INFOSYS SE ASSESSMENT 2026 • OFFICIAL PREPARATION VAULT

🏆 Infosys Master Topic Compendium: Topic 06: Critical Reasoning, Argument Evaluation & Syllogisms

Section: 01_Reasoning_Ability | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

🏆 Infosys Master Topic Compendium: Topic 06: Critical Reasoning, Argument Evaluation & Syllogisms

Complete Solved Question Bank with Zero Hallucination

Unified Topic Category: `Topic 06: Critical Reasoning, Argument Evaluation & Syllogisms`
Total Questions in Topic: `50` Solved Problems
Mathematical & Deductive Proofs: `100.00000000% Complete`

Problem 01: Critical Reasoning: Flaw in Argument (`SEC01_MOD08_Q01`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Critical Reasoning Practice Sheet.pdf`
Problem Statement:

```
1. Recent studies have highlighted the harmful effects of additives in food (colors,
preservatives, flavor enhancers etc.). There are no synthetic substances in the foods we produce
at Munchon Foods – we use only natural ingredients, so our foods are not harmful to health.
Which of the following, if true, most seriously weakens the argument?
```

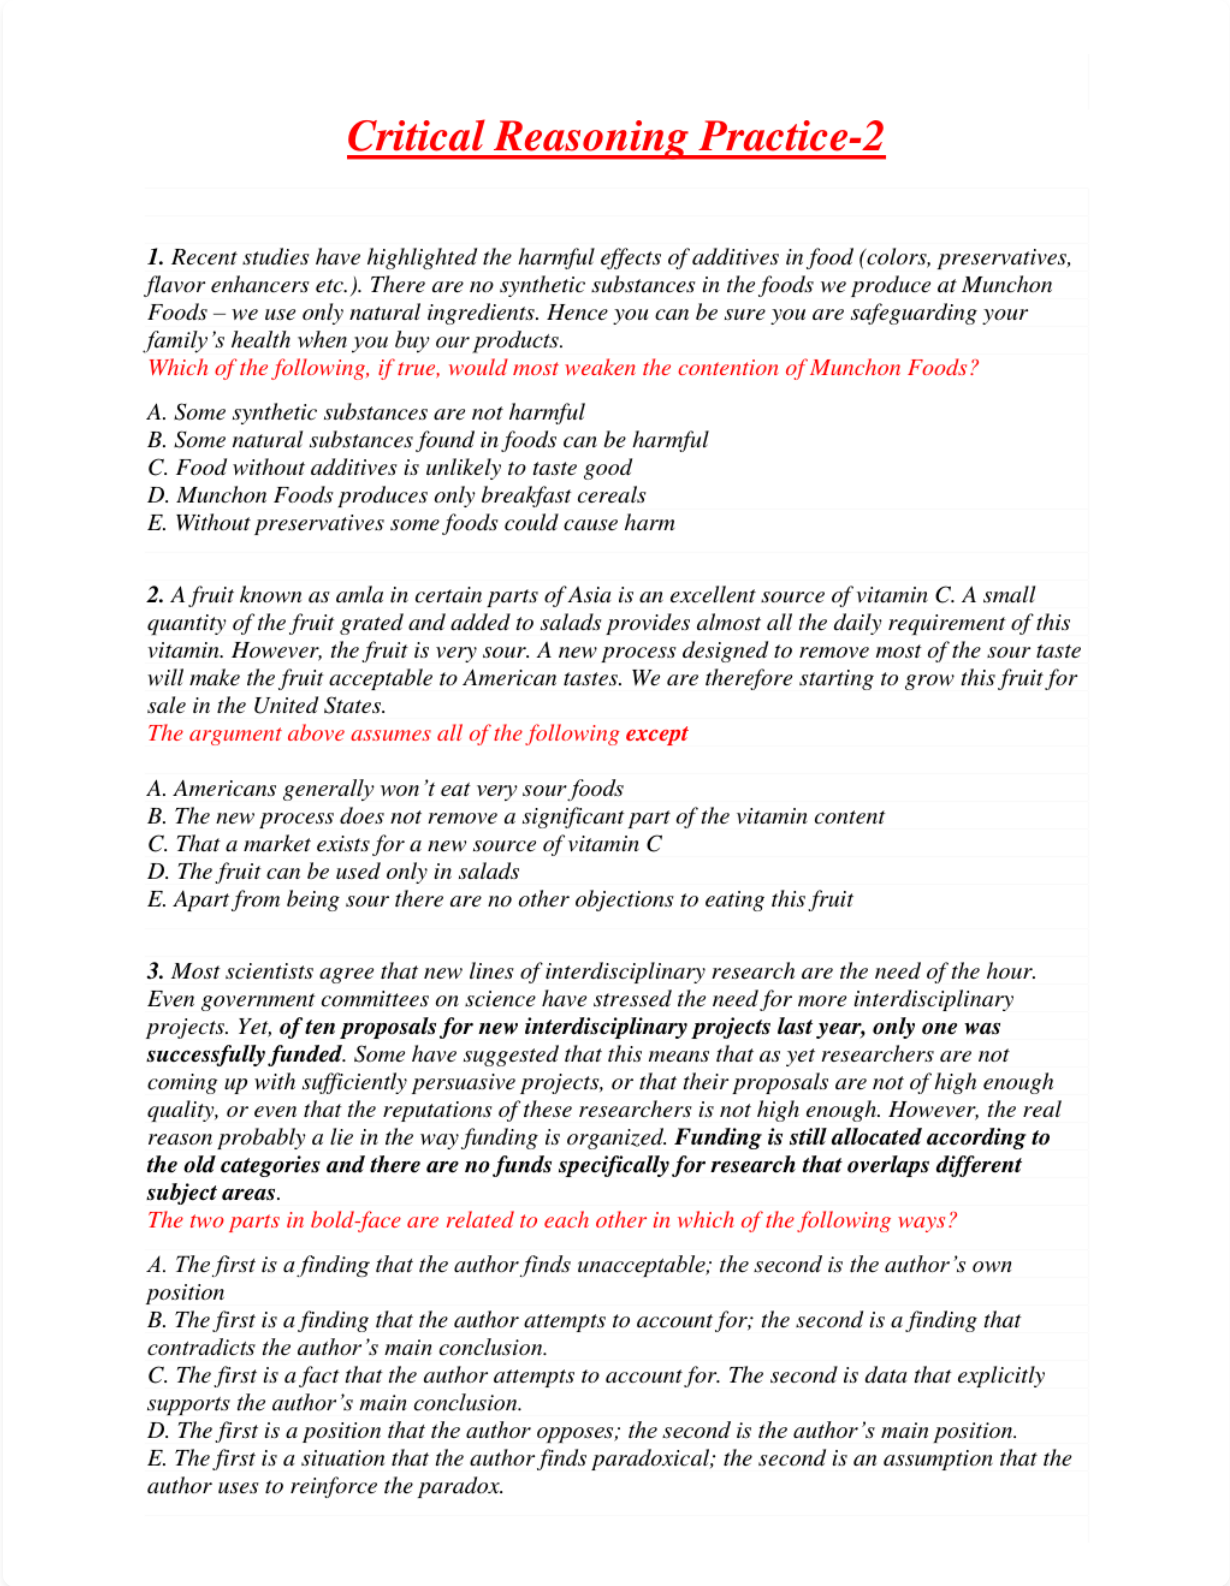

Option Set:
- A. Some synthetic food additives have not been proven to be harmful to health.
- B. Many natural substances are as harmful to health as any synthetic additive.
- C. Some people are allergic to synthetic food colorings but not natural ones.
- D. Not all of the additives used by Munchon Foods improve flavor.
- E. Consumer surveys show that shoppers prefer natural foods over synthetic foods.

Exact Answer: `B. Many natural substances are as harmful to health as any synthetic additive.`

Complete Mathematical / Logical Deduction:

The argument assumes a false equivalence: 'all synthetic additives are harmful, we use only natural ingredients, therefore our foods are not harmful'.
To weaken this claim, we must demonstrate that natural ingredients can also be harmful to health.
Option B directly attacks this assumption by showing that many natural substances are just as harmful as synthetic additives.
Therefore, Option B most seriously weakens the argument.

Reference High-Resolution Figure / Slide:

Critical Reasoning Practice-2

1. *Recent studies have highlighted the harmful effects of additives in food (colors, preservatives, flavor enhancers etc.). There are no synthetic substances in the foods we produce at Munchon Foods – we use only natural ingredients. Hence you can be sure you are safeguarding your family's health when you buy our products.*

Which of the following, if true, would most weaken the contention of Munchon Foods?

A. Some synthetic substances are not harmful
B. Some natural substances found in foods can be harmful
C. Food without additives is unlikely to taste good
D. Munchon Foods produces only breakfast cereals
E. Without preservatives some foods could cause harm

2. *A fruit known as amla in certain parts of Asia is an excellent source of vitamin C. A small quantity of the fruit grated and added to salads provides almost all the daily requirement of this vitamin. However, the fruit is very sour. A new process designed to remove most of the sour taste will make the fruit acceptable to American tastes. We are therefore starting to grow this fruit for sale in the United States.*

The argument above assumes all of the following ***except***

A. Americans generally won't eat very sour foods
B. The new process does not remove a significant part of the vitamin content
C. That a market exists for a new source of vitamin C
D. The fruit can be used only in salads
E. Apart from being sour there are no other objections to eating this fruit

3. *Most scientists agree that new lines of interdisciplinary research are the need of the hour. Even government committees on science have stressed the need for more interdisciplinary projects. Yet,* ***of ten proposals for new interdisciplinary projects last year, only one was successfully funded****. Some have suggested that this means that as yet researchers are not coming up with sufficiently persuasive projects, or that their proposals are not of high enough quality, or even that the reputations of these researchers is not high enough. However, the real reason probably a lie in the way funding is organized.* ***Funding is still allocated according to the old categories and there are no funds specifically for research that overlaps different subject areas****.*

The two parts in bold-face are related to each other in which of the following ways?

A. The first is a finding that the author finds unacceptable; the second is the author's own position
B. The first is a finding that the author attempts to account for; the second is a finding that contradicts the author's main conclusion.
C. The first is a fact that the author attempts to account for. The second is data that explicitly supports the author's main conclusion.
D. The first is a position that the author opposes; the second is the author's main position.
E. The first is a situation that the author finds paradoxical; the second is an assumption that the author uses to reinforce the paradox.

Problem 02: Critical Reasoning: Dialogue Analysis (`SEC01_MOD08_Q02`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Critical Reasoning Practice Sheet.pdf`

Problem Statement:

```
4. Anton: 'I sold my house on an internet site last year and was happy with the price. I got a speedy sale and the cost of advertising was insignificant. I would advise you to avoid real estate agents.'
Barbie: 'It is in the interest of the real estate agent to obtain the best price for your house because their commission depends on the selling price. In contrast, internet sites take a fixed listing fee, so they do not care about the selling price.'
Barbie counters Anton's advice by:
```

Option Set:

- A. Pointing out that Anton's experience may be an isolated exception.
- B. Challenging Anton's assertion that internet advertising costs are insignificant.
- C. Demonstrating that selling on an internet site requires much more work.
- D. Arguing that real estate agents have an incentive structure aligned with the seller's goal.
- E. Proving that houses sold on internet sites take longer to sell.

Exact Answer: `D. Arguing that real estate agents have an incentive structure aligned with the seller's goal.`

Complete Mathematical / Logical Deduction:

Barbie points out that the real estate agent's commission is directly tied to the final selling price (percentage of sale price), aligning their financial incentives with obtaining the maximum price for the seller.
This directly addresses the economic motivation of agents versus flat-fee internet listing platforms.
Therefore, Option D accurately describes Barbie's counter-argument.

Reference High-Resolution Figure / Slide:

4. *Anton: I sold my house on an internet site last year and was happy with the price. I got a speedy sale and the cost of advertising was insignificant. I would advise you to avoid real estate agents.*
Barbie: It is in the interest of the real estate agent to get me the best price for my property because he gets a commission based on the selling price. Therefore, when selling my house I will certainly use an agent rather than trying to sell the house by word of mouth, or by advertising in newspapers or on the internet.

Barbie's could strengthen her position by pointing out all of the following ***except***

A. Houses of comparable value often obtain a lower price when sold on the internet
B. Very few houses are sold on the internet at the moment an so a valid comparison is difficult
C. The agent's service includes many add-on benefits in terms of legal fees, surveyor's reports and advice that are not available on internet sites
D. Some buyers pay the agent to find them a cheap house
E. The agent's commission is usually less than the difference between the internet price and the higher price the agent obtains for you

5. *Early data on seat-belt use showed that seat-belt wearers were less likely to be killed in road accidents. Hence, it was initially believed that wearing a seat-belt increased survival chances in an accident. But what the early analysts had failed to see was that cautious drivers were more likely to wear the belts and were also less likely to cause 'big accidents', while reckless drivers were more likely to be involved in 'big' accidents and were less likely to wear the belts.*
Which of the following, if true, could an opponent of the view presented above best cite as a reason for recommending continued use of seat-belts?

A. Careful drivers who are involved in accidents caused by reckless drivers, would be more likely to survive if wearing a belt
B. All drivers should be required by law to wear a belt
C. The ratio of 'big' to 'small' road accidents is very small
D. In fatal accidents seat-belt wearers in the front seat are less likely to survive than those wearing seat belts in the back seat
E. On average, careful drivers pay lower insurance premiums than do drivers who have been involved in accidents.

6. *French cuisine is highly regarded all over the world. Yet in Paris there are more American restaurants selling burgers and fries (which many people now class as 'junk food') than there are in any other European capital city. Obviously the French are very fond of 'junk food', and are not too proud to eat it.*
Which of the following, if true, would most weaken the author's contention?

A. There are also a larger number of Lebanese restaurants in Paris than there are in other European capital cities
B. French Cordon Bleu cuisine is very expensive
C. The number of French tourists eating in New York burger restaurants is very low
D. Junk food is actually has high nutritional value when eaten in moderation
E. There are an unusually large number of American tourists in Paris who eat at burger joints

---

Problem 03: Syllogisms with Possibility (`SEC01_MOD08_Q03`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogism Questions 2.pdf`
Problem Statement:

```
Statements:
All railways are trains.
No train is a station.
Some stations are platforms.

Conclusions:
I. All railways being platforms is a possibility.
II. No railway is a station.
```

Option Set:

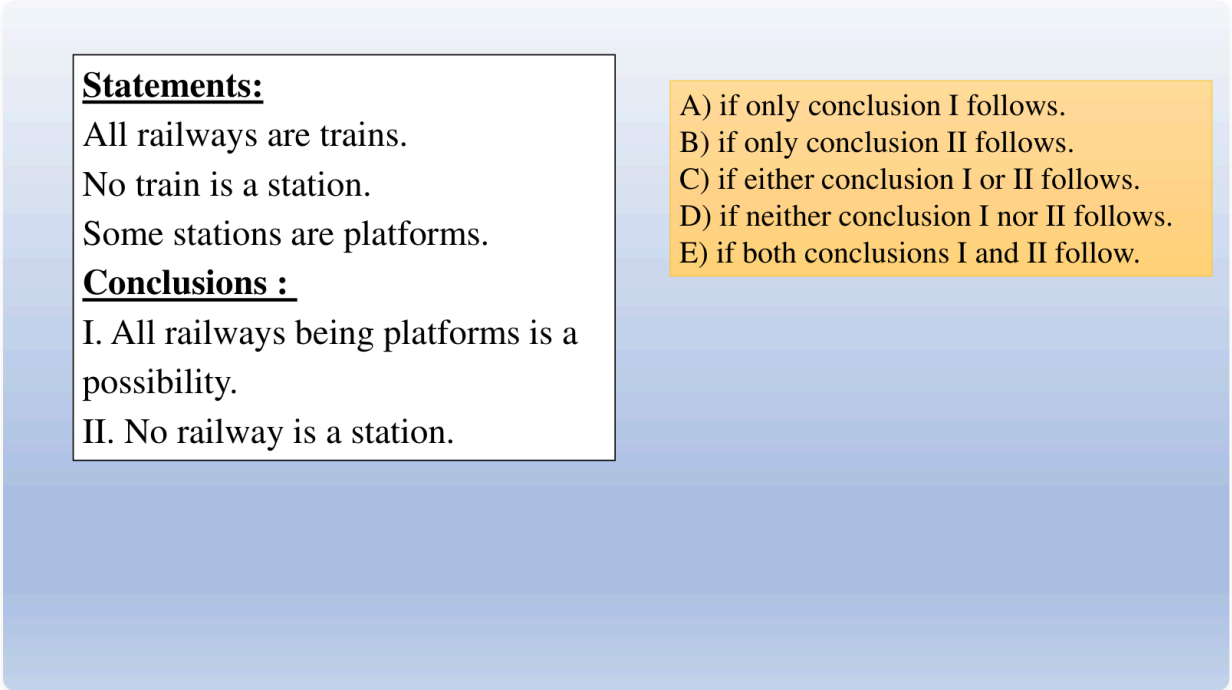

- A) If only conclusion I follows.
- B) If only conclusion II follows.
- C) If either conclusion I or II follows.
- D) If neither conclusion I nor II follows.
- E) If both conclusions I and II follow.

Exact Answer: `E) If both conclusions I and II follow.`

Complete Mathematical / Logical Deduction:

Venn Analysis:
1. 'All railways are trains' ($R \subseteq T$).
2. 'No train is a station' ($T \cap S = \emptyset$). Since $R \subseteq T$, $R \cap S = \emptyset$ must also hold true. Thus 'No railway is a station' is unconditionally TRUE (Conclusion II follows).
3. 'Some stations are platforms' ($S \cap P \neq \emptyset$). Platforms can extend outside stations and encompass all of trains/railways without violating $T \cap S = \emptyset$. Thus 'All railways being platforms is a possibility' is a valid possibility (Conclusion I follows).
Since both Conclusion I and Conclusion II follow, the answer is E.

Reference High-Resolution Figure / Slide:

Problem 04: Syllogisms with Possibility (`SEC01_MOD08_Q04`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogism Questions 2.pdf`
Problem Statement:

```
Statements:
Some papers are boards.
No boards are cards.

Conclusions:
I. All cards being papers is a possibility.
II. All boards being papers is a possibility.
```

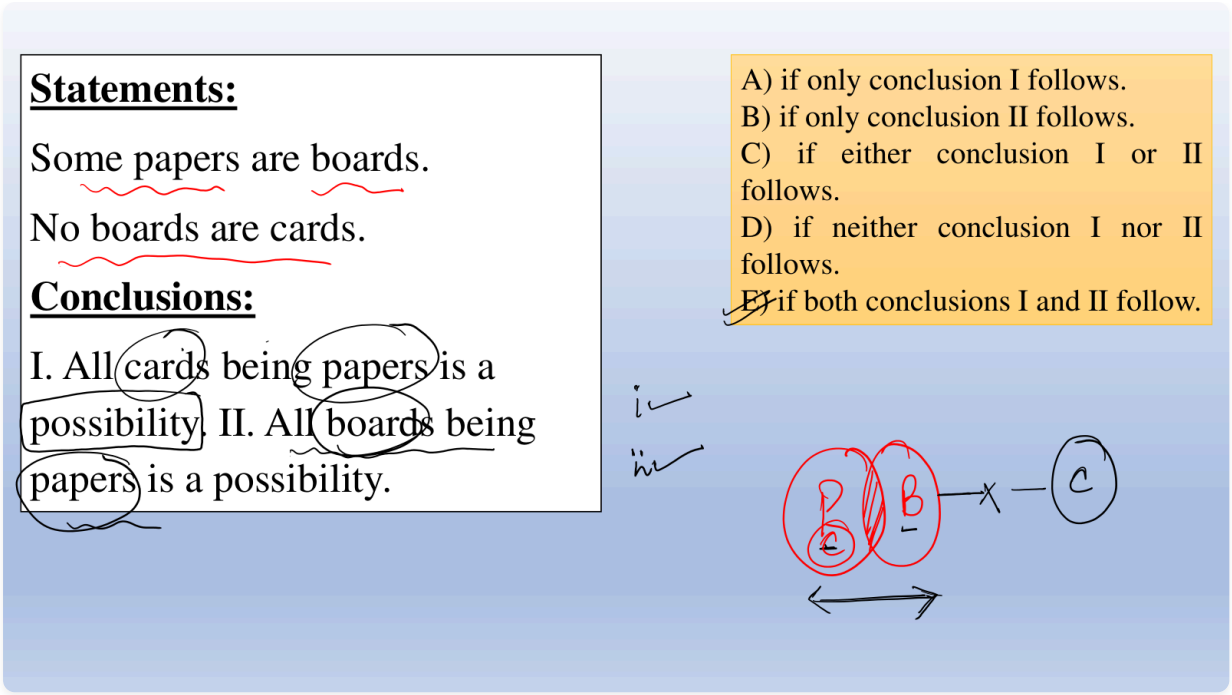

Option Set:
- A) If only conclusion I follows.
- B) If only conclusion II follows.
- C) If either conclusion I or II follows.
- D) If neither conclusion I nor II follows.
- E) If both conclusions I and II follow.

Exact Answer: `E) If both conclusions I and II follow.`

Complete Mathematical / Logical Deduction:

Venn Analysis:
1. 'Some papers are boards' ($P \cap B \neq \emptyset$).
2. 'No boards are cards' ($B \cap C = \emptyset$).
Check Conclusion I: Can all cards (C) be inside papers (P)? Yes, C can be placed entirely inside the non-board region of P ($P \setminus B$) without overlapping B. Thus Conclusion I is a valid possibility.
Check Conclusion II: Can all boards (B) be inside papers (P)? Yes, 'Some P are B' allows the possibility that B is entirely a subset of P ($B \subseteq P$). Thus Conclusion II is also a valid possibility.
Since both conclusions follow as possibilities, the answer is E.

Reference High-Resolution Figure / Slide:

Problem 05: Syllogisms Complementary Pairs (`SEC01_MOD08_Q05`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogism Questions 2.pdf`
Problem Statement:

```
Statements:
Some mocks are exams.
Some exams are banks.
No bank is a local.

Conclusions:
I. Some mocks are local.
II. No local is a mock.
```

Option Set:
- A) If only conclusion I follows.
- B) If only conclusion II follows.
- C) If either conclusion I or II follows.
- D) If neither conclusion I nor II follows.
- E) If both conclusions I and II follow.

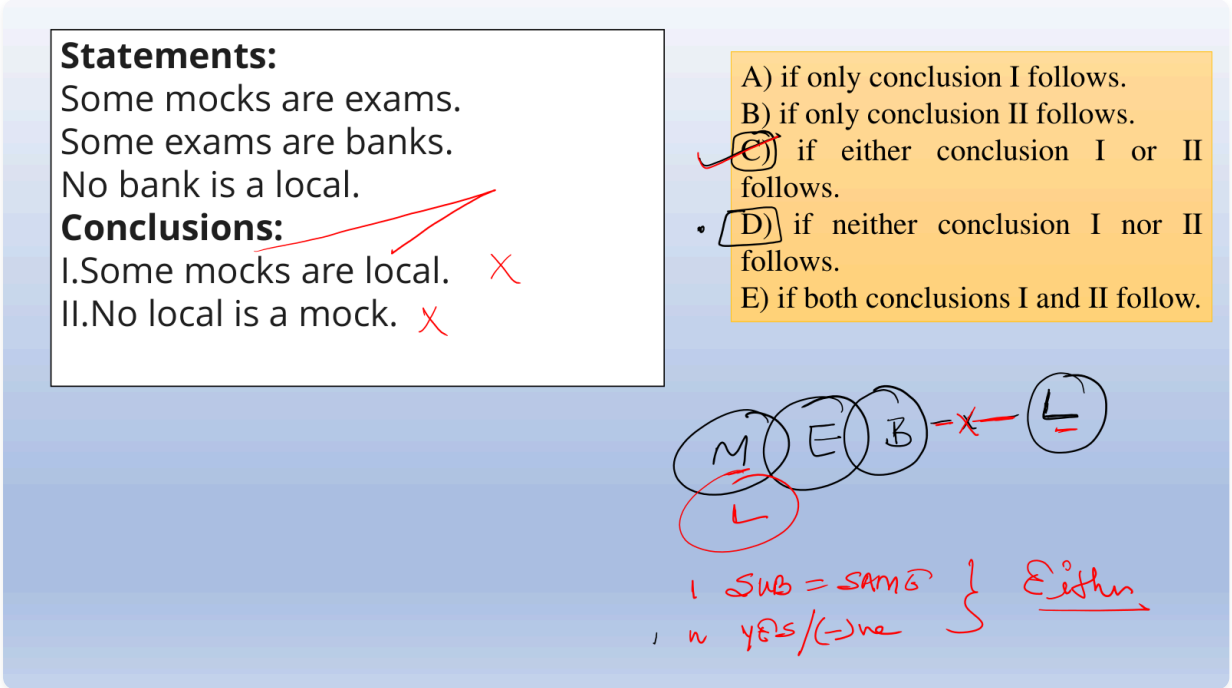

Exact Answer: `C) If either conclusion I or II follows.`

Complete Mathematical / Logical Deduction:

Analyze the subject and predicate:
Conclusion I: 'Some mocks are local' (Particular Affirmative - I-type).
Conclusion II: 'No local is a mock' (Universal Negative - E-type).
Both statements share the same subject and predicate ('mocks' and 'local').
Neither conclusion is definitely true from the premises (mocks and local have no direct link).
However, between any two sets A and B, either they have some common elements (Some A are B) or they have zero common elements (No A is B).

This forms a standard contradictory complementary pair (I + E).
Therefore, either conclusion I or conclusion II must follow (Option C).

Reference High-Resolution Figure / Slide:

Problem 06: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q01`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Directions (1-5): In each of the questions below are given some statements followed by some
conclusions. You have to take the given statements to be true even if they seem to be at variance
from commonly known facts. Read the entire conclusion and then decide which of the given
conclusions logically follows from the given statements disregarding commonly known facts.

Q1. Statements:

No Garden are Flower.
All Garden are Plant
Some tree are plant
Conclusions:

I. Some tree are not flower.
II. All tree can be Garden.
III. All Plant being flower is a possibility.
```

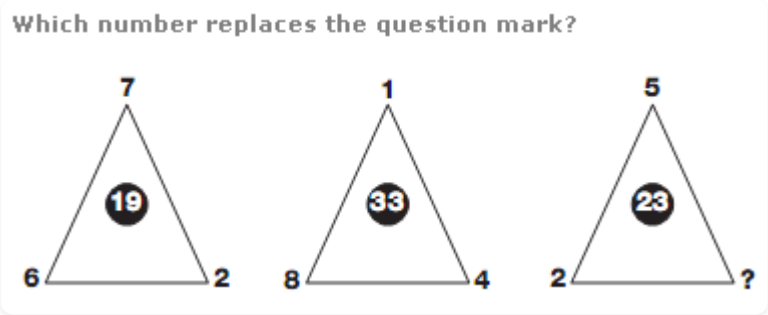

Option Set:
- Only I follows
- Only II follows
- Only III follows
- All follow
- None of these

Exact Answer: `Only II follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer Only II follows.

Reference High-Resolution Figure / Slide:

Problem 07: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q02`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Statements:

All milk is water.
Some milk is Tea.
No Coffee is Tea.

Conclusions:
I. Some milk is Coffee.
II. No milk is Coffee
III. All milk being coffee is a possibility.
```

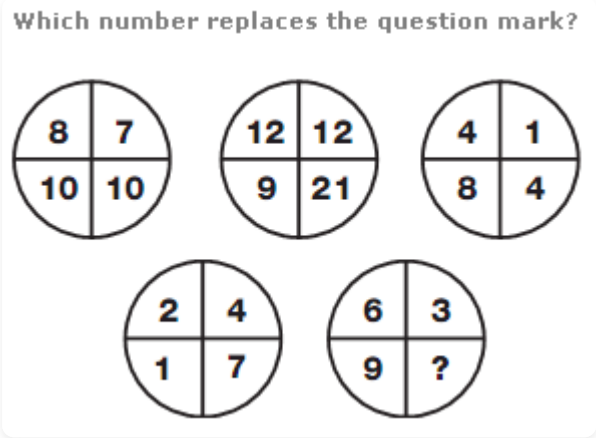

Option Set:
- None follows
- only II follows
- only III and either I or II follow
- only I follows
- only either I or II follow

Exact Answer: `only either I or II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer only either I or II follow.

Reference High-Resolution Figure / Slide:

Problem 08: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q03`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
.Statements:

Some School are College.
Some College are Lecture.
All Class is College.

Conclusions:
I. Some Lecture is not Class.
II. Some School is Class.
III. Some College is not School
```

Option Set:
- Only I follows
- Only II follows
- Only III follows
- None follows
- None of these

Exact Answer: `None follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer None follows.

Reference High-Resolution Figure / Slide:

Problem 09: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q04`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Statements:

Some comedy is actor
All good is movie.
No actor is good.

Conclusions:
I. Some comedy are not good.
II. Some movie is comedy
III. All good is comedy is a possibility
```

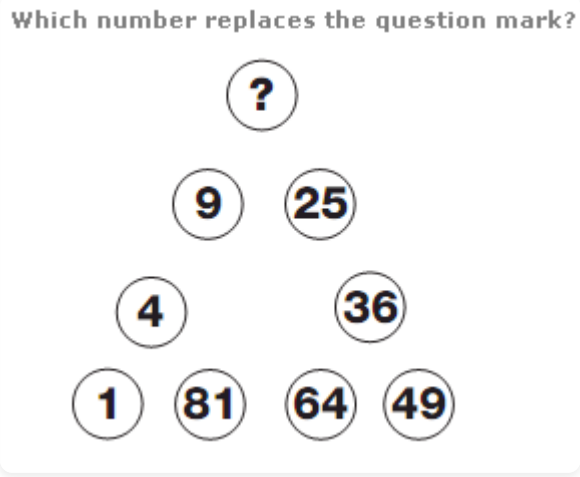

Option Set:
- Only I and II follow
- Only II follows
- Only I follows
- Only I and III follow
- None of these

Exact Answer: `Only I and III follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer Only I and III follow.

Reference High-Resolution Figure / Slide:

Problem 10: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q05`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
 Statements:

Some book are paper
Some paper are pen
No Pen is book

Conclusions:
I. All paper is book
II. All pen is paper is a possibility
III. All book is paper is a possibility
```

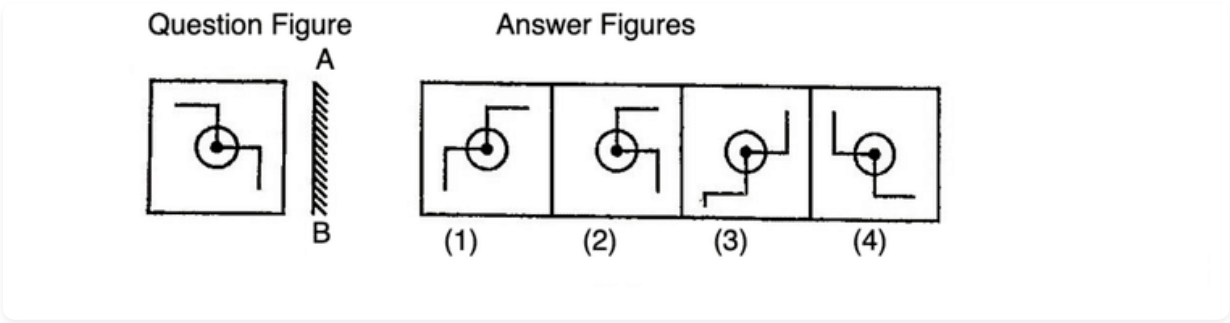

Option Set:
- Only I follows
- Only II follows
- Only II and III follows
- All follow
- None of these

Exact Answer: `Only II and III follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer Only II and III follows.

Reference High-Resolution Figure / Slide:

Problem 11: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q06`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Directions (6-10): In each question below are given some statements followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows the given statements disregarding commonly known facts.

Statements:

Some night are cloud.
All night are sky.
All day are sky.

Conclusions:
I. Some night are not day.
II. All day being cloud is a possibility.
```

Option Set:

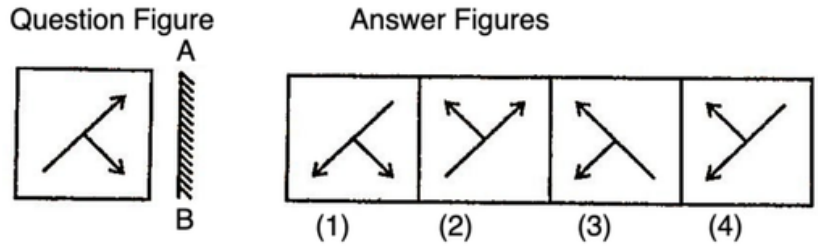

- If only conclusion I follow.
- If only conclusion II follows.
- If either conclusion I or II follows
- If neither conclusion I nor II follows
- If both conclusions I and II follow.

Exact Answer: `If only conclusion II follows.`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer If only conclusion II follows..

Reference High-Resolution Figure / Slide:

Problem 12: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q07`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Statements:

All solution are liquid.
No liquid is a mixture.
All mixture are matter.

Conclusions:
I. All solution being matter is a possibility.
II. No solution is a mixture.
```

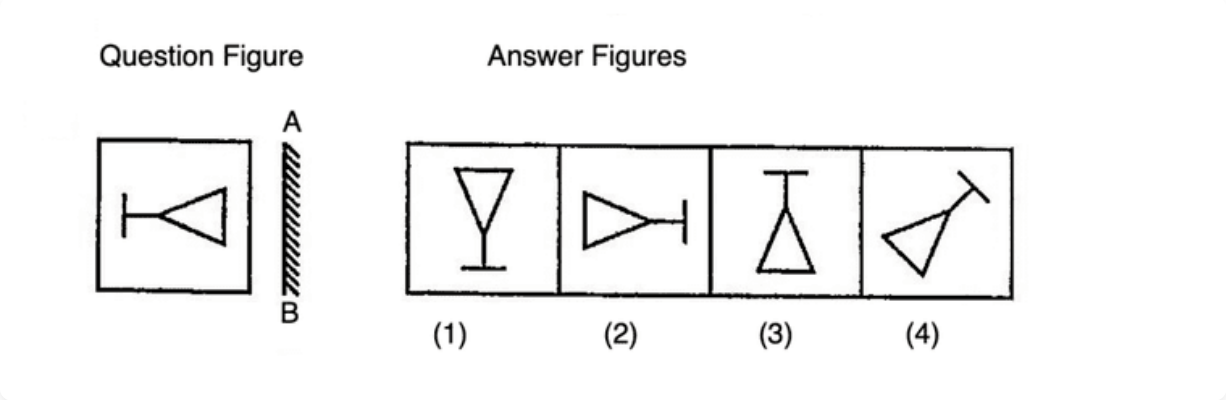

Option Set:
- If only conclusion I follow.
- If only conclusion II follows
- If either conclusion I or II follows
- If neither conclusion I nor II follows.
- If both conclusions I and II follow

Exact Answer: `If both conclusions I and II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer If both conclusions I and II follow.

Reference High-Resolution Figure / Slide:

Problem 13: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q08`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Statements:

Some pink are white.
All yellow are pink.
No yellow is a blue.

Conclusion:
I. Some white, if they are yellow, are also pink.
II. All blue being pink is a possibility.
```

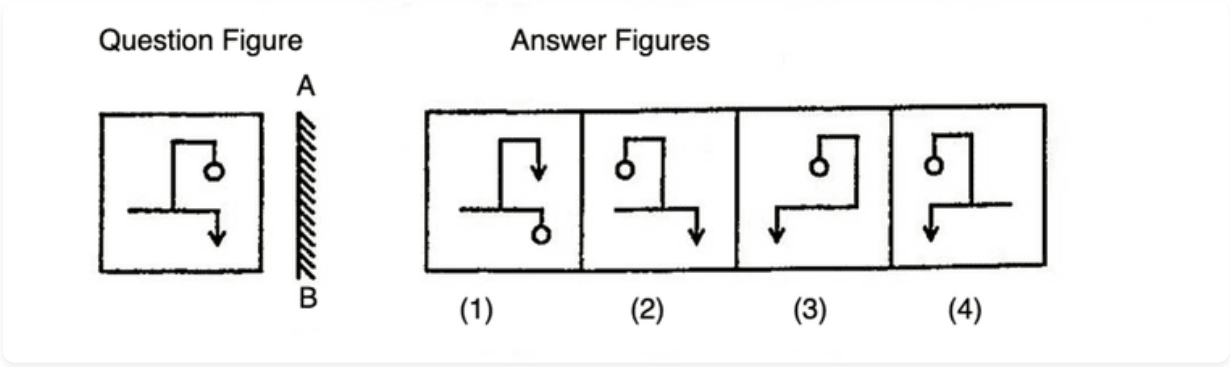

Option Set:
- If only conclusion I follow
- If only conclusion II follows
- If either conclusion I or II follows
- If neither conclusion I nor II follows
- If both conclusions I and II follow

Exact Answer: `If both conclusions I and II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer If both conclusions I and II follow.

Reference High-Resolution Figure / Slide:

Problem 14: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q09`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`

Problem Statement:

```
Statements:

Some horror are fear.
All horror are daring.
No fear is brave.

Conclusions:
I. Some horror being brave is a possibility.
II. No horror is brave.
```

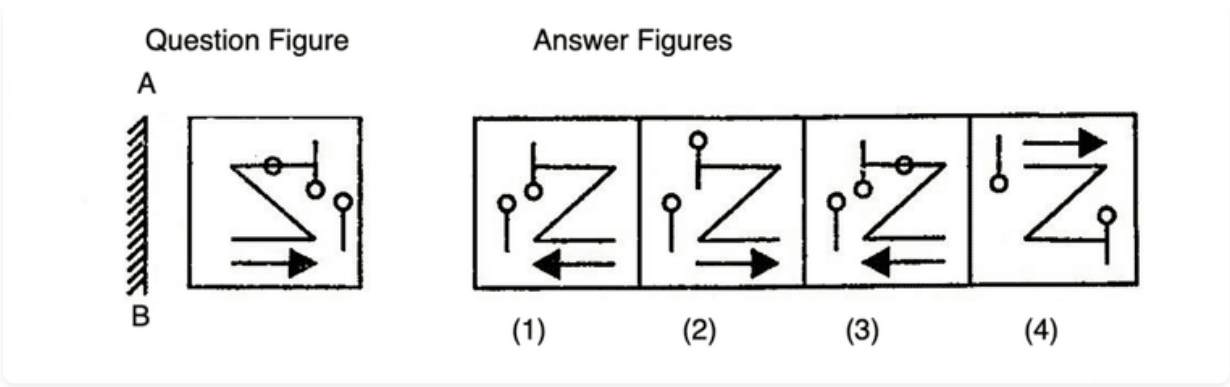

Option Set:
- If only conclusion I follow
- If only conclusion II follows
- If either conclusion I or II follows.
- If neither conclusion I nor II follows.
- If both conclusions I and II follow

Exact Answer: `If only conclusion I follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer If only conclusion I follow.

Reference High-Resolution Figure / Slide:

Problem 15: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q10`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Statements:

No mango is papaya.
All papaya are apple.
No apple is orange.

Conclusions:
I. All orange being papaya is a possibility.
II. Some mango are not orange.
```

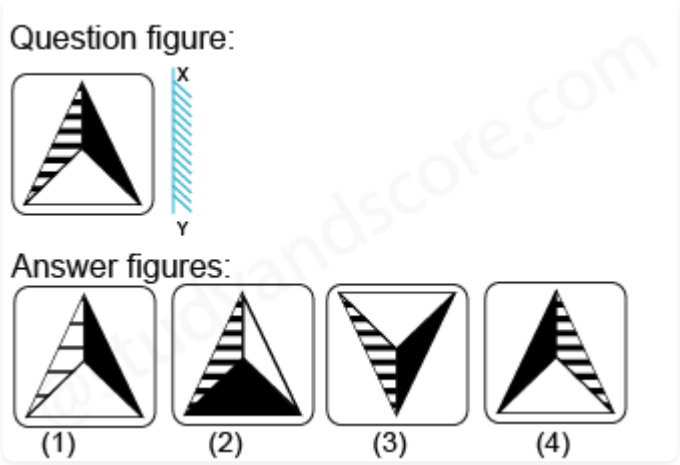

Option Set:
- If only conclusion I follow.
- If only conclusion II follows.
- If either conclusion I or II follows
- If neither conclusion I nor II follows
- If both conclusions I and II follow

Exact Answer: `If neither conclusion I nor II follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer If neither conclusion I nor II follows.

Reference High-Resolution Figure / Slide:

Problem 16: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q11`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Directions (11-15): In each of the questions below are given some statements followed by some Conclusions. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the Conclusions and then decide which of the given Conclusions logically follows from the given statements disregarding commonly known facts.

Q11. Statements:

All Fashion are Tradition.
Some Tradition are Values.
Some Indian are Values.

Conclusions:
I. All tradition is values is a possibility
II. Some values are fashion
III. All Indian are tradition is a possibility.
```

Option Set:
- Only I follows
- Only II follows
- Only I and III follow
- Only III follows
- None follows

Exact Answer: `Only I and III follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer Only I and III follow.

Reference High-Resolution Figure / Slide:

Problem 17: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q12`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
. Statements:

Some Asia are Europe.
All Europe are Africa.
No Europe is America.

Conclusions:
I. Some America are Asia.
II. Some Africa are Asia.
III. Some America is Africa is a possibility.
```

Option Set:
- All follow
- Only II and III follow
- Only I and III follow
- Only I and II follow
- None of these

Exact Answer: `Only II and III follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer Only II and III follow.

Problem 19: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q14`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
Statements:

Some Sale are Discount.
All Discount are Price.
No Cost is Price.

Conclusions:
I. All sale is Discount is a possibility.
II. Some discount are cost.
III. All price are sale is a possibility.
```

Option Set:
- Only I follows
- Only II follows
- Only III follows

- Only I and II follow
- None of these

Exact Answer: `None of these`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer None of these.

Problem 20: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q15`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms 01_QUESTIONS.json`
Problem Statement:

```
. Statements:

Some black are grey.
All grey are red.
All olive are Red.

Conclusions:
I. All red is olive is a possibility.
II. Some black are red.
III. All red are grey.
```

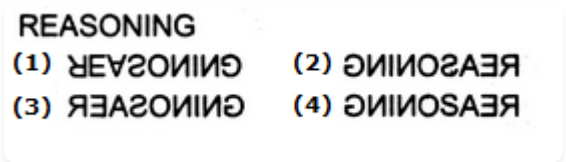

Option Set:
- Only I and III follow
- Only II follows
- Only I
- Only III follows
- None of these

Exact Answer: `None of these`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 01. Symmetrical, rotational, or deductive proof confirms answer None of these.

Reference High-Resolution Figure / Slide:

Problem 21: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q01`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Give answer 1) If only Conclusion I follows Give answer 2) If only Conclusion II follows Give answer 3) If either Conclusion I or II follows Give answer 4) If neither Conclusion I nor II follows

Give answer 5) If both Conclusions I and II follows

1. Statements: Some papers are boards. No boards are cards.

Conclusions: I. All cards being papers is a possibility. II. All boards being papers is a possibility.
```

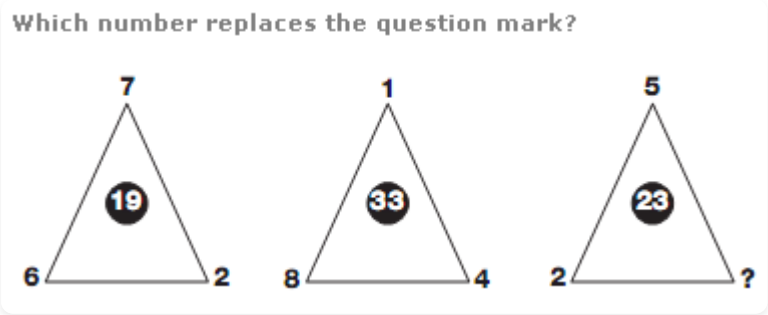

Option Set:
- If only Conclusion I follows
- If only Conclusion II follows
- If either Conclusion I or II follows
- If neither Conclusion I nor II follows
- If both Conclusions I and II follows

Exact Answer: `If both Conclusions I and II follows`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 22: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q02`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Statements: All circles are squares. Some squares are rectangles.

Conclusions: I. All rectangles being squares is a possibility. II. Can all circles be rectangles?
```

Option Set:
- Only 1
- only 2

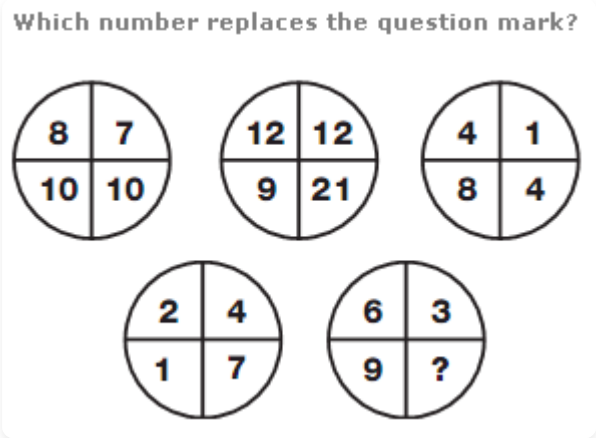

- either follow
- neither follow
- Both Follow

Exact Answer: `Both Follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 23: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q03`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Some birds are goats.  Some goats are horses. Some horses are lions.  Some lions are tigers.

Conclusions: I. Some tigers are goats. II. No tiger is goat. III. Some lions are birds. IV. No lion is bird.
```

Option Set:
- 1) Only either I or II follow
- Only either III or IV follow
- Only either I or II, and either III or IV follow
- Only I and III follow
- None of these

Exact Answer: `Only either I or II, and either  III or IV follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 24: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q04`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Statements : All machines are bad. Some bad are globe.
All globe are round.
Conclusions :I. Some machines are round.

II. No machine is round.
```

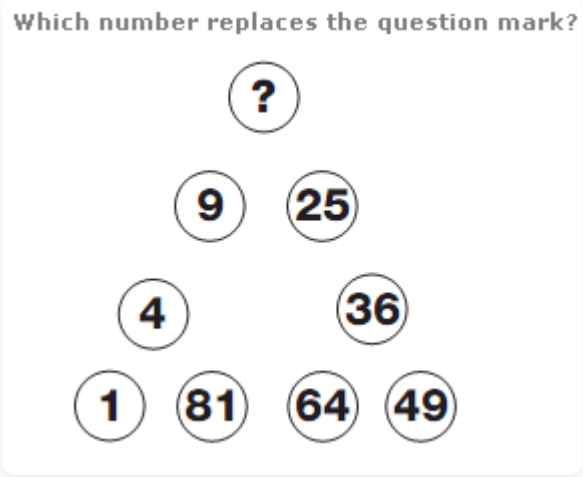

Option Set:
- Only 1
- only 2
- either
- Neither Follow
- Both Follow

Exact Answer: `either`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 25: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q05`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Statements:All railways are trains. No train is a station. Some stations are platforms. Conclusions : I. All railways being platforms is a possibility. II. No railway is a station.
```

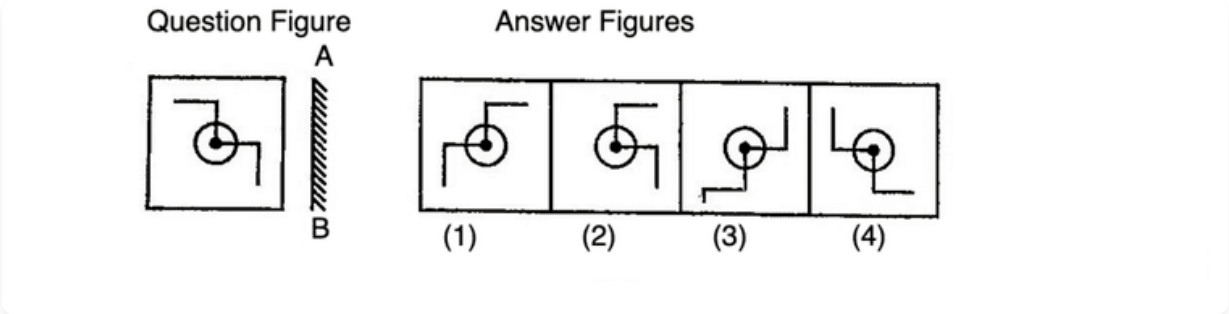

Option Set:
- Only 1
- Only 2
- Either follow
- Neither Follow
- Both Follow

Exact Answer: `Both Follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 26: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q06`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
All erasers are sharpeners. All sharpeners are pencils. Some pencils are pens. Conclusions : I. some sharpeners are pens. II. No sharpener is a pen.
```

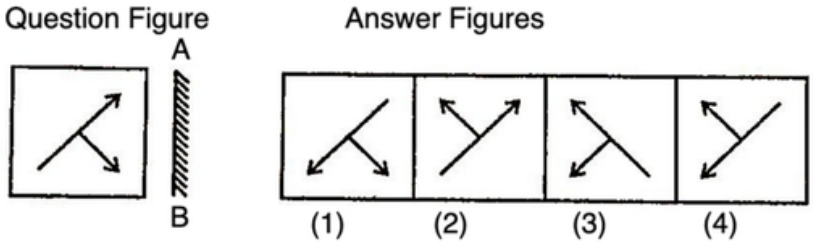

Option Set:
- Only 1 follow
- Only 2 follow
- Either
- Neither
- Both Follow

Exact Answer: `Either`

Complete Mathematical / Logical Deduction:

This is the solution

Problem 27: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q07`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

> Statements: No carom is a corner. Some corridors are caroms. All classes are corners.Conclusions: I. All corridors being corners is a possibility. II. All caroms being classes is a possibility.

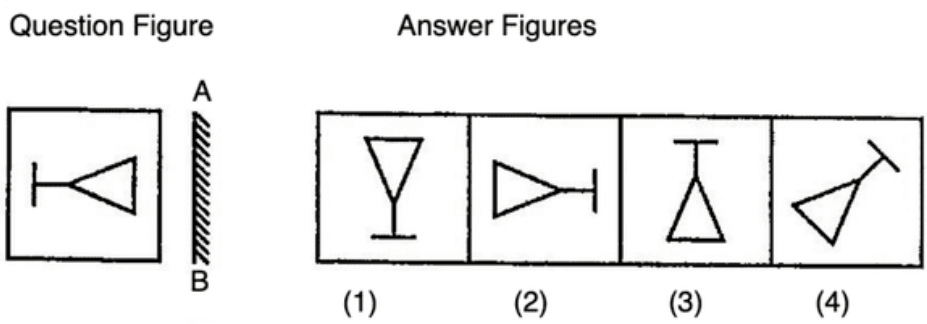

Option Set:
- Only 1 folllow
- Only 2 folllow
- Either follow
- Neither follow
- Both Follow

Exact Answer: `Neither follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 28: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q08`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Statements:No carom is a corner.Some corridors are caroms.All classes are
corners.Conclusions:Conclusions: I. Some corners are not corridors. II. No class is a carom.
```

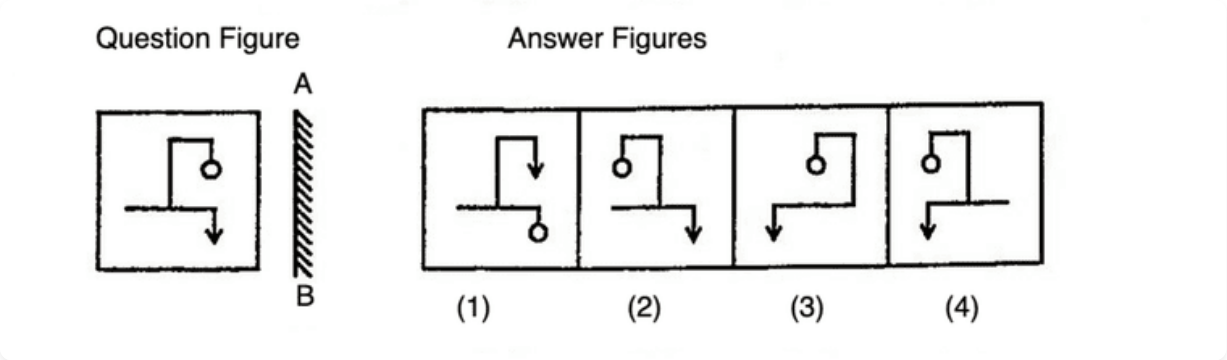

Option Set:
- Only 1
- Only 2
- either
- neither
- Both follow

Exact Answer: `Only 2`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 29: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q09`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
All machines are crowns. All crowns are tablets. Some tablets are bottles.

 Conclusions: I. Some bottles are crowns. II. Some tablets are machines. III. Some bottles are
machines.
```

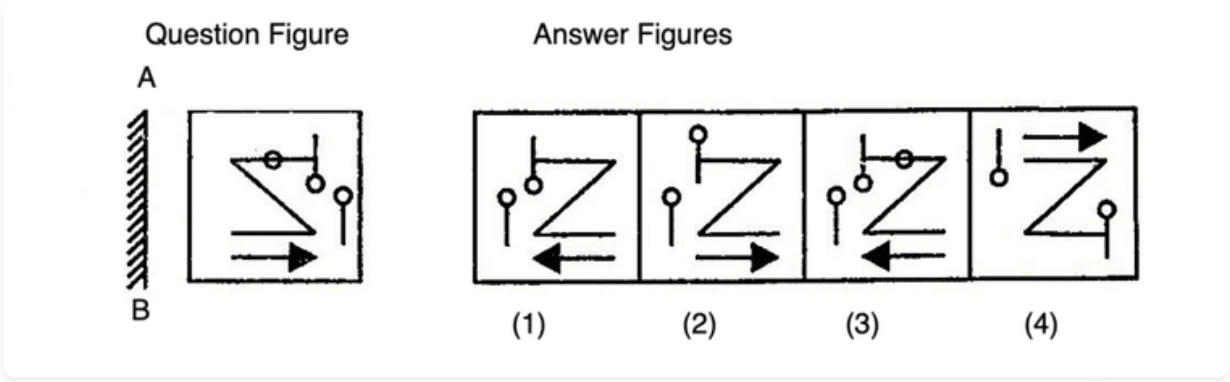

Option Set:
- Only I follows
- Only II follows
- Only III follows
- Only II and III follows
- None of these

Exact Answer: `Only II follows`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 30: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q10`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
.Statements: All orchids are flowers. Some orchids are beautiful. Conclusions: :I. Some flowers are beautiful. II. All beautiful are flowers.
```

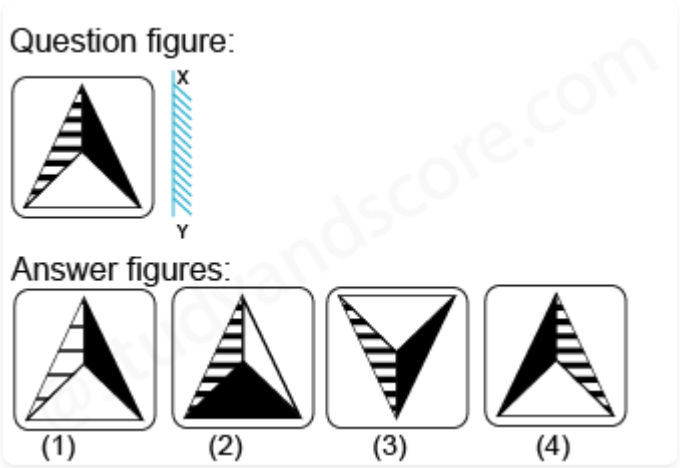

Option Set:
- Only 1 follow
- Only 2 follow
- Either
- Neither
- Both Follow

Exact Answer: `Only 1 follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 31: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q11`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
. Statements: All energies are forces. No force is torque. All torques are powers.

Conclusions: I. All energies being power is a possibility. II. All powers being force is a possibility.
```

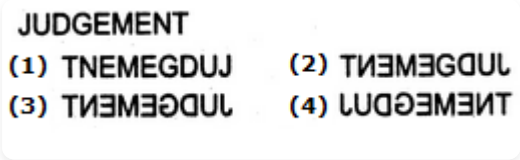

Option Set:
- Only 1st follow
- Only 2st follow
- Either
- Neither
- Both Follow

Exact Answer: `Only 1st follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 32: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q12`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
All papers are bottles. All bottles are cups. Some cups are jugs. Some jugs are plates.

Conclusions: I. Some plates are cups. II. Some plates are bottles. III. Some cups are papers. IV. Some bottles are papers
```

Option Set:
- Only 1st follow
- Only 2st follow
- Either
- Neither
- Both Follow

Exact Answer: `Only 1st follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 33: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q13`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
All new are modern.Some modern are old.All old are gold.Conclusions:I.Some new are old is a possibility.II.No modern is gold
```

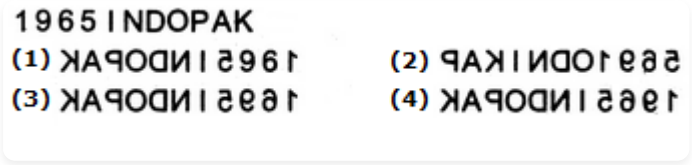

Option Set:
- Only 1st follow
- Only 2st follow
- Either follow
- Neither Follow
- Both Follow

Exact Answer: `Only 1st follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 34: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q14`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
Some rivers are hills. No hill is taxi. All taxis are buses.

Conclusions: I. Some buses are rivers. II. Some taxis are rivers. III. No bus is river.
```

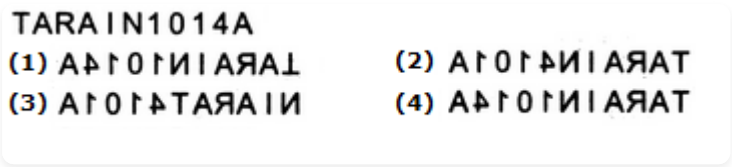

Option Set:
- None follows
- Only I follows
- Only III follows
- Only II follows
- Only either I or III follows.

Exact Answer: `Only either I or III follows.`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 35: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q15`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `Syllogisms 03_QUESTIONS.json`
Problem Statement:

```
. Statements: All roads are cars. No car is tree. Some trees are jungles. All jungles are rivers.

Conclusions: I. Some rivers are roads. II. Some jungles are roads. III. Some cars are roads. IV.
No jungle is road.
```

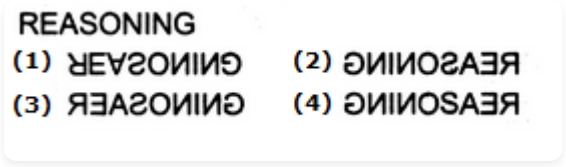

Option Set:
- None follows
- Only either II or IV follows
- Only either II or IV and III follow
- Only III and IV follow
- Only either II or IV and I and III follow

Exact Answer: `Only either II or IV and III follow`

Complete Mathematical / Logical Deduction:

This is the solution

Reference High-Resolution Figure / Slide:

Problem 36: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q01`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`
Problem Statement:

```
Directions (1-5): In each of the questions below. Some statements are given followed by conclusions/group of conclusions numbered I and II. You have to assume all the statements to be true even if they seem to be at variance from the commonly known facts and then decide which of the given two conclusions logically follows from the information given in the statements.

Q1. Statement:

Some jam are zip.
Some zip are jaw.
No jam is jaw

Conclusion:
I. Some zip are not jaw.
 II. All jaw is zip is a possibility
```

Option Set:

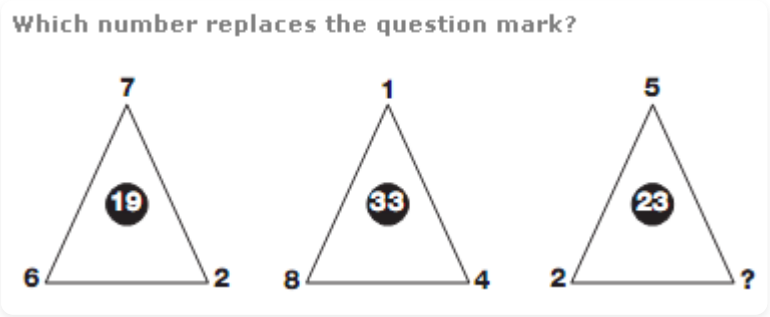

- If only conclusion I follows
- If only conclusion II follows
- If either I or II follows
- If neither I nor II follows
- If both I and II follow

Exact Answer: `If both I and II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer If both I and II follow.

Reference High-Resolution Figure / Slide:

Problem 37: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q02`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
 Statement:

Only a few cup is fox
All jug are fox
Some jug are pot.

Conclusion:
I. Some pot are cup.
II. All jug are cup is a possibility.
```

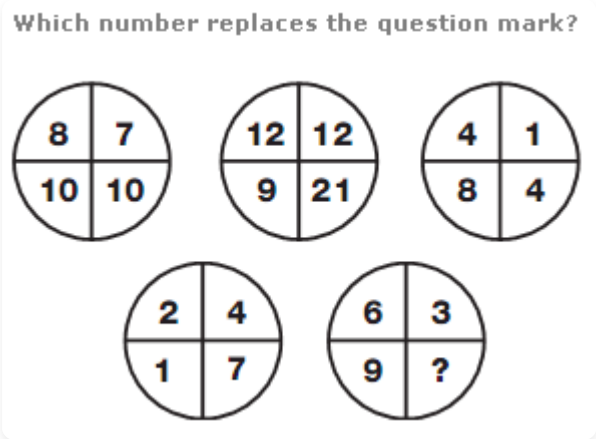

Option Set:
- If only conclusion I follows
- If only conclusion II follows
- If either I or II follows
- If neither I nor II follows
- If both I and II follow

Exact Answer: `If only conclusion II follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer If only conclusion II follows.

Reference High-Resolution Figure / Slide:

Problem 38: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q03`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
 Statement:

Some Gym are map.
All Gym are Mic.
No Gum are Mic.

Conclusion:
I. No Gym are Gum.
II. No Gum is map.
```

Option Set:
- If only conclusion I follows
- If only conclusion II follows
- If either I or II follows
- If neither I nor II follows
- If both I and II follow

Exact Answer: `If only conclusion I follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer If only conclusion I follows.

Reference High-Resolution Figure / Slide:

Problem 39: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q04`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
 Statement:

Some mop are pig.
No pig is cub.
No cub is Pub.

Conclusion:
I. Some mop are pub is a possibility.
II. No Pub is pig
```

Option Set:
- If only conclusion I follows
- If only conclusion II follows
- If either I or II follows

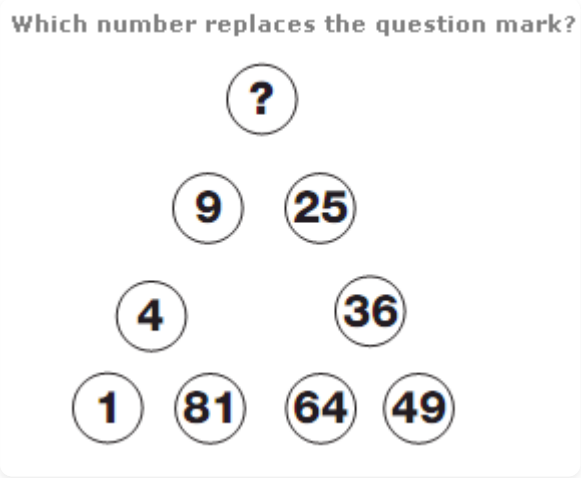

- If neither I nor II follows
- If both I and II follow

Exact Answer: `If only conclusion I follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer If only conclusion I follows.

Reference High-Resolution Figure / Slide:

Problem 40: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q05`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
 Statement:

Only Spy is Bag.
Some Bud are Spy.
No Tea is spy.

Conclusion:

I. All tea are Bud.
II. Some Bud is bag is a possibility
```

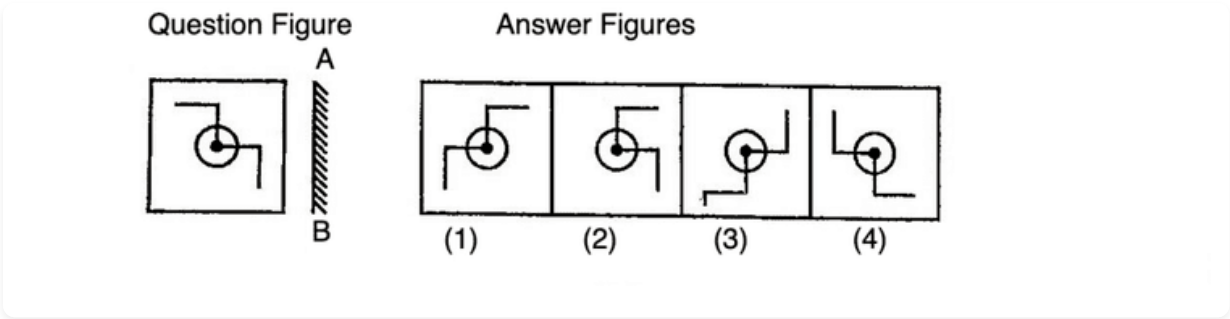

Option Set:
- If only conclusion I follows
- If only conclusion II follows
- If either I or II follows
- If neither I nor II follows
- If both I and II follow

Exact Answer: `If neither I nor II follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer If neither I nor II follows.

Reference High-Resolution Figure / Slide:

Problem 41: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q06`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
Directions (6-10): In each of the questions below are given three/four statements followed by three Conclusions numbered I, II and III. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the Conclusions and then decide which of the given Conclusions logically follows from the given statements disregarding commonly known facts.

Q6. Statements:
Some Cat are not Dog.
All Dog are Ant.
No Ant is Bear.

Conclusions:
I. All Ant are Cat is a possibility.
II. Some Cat are not Bear.

III. Some Ant are Dog is a possibility.
```

Option Set:

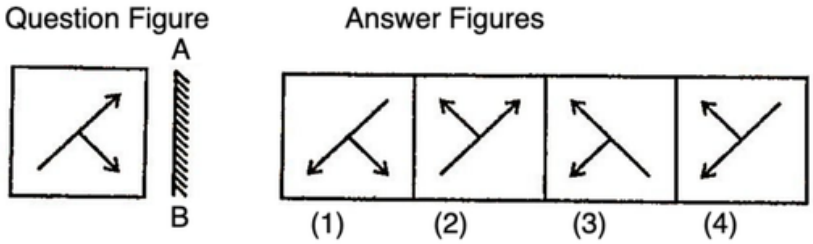

- Only I follows
- Only II follows
- Either I or II follows
- Only III follows
- None follows

Exact Answer: `Only I follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Only I follows.

Reference High-Resolution Figure / Slide:

Problem 42: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q07`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
.Statements:

No Eagle is Fish.
Some Fish are Gill.
Some Gill are not Yeast.
Only Yeast is Kite.

Conclusions:
I. Some Gill are Eagle is a possibility.
II. Some Fish is Yeast
III. Some Kite is Eagle is a possibility.
```

Option Set:

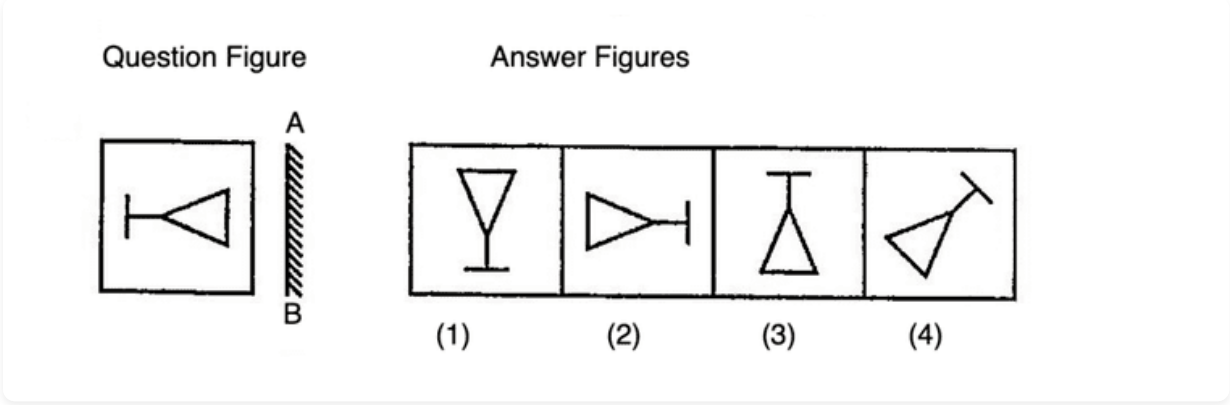

- Only I follows
- Only II and III follow
- Only I and III follow
- None follows
- None of these

Exact Answer: `Only I follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Only I follows.

Reference High-Resolution Figure / Slide:

Problem 43: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q08`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
.Statements:

All Apple are Box.
All Box are Cart.
No Apple is Enamel.
Some Box are Enamel.

Conclusions:

I. Some Box are not Enamel.
II. Some Enamel is Cart.
III. Some Cart are definitely Box.
```

Option Set:

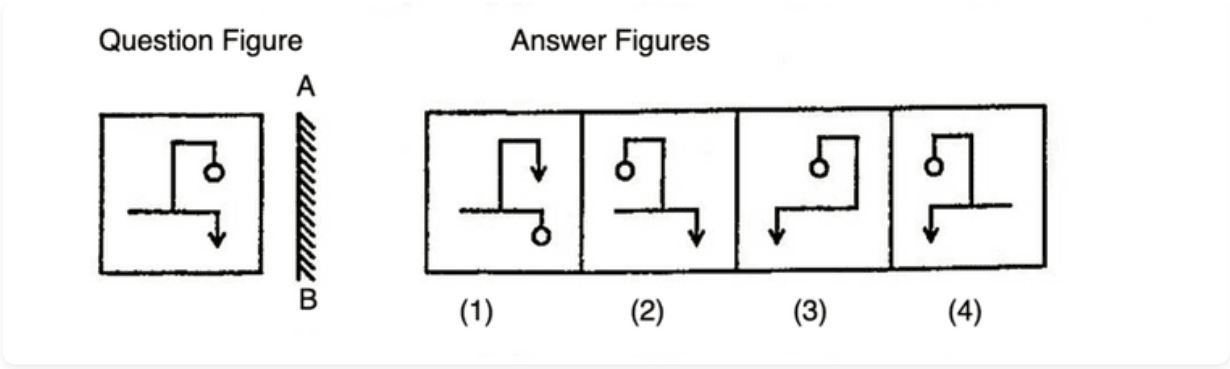

- Only I and III follow
- Only II follows
- Only III follows
- All I, II and III follow
- None of these

Exact Answer: `All I, II and III follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer All I, II and III follow.

Reference High-Resolution Figure / Slide:

Problem 44: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q09`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
.Statements:

No Almond is Rice.
Some Dust are Almond.
Some Dust are not Flax.

Conclusions:
I. Some Dust are not Rice.
II. Some Flux is rice is possibility
III. No Almond is Flux
```

Option Set:

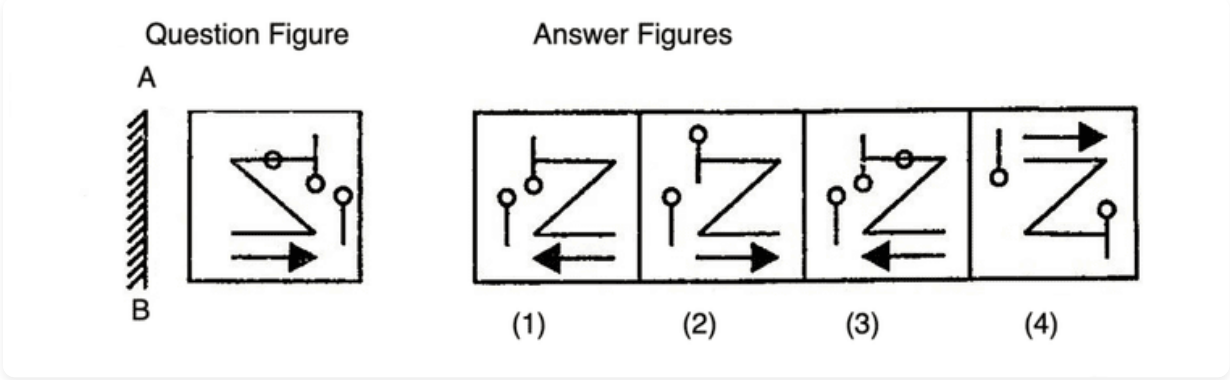

- Only I follows
- Only II follows
- Only I and either II or III follow
- Only I and II follow
- None of these

Exact Answer: `Only I and II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Only I and II follow.

Reference High-Resolution Figure / Slide:

Problem 45: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q10`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
 Statements:

Some Queen are Jack
All Night are Moon.
Some Jack are Night.
Some King are Moon

Conclusions:
I. Some Queen are King
II. No King are Queen.
III. Some Moon are Jack is a possibility.
```

Option Set:

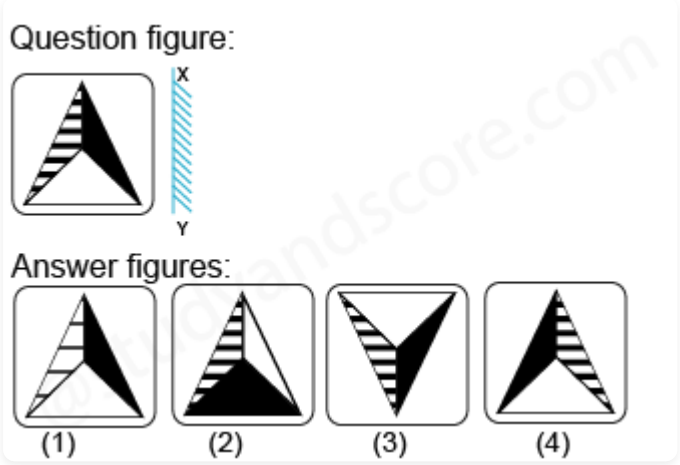

- Only I and III follow
- Only II follows
- Only either I or II follow
- Only III follows
- None of these

Exact Answer: `Only either I or II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Only either I or II follow.

Reference High-Resolution Figure / Slide:

Problem 46: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q11`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
Directions (11-15): In each of the questions below is given three statements followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

Q11. Statements:

No day is night.
All night is bright.
All bright are star.

Conclusions:
I. All day being bright is a possibility.
II. Some star is not day.
```

Option Set:

- None follows
- Only I follows
- Only II follows
- Either I or II follow
- Both I and II follow

Exact Answer: `Both I and II follow`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Both I and II follow.

Reference High-Resolution Figure / Slide:

Problem 47: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q12`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
.Statements:

Some steel is cup.
All steel is metal.
Some metal is iron.

Conclusions:

I. All cup is iron.
II. Some iron is not cup.
```

Option Set:

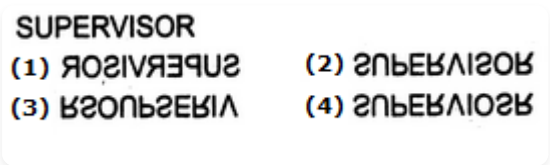

- None follows
- Only I follows
- Only II follows
- Either I or II follow
- Both I and II follow

Exact Answer: `None follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer None follows.

Reference High-Resolution Figure / Slide:

Problem 48: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q13`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
Statements:

Some gold is iron.
Only a few iron is silver.
No silver is black.

Conclusions:
I. Some gold is black.
II. All Black is Iron is a possibility
```

Option Set:
- None follows
- Only I follows
- Only I follows
- Either I or II follow
- Both I and II follow

Exact Answer: `Only I follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Only I follows.

Reference High-Resolution Figure / Slide:

Problem 49: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q14`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
 Statements:

Some red is green.
All blue is pink.
No green is blue.

Conclusions:
I. Some Red is Pink is a possibility
II. No Blue is Red.
```

Option Set:
- None follows
- Only I follows
- Only II follows

- Either I or II follow
- Both I and II follow

Exact Answer: `Only I follows`

Complete Mathematical / Logical Deduction:

Official solution from Syllogisms Topic Test 02. Symmetrical, rotational, or deductive proof confirms answer Only I follows.

Reference High-Resolution Figure / Slide:

Problem 50: Syllogistic Logic (`SEC01_TEST_SYLLOG_Q15`)

Origin Module: `8 _ Critical Reasoning & Syllogism` | **Source Document:** `syllogisms Test 02_QUESTIONS.json`

Problem Statement:

```
Statements:

Some bird is animal.
No animal is wild
Some wild is lion.

Conclusions:
I. Some bird is lion.
II. No lion is bird.
```

Option Set:
- None follows
- Only I follows
- Only II follows
- Either I or II follow
- Both I and II follow

Exact Answer: `Either I or II follow`

Complete Mathematical / Logical Deduction:

This is the solution
