Data Sufficiency

Logical Reasoning

LIVE CLASS

TYPE:I

SET 01:

There are six people A,B,C,D,E and F. All of them have different heights .A is taller than F&D. B is shorter than only two people including A. A is not the tallest .C is taller than D but shorter than F. The height of 2nd tallest person and the 2nd shortest person is 153 cm and 135 cm respectively.

Q1. What is the possible height of F?
(a)152 cm (b)165 cm (c)100 cm (d)134 cm (e)130 cm

Q2. Who among the following is the 3rs shortest?
(a)A (b)C (c)B (d)E (e)F

SET 02:

Six friends P, Q, R, S, T and U are members of a club and play a different game of - Football, Cricket, Tennis, Basketball, Badminton and Volleyball.

T, who is taller than P and S, plays Tennis. The tallest among them plays Basketball. The shortest among them plays Volleyball. Q and S neither play Volleyball nor Basketball. R plays Volleyball. T is exactly between Q who plays Football and P in order of height.

Who will be at the third place if they are arranged in descending order of their height?

Question 3: Six students A, B, C, D, E, F, and G are sitting in a straight line facing north direction. D is sitting third to the right of B. E is sitting third to the left of C. Who is sitting to the immediate left of B?

(I) D and E are sitting at the extreme ends.

(II) A is sitting third to the left of F.

a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question

(b) The data even in both statements I and II together are not sufficient to answer the question

(c) The data either in statement I alone or in statement II alone are sufficient to answer the question

(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

(e) The data in both statements I and II together are necessary to answer the question

Question 4: Five children were administered psychological tests to know their intellectual levels. Which child is the most intelligent?

(1) The child A is less intelligent than the child B. The child C is less intelligent than

the child D..

(2) The child B is less intelligent than the child C and child A is more intelligent than the child E.

a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question

(b) The data even in both statements I and II together are not sufficient to answer the question

(c) The data either in statement I alone or in statement II alone are sufficient to answer the question

(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

(e) The data in both statements I and II together are necessary to answer the question

Question 5:

Among mobiles R, S, T, U, V and W, which is the costliest?

I. T is costlier than only two mobiles. S is costlier than R but not the costliest. V is costlier than only W.

II. R is cheaper than only two mobiles. V is costlier than W but cheaper than T. T is cheaper than R. S is cheaper than U.

(a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question
(b) The data even in both statements I and II together are not sufficient to answer the question
(c) The data either in statement I alone or in statement II alone are sufficient to answer the question
(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question
(e) The data in both statements I and II together are necessary to answer the question

Question 6:

Who among A, B, C, D, E and F, each having a different height, who is the shortest?

I. E is taller than D. B is taller than F and E.

II. A is shorter than only one person .F is taller than D.

III. E is taller than F.

(a) Only I and II are sufficient to answer the question.

(b) Only I and III are sufficient to answer the question.

(c) Only II and III are sufficient to answer the question.

(d) All I, II and III are required to answer the question.

(e) All I, II and III even together are not sufficient to answer the question.

TYPE:II

Question 7:

Point S is in which direction with respect to point Y?

I. Point S is in north of Point X. Point X is in east of Point T. Point T is in north of point V which is west of Point Y.

II. Point Y is west of Point X. Point X is in west of Point T which is north of V. Point V is east of Point S which is south of Point X .

a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question

(b) The data even in both statements I and II together are not sufficient to answer the question

(c) The data either in statement I alone or in statement II alone are sufficient to answer the question

(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

(e) The data in both statements I and II together are necessary to answer the question

Question 8:

Point S is in which direction with respect to point Y?

I. Point S is in north of Point X. Point X is in east of Point T. Point T is in north of point V which is west of Point Y.

II. Point Y is west of Point X. Point X is in west of Point T which is north of V. Point V is east of Point S which is south of Point X .

IBPS IT Officer 2019 Nov

a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question

(b) The data even in both statements I and II together are not sufficient to answer the question

(c) The data either in statement I alone or in statement II alone are sufficient to answer the question

(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

(e) The data in both statements I and II together are necessary to answer the question

Question 9:

Towards which direction is Town J from Town W?

I. Town R is to the west of Town W and to the north of Town T.

II. Town Z is to the east of Town J and to the south of Town T.

III. Town M is to the north-east of Town J and to the north of Town Z.

(a) Only III is sufficient to answer the question.
(b) Only II and III sufficient to answer the question.
(c) All I, II and III are required to answer the question.
(d) Question cannot be answered even with all I, II and III.
(e) Only I and II sufficient to answer the question.

TYPE : III

Question 10:

On a T.V. channel, four serials A, B, C and D were screened, one on each day, on four consecutive days but not necessarily in that order.

On which day was the serial C screened ?

I the first serial was screened on 23, Tuesday and was followed by serial D.

II. Serial A was not screened on 25 and one serial was screened between serials A and B.

If the data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

If the data in statement II alone are sufficient to answer the answer the question while the data in statement II alone are not sufficient to answer the question

If the data in statement in either statement I or II are sufficient to answer the question

If the data given in statement I or statement II are not sufficient to answer the question

If the data in statement I and II together are necessary to answer the question

Question 11:

What is position of P?
I. T and V are immediate neighbours of P. only Q stands between V and U. Only R stands between S and T.
II. U and S stand at the extreme ends of the row. Only three people stand between U and T. R stands exactly between S and T. Q stands to the immediate left of U.

a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question

(b) The data even in both statements I and II together are not sufficient to answer the question

(c) The data either in statement I alone or in statement II alone are sufficient to answer the question

(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

(e) The data in both statements I and II together are necessary to answer the question

Question 12:

Five persons A, B, C, D and E are sitting around a circular table with all of them facing towards the center. Who sits immediate left of B ?

I. A sits third to right of B. C sits third to right of A.

II. B sits immediate left of C who sits second to left of A. D does not sit adjacent to B.

a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question

(b) The data even in both statements I and II together are not sufficient to answer the question

(c) The data either in statement I alone or in statement II alone are sufficient to answer the question

(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

(e) The data in both statements I and II together are necessary to answer the question

Question 17:

Among six persons A, B, C, D, E and F standing around a circle, some of them are facing the centre while others are facing outside (i.e. opposite to the centre). What is the position of A with respect of E?

I. C stands second to the right of E. E faces outside. C is an immediate neighbour of both D and B. F stands second to the left of D. D faces the same direction as E.

II. Only two persons stand between B and E. Both B and E face outside. E is an immediate neighbour of both D and F. B is an immediate neighbour of both C and A. A is not an immediate neighbour of D.

(a)The data in both statements I and II together are necessary to answer the question

(b) The data in statement II alone are sufficient to answer the question while the data in statement I alone are not sufficient to answer the question

(c) The data even in both statements I and II together are not sufficient to answer the question

(d)The data either in statement I alone or in statement II alone are sufficient to answer the question

(e) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question

TYPE : IV

Question 13:

Is M the mother of L?

I. T is the mother of M. M is married to J. K is the son of J. F is the sister of K. L is the sister of F.

II. K is the grandson of T. K is the bother of F. F is the sister of L. L is daughter of J. J is the son-in-law of T.

(a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question
(b) The data even in both statements I and II together are not sufficient to answer the question
(c) The data either in statement I alone or in statement II alone are sufficient to answer the question
(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question
(e) The data in both statements I and II together are necessary to answer the question

Question 14:

How is Y related to P?

I.P is the mother of X, who is the only brother of Y.

II. Q is the father of Z, who is the sister of Y.

III. P has three children in which only one is son.

(a) Only I and III are sufficient to answer the question.

(b) All I, II and III are required to answer the question.

(c) Only II and III are sufficient to answer the question.

(d) Question cannot be answered even with all I, II and III.

(e) Only I and II are sufficient to answer the question

TYPE : V

Question 15:

How is ‘go’ written in a code language?

I. ‘now or never again’ is written as ‘to ka na sa’ in that code language.

II. ‘you come again now’ is written as ‘ja ka ta sa’ in that code language.

III. ‘again go now or never’ is written as ‘na ho ka sa to’ in that code language.

(a) Only I and III are sufficient to answer the question.
(b) Only II and III are sufficient to answer the question.
(c) Only I and II are sufficient to answer the question.
(d) All I, II and III are required to answer the question.
(e) None of these

Question 16:

How is the word 'plant' written in the given code language?

I. 'Buy a new plant today' is written as '4 $ % 7 2' and 'not the plant she said' is written as '@ # 5 $ 9'.

II. 'Plant is always good' is written as '> 6 3 $' and 'is good buy always' is written as '3 > 2 6'.

(a) The data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question
(b) The data even in both statements I and II together are not sufficient to answer the question
(c) The data either in statement I alone or in statement II alone are sufficient to answer the question
(d) The data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question
(e) The data in both statements I and II together are necessary to answer the question
