QUESTION 19 OF 20

Q19. READING COMPREHENSION.

Passage:

The concept of sustainable development has gained immense importance in recent decades. With rising global temperatures, pollution, and depletion of resources, nations across the world are focusing on balancing economic growth with environmental protection. The idea is not to stop development but to ensure that it meets the needs of the present without compromising the ability of future generations to meet their own needs.

Sustainability is built on three pillars: economic, social, and environmental. Economic sustainability ensures that resources are used efficiently and responsibly. Social sustainability focuses on equality, education, and healthcare. Environmental sustainability deals with conserving natural resources, reducing pollution, and maintaining biodiversity. True progress can only be achieved when all three pillars work together.

What is the main focus of sustainable development?

(A) Stopping economic growth

(B) Balancing growth with environmental care

(C) Increasing resource use

(D) Prioritizing industry over environment

QUESTION 19 OF 20

Q19. READING COMPREHENSION.

Passage:

The concept of sustainable development has gained immense importance in recent decades. With rising global temperatures, pollution, and depletion of resources, nations across the world are focusing on balancing economic growth with environmental protection. The idea is not to stop development but to ensure that it meets the needs of the present without compromising the ability of future generations to meet their own needs.

Sustainability is built on three pillars: economic, social, and environmental. Economic sustainability ensures that resources are used efficiently and responsibly. Social sustainability focuses on equality, education, and healthcare. Environmental sustainability deals with conserving natural resources, reducing pollution, and maintaining biodiversity. True progress can only be achieved when all three pillars work together.

Which of the following is NOT a pillar of sustainability?

(A) Political

(B) Social

C) Economic

(D) Environmental

QUESTION 19 OF 20

Q19. READING COMPREHENSION.

Passage:

The concept of sustainable development has gained immense importance in recent decades. With rising global temperatures, pollution, and depletion of resources, nations across the world are focusing on balancing economic growth with environmental protection. The idea is not to stop development but to ensure that it meets the needs of the present without compromising the ability of future generations to meet their own needs.

Sustainability is built on three pillars: economic, social, and environmental. Economic sustainability ensures that resources are used efficiently and responsibly. Social sustainability focuses on equality, education, and healthcare. Environmental sustainability deals with conserving natural resources, reducing pollution, and maintaining biodiversity. True progress can only be achieved when all three pillars work together.

According to the passage, what does environmental sustainability emphasize?

(A) Healthcare and equality

(B) Increasing consumption

QUESTION 19 OF 20

Q19.READING COMPREHENSION.

Passage:

The concept of sustainable development has gained immense importance in recent decades. With rising global temperatures, pollution, and depletion of resources, nations across the world are focusing on balancing economic growth with environmental protection. The idea is not to stop development but to ensure that it meets the needs of the present without compromising the ability of future generations to meet their own needs.

Sustainability is built on three pillars: economic, social, and environmental. Economic sustainability ensures that resources are used efficiently and responsibly. Social sustainability focuses on equality, education, and healthcare. Environmental sustainability deals with conserving natural resources, reducing pollution, and maintaining biodiversity. True progress can only be achieved when all three pillars work together.

The passage suggests that true progress happens when:

(A) Economy is prioritized over nature

(B) All three pillars support each other

(C) Education replaces economic growth

(D) Pollution levels are ignored

QUESTION 20 OF 20

Q20. Write an essay of 150-200 words from the topic given below .

“The Role of Artificial Intelligence in Shaping the Future Workplace”

Artificial Intelligence (AI) is rapidly transforming the way organizations operate and employees work. From automating routine tasks to enabling advanced decision-making, AI has become a driving force in modern workplaces. It allows companies to save time, reduce human error, and improve overall efficiency. For instance, chatbots now handle customer queries, while AI-driven analytics help businesses predict market trends and design better strategies.

However, AI is not just about replacing jobs; it is about creating new opportunities as well. With repetitive work being automated, employees can focus on creative, strategic, and innovative tasks. This shift requires individuals to continuously upgrade their skills in areas like data literacy, problem-solving, and critical thinking. At the same time, ethical considerations such as data privacy, transparency, and fairness must be addressed to ensure responsible AI adoption.

In conclusion, AI will not eliminate the human role in workplaces but will redefine it. The future workplace will thrive on a strong partnership between human intelligence and artificial intelligence.
