Day 03

Updated Content: Time and Work

Placement & Competitive Exam(IT Officer ,Other Govt Exam)

LIVE CLASS

Pre-assessment

Question1 : (TCS , CAT , Other Govt)

Arun and Satyam can complete a work individually in 12 working days and 15 working days respectively with their full efficiencies. Arun does work only on Monday, Wednesday and Friday while Satyam does the work on Tuesday, Thursday and Saturday. Sunday is always off. But Arun and Satyam both works with half of their efficiencies on Friday and Saturday respectively. If Arun started the work on 1st January which falls on Monday followed by Satyam on the next day and so on (i.e., they work collectively in alternate days), then on which day work will be completed?

(a) Tuesday (b) Wednesday (c) Thursday (d) Friday

Question2: (**TCS , IT Officer**)

Time taken by P alone to finish a work is 50% more than the time taken by P and Q together. Q is thrice as efficient as R. If Q and R together can complete the work in 22.5 days, then how many days will P alone take to complete the work?

Agenda/Types

TYPE 1 : MDH RULE

Type:

Question 1:

12 examiners (men) work 16 hours a day to check 24000 answer sheets in 18 days. Now, 24 examiners would work how many hours per day to check 36000 answer sheets in 36 days?

Question 2:

18 men bind 900 books in 10 days. Find how many binders will be required to bind 600 books in 12 days?

Question 3:

If 8 men can reap 40 hectares in 12 days, then how many hectares can 30 men reap in 20 days?

a. 175 hectares
b. 225 hectares
c. 250 hectares
d. 275 hectares

Question 4:

If 30 men can build a wall 56 meters long in 5 days, what length of a similar wall can be built by 40 men in 3 days?

a. 36.5 m
b. 44.8 m
c. 62.3 m
d. 92 m

TYPE : MDH RULE-CONTRACTOR

Question 1:

A contractor undertook to finish a certain work in 124 days and employed 120 men. After 64 days, he found that he had already done $\frac{2}{3}$ of the work. How many men can be, discharged now so that the work may finish in time?

Question 2:

A job must finish in 60days .40 men start the work ,each working 8 hrs a day , after 20 days just $\frac{1}{4}$ of the work is finished .How many additional men need to be engaged to complete the work on time ,if all of them have now been asked to work for 10hrs a day ?

Question 3:

A contractor undertook to finish a work in 92 days and employed 110 men. After 48 days, he found that he had already done $\frac{3}{5}$ part of the work, the number of men he can withdraw so that his work may still be finished in time is:

TYPE : Alternate Days(Monkey Jump)

TYPE : Alternate Days

Q1.

A and B working separately can do a piece of work in 9 and 12 days, respectively. If they work for a day alternately with A beginning, the work would be complete in:

(a) 10 2/3 days

(b) (b) 10 1/2 days

(c) (c) 10 1/4 days

(d) (d) 10 1/3 days

(e) (e) None of these

TYPE : Alternate Days

Q2:

A and B alone can do a piece of wok in 8 and 18 days respectively. In how many days the work will be completed if they both work on alternate days starting with A?

A) 6 5/9 days

B) 5 days

C) 10 7/9 days

D) 10 9/7 days

E) not

Direction (7-10)

3 toys maker Mahesh, Suresh and Ramesh take a contract of making toys. Mahesh alone can make the entire toys in 12 days while Suresh alone can make the entire toys in 15 days and Ramesh can destroy the entire toys in 20 days.

1. How much time will Mahesh and Suresh take to make all toys if Mahesh and Suresh work together?
2. How much time will they take to make the entire toys if all 3 work together?
3. How much time will Mahesh and Suresh take to make the entire toys and if they work on alternate days with Mahesh starting on the first day?
4. In the previous question, when will the work be complete if all 3 work on alternate days, with Mahesh working on first day, Suresh on second day, Ramesh on third day, and this process repeats till work is complete?

TYPE : Efficiency Based

TYPE : Efficiency Based

Question 1:

Sakshi can do a piece of work in 20 days. Tanya is 25% more efficient than Sakshi. The number of days taken by Tanya to do the same piece of work is:

a) 15

b) 16

c) 18

d) 25

e) None of these

Question 2:

Time taken by P alone to finish a work is 50% more than the time taken by P and Q together. Q is thrice as efficient as R. If Q and R together can complete the work in 22.5 days, then how many days will P alone take to complete the work?

Question 3:

A can complete a piece of work in 8 days ,while B is 20% more efficient than him.
A works for 2 days ,then B works for 1 day and the cycle continues like this.in how many days would the work be completed?

A. 7(3/5)
B. 7 days
C. 7(7/9)
D. Not

Question 4:

P, Q and R can do a work in 20, 30 and 60 days respectively. How many days does it need to complete the work if P does the work and he is assisted by Q and R on every third day?

Question 5: SBI PO MAINS

There are three taps A ,B & C .A takes 4 times the time taken by b & c together to fill the tank .c takes 5 times the time taken by a& b together to fill the tank .in how much time can a fill the tank alone ,if the three taps together require 1hr 12min to fill the tank?

a.6 hrs
b.5hrs
c.7hrs
d.not

TYPE :

TYPE : MEN/WOMEN-“OR”

Question 1:

2 men or 3 women can do a piece of work in 16 days. In how many days can 4 men and 6 women do the same

TITA

Question 2:

If 2 men or 3 women or 4 boys can do a piece of work in 52 days, then the same piece of work will be done by 1 man, 1 woman and 1 boy in :

Question 3:

2 man or 3 women or 4 children can do a work in 20 days. In how many days will 3 men and 3 women can finish that work?

TITA

Question 4: CAT

2 Men & 3women completed a task in 12days.If the women are at least half as efficient as the men, but not more efficient than the men, what is the range of the number of days for 3women & 1 man to complete the same task?

A. 16 to 17.5

B. 16.8 to 17.5

C. 15 to 17.5

D. 15 to 16.8 days

TYPE :

TYPE : MEN/WOMEN-“AND”

TYPE :

TYPE : MEN/WOMEN-“AND”

Question 1:

4 men and 6 women can complete a work in 8 days, while 3 men and 7 women can complete it in 10 days. In how many days will 10 women complete it?

Question 2:

2 men and 3 women can together complete a piece of work in 4 days and 3 men and 2 women together can complete work in 3 days. In how many days 10 women will complete this work?

Question 3:

10 women can complete a work in 7 days and 10 children take 14 days to complete the work. How many days will 5 women and 10 children take to complete the work?
