Question 31

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid

models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
According to the passage, new joiners learn more slowly when they work remotely because they

Options:

- (A) are given fewer software tools than office staff
- (B) spend too much time commuting
- ✅ **(C) cannot observe experienced colleagues** *(Correct Answer)*
- (D) refuse to follow hybrid schedules

Correct Answer: (C)

Explanation / Solution:
The passage states directly that new joiners learn less quickly when they cannot observe experienced colleagues.

Question 32

Arrange the sentences to form a coherent paragraph. P: Customers then wait longer, and complaints rise. Q: A single outdated instruction can stop a whole assembly line. - (B) Q S R P
- (C) S P Q R
- (D) R S Q P

Correct Answer: (A)

- (A) Ambiguous
- (B) Ambivert

Question 34

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
What is the main idea of the passage?

Options:

- (A) Remote work has failed and companies should return to the office full-time.
- ✅ **(B) Hybrid work is emerging because remote work has both benefits and limits.** *(Correct Answer)*
- (C) Software tools are the main reason hybrid models succeed.
- (D) New joiners prefer working only from home.

Correct Answer: (B)

Explanation / Solution:
The passage notes gains from remote work,
then its drawbacks for collaboration and new joiners, and ends
with hybrid models plus the need for norms. That balanced shift is
the main idea.

Question 35

Choose the grammatically correct sentence.

Options:

- (A) Each of the players have received a medal.
- ✅ **(B) Each of the players has received a medal.** *(Correct Answer)*
- (C) Each of the player has received a medal.
- (D) Each of the players are received a medal.

Correct Answer: (B)

Explanation / Solution:
"Each" is singular, so it takes
"has." The plural noun after "of" does not
control the verb. "Player" would also be wrong because
"each of" needs a plural noun.

Question 27

Passage
Many software companies now treat code reviews as a daily habit rather than a last-minute check. A second pair of eyes often finds defects that automated tests miss, especially unclear names, missing edge cases and weak error messages. Reviews also spread knowledge: a junior engineer who reads a senior colleague’s change learns the team’s style faster than by studying a handbook. The practice has a cost. Long review queues delay releases, and harsh comments discourage people from sharing early drafts. Teams that keep reviews short, set a response-time target and discuss design before large patches are written usually keep both quality and speed. Tools help, but they cannot replace an agreed standard of courtesy and focus.

Question 37

Passage
Many software companies now treat code reviews as a daily habit rather than a last-minute check. A second pair of eyes often finds defects that automated tests miss, especially unclear names, missing edge cases and weak error messages. Reviews also spread knowledge: a junior engineer who reads a senior colleague's change learns the team's style faster than by studying a handbook. The practice has a cost. Long review queues delay releases, and harsh comments discourage people from sharing early drafts. Teams that keep reviews short, set a response-time target and discuss design before large patches are written usually keep both quality and speed. Tools help, but they cannot replace an agreed standard of courtesy and focus.

Question 39

Passage
Remote
work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting.

Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
What is the
main idea of the passage?

Options:

- (A) Remote work has failed and companies should return to the office full-time.
- ✅ **(B) Hybrid work is emerging because remote work has both benefits and limits.** *(Correct Answer)*
- (C) Software tools are the main reason hybrid models succeed.
- (D) New joiners prefer working only from home.
