# INFOSYS SE MASTER COMPENDIUM

## TOPIC: TIME & WORK, PIPES & CISTERNS

Total Questions: 3 | All Question Variations & Solved Solutions

### QUESTION 1

[CampusMonk] 2. Full length Quantitative Aptitude (with sol) Level -2

A person can complete a job in 120 days. He works alone on Day 1. On Day 2, he is joined by another person who also can complete the job in exactly 120 days. On Day 3, they are joined by another person of equal efficiency. Like this, everyday a new person with the same efficiency joins the work. How many days are required to complete the job?

**(A)** 20

**(B)** **15**

**(C)** 25

**(D)** NOT

**✓ Correct Answer: (B)**

Ans - B

### QUESTION 2

[OnlineStudy4U] INFOSYS TEST SERIES-2

A
can do a piece of work in 15 days, B in 20 days, and C in 30 days.
They all work together for 4 days, then A leaves. In how many more days will B and C finish the remaining work?

**(A)** 6 days

**(B)** **5 days**

**(C)** 8 days

**(D)** 9 days

**✓ Correct Answer: (B)**

Work per day = A=1/15, B=1/20, C=1/30. Together = (4+3+2)/60=9/60=3/20. Work in 4 days = 12/20=3/5. Remaining = 2/5. B+C = 1/20+1/30=5/60=1/12. So, time = (2/5)/(1/12)=24/5=4.8 ≈ 5 days.

## QUESTION 3

[OnlineStudy4U] Infosys Full Length Mock Test- 2

A and B together can do a piece of work in 10 days. A alone can do it in 15 days. In how many days can B alone do the same work?

**(A)** 20 days

**(B)** 25 days

**(C) 30 days**

**(D)** 45 days

**✓ Correct Answer: (C)**

A + B = 1/10 and A = 1/15. B = 1/10 − 1/15 = 3/30 − 2/30 = 1/30. So B alone takes 30 days.
