Questions Based on Recent Pattern

CAT

Question 1:

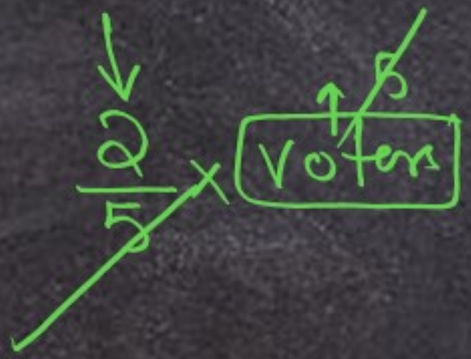

A tea shop offers tea in cups of three different sizes. The product of the prices, in INR, of three different sizes is equal to 800. The prices of the smallest size and the medium size are in the ratio 2:5. If the shop owner decides to increase the prices of the smallest and the medium ones by INR 6 keeping the price of the largest size unchanged, the product then changes to 3200. The sum of the original prices of three different sizes, in INR, is:

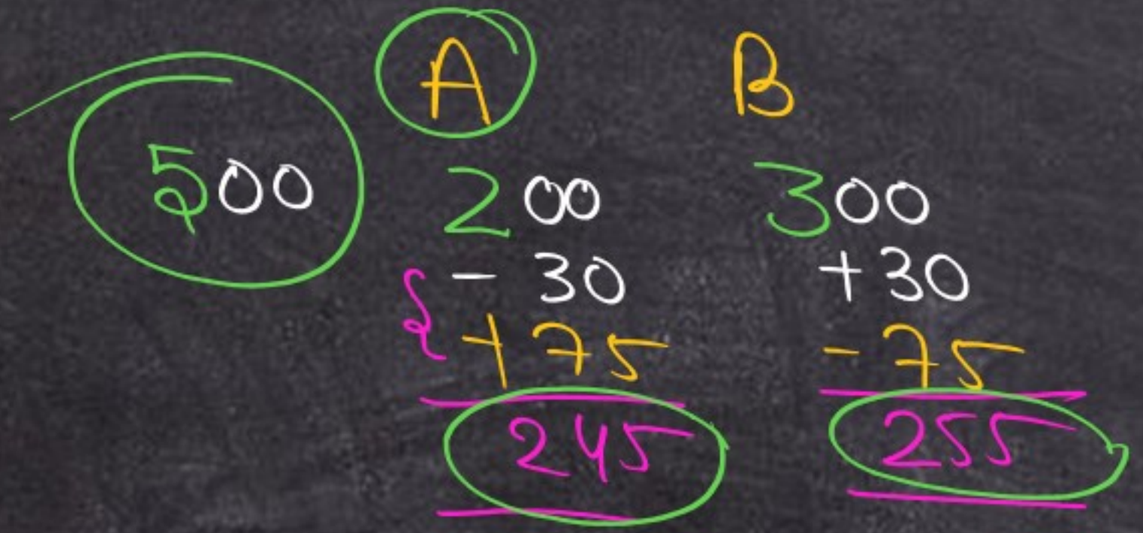

ASSESSMENT

Question 2:

2/5 of the voters promises to vote for A and rest promised to vote for B. On the last day 15% of the voters of A went back of their promise and vote for B. On the other hand, 25% of the voters of B went back on their promises and vote for A and therefore A lost by 200 votes.

Then the total number of vote is :

10 = 200

1 = 20

= 10000

x is what % more/less than y?

Q0 % more than 12?

$$\frac{8}{12} \times 100$$

Question 3:

In a constituency, 55% of the total number of voters are males and the rest are females . If 40% of the males are illiterates and 40% of the females are literates then by what percent is the number of literate males more than that of illiterate females ?

The value of lathe machine depreciates at the rate of 20 % per annum. If the cost of machine at present is Rs. 160,000, then what will be its worth after 2 years?

$$1,60,000 \times \frac{80}{100} \times \frac{80}{100} = [\quad]$$

$$16 \times 64 = 1024 \quad \Rightarrow \frac{1024}{6}$$

Question 5:

The value of a washing machine depreciates at the rate of 10% every year. If its present value is Rs. 8748, then what was the price of the washing machine three years ago?

$x \times \frac{9}{10} \times \frac{9}{10} \times \frac{9}{10} = 8748$

12
+08
8748
6

12000 Rs

The population of different trees in a field
increased by 10 % in first year, increased by 8
% in second year and decreased by 10 % in third year. If at present the number of trees is 26730, then find the number of tress in the beginning.

$\frac{10}{100} = \frac{1}{10}$

25000

$x \times \frac{11}{10} \times \frac{27}{25} \times \frac{9}{10} = 26730$

Question 7:

The population of a town was 48500. It increased by 20% in the first year and decreased by 8% in the second year.

What will be the population of the town at the end of two years?

A. 53544
B. 53545
C. 53546
D. 53547

Question 8:

The population of a village has a constant growth of 6.25% every year. .present population 4046. What was the population two yes ago

$$x \times \frac{17}{16} \times \frac{17}{16} = 4046$$

$x = 3584$ Ans

$$\frac{6.25}{100 \times 100} = \frac{1}{16}$$

4 4

A. 3583
B. 3584
C. 3585
D. 3593

Question 9:

Mr x spends 20% of his monthly income on household expenditure, out of the remaining, 25% he spends on children's education, 15% on transport, 15% on medicine and 10% on entertainment. He is left with Rs.9800 after incurring all these expenditures. what is his monthly income?

$\frac{65}{100} \times 80$

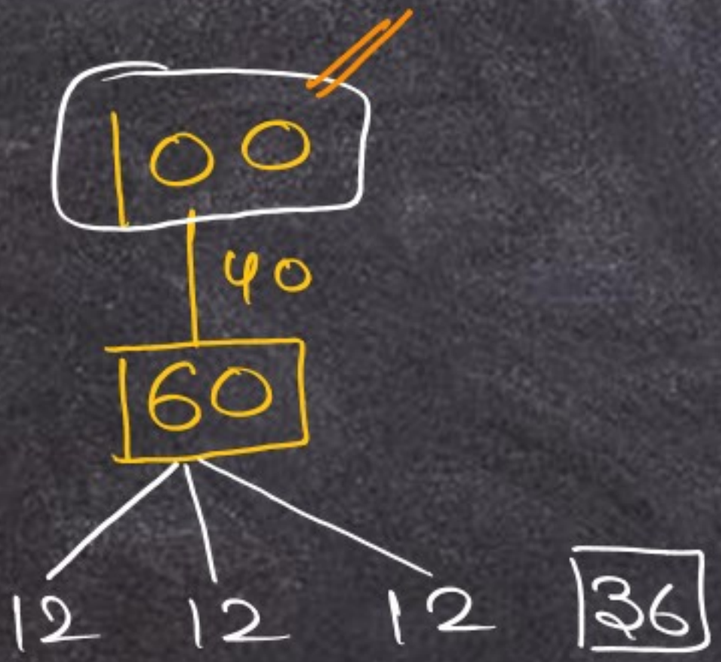

$48 = 9800$

$1 = \frac{9800}{48} \times 100$

$x \times \frac{80}{100} \times \frac{35}{100} = 980$

Question 10:

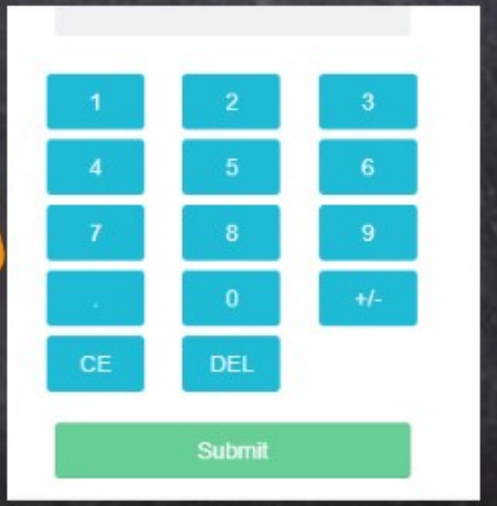

Mr. Jones gave 40% of the money he had, to his wife. He also gave 20% of the remaining amount to each of his three sons. Half of the amount now left was spent on miscellaneous items and the remaining amount of Rs. 12,000 was deposited in the bank. How much money did Mr. Jones have initially?

24
-12
12 = 12000
1 = 100000

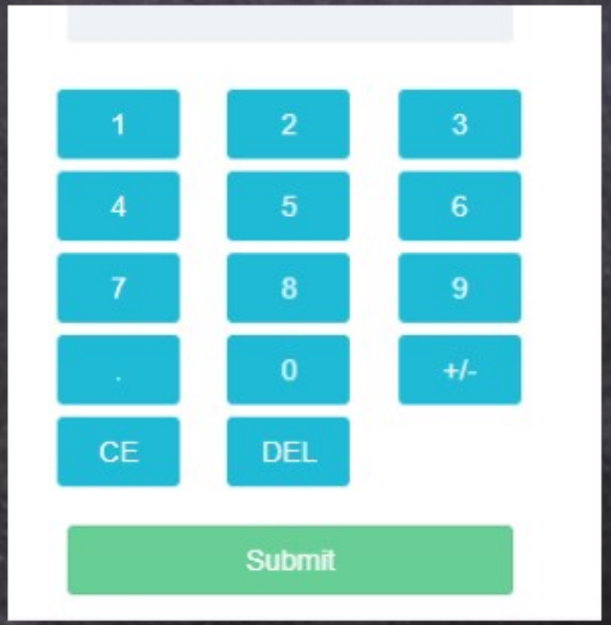

1 Lakh.

$x \times \frac{60}{100} \times \frac{40}{100} \times \frac{1}{2} = 12000$

Question 11:

The price of an article rose by 25% every odd year and fell by 20% every
even year , what would be the percentage change after 180 years ?

12:

The present population of a country estimated to be 10 crores is expected to increase to 13.31 crores during the next 3 years the uniform rate of growth is?

$10 \times (m \cdot F)^3 = 13.3$

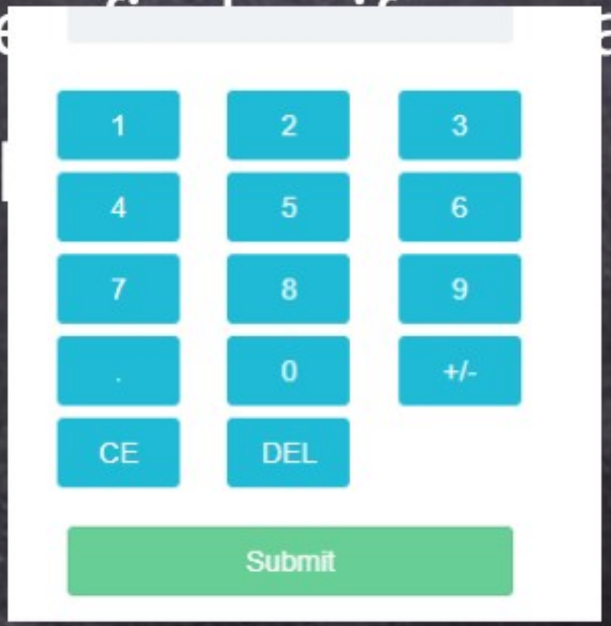

$(m \cdot F) = \sqrt[3]{\frac{1331}{1000}} = \frac{11}{10}$ $\frac{1}{10} \times 100$

10%

Ans

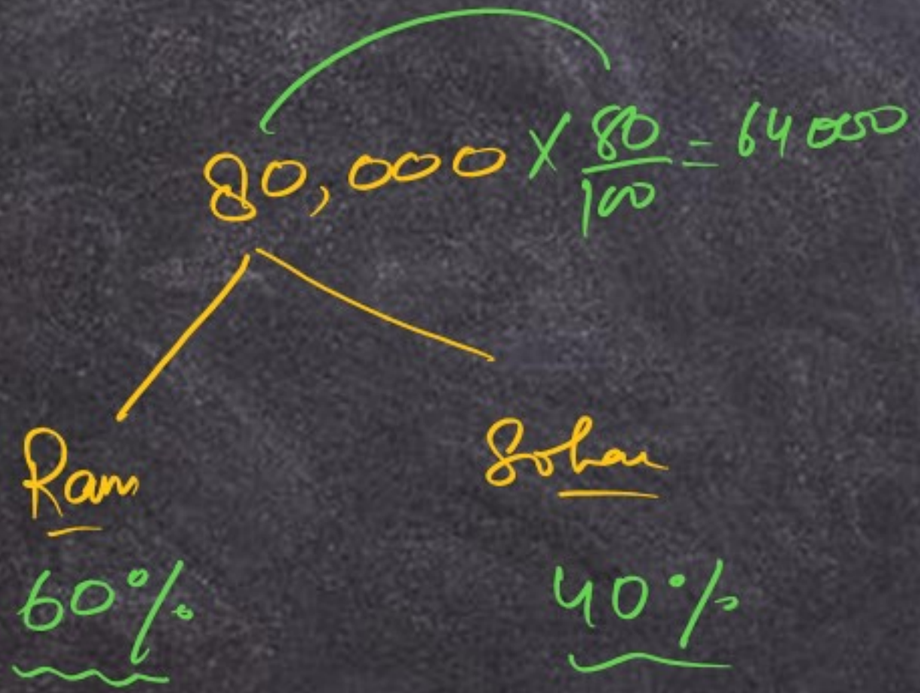

Question 13:

The present population of a country is 10 crores. If it rises to 17.28 crores during next 3 years, the ate of growth

Question 14:

In an election there were two candidates Ram Singh and Sohan Lal. The total no. of voters in the constituency was 80000 and 80% of the total votes were polled. If 60% of the polled votes were cast in favour of Ram
Singh, how many votes were received by
Sohan Lal?

$64000 \times \frac{40}{100} = 25600$

x

$80000 \times \frac{60}{100} \times \frac{40}{100} = [\quad]$

Submit

Question 15:

Three candidates were participating in an election. The person at third place got 20% of the total votes while the difference between the votes of the winner and the first runner up was 20% of the total votes. If the difference between the votes of the first runner up and the second runner up was 37,000, how many votes did the winner receive?

$x + y = 80$ ✓

$x - y = 20$ ✓

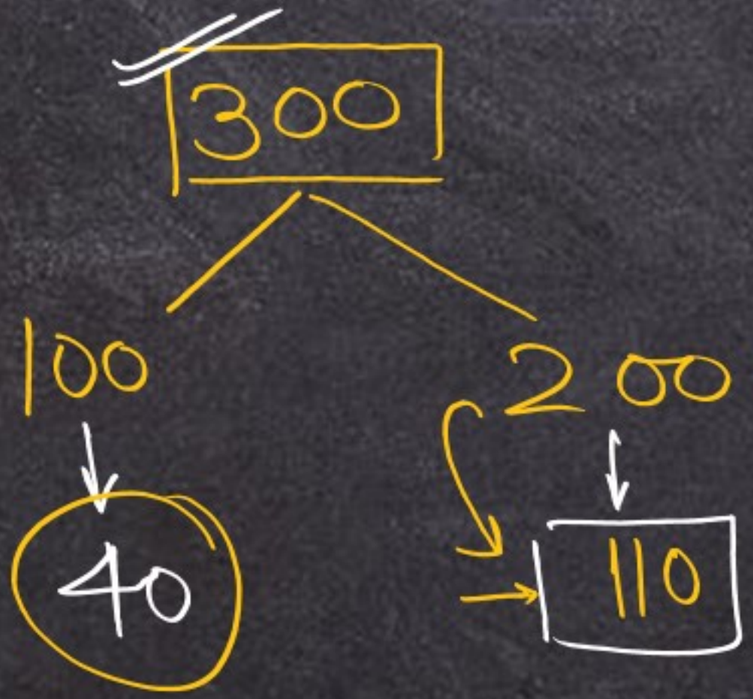

$x = 50$

$10\% = 37000$

$= 3700 \times 50$

1,85,000, Ans

$\frac{110}{200} \times 100$

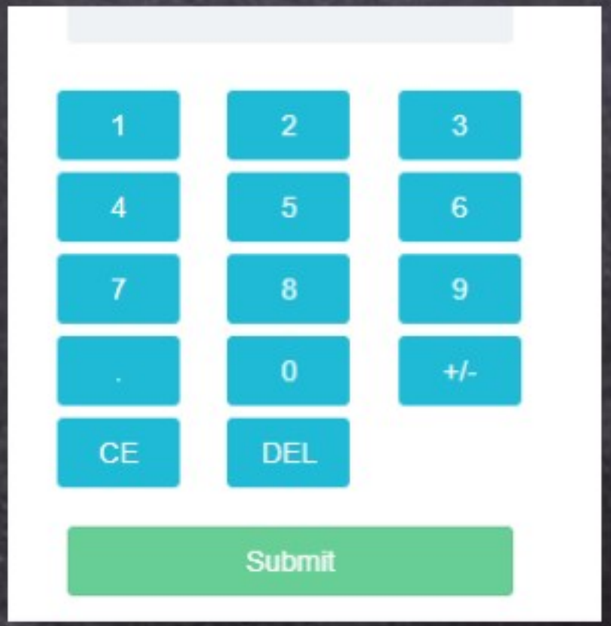

Question 16:

In a test consisting of 300 questions, Rahul answered 40% of the first 100 questions correctly.

What per cent of the remaining 200 questions does he need to answer correctly for her grade on the entire exam to be 50%?

$= 150$

Question 17:

In an examination, a student scores 4 marks for every correct answer and loses 1 mark for every wrong answer. If he attempts all 60 questions and secures 130 marks, the no of questions he attempts correctly is :

60

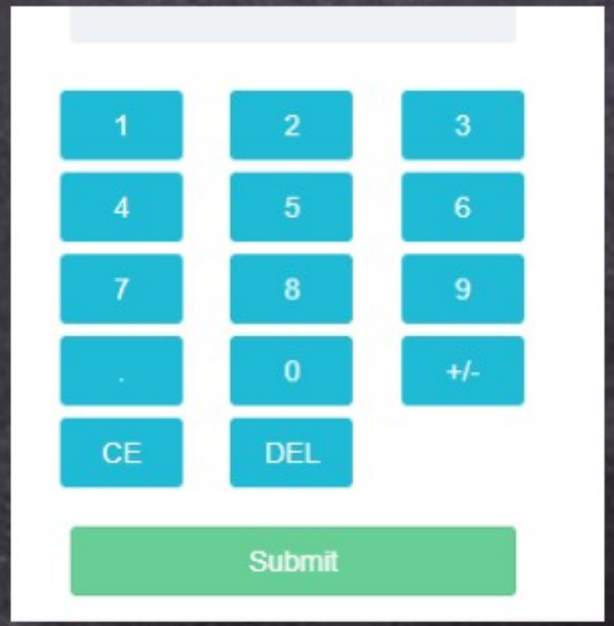

$4[x] - 1[60-x] = 130$

$4x - 60 + x = 130$

$5x = 190$

$x = 38$ ✓

38 ✓

In an examination, P scored 30 % marks and failed by 15 marks. Q scored 40 % marks and obtained 35 marks more than those required to pass. Find the pass percentage. 33% Ans

Pass = Pass

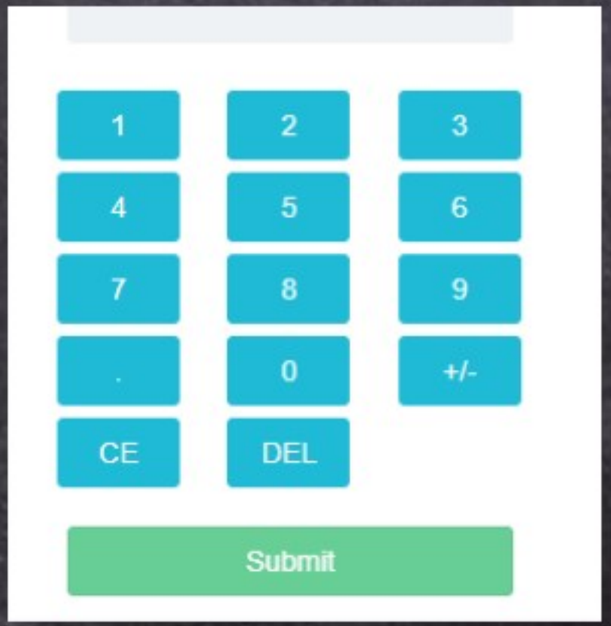

$30\%.x + 15 = 40\%.x - 35$

$10\%.x = 50$

$x = 500$

Marks = 165

$\% = \frac{165}{500} \times 100$

99.99%

$5 = \frac{10}{2}$

Imp.

12, 16 = 48

Question 19:

If first no. is 8.33% less than third no. and ratio of second and third no. is 15:16 then average of first and third no. is how much % percentage more than second no.

A. 2.45%
B. 2.22%
C. 3.33%
D. 2.75%

$\frac{11.11\%}{5} = 2.22\%$

8.33% = 1/12

I : III	II : III
4 [11 : 12]	[15 : 16] x3

\# I : II : III

44 : 45 : 48

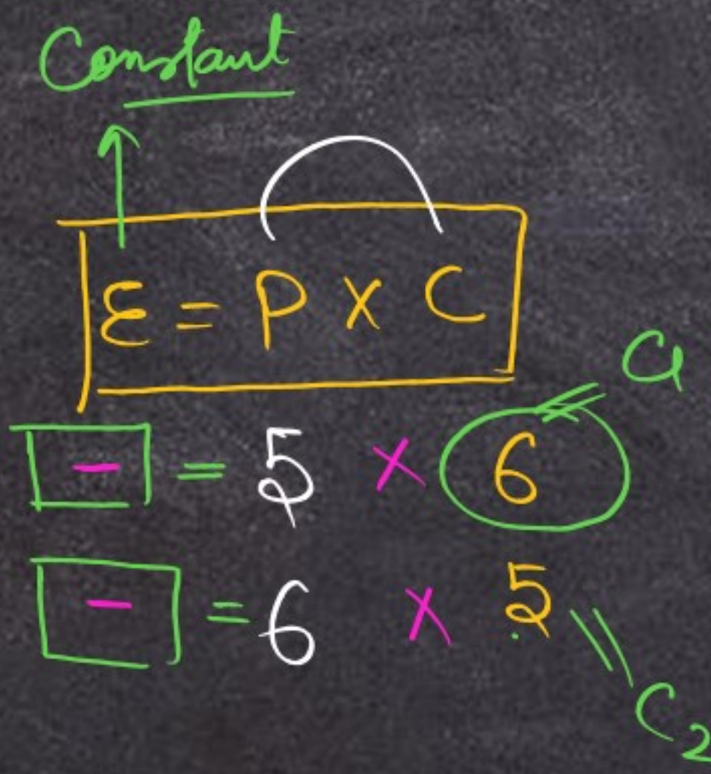

46

$\Rightarrow \frac{1}{45} \times 100 = \frac{1}{9 \times 5} \times 100$

Question 20:

The price of sugar increases by 20% due to this a family purchase 12kg less sugar for Rs300.find

1. Original consumption = 72 kg
2. New consumption = 60 kg
3. New price /kg

1 = 12 kg

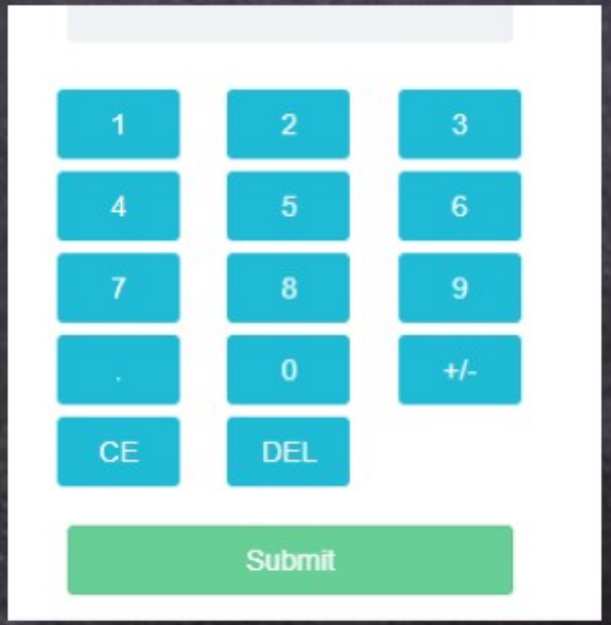

$\frac{300}{60} = 5$ Rs/kg

Question 21: (H.W)

The price of sugar having gone down by 10%,
a consumer can buy 5 kg more sugar for Rs
270. The difference between the original and reduced price per kg is(In Paise)

60 paise.

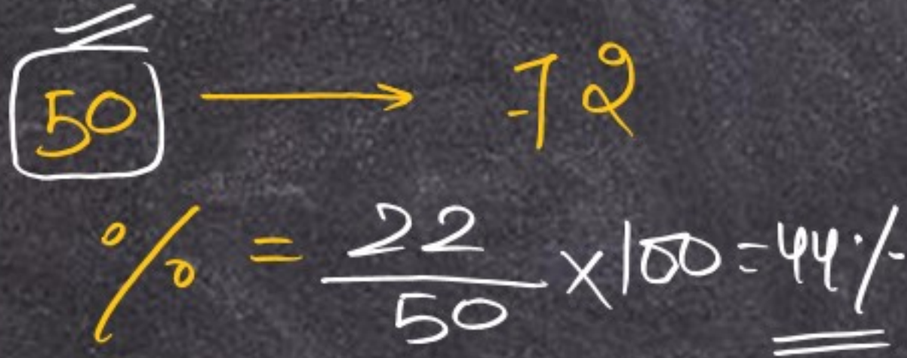

Ans

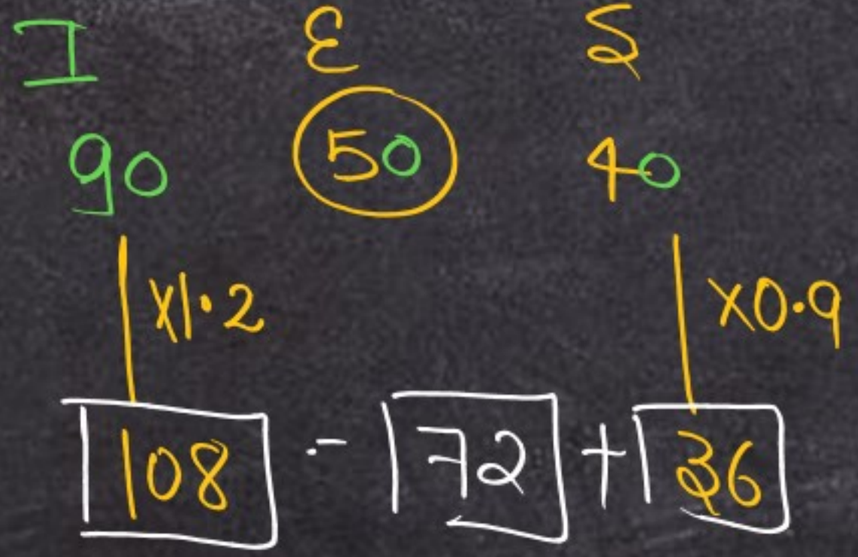

Question 22:

the reduction in 10% in the price
of mangoes in able Vicky to buy 25 kg mangoes more for rupees 22500 . find the reduced price per kg

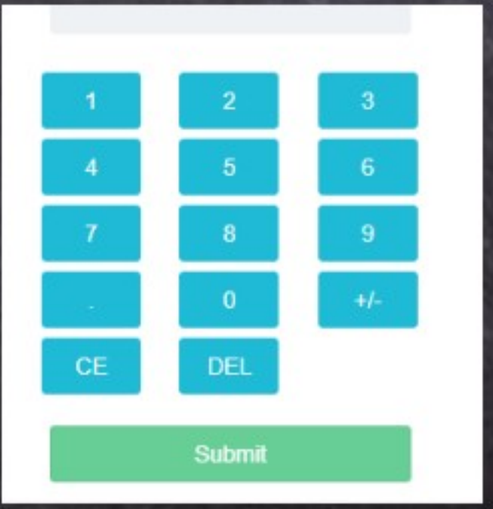

Question 23:

Ratio between the expenditure and saving of a man is 5:4. If income is increased by 20% and saving is decreased by 10% then calculate % change in expenditure.

$$\text{Error} = \frac{5}{33} \times 100$$

$$= \frac{5}{11 \times 3} \times 100$$

Question 24:

Krishna was supposed to multiply a number by 11/16, but by mistake multiplied it
by 7/12 instead. What is the percentage error in
the calculation?

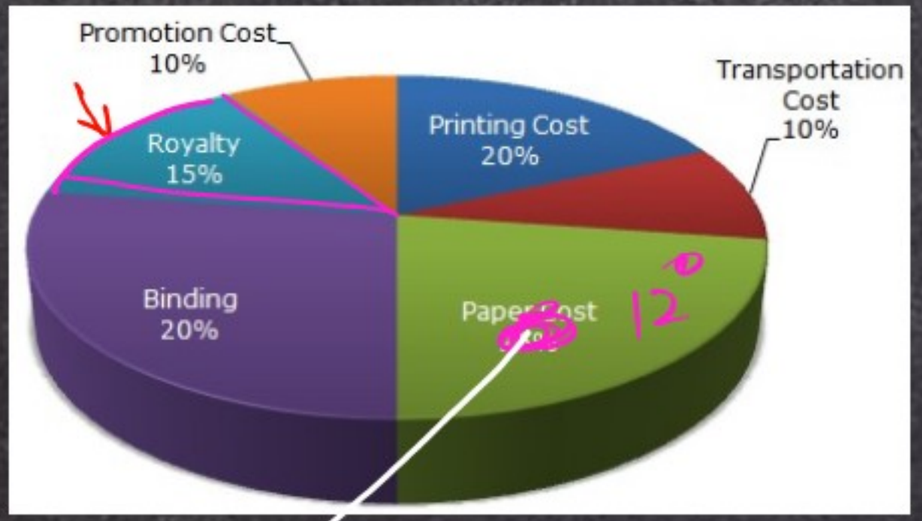

$$\frac{11}{16} \times [48] = 33$$

$$\frac{7}{12} \times [48] = 28$$

11.11%
13.33%
15.15%
16.16%

Direction 25-26: The following pie-chart shows the percentage distribution of the expenditure incurred in publishing a book. Study the pie-chart and the answer the questions based on it.

Various Expenditures (in percentage) Incurred in Publishing a Book

If for a certain quantity of books, the publisher has to pay Rs. 30,600 as printing cost, then what will be amount of royalty to be paid for these books?

A. Rs. 19,450
B. Rs. 21,200
C. Rs. 22,950
D. Rs. 26,150

What is the central angle of the sector corresponding to the expenditure incurred on Royalty?

A. 15°
B. 24°
C. 54°
D. 48°

$20\% = 30600$

$= \frac{30600}{20} \times 15$

$\frac{15}{100} \times 360^\circ$
