Question 13

13 of 15

Direction: The question below consists of a question and two statements numbered I and II given. You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this. Two trains having the difference of their speeds as 5 m/s are running in opposite direction. How long does it take for the trains to cross each other completely? I. The faster train would have taken 48 sec to cross the slower train, had they travelled in the same direction. II. Sum of their speeds is 36 km/hr. (Choose one solution)

shivam.agrawalec@gmail.com, please provide your response below

- ○ The data either in statement I alone or in statement II alone is sufficient to answer the question.
- ◉ The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.
- ○ The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.
- ○ The data in both statements I and II together is necessary to answer the question.

Direction: The question below consists of a question and two statements numbered I and II given. You have to decide whether the data provided in which of the statements are sufficient to the question. Choose your answer from the options based on this. Is the unit price of gold more than 300 times that of silver? I. The price of gold is Rs.4000 per ten grams, which is exactly the price of silver per kg. II. The price of 100 grams of gold is twice that of an American diamond. (Choose one solution)

omkarwhaval12@gmail.com, please provide your response below

- ○ The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.
- ○ The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.
- ○ The data either in statement I alone or in statement II alone is sufficient to answer the question.
- ○ The data in both statements I and II together is necessary to answer the question.
