

Simple & Compound Interest

LIVE Class -03 – **Previous Year Questions**

Concept

Question 1:

Vijay borrowed some money from Vishnu at simple interest of 8% per eight months. If after 4 years, Vishnu got 2664 as principal and interest, how much did Vijay borrow from Vishnu?

1) 2018
2) 2000
3) 1800
4) Cannot be determined
5) None of these

Question 2:

Manish deposited some money in a bank at the rate of 6% p.a. for 2 years at Compound interest. How much money was deposited if he gets 11236 on maturity?

1) 15000

2) 14000

3) 10000

4) 16000

5) None of these

Question 3:

The compound interest on a certain amount for 2 years at the rate of 5% is 102.5. Find the amount.

1) 500
2) 725
3) 850
4) 1000
5) None of these

Question 4:

If the compound interest on a certain sum for two year at 12% per annum is Rs. 2,544, the simple interest on it at the same time for 2 years will be

a) Rs. 2,400

b) Rs. 2,500

c) Rs. 2,480

d) Rs. 2,440

Question 5:

The compound interest on a certain sum of money for 2 years at 10% per annum is Rs 420. The simple interest on the same sum at the same rate and same time will be:

Question 6:

If the CI on a certain sum for 2 years at 4% be Rs 510, what would be the SI?

TITA

Question 7:

On a certain sum of money, the simple interest for 2 years is Rs 140 at the rate of 4% per annum. Find the difference in CI and SI.

A)Rs 3

(b) Rs 1.5

(c) Rs 2.8

(d) Rs 1.8

Question 8:

What is the difference between compound interest and simple interest for the sum of 20000 over a 2 year period, if the compound interest is calculated at 20% p.a. and simple interest is calculated at 23% p.a.?

1)200
2) 125
3) 250
4) 400
5) None of these

Concept

Question 9:

On a certain sum of money, the simple interest for 2 years is Rs 160 at the rate of 5% per annum. Find the difference in CI and SI.

TITA

Question3 :

The difference between Simple interest and compound interest earned on sum of Rs.2500 invested for 2 years was Rs. 225. Find the rate at which sum was invested annually?

A. 25%
B. 30%
C. 55%
D. 35%
E 24

Question 10:

Find the difference between the simple and compound interest at 5% pa for 2 years on a principal of 2000

1) 5
2) 50
3) 10
4) 25
5) None of these

Concept

Question 11:

If the difference between the simple interest and compound interest on some amount at 20% pa for 3 years is 48, then what must be the principal amount?

a) 240

b) 375

c) 480

d) 180

e) None of these

Question 12:

The simple interest (p.a.) accrued on an amount of Rs 17,000 at the end of four years is Rs 6,800. What would be the compound interest (compounded annually) accrued on the same amount at the same rate in two years?

a. Cannot be determined

b. Other than those given as option

c. Rs 3570

d. Rs 3260

e. Rs 3980

Question 13:

A sum becomes 29 times of itself when invested for 56 years at r% simple interest per annum. Find the compound interest earned if Rs.80,000 is invested at r% per annum when interest is compounded half yearly, for 1 year.

36000
40000
45000
125000
None of these

Question 14:

The simple interest accrued on an amount of Rs. 22,500 at the end of four years is Rs. 10,800. What would be the compound interest accrued on the same amount at the same rate of interest at the end of two years?

(a) Rs. 16,908

(b) Rs. 5,724

(c) Rs. 28,224

(d) Rs. 8,586

(e) Rs. 5424

Question 15:

Rahul took a loan of Rs.80000/- at rate of of 5% p.a. at SI & lent it at 5% pa at CI. After 3 years, he cleared all his debts and invested the profit earned in a scheme which offers C.I. After two years he got Rs.128.1/- as interest from the scheme. Find the rate of interest offered by scheme.

a) 8%

b) 7%

c) 6%

d) 10%

e) 12%
