**Q1. Statement I:** N is a two-digit number divisible by 6.
**Statement II:** The sum of the digits of NN is 9.

A) Statement I alone is sufficient
B) Statement II alone is sufficient
C) Both statements together are sufficient
D) Either statement alone is sufficient
E) Both statements together are not sufficient

# Infosys PYQ

Q2. A and B together can complete a work in how many days?

**Statement I:** A alone can complete the work in 12 days.
**Statement II:** B alone can complete the work in 18 days.

A) Statement I alone is sufficient
B) Statement II alone is sufficient
C) Both statements together are sufficient
D) Either statement alone is sufficient
E) Both statements together are not sufficient

# Infosys PYQ

Q3. Is x>y ?

**Statement I:** x^2 > y^2
**Statement II:** x+y > 0

A) Statement I alone is sufficient
B) Statement II alone is sufficient
C) Both statements together are sufficient
D) Either statement alone is sufficient
E) Both statements together are not sufficient

# Infosys PYQ

Q4. A bag contains red and blue balls. What is the probability of drawing a red ball?

**Statement I:** The total number of balls is 20.
**Statement II:** The number of blue balls is 8.

A) Statement I alone is sufficient
B) Statement II alone is sufficient
C) Both statements together are sufficient
D) Either statement alone is sufficient
E) Both statements together are not sufficient

# Infosys PYQ

Q5. What is the area of a rectangle?

**Statement I:** Its perimeter is 40 cm.
**Statement II:** Its diagonal is 10 cm.

A) Statement I alone is sufficient
B) Statement II alone is sufficient
C) Both statements together are sufficient
D) Either statement alone is sufficient
E) Both statements together are not sufficient

# Infosys PYQ

Q6. What is the present age of A?

**Statement I:** Five years ago, the ratio of A's age to B's age was 3:4.
**Statement II:** After 5 years, the ratio of A's age to B's age will be 4:5.

A) Statement I alone is sufficient
B) Statement II alone is sufficient
C) Both statements together are sufficient
D) Either statement alone is sufficient
E) Both statements together are not sufficient

Q7. In a certain code language:

**MANGO → NZMTL**
**APPLE → ZKKOV**

How is **GRAPE** coded?

A) TIZKV
B) TIZOV
C) TIZPV
D) TIZKV
E) GIZKV

# Infosys PYQ

Q8. In a certain code:

**CAT → 6-2-40**
**DOG → 8-30-14**
**BAT → 4-2-40**

The code for each letter is obtained by multiplying its alphabet position by **2**.

How will **COW** be coded?

A) 6-30-46
B) 6-15-23
C) 3-30-46
D) 6-30-44
E) 4-30-46

# Infosys PYQ

Q9. In a certain language:

**"red green blue" → "ka mo ti"**

**"green yellow white" → "mo pa ra"**

**"blue white black" → "ti ra su"**

**"red black yellow" → "ka su pa"**

What is the code for:

**"green black blue"**

A) mo su ti
B) ka mo su
C) ti pa su
D) mo ra ti
E) ka ti pa

# Infosys PYQ

Q10. In a certain code language, a word is first **reversed**, and then every letter is replaced by its **opposite alphabet letter**:

A ↔ Z, B ↔ Y, C ↔ X, ..., Z ↔ A.

If:

**CODE → V W L X**

What is the code for **MIND**?

A) WMRN
B) WMRM
C) WNRI
D) WMRN
E) NMRW

The table shows the number of candidates who **appeared for** and **were selected** in a recruitment test conducted by a company.

## Data for Questions (Data Interpretation)

The table shows the number of candidates who appeared for and were selected in a recruitment test conducted by a company.

| Year | Appeared | Selected |
|---|---|---|
| **2021** | 4,800 | 720 |
| **2022** | 6,000 | 900 |
| **2023** | 7,500 | 1,050 |
| **2024** | 8,400 | 1,260 |
| **2025** | 10,000 | 1,500 |

Q1. What is the **average selection percentage** over all five years?

A) 14.25%
B) 15.00%
C) 14.8%
D) 16.00%
E) 16.25%

**Q3)** Find the missing term in the third figure. Assume the third figure works in the same way as the other two.

A. 50

B. 110

C. 61

D. 26

# Infosys PYQ

A box contains 5 white, 4 black and 3 red balls. Two balls are drawn without replacement. What is the probability that both are of the same color?

A) 19/66
B) 17/66
C) 5/22
D) 1/3

# Infosys PYQ

A bag contains **6 red, 5 blue and 4 green balls**. Three balls are drawn randomly without replacement. What is the probability that **exactly two balls are of the same color and the third is of a different color**?

A) 47/91
B) 59/91
C) 61/91
D) 73/91
