Concept Sheet - Foundation

Concept Sheet - Foundation

Concept Sheet – TSD Basic

Question1 :

The wheel of the engine of a train is $4\frac{2}{7}$ m in circumference makes 7 revolutions in 3 seconds. Find the speed of the train in km per hour.

A. 36 km/hr
B. 18 km/hr
C. 24 km/hr
D. 9 km/hr

Question 2:

A man is walking at a speed of 12 kms/hr. after every km he takes rest for 12 minutes. How much time(hrs.) will he Take to cover a distance of 36kms

A. 10.2

B. 10 hrs.

C. 10.5 hrs.

D. NOT

Question 3:

A man is walking at a speed of 6 kms/hr. After every km he takes rest for 6 minutes. How much time(hrs.) will he take to cover a distance of 18kms

A. 5hrs
B. 5hrs 42min
C. 4hrs 42min
D. NOT

Concept Sheet - Average Speed

Question 1:

Praveen travelled from city A to city B at the speed of 60 kmph and back from city B to city A, via the same route at the speed of 40 kmph. Find his average speed for the round trip?

Question 2:

Prathiba covers a distance of 24 km at the speed of 8 kmph and a distance of 18 km at the speed of 9 kmph. Further, she covers a distance of 12 km at the speed of 3 kmph. What is her average speed in covering the whole distance?

1) 8 kmph
2) 5.5 kmph
3) 3 kmph
4) 6 kmph
5) None of these

Question3:

A car travels from A to B at V1 km/h, travels back from B to A at V2 Km/h and again goes back from A to B at V2 km/h. The average speed of the Car is:

A. 2v1v2/(v1+v2v2)

B. v1v2/(v1+v2)

C. 3v1v2/(v2+2v1)

D. NOT

Question 4:

Arjun travelled from A to B by a bus at the speed of 30 kmph and from B to C by a car at the speed of 70 kmph. What is his average speed for the whole journey from A to C if the distance between A and B is same as that between B and C?

1) 48 kmph 2) 50 kmph 3) 40 kmph 4) 42 kmph 5) None of these

Question 5:

Aniruddh covered a certain distance in 4 hours, where he travelled at the speed of 48 kmph for the first 2 hours and 60 kmph for the next 2 hours. Find his average speed for the total journey?

1) 52 kmph 2) 55 kmph 3) 53 kmph 4) 54 kmph 5) None of these

Question 6:

Ankit covered some part of his journey in 6 hours at the speed of 54 kmph and the remaining part of the journey in another 6 hours at the speed of 60 kmph. Find his average speed for the whole journey

1) 55 kmph 2) 56 kmph 3) 57 kmph 4) 58 kmph 5) None of these

Concept Sheet -Constant

Question 1:

Speed of Karan is 40 km/h and speed of Arjun is 60km/h. What is the ratio of time taken by each to cover the same distance?

Question 2:

The speeds of three cars are in the ratio 2 : 3 : 4. The ratio of the time taken by these cars to travel the same distance is

Question 3:

The ratio of speeds of A and B is 3 : 7. If B takes 20 minutes less than A to cover a certain distance, then what is the time taken (in minutes) by A to cover the distance?

Concept Sheet -Constant

Question 4:

Zakir travels from City A to City B. If Zakir drives his car at 3/8 of his normal speed, then he reaches City B 45 minutes late. Find the time (in minutes) that Zakir would have taken to travel from City A to City B if he drove at his nromal speed.

Question 5:

Walking at 3/4 of his normal speed, Mike is 16 minutes late in reaching his office. The usual time taken by him to cover the distance between his home and his office is

A. 42 minutes

B. 48 minutes

C. 60 minutes

D. 62 minutes

E. 66 minutes

Question 6:

If an employee walks at 2/3 of his usual speed, he gets late to the office by 15 mins. What time does he usually take to reach the office?

A. 10 min.
B. 30 min
C. 35 min
D. 25 min

Question 7:

Walking at 6/7th of his usual speed of man is 25 minutes too late. His usual time to cover this distance is

A. 2h 30m
B. 2h 15m
C. 2h 25m
D. 2h 10m

Question 8:

The distance between two towns is covered in 7 hours and 30 minutes at the speed of 72 km/h. The time saved if the speed is increased by 25% is :

A. 1 hour 36 minute

B. 1 hour 30 minutes

C. 1 hour 50 minutes

D. 1 hour 20 minutes

Question 9:

A car can finish a certain journey in 20 hours at a speed of 132 kmph. In order to cover the same distance in 16.5 hours, the speed of the car must be increased by

A. 28

B. 25

C. 24

D. 33

Question 10:

A flight covers a distance between A and B in 21 hours. If the speed of the flight is reduced by 220 km/h, then the same distance is covered in 26 hours. Find the distance between A and B (in km)?

A) 24624

B) 24224

C) 24424

D) 24024

Concept Sheet

Question 1:

Manish travels a certain distance by his car at the rate of 12km/hr and walks back at the rate of 3km/hr . the whole journey took 5 hrs . what is the distance he covered on car

a) 12km
b) 30km
c) 15km
d) 6km

Question 2:

Jayshree goes to office at a speed of 6 km/h and returns to her home at a speed of 4 km/h. If she takes 10 hours in all, what is the distance between her office and her home?

A. **12km**
B. **24km**
C. **10km**
D. **20km**

Question 3:

Ram and bharat travel the same distance at the rate of 6 km per hour and 10 km per hour respectively. If ram takes 30 minutes longer than bharat, the distance travelled by each is:

TITA

Question 4:

Harsh and vijay move towards hosur starting from iim bangalore at a speed of 40 km/h and 60 km/h respectively. if vijay reaches hosur 200 minutes earlier then harsh what is the distance between iim bangalore and hosur?

TITA

Concept Sheet

Question 1:

If I walk at 5 km/hr, I miss a train by 7 minutes. If, however, I walk at 6 km/hr, I reach the station 5 minutes before the departure of the train. The distance (in km) between my house and the station is:

A. 6
B. 5
C. 4
D. 3

Question 2:

Shri X goes to his office by scooter at a speed of 30 km/hr and reaches 6 minutes earlier. If he goes at a speed of 24 km/hr, he reaches 5 minutes late. The distance to his office is :

A. 20 km

B. 21 km

C. 22 km

D. 24 km

Question 3:

A student goes to school at the rate of 2 ½ km/hr and reaches 6 minutes late. If he travels at the speed of 3 km/hr, he is 10 minutes early. The distance (in km) between the school and his house is:

a) 5 b) 4 c) 3 d) 1

Question 4:

Narayan Murthy walking at a speed of 20km/hr reaches his college 10 min late next time he increases his speed by 5km/hr but finds again 4 min late then what is distance of his college from his house ?

Question 5:

If the speed of a train is increased by 5 km/hr from its normal speed, then it takes 2 hr less for a journey of 300 km. What is the normal speed of the train.

A. 10 km/hr
B. 25 km/hr
C. 20 km/hr
D. 30 km/hr
E. 60 km/hr

Question 6:

A student walks to school at the rate of 2.5 kmph and reaches 6 min too late. Next day he increases his speed by 2 kmph and then reaches school 10 min early. What is the distance of the school from his home?

1) 1.5 km
2) 3 km
3) 6 km
4) 12 km
5) None of these
