Data Sufficiency - Questions & Detailed Solutions

Section: 09_Mock_Test_Series | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

Data Sufficiency - Questions & Detailed Solutions

Total Questions: 20 | **Total Marks:** 80

Section: Data Sufficiency

Question 1

How
many students are in the class?
Statements:
I.
Ramesh is ranked 12th from the top.
II.
Suresh is ranked 8th from the bottom.
III.
There are 5 students between Ramesh and Suresh.

Options:

- (A) Only
  I and II together are sufficient
- (B) Only
  II and III together are sufficient
- (C) Only
  I and III together are sufficient
- ✅ **(D) All**
  I, II, and III together are sufficient *(Correct Answer)*
- (E) Even
  all statements together are not sufficient

Correct Answer: (D)

Explanation / Solution:
From
Statement I, Ramesh is 12th from the top.
From
Statement III, there are 5 students between Ramesh and Suresh,

meaning Suresh's rank from the top is 18th.
From
Statement II, Suresh is 8th from the bottom.
Since
Suresh is 18th from the top and 8th from the bottom, the total number of students = 18 + 8 - 1 = 25.
All
three statements together are required to determine the total number of students.

Question 2

Question:
Who among P, Q, T, V and M is exactly in the middle when they are arranged in ascending order of their heights ?
Statements:
I.
V is taller than Q but shorter than M.
II.
T is taller than Q and M but shorter than P.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- ✅ **(E) Both**
  I and II are sufficient *(Correct Answer)*

Correct Answer: (E)

Explanation / Solution:
From
I, we have: M > V > Q.
From
II, we have: T > Q, T > M, P > T.
Combining
the above two, we have: P>T>M>V>Q i.e. Q
Clearly,
M is in the middle.

Question 3

Question:
How is 'DATE' written in the code language ?
Statements:
I.
DEAR is written as $#@? in that code.
II.
TREAT is written as %?#@% in that code.
III.
TEAR is written as %#@? in that code.

Options:

- (A) Only
  I and II together are sufficient
- (B) Only
  II and III together are sufficient
- (C) Only
  I and III together are sufficient
- ✅ **(D) All**
  I, II, and III together are sufficient *(Correct Answer)*
- (E) Even
  all statements together are not sufficient

Correct Answer: (D)

Explanation / Solution:
Observing
I, II and III, we find that similar letters have similar code
symbols at the corresponding places in the code. So, this is
direct-coding.
Thus,
to find the code for DATE, we need the code for D which can be
obtained from I only (i.e. $.) and the codes for A, T and E which
can be obtained either from II or III (@, # and % respectively).

Question 4

What
is the total salary of A and B?
Statements:
I.
A's salary is ₹10,000 more than B's salary, and
B's salary is ₹40,000.
II.
The difference between A's and B's salary is ₹10,000.

Options:

- ✅ **(A) I**
  alone is sufficient while II alone is not sufficient *(Correct Answer)*
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- (E) Both
  I and II are sufficient

Correct Answer: (A)

Explanation / Solution:
Statement
1: A’s salary = 40,000 + 10,000 = ₹50,000
Total Salary=
50,000 + 40,000 = ₹90,000
So,
total salary is determined from statement I only.

Question 5

How
many pencils does the shopkeeper sells on Sunday ?
I.
On Sunday he sold 12 more pencils than he sold the previous day
II.
He sold 28 pencils each on Thursday and Saturday

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- ✅ **(E) Both**
  I and II are sufficient *(Correct Answer)*

Correct Answer: (E)

Explanation / Solution:
28+12
= 40

Question 6

What
is the position of A from the left end of row?
I.
In a row having 15 people, A is sitting second to the right of B who is sitting at twelfth position from the right end of row.
II.
In a row of 20 people, C will take the eighth position from the right end of row if C and A interchange their respective positions.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- ✅ **(C) Either**
  I or II is sufficient *(Correct Answer)*
- (D) Neither
  I nor II is sufficient
- (E) Both
  I and II are sufficient

Correct Answer: (C)

Explanation / Solution:
From
Statement I, B is 12th
from the right end, so A is 10th from right end so (15-10+1) 6th from left end.
From
statement II, C is 8th
from right end means before changing positions, A was at 8th position from right, so (20-8+1) = 13th
from left end.

Question 7

What
is the total salary of A and B together?
Statements:

I.
A’s salary is 20% more than B’s salary.
II.
B’s salary is ₹40,000.
III.
A’s salary is ₹48,000.

Options:

- (A) Only
  I and II together are sufficient
- ✅ **(B) Only**
  II and III together are sufficient *(Correct Answer)*
- (C) Only
  I and III together are sufficient
- (D) All
  I, II, and III together are sufficient
- (E) Even
  all statements together are not sufficient

Correct Answer: (B)

Explanation / Solution:
Statement
II: B’s salary = ₹40,000.
Statement
III: A’s salary = ₹48,000.
Total
salary = ₹40,000 + ₹48,000 = ₹88,000.
Statement
I is unnecessary since we already have exact values.

Question 8

What
is the total monthly salary of Ramesh?
Statements:
I.
Ramesh's basic salary is ₹40,000, and his total salary
includes HRA and allowances.
II.
HRA is 30% of the basic salary, and allowances are ₹12,000.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient

- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- ✅ **(E) Both**
  I and II are sufficient *(Correct Answer)*

Correct Answer: (E)

Explanation / Solution:
From
statement I, we know the basic salary is ₹40,000.
From
statement II, we know HRA = 30% of ₹40,000 = ₹12,000
and allowances = ₹12,000.
Thus,
total salary = ₹40,000 + ₹12,000 + ₹12,000 =
₹64,000.
So,
both statements together are sufficient.

Question 9

In
which year was Sanjay born?
Statements:
I.
Sanjay is six years older than Gopal.
II.
Gopal's brother was born in 1982.
III.
Sanjay's brother is two years younger than Gopal's brother who was
eight years younger than Gopal.

Options:

- (A) Only
  I and II together are sufficient
- (B) Only
  II and III together are sufficient
- (C) Only
  I and III together are sufficient
- ✅ **(D) All**
  I, II, and III together are sufficient *(Correct Answer)*

- (E) Even
  all statements together are not sufficient

Correct Answer: (D)

Explanation / Solution:
From
Statement II, Gopal's brother was born in 1982.
From
Statement III, Sanjay's brother is two years younger than
Gopal's brother → Born in 1984.
Gopal's
brother was 8 years younger than Gopal, so Gopal was born in 1974.
From
Statement I, Sanjay is 6 years older than Gopal, so he was born in
1968.
All
three statements together are required to determine the birth year
of Sanjay.

Question 10

What
is the present age of Sunita?
Statements:
I.
Five years ago, Sunita's age was half of what it will be in 10
years.
II.
The difference between Sunita's present age and twice her age five
years ago is 10 years.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- ✅ **(C) Either**
  I or II is sufficient *(Correct Answer)*
- (D) Neither
  I nor II is sufficient
- (E) Both
  I and II are sufficient

Correct Answer: (C)

Explanation / Solution:
From
statement I: Let Sunita's present age be x.
Five
years ago, her age was (x - 5).
In
10 years, her age will be (x + 10).
Given:
(x - 5) = ½ (x + 10)
Solving
for x, we get x = 20.
From
statement II: Let Sunita's age be x.
Twice
her age five years ago = 2(x - 5).
Given:
x - 2(x - 5) = 10
Solving
for x, we get x = 20.

Question 11

Question:
How many children does M have ?
Statements:
I.
H is the only daughter of X who is wife of M.
II.
K and J are brothers of M.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- ✅ **(D) Neither**
  I nor II is sufficient *(Correct Answer)*
- (E) Both
  I and II are sufficient

Correct Answer: (D)

Explanation / Solution:
From

I, we conclude that H is the only daughter of M. But this does not indicate that M has no son. The information given in II is immaterial.

Question 12

3.
Is number X an even number?
Statements:
I.
X is divisible by 4.
II.
X is a multiple of 6.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- ✅ **(C) Either**
  I or II is sufficient *(Correct Answer)*
- (D) Neither
  I nor II is sufficient
- (E) Both
  I and II are sufficient

Correct Answer: (C)

Explanation / Solution:
From statement I: If X is divisible by 4, then
X is definitely even. So, statement I alone is sufficient.
From statement II: If X is a multiple of 6,
X could be 12, 18, 24, 30, ... (all even).

Question 13

Can
a water tank of 2500 litres capacity be filled by two inlet pipes A and B together in less than 8 hours?
I.
If pipe A is opened alone then it takes 12 hours to fill the tank.
II.
Pipe B can fill 1 litres of water per minute.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- ✅ **(E) Both**
  I and II are sufficient *(Correct Answer)*

Correct Answer: (E)

Explanation / Solution:
From
the statement I, the efficiency of pipe A per hour = 2500/12 =
625/3 litres per hour
From
the statement II, the efficiency of pipe B = 1 × 60 = 60
litres per hour
Pipe
A and B together will fill in 1 hour = 625/3 + 60 = 805/3 litres
per hour
The
time it will take to fill 2500 litres of water = more than 8
hours, therefore answer will be no
Therefore,
the data in both the statements I and II together is necessary to
answer the question

Question 14

What
is the speed of a train?
Statements:
I.
The train crosses a pole in 8 seconds.
II.
The train is 200 meters long.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient

- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- ✅ **(E) Both**
  I and II are sufficient *(Correct Answer)*

Correct Answer: (E)

Explanation / Solution:
Speed
= Distance / Time.
From
statement I, we know time = 8 seconds, but we don't know the distance.
From
statement II, we know the length of the train is 200 meters.
Using
both together: Speed = 200 / 8 = 25 m/s.
So,
both statements together are sufficient.

Question 15

What
is the code for "WORLD" in a certain coding language?
Statements:
I.
"HELLO" is coded as "IFMMP".
II.
"NIGHT" is coded as "OJHIU".
III.
The coding follows a pattern where each letter is replaced by the next letter in the English alphabet.

Options:

- (A) Only
  I and II together are sufficient
- (B) Only
  II and III together are sufficient
- ✅ **(C) Only**
  I and III together are sufficient *(Correct Answer)*
- (D) All
  I, II, and III together are sufficient

- (E) Even
  all statements together are not sufficient

Correct Answer: (C)

Explanation / Solution:
Statement
I: Shows how "HELLO" is coded as "IFMMP".
Statement
II: Shows how "NIGHT" is coded as "OJHIU".
Statement
III: Confirms the pattern → Each letter is replaced by the
next letter.
Applying
this pattern to WORLD:
W
→ X
O
→ P
R
→ S
L
→ M
D
→ E
So,
"WORLD" = "XPSME".
Statements
I and III together are sufficient.

Question 16

What
is the sum of the angles of a triangle?
I.
One of the angles of the triangle is 60 degrees.
II.
The triangle is an equilateral triangle.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- ✅ **(B) II**
  alone is sufficient while I alone is not sufficient *(Correct Answer)*
- (C) Either
  I or II is sufficient

- (D) Neither
  I nor II is sufficient
- (E) Both
  I and II are sufficient

Correct Answer: (B)

Explanation / Solution:
Step
1: Checking Statement I
It
only tells us that one of the angles is 60 degrees, but it does
not give information about the sum of all angles.
However,
the sum of the angles in any triangle is always 180 degrees, which
is a known fact.
Statement
I alone is NOT sufficient, as it does not help determine whether
the general rule of 180° holds.
Step
2: Checking Statement II
An
equilateral triangle has all three angles equal to 60 degrees.
Since
we know it's a triangle, its angles must sum to 180 degrees by
definition.
Statement
II alone is sufficient, as it confirms the sum of angles.

Question 17

What
is the value of X?
Statements:
I.
X is an even number.
II.
X is a multiple of 4 and lies between 10 and 20.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient

- ✅ **(D) Neither**
  I nor II is sufficient *(Correct Answer)*
- (E) Both
  I and II are sufficient

Correct Answer: (D)

Explanation / Solution:
Statement
1: X is even → Possible values: any even number (not
sufficient).
Statement
2: X is a multiple of 4 and lies between 10 and 20 → Possible
values: 12, 16 (not unique).
Even
together, we can't determine a unique value.

Question 18

On
which day of the week did Raman leave for Dubai ?
I.
Raman didn’t leave for Dubai during the weekend.
II.
Raman’s brother left for Dubai on Friday 2 days after Raman
left for Dubai

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- ✅ **(B) II**
  alone is sufficient while I alone is not sufficient *(Correct Answer)*
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- (E) Both
  I and II are sufficient

Correct Answer: (B)

Explanation / Solution:
From
Statement II: Raman’s brother left on Friday, 2 days after
Raman → So Raman left on Wednesday.
Statement
I only tells us Raman didn’t leave on the weekend but

doesn’t determine the exact day.
Thus,
Statement II alone is sufficient.

Question 19

Five
persons - A, B, C, D and E are sitting in a row. Who is sitting in
the middle?
Statements:
I.
B is between E and C.
II.
B is to the right of E.
III.
D is between A and E.

Options:

- (A) Only
  I and II together are sufficient
- (B) Only
  II and III together are sufficient
- (C) Only
  I and III together are sufficient
- ✅ **(D) All**
  I, II, and III together are sufficient *(Correct Answer)*
- (E) Even
  all statements together are not sufficient

Correct Answer: (D)

Explanation / Solution:
From
I, the order is : E, B, C or C, B, E.
From
II, the order is : E, B.
From
III, the order is : A, D, E.
Combining
the above three, we get the order as : A, D, E, B, C. Clearly, E
is sitting in the middle.

Question 20

What
is the speed of a train?

Statements:
I.
The train crosses a 240-meter platform in 12 seconds.
II.
The length of the train is 120 meters.

Options:

- (A) I
  alone is sufficient while II alone is not sufficient
- (B) II
  alone is sufficient while I alone is not sufficient
- (C) Either
  I or II is sufficient
- (D) Neither
  I nor II is sufficient
- ✅ **(E) Both**
  I and II are sufficient *(Correct Answer)*

Correct Answer: (E)

Explanation / Solution:
Statement
1: Distance covered = Train length + Platform length = 120 + 240 =
360 meters
Speed
= 360/12 = 30 m/s
So,
speed is determined.
Statement
2: Only gives train length, which is not enough to calculate
speed.
