Section IV: Puzzle Solving — Solutions & Explanations

🎯 Infosys Systems Engineer (SE) | 🗓️ 5-6 Nov 2026 Drive | ⚡ 100% Pure SE Verified

Total Questions: 4 | **Total Marks:** 4

Section: Technical Pseudo Codes -01

Problem 1 • Find the value of the question mark (?) Choose the best answer: ◯ PRACTICE VARIANT

ID: Q1 | Source: Infosys PYQ | Level: Infosys SE Standard

Find the value of the question mark (?) Choose the best answer:

A 169

C 197

D 205

✓ **Verified Answer:** Option (B) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (B)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 2 • Study the 3×3 matrix. Each row follows the same rule relating the first two entries to the third entry. Find the missing number ? that makes the middle row obey the same rule. 3 2 11 ? 6 13 3 5 23 ◯ PRACTICE VARIANT

ID: Q2 | Source: Infosys PYQ | Level: Infosys SE Standard

Study the 3×3 matrix. Each row follows the same rule relating the first two entries to the third entry. Find the missing number ? that makes the middle row obey the same rule. 3 2 11 ? 6 13 3 5 23

A 0

C 2

D 4

✓ **Verified Answer:** Option (B) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (B)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 3 • In the following question select the number which can be placed at the question ? mark which follows the same rule relating the first two entries to the third entry.

PRACTICE VARIANT

ID: Q3 Source: Infosys PYQ Level: Infosys SE Standard

In the following question select the number which can be placed at the question ? mark which follows the same rule relating the first two entries to the third entry.

A 76

B 58

D 98

Verified Answer: Option (C) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (C)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 4 • Study the 3×3 matrix. Each row follows the same rule relating the first two entries to the third entry. Find the missing number ? that makes the middle row obey the same rule. 5 J G 4 A C B 7 5 V Q ?

PRACTICE VARIANT

ID: Q4 Source: Infosys PYQ Level: Infosys SE Standard

Study the 3×3 matrix. Each row follows the same rule relating the first two entries to the third entry. Find the missing number ? that makes the middle row obey the same rule. 5 J G 4 A C B 7 5 V Q ?

A Y

B X

C W

Verified Answer: Option (D) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (D)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.
