Aptitude 01 - All India Mock 01 — Solutions & Explanations

Infosys Systems Engineer (SE) | 5-6 Nov 2026 Drive | 100% Pure SE Verified

Total Questions: 33 | **Total Marks:** 40

Section: Quantitative Aptitude

Problem 1 • Question : If the surface areas of two spheres are in the ratio of 49:81 , then find the ratio of their volumes.

◯ PRACTICE VARIANT

ID: Q1 | Source: Infosys PYQ | Level: Infosys SE Standard

Question : If the surface areas of two spheres are in the ratio of 49:81 , then find the ratio of their volumes.

A 27:64

B 125:512

D 216:512

✓ **Verified Answer:** Option (C) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (C)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 2 • Question : If Raman drives his bike at a speed of 24 km/h, he reaches his office 5 minutes late. If he drives the bike at a speed of 30 km/h, he reaches his office 4 minutes early. How much time (in minutes) will he take to reach his office at a speed of 27 km/h?

◯ PRACTICE VARIANT

ID: Q2 | Source: Infosys PYQ | Level: Infosys SE Standard

Question : If Raman drives his bike at a speed of 24 km/h, he reaches his office 5 minutes late. If he drives the bike at a speed of 30 km/h, he reaches his office 4 minutes early. How much time (in minutes) will he take to reach his office at a speed of 27 km/h?

B 55

C 50

D 45

✓ **Verified Answer:** Option (A) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (A)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 3 • Question : If the height of a solid right circular cylinder is 27 cm and diameter of its base is 30 cm, the total surface area (in sq cm) of the right circular cylinder is?

○ PRACTICE VARIANT

ID: Q3 | Source: Infosys PYQ | Level: Infosys SE Standard

Question : If the height of a solid right circular cylinder is 27 cm and diameter of its base is 30 cm, the total surface area (in sq cm) of the right circular cylinder is?

A 3976

B 3964

D 3978

✓ **Verified Answer:** Option (C) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (C)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 4 • Question : Avra travels from A to B at 74 km/h and returns from B to A through the same route at 111 km/h. What was his average speed during the two-way journey?

○ PRACTICE VARIANT

ID: Q4 | Source: Infosys PYQ | Level: Infosys SE Standard

Question : Avra travels from A to B at 74 km/h and returns from B to A through the same route at 111 km/h. What was his average speed during the two-way journey?

A 78.88 km/hr

C 98.88 km/hr

D 108.88 km/hr

✓ **Verified Answer:** Option (B) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (B)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 5 • Question : A can do 1/4 of a work in 3 days and B can do 1/6 of the same work in 4 days, how much will A get if both work together and are paid Rs. 180 in all?

○ PRACTICE VARIANT

ID: Q5 | Source: Infosys PYQ | Level: Infosys SE Standard

Question : A can do 1/4 of a work in 3 days and B can do 1/6 of the same work in 4 days, how much will A get if both work together and are paid Rs. 180 in all?

A 150 Rs

B 100

D 160

✓ **Verified Answer:** Option (C) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (C)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 6 • Question : At 20% discount the selling price of a refrigerator is Rs 2400. What is the selling price if the discount is 32.5%? ○ PRACTICE VARIANT

ID: Q6 Source: Infosys PYQ Level: Infosys SE Standard

Question : At 20% discount the selling price of a refrigerator is Rs 2400. What is the selling price if the discount is 32.5%?

A undefined

✓ **Verified Answer:** Option () **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option ()** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 7 • Question : A mixture contains milk and water in ratio 5 : 7, when 8 liters milk of and 8 liters of water is added in mixture then ratio becomes 9 : 11. Find initial quantity of milk. ○ PRACTICE VARIANT

ID: Q7 Source: Infosys PYQ Level: Infosys SE Standard

Question : A mixture contains milk and water in ratio 5 : 7, when 8 liters milk of and 8 liters of water is added in mixture then ratio becomes 9 : 11. Find initial quantity of milk.

A 24 liters

C 16liters

D 18 liters

✓ **Verified Answer:** Option (B) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (B)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 8 • Question : The mean weight of 34 students of a school is 42 kg. If the weight of the teacher is also included, the mean rises by 400 grams. Find the weight of the teacher (in kg.) ○ PRACTICE VARIANT

ID: Q8 Source: Infosys PYQ Level: Infosys SE Standard

Question : The mean weight of 34 students of a school is 42 kg. If the weight of the teacher is also included, the mean rises by 400 grams. Find the weight of the teacher (in kg.)

A undefined

✓ **Verified Answer:** Option () **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option ()** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 9 • Question : A basket contains 6 White 4 Black 2 Pink and 3 Green balls. If four balls are picked at random, what is the probability that at least one is Black?

PRACTICE VARIANT

ID: Q9 Source: Infosys PYQ Level: Infosys SE Standard

Question : A basket contains 6 White 4 Black 2 Pink and 3 Green balls. If four balls are picked at random, what is the probability that at least one is Black?

B 80/91

C 21/91

D 55/91

Verified Answer: Option (A) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (A)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 10 • Question : Two boys Rishi and Vamsi start at the same time to ride from Lucknow to Kanpur that is 95 km away. Rishi travels 5 km/h slower than Vamsi. Vamsi reaches Kanpur and immediately start to travel back. On his return journey he meets Rishi who is 25 km away from Kanpur. Find Rishi's speed(Km/hr)

PRACTICE VARIANT

ID: Q10 Source: Infosys PYQ Level: Infosys SE Standard

Question : Two boys Rishi and Vamsi start at the same time to ride from Lucknow to Kanpur that is 95 km away. Rishi travels 5 km/h slower than Vamsi. Vamsi reaches Kanpur and immediately start to travel back. On his return journey he meets Rishi who is 25 km away from Kanpur. Find Rishi's speed(Km/hr)

A undefined

Verified Answer: Option () **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option ()** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 11 • Question : The length, Breadth and height of a cuboid increases by 20%, 10% and 30% Respectively. What is the percentage increases in the volume of that cuboid?

PRACTICE VARIANT

ID: Q11 Source: Infosys PYQ Level: Infosys SE Standard

Question : The length, Breadth and height of a cuboid increases by 20%, 10% and 30% Respectively. What is the percentage increases in the volume of that cuboid?

A 30%

B 20%

D 43%

Verified Answer: Option (C) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (C)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 12 • Question : A bag contains Rs. 4100 in the form of Rs. 5, Rs. 2 and Rs. 1 coin. The number of coins is in ratio 4: 6: 9. So, find the number of 1 Rs. coins.

◯ PRACTICE VARIANT

ID: Q12 Source: Infosys PYQ Level: Infosys SE Standard

Question : A bag contains Rs. 4100 in the form of Rs. 5, Rs. 2 and Rs. 1 coin. The number of coins is in ratio 4: 6: 9. So, find the number of 1 Rs. coins.

A 40

B 500

D None of these

✓ **Verified Answer:** Option (C) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (C)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 13 • Question : The two trains are coming towards each other and cross a signal pole in 30 seconds and 20 seconds respectively and they cross each other in 24seconds. Find the ratio of the speed of these two trains?

◯ PRACTICE VARIANT

ID: Q13 Source: Infosys PYQ Level: Infosys SE Standard

Question : The two trains are coming towards each other and cross a signal pole in 30 seconds and 20 seconds respectively and they cross each other in 24seconds. Find the ratio of the speed of these two trains?

B 3:5

C 4:5

D 3:4

✓ **Verified Answer:** Option (A) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (A)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 14 • **Options:**

◯ PRACTICE VARIANT

ID: Q14 Source: Infosys PYQ Level: Infosys SE Standard

A A

B C

C Z

✓ **Verified Answer:** Option (D) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (D)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 15 • Directions : Study the following information carefully to answer these questions. A, B, C, D, E, F, G and H are sitting around a circle, facing the centre. F sits to the immediate right of D and third to the left of A. G sits third to the left of D who does not sit next to E. B sits next to G but not next to D. C does not sit next to either D or A. Question : What is the position of H with respect to C?

PRACTICE VARIANT

ID: Q15 Source: Infosys PYQ Level: Infosys SE Standard

Directions : Study the following information carefully to answer these questions. A, B, C, D, E, F, G and H are sitting around a circle, facing the centre. F sits to the immediate right of D and third to the left of A. G sits third to the left of D who does not sit next to E. B sits next to G but not next to D. C does not sit next to either D or A. Question : What is the position of H with respect to C?

A Second to the left

B First to the right

C Third to the right

D Second to the right

Verified Answer: Option (E) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (E)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 16 • Directions : Study the following information carefully to answer these questions. A, B, C, D, E, F, G and H are sitting around a circle, facing the centre. F sits to the immediate right of D and third to the left of A. G sits third to the left of D who does not sit next to E. B sits next to G but not next to D. C does not sit next to either D or A. Question : Starting from A's position, if all the eight are arranged in alphabetical order in clockwise direction, the seating position of which of the following (excluding A) would not change?

PRACTICE VARIANT

ID: Q16 Source: Infosys PYQ Level: Infosys SE Standard

Question : Starting from A's position, if all the eight are arranged in alphabetical order in clockwise direction, the seating position of which of the following (excluding A) would not change?

A B

C D

D H

E None of these

Verified Answer: Option (B) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (B)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 17 • P started from his house towards west. After walking a distance of 25 m. He turned to the right and walked 10 m. He then again turned to the right and walked 15 m. After this he is to turn right at 135 degree and to cover 30 m. In which direction P is going?

○ PRACTICE VARIANT

ID: Q17 Source: Infosys PYQ Level: Infosys SE Standard

P started from his house towards west. After walking a distance of 25 m. He turned to the right and walked 10 m. He then again turned to the right and walked 15 m. After this he is to turn right at 135 degree and to cover 30 m. In which direction P is going?

A West

B South

C South-East

✓ **Verified Answer:** Option (D) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (D)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 18 • If GOOD is coded as 164 , BAD is coded as 21 & UGLY is coded as 260 then JUMP will be coded as ?

○ PRACTICE VARIANT

ID: Q18 Source: Infosys PYQ Level: Infosys SE Standard

If GOOD is coded as 164 , BAD is coded as 21 & UGLY is coded as 260 then JUMP will be coded as ?

A undefined

✓ **Verified Answer:** Option () **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option ()** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 19 • The Line graph shows the data of 3 different types of cars sold in 5 different cities : Questio : Number of Honda car sold in Ahmedabad is what percent of the total Innova car sold in surat ?

○ PRACTICE VARIANT

ID: Q19 Source: Infosys PYQ Level: Infosys SE Standard

The Line graph shows the data of 3 different types of cars sold in 5 different cities : Questio : Number of Honda car sold in Ahmedabad is what percent of the total Innova car sold in surat ?

A 50 %

C 70%

D None of these

✓ **Verified Answer:** Option (B) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (B)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 20 • Statements: Some towns are villages. Some villages are lanes. Some lanes are hamlets. Conclusions: I. Some hamlets are villages. II. Some lanes are towns. III. Some hamlets are towns.

○ PRACTICE VARIANT

ID: Q20 | Source: Infosys PYQ | Level: Infosys SE Standard

Statements: Some towns are villages. Some villages are lanes. Some lanes are hamlets. Conclusions: I. Some hamlets are villages. II. Some lanes are towns. III. Some hamlets are towns.

A Only I follows

B Only II follows

C Only III follows

D Only II and III follows

✓ **Verified Answer:** Option (E) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (E)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 21 • Question : In a certain code, MONKEY is written as XDJMNL . How is TIGER written in that code ?

○ PRACTICE VARIANT

ID: Q21 | Source: Infosys PYQ | Level: Infosys SE Standard

Question : In a certain code, MONKEY is written as XDJMNL . How is TIGER written in that code ?

A SDFHS

B SHFDQ

C UJHFS

✓ **Verified Answer:** Option (D) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (D)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 22 • Find the Missing Term: 256 , 64 , ? , 24 , 24 , 30

○ PRACTICE VARIANT

ID: Q22 | Source: Infosys PYQ | Level: Infosys SE Standard

Find the Missing Term: 256 , 64 , ? , 24 , 24 , 30

A undefined

✓ **Verified Answer:** Option () **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option ()** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 23 • Seven girls P, Q, R, S, T, W and X are sitting in a row facing towards the north (not necessarily in the same order). R is at one of the ends of the row. T sits exactly in the middle of row. S is third to the left of X. Q is to the immediate left of W. Q is not at any end of the row. Which of the following statements) is/are correct? I. S is to the immediate right of R. II. T is to the immediate right of X.

○ PRACTICE VARIANT

Seven girls P, Q, R, S, T, W and X are sitting in a row facing towards the north (not necessarily in the same order). R is at one of the ends of the row. T sits exactly in the middle of row. S is third to the left of X. Q is to the immediate left of W. Q is not at any end of the row. Which of the following statements) is/are correct? I. S is to the immediate right of R. II. T is to the immediate right of X.

B Only II

C Both I & II

D Neither I nor II

✓ **Verified Answer:** Option (A) **Explanation / Solution:** - **Formal Proof & Derivation:** Option **Option (A)** satisfies the exact geometric, spatial, or logical constraints demonstrated in the problem statement. - **Verification Rule:** Applying systematic elimination, all competing choices fail to preserve the required symmetry, algebraic equality, or topological continuity.

Problem 24 • Read the passage and answer the questions that follow : Once upon a time, in a quaint little village nestled in a picturesque valley, there lived a young girl named Lily. She was known for her adventurous spirit and her deep curiosity. One sunny afternoon, while exploring the woods that bordered the village, Lily stumbled upon a hidden clearing. In the center of this secret meadow, she found an old oak tree with a peculiar nook. In that nook, half-buried in the earth, was a mysterious locket, ornate and gleaming with intricate designs. Lily carefully unearthed it, and as she held it in her hand, she felt a strange connection to this forgotten piece of jewelry. Back in her cottage, Lily examined the locket more closely. It was made of silver with a hint of gold, and its surface was adorned with delicate engravings of leaves and flowers. On the front, there was an image of a crescent moon, and on the back, an engraving read, "To the one who seeks the truth." The locket was sealed tightly, and Lily couldn't open it no matter how hard she tried. Determined to solve the mystery, Lily embarked on a quest to find someone who could open the locket. She asked the village blacksmith, the wise old woman who lived on the hill, and even the town's mayor, but none of them could unlock its secrets. Feeling a bit discouraged, Lily spent her days reading about ancient relics and searching for clues in the library. One day, while immersed in an old book about mystical lockets, Lily came across a passage that mentioned the existence of a "key of the heart." It said that this key could open the most stubborn of locks, but it was hidden within each person, waiting to be discovered. This newfound knowledge gave Lily a renewed sense of hope and determination. The next morning, Lily decided to visit the village's recluse, an elderly woman rumored to have deep knowledge of the heart. The recluse lived in a remote cottage surrounded by a lush garden. Lily knocked on the door and explained her quest. The old woman listened attentively and finally agreed to help. She told Lily that the key to opening the locket was hidden within her heart and that she needed to meditate on her truest desires and intentions. Lily followed the recluse's advice, sitting beneath the ancient oak tree where she had found the locket. She closed her eyes, focused on her heart's deepest desires, and as she did, she felt the locket warming in her hand. When she opened her eyes, she found the locket had sprung open, revealing a tiny, folded parchment inside. With trembling hands, she carefully unfolded it and read the message: "The truth lies in the journey, not the destination." The mystery of the locket was solved, but Lily realized that the real treasure was the journey of self-discovery she had undertaken. She understood that her quest had led her to understand her heart's desires and the power of her own determination. Question 1- What did Lily discover in the hidden clearing in the woods?

○ PRACTICE VARIANT

A "To the one who seeks adventure"

B "To the one who seeks answers"

D "To the one who seeks gold"

Verified Answer: Option (C) > 💡 **Explanation:** > Solution: C) "To the one who seeks the truth". The passage explicitly states that the locket had the inscription, "To the one who seeks the truth."

Problem 26 • Read the passage and answer the questions that follow : Once upon a time, in a quaint little village nestled in a picturesque valley, there lived a young girl named Lily. She was known for her adventurous spirit and her deep curiosity. One sunny afternoon, while exploring the woods that bordered the village, Lily stumbled upon a hidden clearing. In the center of this secret meadow, she found an old oak tree with a peculiar nook. In that nook, half-buried in the earth, was a mysterious locket, ornate and gleaming with intricate designs. Lily carefully unearthed it, and as she held it in her hand, she felt a strange connection to this forgotten piece of jewelry. Back in her cottage, Lily examined the locket more closely. It was made of silver with a hint of gold, and its surface was adorned with delicate engravings of leaves and flowers. On the front, there was an image of a crescent moon, and on the back, an engraving read, "To the one who seeks the truth." The locket was sealed tightly, and Lily couldn't open it no matter how hard she tried. Determined to solve the mystery, Lily embarked on a quest to find someone who could open the locket. She asked the village blacksmith, the wise old woman who lived on the hill, and even the town's mayor, but none of them could unlock its secrets. Feeling a bit discouraged, Lily spent her days reading about ancient relics and searching for clues in the library. One day, while immersed in an old book about mystical lockets, Lily came across a passage that mentioned the existence of a "key of the heart." It said that this key could open the most stubborn of locks, but it was hidden within each person, waiting to be discovered. This newfound knowledge gave Lily a renewed sense of hope and determination. The next morning, Lily decided to visit the village's recluse, an elderly woman rumored to have deep knowledge of the heart. The recluse lived in a remote cottage surrounded by a lush garden. Lily knocked on the door and explained her quest. The old woman listened attentively and finally agreed to help. She told Lily that the key to opening the locket was hidden within her heart and that she needed to meditate on her truest desires and intentions. Lily followed the recluse's advice, sitting beneath the ancient oak tree where she had found the locket. She closed her eyes, focused on her heart's deepest desires, and as she did, she felt the locket warming in her hand. When she opened her eyes, she found the locket had sprung open, revealing a tiny, folded parchment inside. With trembling hands, she carefully unfolded it and read the message: "The truth lies in the journey, not the destination." The mystery of the locket was solved, but Lily realized that the real treasure was the journey of self-discovery she had undertaken. She understood that her quest had led her to understand her heart's desires and the power of her own determination. Question 3- Who did Lily seek help from in opening the locket?

Rearrange them to form a logically coherent paragraph 1 Start-ups are increasingly adopting artificial intelligence to automate routine operations and reduce human error. 2 Investors are keen to fund ventures that can demonstrate scalable AI-driven business models. 3 As competition intensifies, companies seek innovative tools to gain a market edge. 4 However, reliance on AI also raises ethical concerns about transparency and job displacement. Q1. After rearranging into a coherent paragraph, which sentence will come second? (Enter the integer only)

A undefined

Verified Answer: Option () > 💡 **Explanation:** > Q1: The paragraph logically opens with the competitive landscape (3) → AI adoption (1) → funding interest (2) → concerns (4). Why the correct order is 3 → 1 → 2 → 4 1) Opener = 3 Role: Sets the context/problem : rising competition. Logic: A good first sentence frames why the topic matters. "As competition intensifies…" naturally introduces the need for solutions. 2) Next = 1 Link to 3: Cause → Response From "competition intensifies" (3) to "adopting AI" (1) as the solution firms choose to gain an edge. Flow device: "seek innovative tools" (3) → "adopting AI to automate & reduce error" (1) is a direct, specific instantiation of that search. 3) Then = 2 Narrative progression: After establishing adoption, we move to market consequences —specifically, investor behavior . Coherence: It's natural to go from firms adopting AI (1) to investors supporting scalable AI models (2). 4) Conclusion = 4 Why last: Starts with "However," a contrastive connector that signals a caveat/closure point. "Also" presupposes prior mention of AI use; it works best after we've discussed adoption and investment, not before. Function: Provides a balanced concluding perspective by highlighting ethical risks.

Problem 28 • Rearrange them to form a logically coherent paragraph 1 Start-ups are increasingly adopting artificial intelligence to automate routine operations and reduce human error. 2 Investors are keen to fund ventures that can demonstrate scalable AI-driven business models. 3 As competition intensifies, companies seek innovative tools to gain a market edge. 4 However, reliance on AI also raises ethical concerns about transparency and job displacement. Q2. Which sentence best serves as the concluding idea for the paragraph? (Enter the integer only)

Q2. Which sentence best serves as the concluding idea for the paragraph? (Enter the integer only)

A undefined

✓ **Verified Answer:** Option () > 💡 **Explanation:** > Q2: 4 Sentence 4 closes by presenting the caution/ethical perspective, rounding off the discussion. Why the correct order is 3 → 1 → 2 → 4 1) Opener = 3 Role: Sets the context/problem : rising competition. Logic: A good first sentence frames why the topic matters. “As competition intensifies…” naturally introduces the need for solutions. 2) Next = 1 Link to 3: Cause → Response From “competition intensifies” (3) to “adopting AI” (1) as the solution firms choose to gain an edge. Flow device: “seek innovative tools” (3) → “adopting AI to automate & reduce error” (1) is a direct, specific instantiation of that search. 3) Then = 2 Narrative progression: After establishing adoption, we move to market consequences —specifically, investor behavior . Coherence: It’s natural to go from firms adopting AI (1) to investors supporting scalable AI models (2). 4) Conclusion = 4 Why last: Starts with “However,” a contrastive connector that signals a caveat/closure point. “Also” presupposes prior mention of AI use; it works best after we’ve discussed adoption and investment, not before. Function: Provides a balanced concluding perspective by highlighting ethical risks.

Problem 29 • Each sentence below has a blank space. Four options are suggested. Select the most appropriate word/phrase to complete the sentence meaningfully. Mark the correct option. Despite several challenges, the new metro project has made remarkable progress and is now expected to be completed _____ schedule.

○ PRACTICE VARIANT

ID: Q29 Source: Infosys PYQ Level: Infosys SE Standard

Each sentence below has a blank space. Four options are suggested. Select the most appropriate word/phrase to complete the sentence meaningfully. Mark the correct option. Despite several challenges, the new metro project has made remarkable progress and is now expected to be completed _____ schedule.

A beneath

C on

D over

✓ **Verified Answer:** Option (B) > 💡 **Explanation:** > Key phrase: “completed … schedule” tells us the blank must express a time relation with the planned schedule . Collocations: ahead of schedule → earlier than the planned finish date. on schedule → exactly on time. over schedule or beneath schedule → not idiomatic in this context (you’d say “behind schedule” or “over time”). Tone: The sentence says “remarkable progress,” implying faster completion than expected. ✅ Correct Answer: B) ahead of schedule “Ahead of schedule” means finishing earlier than the original plan, matching the positive tone (“remarkable progress”).

Problem 30 • Question : The committee urged all departments to work in a _____ manner to achieve the organization's long-term goals.

◯ PRACTICE VARIANT

ID: Q30 Source: Infosys PYQ Level: Infosys SE Standard

Question : The committee urged all departments to work in a _____ manner to achieve the organization's long-term goals.

B casual

C negligent

D contradictory

✓ **Verified Answer:** Option (A) > 💡 **Explanation:** > Answer: A) coordinated Why? "Work in a coordinated manner" expresses organized teamwork , which is logical for achieving goals; the other options are negative or ill-fitting.

Problem 31 • Each sentence is split into four numbered parts (1–4). Identify the part that contains the grammatical error. If there is no error , choose option 5 . Type only the integer (1/2/3/4/5) as your answer. Question Neither the manager nor his assistants was willing to accept the responsibility. No error

◯ PRACTICE VARIANT

ID: Q31 Source: Infosys PYQ Level: Infosys SE Standard

Each sentence is split into four numbered parts (1–4). Identify the part that contains the grammatical error. If there is no error , choose option 5 . Type only the integer (1/2/3/4/5) as your answer. Question Neither the manager nor his assistants was willing to accept the responsibility. No error

A undefined

✓ **Verified Answer:** Option () > 💡 **Explanation:** > When two subjects are joined by neither ... nor ... , the verb agrees with the nearest subject (the one immediately before the verb). If the nearest subject is singular , use singular verb. If the nearest subject is plural , use plural verb. Why part 3 is wrong Here the two joined subjects are: "the manager" (singular) and "his assistants" (plural). The verb must therefore agree with the nearest subject to the verb — i.e., "assistants" (plural). So the correct verb is were , not was . Thus part 3 ("was willing to accept") contains the error. Correct sentence: Neither the manager nor his assistants were willing to accept the responsibility. Short examples to remember Neither the coach nor the players were ready. (players = nearest → plural) Neither the players nor the coach was ready. (coach = nearest → singular) Neither the cat nor the dogs are outside. (dogs nearest → plural)

Problem 32 • Each sentence is split into four numbered parts (1–4). Identify the part containing the grammatical error. If there is no error , choose option 5 . Answer by typing the integer (1/2/3/4/5) only. Question : The teacher along with her students were preparing for the annual function. No error

PRACTICE VARIANT

ID: Q32 Source: Infosys PYQ Level: Infosys SE Standard

Each sentence is split into four numbered parts (1–4). Identify the part containing the grammatical error. If there is no error , choose option 5 . Answer by typing the integer (1/2/3/4/5) only. Question : The teacher along with her students were preparing for the annual function. No error

A undefined

Verified Answer: Option () > 💡 **Explanation:** > Detailed Reasoning: The subject is “The teacher” (singular). The phrase “along with her students” is a parenthetical addition; it does not change the number of the subject. Therefore, the verb must be was preparing , not were preparing . ✅ Correct sentence: The teacher along with her students was preparing for the annual function.

Problem 33 • Choose the word that is nearest in meaning to the underlined word. Question The detective’s report was meticulous , leaving no room for doubt. careless detailed hasty approximate
