Infosys Full Length Mock Test-1 - Questions & Detailed Solutions

Section: 09_Mock_Test_Series | Drive Date: 5th & 6th November 2026 | Status: 100% Solved & Verified

Infosys Full Length Mock Test-1 - Questions & Detailed Solutions

Total Questions: 60 | **Total Marks:** 76

Section: Reasoning

Question 1

In a class of 50 students, Amit is 12th from the top. There are 8 students between Amit and Riya, and Riya's rank from the top is better than Amit's. What is Riya's rank from the top?

Options:

- (A) 2
- ✅ **(B) 3** *(Correct Answer)*
- (C) 4
- (D) 5

Correct Answer: (B)

Explanation / Solution:
Better rank means a smaller position number. Riya's rank = Amit's rank − (students between them) − 1 = 12 − 8 − 1 = 3.

Question 2

If FRUIT is written as HTWKV (each letter shifted two places forward), how is APPLE written in the same code?

Options:

- ✅ **(A) CRRNG** *(Correct Answer)*
- (B) CRQNG
- (C) BRRNG

- (D) CRRNF

Correct Answer: (A)

Explanation / Solution:
Shift every letter +2 in the alphabet: A→C,
P→R, P→R, L→N, E→G. The code is CRRNG.

Question 3

If in a certain code, PAPER is written as
16-1-16-5-18 (letter positions in the alphabet), how is PENCIL
written using the same rule?

Options:

- ✅ **(A) 16-5-14-3-9-12** *(Correct Answer)*
- (B) 16-5-13-3-9-12
- (C) 15-5-14-3-9-12
- (D) 16-5-14-3-8-12

Correct Answer: (A)

Explanation / Solution:
Use each letter's serial number: P=16,
E=5, N=14, C=3, I=9, L=12. So PENCIL → 16-5-14-3-9-12.

Question 4

Pointing to a photograph of a girl, Rohan
said, "She is the daughter of the only son of my
grandfather." How is the girl related to Rohan?

Options:

- (A) Cousin
- (B) Daughter
- ✅ **(C) Sister** *(Correct Answer)*
- (D) Niece

Correct Answer: (C)

Explanation / Solution:
The only son of Rohan's grandfather is
Rohan's father. The daughter of Rohan's father is
Rohan's sister.

Question 5

At what time between 4 and 5 o'clock
are the hands of a clock at right angles for the later of the two
occasions?

Options:

- (A) 4:32
- ✅ **(B) 4:38 2/11 min** *(Correct Answer)*
- (C) 4:40
- (D) 4:42 8/11 min

Correct Answer: (B)

Explanation / Solution:
Use |30H − 5.5M| = 90 with H = 4. This
gives 5.5M = 30 or 5.5M = 210, so M = 5 5/11 or M = 38 2/11. The
later occasion is 4:38 2/11 minutes.

Question 6

Find the next number in the series: 5, 11,
24, 51, 106, ?

Options:

- (A) 215
- ✅ **(B) 217** *(Correct Answer)*
- (C) 221
- (D) 225

Correct Answer: (B)

Explanation / Solution:
Each term is formed as (previous × 2)
plus an increasing integer: 5×2+1 = 11, 11×2+2 = 24,
24×2+3 = 51, 51×2+4 = 106. The next term is 106×2+5
= 217.

Question 7

If the meeting is held on Monday, Kavya will
attend it. Kavya did not attend the meeting. Which conclusion
follows?

Options:

- (A) The meeting was held on Monday
- ✅ **(B) The meeting was not held on Monday** *(Correct Answer)*

- (C) The meeting may or may not have been on Monday
- (D) Kavya never attends meetings

Correct Answer: (B)

Explanation / Solution:
This is modus tollens: from "If P then Q" and "not Q", infer "not P". P = meeting on Monday, Q = Kavya attends. She did not attend, so the meeting was not on Monday.

Question 8

Choose the pair that has the same relationship as Surgeon : Scalpel.

Options:

- (A) Teacher : Classroom
- (B) Author : Novel
- ✅ **(C) Sculptor : Chisel** *(Correct Answer)*
- (D) Farmer : Crop

Correct Answer: (C)

Explanation / Solution:
A scalpel is the primary tool a surgeon works with. A chisel is the primary tool a sculptor works with. The other options are workplace, product, or output — not tool.

Question 9

Find the next letter in the series: C, F, J, O, U, ?

Options:

- (A) Z
- (B) A
- ✅ **(C) B** *(Correct Answer)*
- (D) Y

Correct Answer: (C)

Explanation / Solution:
Letter positions: C=3, F=6, J=10, O=15, U=21. The gaps are +3, +4, +5, +6. The next gap is +7, so 21+7 = 28. Wrapping the alphabet (28−26 = 2) gives B.

Question 10

A man walks 10 km west, turns left and walks 8 km, then turns left again and walks 10 km. How far and in which direction is he from the starting point?

Options:

- (A) 8 km North
- (B) 10 km East
- ✅ **(C) 8 km South** *(Correct Answer)*
- (D) 18 km West

Correct Answer: (C)

Explanation / Solution:
Path: 10 km West, then left (South) 8 km, then left (East) 10 km. The eastward 10 km cancels the westward 10 km, leaving him 8 km due South of the start.

Question 11

Find the wrong number in the series: 2, 6, 12, 20, 30, 42, 56, 70

Options:

- (A) 42
- (B) 56
- ✅ **(C) 70** *(Correct Answer)*
- (D) 30

Correct Answer: (C)

Explanation / Solution:
The intended pattern is n(n+1): 1×2=2, 2×3=6, 3×4=12, 4×5=20, 5×6=30, 6×7=42, 7×8=56, 8×9=72. The last term should be 72, so 70 is wrong.

Question 12

Statements: All roses are flowers. Some flowers fade quickly. Conclusions: I. Some roses fade quickly. II. All flowers are roses. Which conclusion(s) follow?

Options:

- (A) Only I follows

- (B) Only II follows
- (C) Both follow
- ✅ **(D) Neither I nor II follows** *(Correct Answer)*

Correct Answer: (D)

Explanation / Solution:
"Some flowers fade quickly" need
not include the subset of flowers that are roses, so I is not
definite. II reverses a universal statement and does not follow.
Neither conclusion is certain.

Question 13

Statement: "Book tickets online to
avoid the queue at the counter." — railway notice.
Assumptions: I. Passengers generally prefer to avoid queues. II.
An online booking facility is available. Which is implicit?

Options:

- (A) Only I is implicit
- (B) Only II is implicit
- ✅ **(C) Both I and II are implicit** *(Correct Answer)*
- (D) Neither is implicit

Correct Answer: (C)

Explanation / Solution:
The advice is useful only if people want to
skip queues (I) and only if online booking actually exists (II).
Both assumptions are implicit.

Question 14

Five friends A, B, C, D and E sit in a row
facing north. A sits second to the left of C. B sits at one
extreme end. D sits between B and A. E does not sit at an extreme
end. Who sits at the extreme right?

Options:

- (A) A
- (B) B
- ✅ **(C) C** *(Correct Answer)*
- (D) E

Correct Answer: (C)

Explanation / Solution:
B occupies the left end (position 1). D between B and A forces B, D, A. A second to the left of C places C at position 5. E takes position 4. Arrangement: B D A E C. Extreme right is C.

Question 15

If 15 August 2023 was a Tuesday, what day of the week was 15 August 2024?

Options:

- (A) Wednesday
- ✅ **(B) Thursday** *(Correct Answer)*
- (C) Friday
- (D) Saturday

Correct Answer: (B)

Explanation / Solution:
2024 is a leap year and 29 February 2024 falls between the two dates, so the gap is 366 days = 52 weeks + 2 extra days. Tuesday + 2 = Thursday.

Section: Aptitude (Technical Ability)

Question 16

Find the compound interest on ₹5000 for 2 years at 10% per annum, compounded annually.

Options:

- (A) ₹1000
- ✅ **(B) ₹1050** *(Correct Answer)*
- (C) ₹1100
- (D) ₹1200

Correct Answer: (B)

Explanation / Solution:
CI = P[(1 + R/100)^n − 1] = 5000[(1.10)^2 − 1] = 5000 × 0.21 = ₹1050.

Question 17

If a:b = 3:4 and b:c = 5:6, find a:b:c.

Options:

- (A) 3:4:6
- ✅ **(B) 15:20:24** *(Correct Answer)*
- (C) 15:20:30
- (D) 3:5:6

Correct Answer: (B)

Explanation / Solution:
Make b the same in both ratios. LCM of 4 and 5 is 20. Scale a:b = 3:4 by 5 → 15:20. Scale b:c = 5:6 by 4 → 20:24. Combined ratio a:b:c = 15:20:24.

Question 18

A shopkeeper marks an article 25% above the cost price and then gives a discount of 10%. Find his profit percentage.

Options:

- (A) 10%
- (B) 12%
- ✅ **(C) 12.5%** *(Correct Answer)*
- (D) 15%

Correct Answer: (C)

Explanation / Solution:
Take CP = 100. Marked price = 125. After 10% discount, SP = 125 × 0.90 = 112.5. Profit = 12.5%.

Question 19

Two fair dice are thrown together. What is the probability of getting a sum of 7?

Options:

- (A) 1/12
- (B) 1/8
- ✅ **(C) 1/6** *(Correct Answer)*
- (D) 5/36

Correct Answer: (C)

Explanation / Solution:
Favourable outcomes: (1,6), (2,5), (3,4),

(4,3), (5,2), (6,1) — 6 outcomes. Total outcomes = 36.
Probability = 6/36 = 1/6.

Question 20

Find the remainder when 3^25 is divided by
5.

Options:

- (A) 1
- (B) 2
- ✅ **(C) 3** *(Correct Answer)*
- (D) 4

Correct Answer: (C)

Explanation / Solution:
Powers of 3 modulo 5 cycle every 4: 3, 4, 2,
1. Since 25 = 4×6 + 1, the remainder is the 1st residue in
the cycle, which is 3.

Question 21

The length of a rectangle is increased by
20% and the breadth is decreased by 10%. What is the percentage
change in its area?

Options:

- ✅ **(A) 8% increase** *(Correct Answer)*
- (B) 8% decrease
- (C) 10% increase
- (D) No change

Correct Answer: (A)

Explanation / Solution:
New area factor = 1.20 × 0.90 = 1.08.
The area increases by 8%.

Question 22

A number is first increased by 20% and then
decreased by 20%. What is the net percentage change?

Options:

- (A) No change
- (B) 4% increase

- ✅ **(C) 4% decrease** *(Correct Answer)*
- (D) 2% decrease

Correct Answer: (C)

Explanation / Solution:
Net multiplying factor = 1.20 × 0.80 =
0.96. This is a 4% decrease from the original value.

Question 23

The HCF and LCM of two numbers are 18 and
252 respectively. If one number is 36, find the other number.

Options:

- (A) 108
- ✅ **(B) 126** *(Correct Answer)*
- (C) 144
- (D) 162

Correct Answer: (B)

Explanation / Solution:
Product of the two numbers = HCF × LCM
= 18 × 252 = 4536. Other number = 4536 / 36 = 126.

Question 24

A train 180 m long is running at 54 km/h.
How long will it take to pass a pole?

Options:

- (A) 10 seconds
- ✅ **(B) 12 seconds** *(Correct Answer)*
- (C) 15 seconds
- (D) 18 seconds

Correct Answer: (B)

Explanation / Solution:
Speed = 54 × 5/18 = 15 m/s. Time to
pass a pole = length / speed = 180 / 15 = 12 seconds.

Question 25

A can finish a work in 15 days and B can
finish the same work in 10 days. In how many days will they finish
the work if they work together?

Options:

- (A) 5 days
- ✅ **(B) 6 days** *(Correct Answer)*
- (C) 7.5 days
- (D) 8 days

Correct Answer: (B)

Explanation / Solution:
A's 1-day work = 1/15, B's 1-day work = 1/10. Together = 1/15 + 1/10 = 1/6. So they finish the work in 6 days.

Section: Verbal Ability

Question 26

Arrange the sentences to form a coherent paragraph. P: Public transport and cycling lanes make that shift easier. Q: Cities that reduce private-car use also cut air pollution. R: The health gains are largest near busy roads. S: Fewer cars mean lower emissions of fine particles.

Options:

- ✅ **(A) Q S R P** *(Correct Answer)*
- (B) Q P S R
- (C) S Q R P
- (D) P Q S R

Correct Answer: (A)

Explanation / Solution:
Q is the topic sentence. S explains the mechanism. R adds where the health benefit is strongest. P names the supporting policy. Order: Q S R P.

Question 27

Choose the grammatically correct sentence.

Options:

- (A) The number of applicants have increased this year.
- ✅ **(B) The number of applicants has increased this year.** *(Correct Answer)*
- (C) The number of applicant has increased this year.

- (D) A number of applicants has increased this year.

Correct Answer: (B)

Explanation / Solution:
"The number of" is singular and takes "has." ("A number of" is plural and would take "have," but that would change the meaning.)

Question 28

Arrange the sentences to form a coherent paragraph. P: As a result, small errors in data can mislead an entire team. Q: Dashboards are now the first place managers look for answers. R: That is why organisations invest in data-quality checks before they build reports. S: These dashboards summarise large volumes of information in a few charts.

Options:

- ✅ **(A) Q S P R** *(Correct Answer)*
- (B) P Q R S
- (C) S Q R P
- (D) Q P S R

Correct Answer: (A)

Explanation / Solution:
Q introduces dashboards. S explains what they do. P gives the consequence of bad data in that setting. R states the practical response. Order: Q S P R.

Question 29

Choose the grammatically correct sentence.

Options:

- (A) If I will see him, I will tell him the news.
- ✅ **(B) If I see him, I will tell him the news.** *(Correct Answer)*
- (C) If I saw him, I will tell him the news.
- (D) If I would see him, I will tell him the news.

Correct Answer: (B)

Explanation / Solution:
In a first-conditional sentence the

if-clause takes the present simple (see), and the main clause takes will + verb.

Question 30

Choose the grammatically correct sentence.

Options:

- (A) He denied to have stolen the documents.
- ✅ **(B) He denied having stolen the documents.** *(Correct Answer)*
- (C) He denied to stealing the documents.
- (D) He denied for stealing the documents.

Correct Answer: (B)

Explanation / Solution:
"Deny" is followed by a gerund (having stolen / stealing), not by an infinitive "to have."

Question 31

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
According to the passage, new joiners learn more slowly when they work remotely because they

Options:

- (A) are given fewer software tools than office staff
- (B) spend too much time commuting
- ✅ **(C) cannot observe experienced colleagues** *(Correct Answer)*
- (D) refuse to follow hybrid schedules

Correct Answer: (C)

Explanation / Solution:
The passage states directly that new joiners learn less quickly when they cannot observe experienced colleagues.

Question 32

Arrange the sentences to form a coherent paragraph. P: Customers then wait longer, and complaints rise. Q: A single outdated instruction can stop a whole assembly line. R: Factories therefore treat documentation as part of daily operations, not as extra paperwork. S: Shop-floor work depends on clear, current instructions.

Options:

- ✅ **(A) S Q P R** *(Correct Answer)*
- (B) Q S R P
- (C) S P Q R
- (D) R S Q P

Correct Answer: (A)

Explanation / Solution:
S sets the general point. Q gives a specific failure. P shows the customer effect. R states the policy response. Order: S Q P R.

Question 33

Choose the one-word substitute: A person who can use both hands equally well.

Options:

- (A) Ambiguous
- (B) Ambivert
- ✅ **(C) Ambidextrous** *(Correct Answer)*
- (D) Amphibious

Correct Answer: (C)

Explanation / Solution:
Ambidextrous describes equal skill with both hands. Ambiguous means unclear; ambivert is a personality type; amphibious means living on land and water.

Question 34

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex

problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
What is the main idea of the passage?

Options:

- (A) Remote work has failed and companies should return to the office full-time.
- ✅ **(B) Hybrid work is emerging because remote work has both benefits and limits.** *(Correct Answer)*
- (C) Software tools are the main reason hybrid models succeed.
- (D) New joiners prefer working only from home.

Correct Answer: (B)

Explanation / Solution:
The passage notes gains from remote work, then its drawbacks for collaboration and new joiners, and ends with hybrid models plus the need for norms. That balanced shift is the main idea.

Question 35

Choose the grammatically correct sentence.

Options:

- (A) Each of the players have received a medal.
- ✅ **(B) Each of the players has received a medal.** *(Correct Answer)*
- (C) Each of the player has received a medal.
- (D) Each of the players are received a medal.

Correct Answer: (B)

Explanation / Solution:
"Each" is singular, so it takes "has." The plural noun after "of" does not control the verb. "Player" would also be wrong because "each of" needs a plural noun.

Question 36

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture.

Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
In the sentence “Productivity studies, however, present a mixed picture,” the phrase "mixed picture" means that

Options:

- (A) all studies reached the same negative conclusion
- ✅ **(B) the results show both improvement and decline, depending on the kind of work** *(Correct Answer)*
- (C) researchers used poor data
- (D) productivity cannot be measured at all

Correct Answer: (B)

Explanation / Solution:
The next sentences explain the mix:
individual task completion often improves, but collaboration on complex problems slows down.

Question 37

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
The author suggests that hybrid models succeed mainly because of

Options:

- (A) expensive video-conferencing software
- (B) a complete ban on work-from-home days
- ✅ **(C) clear norms for meeting, documenting and including remote colleagues** *(Correct Answer)*
- (D) longer commuting hours

Correct Answer: (C)

Explanation / Solution:
The last sentence says success depends less on software tools than on clear norms for meetings, documentation and inclusion.

Question 38

Choose the word most opposite in meaning to "scarce."

Options:

- (A) Rare
- (B) Limited
- ✅ **(C) Abundant** *(Correct Answer)*
- (D) Insufficient

Correct Answer: (C)

Explanation / Solution:
Scarce means in short supply. Abundant means present in large quantity. The other three are near-synonyms of scarce.

Question 39

Arrange the sentences to form a coherent paragraph. P: Mentors help them convert that theory into workplace judgement. Q: Campus courses teach programming languages and tools. R: Without that guidance, even strong graduates repeat avoidable mistakes. S: Fresh engineers therefore need both classroom knowledge and supervised practice.

Options:

- (A) Q P S R
- ✅ **(B) Q S P R** *(Correct Answer)*
- (C) S Q P R
- (D) P Q R S

Correct Answer: (B)

Explanation / Solution:
Q states what campus courses give. S draws the need for both theory and practice. P explains the mentor's role. R warns what happens without it. Order: Q S P R.

Question 40

Arrange the sentences to form a coherent paragraph. P: Over time, that habit lowers the quality of group decisions. Q: People stay silent in meetings when they fear looking uninformed. R: Leaders can reduce the fear by asking for dissent and thanking people who raise risks. S: Useful objections then never reach the table.

Options:

- ✅ **(A) Q S P R** *(Correct Answer)*
- (B) Q P R S
- (C) R Q S P
- (D) S Q P R

Correct Answer: (A)

Explanation / Solution:
Q names the behaviour. S is the immediate result. P is the longer cost. R offers the remedy. Order: Q S P R.

Question 41

Choose the word most similar in meaning to "resilient."

Options:

- (A) Fragile
- ✅ **(B) Flexible and able to recover** *(Correct Answer)*
- (C) Rigid
- (D) Temporary

Correct Answer: (B)

Explanation / Solution:
Resilient means able to recover quickly from difficulty. Fragile and rigid are opposites; temporary refers to duration, not recovery.

Question 42

Fill in the blank: The speaker's argument was so _____ that nobody could find a flaw in it.

Options:

- (A) vague
- (B) fallible

- ✅ **(C) watertight** *(Correct Answer)*
- (D) redundant

Correct Answer: (C)

Explanation / Solution:
Watertight means having no gaps or weaknesses. Vague and fallible suggest weakness; redundant means unnecessarily repeated.

Question 43

Passage
Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
Which of the following is true according to the passage?

Options:

- (A) Every IT role still requires a shared office.
- (B) Employees did not value the time saved on commuting.
- ✅ **(C) Individual home-based task work often becomes faster.** *(Correct Answer)*
- (D) Hybrid models have no office days at all.

Correct Answer: (C)

Explanation / Solution:
The passage says individual task completion often improves when people work from home. The other options contradict the text.

Question 44

Choose the correct meaning of the idiom "hit the nail on the head."

Options:

- (A) Cause an accident at work
- ✅ **(B) Describe a situation exactly right** *(Correct Answer)*

- (C) Finish a task too quickly
- (D) Blame someone unfairly

Correct Answer: (B)

Explanation / Solution:
To hit the nail on the head is to identify
the exact point or say something precisely correct.

Question 45

Choose the grammatically correct sentence.

Options:

- (A) She is senior than me in the organisation.
- ✅ **(B) She is senior to me in the organisation.** *(Correct Answer)*
- (C) She is senior from me in the organisation.
- (D) She is more senior than I in the
  organisation.

Correct Answer: (B)

Explanation / Solution:
Latin comparatives such as senior, junior,
superior and inferior are followed by "to," not "than."

Section: Pseudo Code

Question 46

What is the output of the following Pseudo
Code?
Integer
x, i
Set
x = 0
for
i = 1 to 6 do
if
i % 2 == 0 then
continue
end
if
x
= x + i
end

for
Print
x

Options:

- ✅ **(A) 9** *(Correct Answer)*
- (B) 12
- (C) 16
- (D) 21

Correct Answer: (A)

Explanation / Solution:
continue skips even values of i. The loop
runs i = 1 to 6, so only the odd values 1, 3 and 5 are added. x =
1 + 3 + 5 = 9.

Question 47

How many times does the loop body run, and
what is printed?
Integer
i, count
Set
i = 1, count = 0
while
i < 20 do
i
= i * 2
count
= count + 1
end
while
Print
count

Options:

- (A) 3
- (B) 4
- ✅ **(C) 5** *(Correct Answer)*
- (D) 6

Correct Answer: (C)

Explanation / Solution:
Trace i and count: start i=1. Pass 1: i=2,
count=1. Pass 2: i=4, count=2. Pass 3: i=8, count=3. Pass 4: i=16,

count=4. Pass 5: i=32, count=5. Now i=32 is not less than 20, so the loop stops. Printed value is 5.

Question 48

What value is printed by the following Pseudo Code?
Function
Mystery(n)
if
n <= 1 then
return
1
end
if
return
n * Mystery(n - 1)
End
Function
Print
Mystery(5)

Options:

- (A) 15
- (B) 24
- ✅ **(C) 120** *(Correct Answer)*
- (D) 125

Correct Answer: (C)

Explanation / Solution:
Mystery(n) computes n!. Mystery(5) = 5 × 4 × 3 × 2 × 1 = 120.

Question 49

What is the output of the following Pseudo Code? Integer division is used.
Integer
a, b
Set
a = 17, b = 5
Print
(a / b) + (a % b)

Options:

- (A) 3
- (B) 4
- ✅ **(C) 5** *(Correct Answer)*
- (D) 7

Correct Answer: (C)

Explanation / Solution:
Integer division: 17 / 5 = 3. Remainder: 17 % 5 = 2. Printed value = 3 + 2 = 5.

Question 50

What is printed after the following Pseudo Code runs?
Integer
a, b
Set
a = 12, b = 8
a
= a + b
b
= a - b
a
= a - b
Print
a, b

Options:

- (A) 12 8
- ✅ **(B) 8 12** *(Correct Answer)*
- (C) 20 8
- (D) 20 12

Correct Answer: (B)

Explanation / Solution:
This swaps the two values without a third variable. a = 12+8 = 20, b = 20-8 = 12, a = 20-12 = 8. Output: 8 12.

Question 51

Find the missing number in the 3 × 3 grid.
2
5
17
4
3
19
6
4
?

Options:

- (A) 28
- (B) 30
- ✅ **(C) 34** *(Correct Answer)*
- (D) 36

Correct Answer: (C)

Explanation / Solution:
In each row, third = first × second +
first + second, which is the same as (first + 1)(second + 1) −
1. Row 1: 2×5 + 2 + 5 = 17. Row 2: 4×3 + 4 + 3 = 19.
Row 3: 6×4 + 6 + 4 = 34. Check: (6+1)(4+1) − 1 = 34.

Question 52

Find the missing number in the last row of the grid.
2
3
7
3
4
13
4
5
21
6
7
43
7

8
?

Options:

- (A) 54
- (B) 56
- ✅ **(C) 57** *(Correct Answer)*
- (D) 63

Correct Answer: (C)

Explanation / Solution:
In every row, third = first × second +
1. Check: 2×3+1 = 7, 3×4+1 = 13, 4×5+1 = 21,
6×7+1 = 43. Therefore 7×8+1 = 57.

Question 53

Given is the set of four numbers that relate to each other in a certain way. Determine the missing number in the third set. Assume the third set works in the same way as the first and the second set.
Set 1 Set 2 Set 3
5
10
3
6
4
16
2
8
3
15
?
10

Options:

- ✅ **(A) 2** *(Correct Answer)*
- (B) 3
- (C) 4
- (D) 5

Correct Answer: (A)

Explanation / Solution:
Within each set both rows use the same
multiplier k, where right = left × k. Set 1: 5×2 = 10
and 3×2 = 6, so k = 2. Set 2: 4×4 = 16 and 2×4 =

8, so k = 4. Set 3: 3×5 = 15, so k = 5. Then ? × 5 = 10, hence ? = 2.

Question 54

Find the missing number in the 3 × 3 grid.
39
24
?
76
35
27
58
42
32

Options:

- (A) 16
- ✅ **(B) 19** *(Correct Answer)*
- (C) 21
- (D) 24

Correct Answer: (B)

Explanation / Solution:
In each row, third number = (product of digits of the first number) − (product of digits of the second number). Row 2: 7×6 − 3×5 = 42 − 15 = 27. Row 3: 5×8 − 4×2 = 40 − 8 = 32. Row 1: 3×9 − 2×4 = 27 − 8 = 19. So the missing number is 19.

Section: English Grammar

Question 55

The intern was accused _____ leaking the test data.

Options:

- (A) for
- ✅ **(B) of** *(Correct Answer)*
- (C) with
- (D) to

Correct Answer: (B)

Explanation / Solution:
The standard collocation is "accused of" + gerund/noun. "Accused for" is a common error in exam English.

Question 56

Neither the team lead nor the developers _____ ready for the client demo.

Options:

- (A) is
- ✅ **(B) are** *(Correct Answer)*
- (C) was
- (D) has

Correct Answer: (B)

Explanation / Solution:
With "neither...nor," the verb agrees with the nearer subject. The nearer subject is "developers" (plural), so the correct verb is "are."

Question 57

By next March, the company _____ the new campus in Pune.

Options:

- (A) will complete
- ✅ **(B) will have completed** *(Correct Answer)*
- (C) has completed
- (D) is completing

Correct Answer: (B)

Explanation / Solution:
"By next March" marks a deadline in the future. The action will already be finished by that point, so the future perfect "will have completed" is required.

Question 58

Identify the part that contains an error:
The quality of these reports leave much to be desired.

Options:

- (A) The quality of
- (B) these reports
- ✅ **(C) leave much to be desired** *(Correct Answer)*
- (D) No error

Correct Answer: (C)

Explanation / Solution:
The subject is "quality"
(singular), not "reports." The verb must be "leaves,"
not "leave."

Question 59

Identify the part that contains an error:
One of my colleague has gone to the Bangalore office for training.

Options:

- ✅ **(A) One of my colleague** *(Correct Answer)*
- (B) has gone
- (C) to the Bangalore office
- (D) No error

Correct Answer: (A)

Explanation / Solution:
"One of" is always followed by a
plural noun. The correct phrase is "one of my colleagues."
The verb "has gone" is already singular and agrees with
"one."

Question 60

Impact of Artificial Intelligence on IT Job

Options:

- ✅ **(A) ** *(Correct Answer)*

Correct Answer: (A)

Explanation / Solution:
Artificial Intelligence (AI) is transforming the IT industry by changing the way people work, develop software, and solve technical problems. AI tools can automate repetitive tasks such as code generation, software testing, data analysis, customer support, and system monitoring. This has increased productivity and helped companies reduce the time required to complete many tasks.

However, the growth of AI has also raised concerns about job displacement. Some routine and repetitive IT roles may experience reduced demand as organizations adopt automation. Employees whose work mainly involves predictable tasks may need to develop new skills to remain competitive.

At the same time, AI is creating new career opportunities. Jobs related to AI engineering, machine learning, data science, cybersecurity, cloud computing, AI testing, and prompt engineering are becoming increasingly important. IT professionals can benefit from AI by learning how to use these technologies effectively rather than viewing them only as a threat.

AI is therefore more likely to change the nature of many IT jobs than simply eliminate them. Human skills such as creativity, communication, critical thinking, problem-solving, and decision-making will continue to be valuable. The future of IT will depend on collaboration between humans and AI. Continuous learning and upskilling will be essential for IT professionals to adapt successfully to this changing workplace.
