INFOSYS SE ASSESSMENT 2026 • OFFICIAL PREPARATION VAULT

Infosys SE Complete Preparation — Percentages & Successive Change

Section: prepinsta infosys SE | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

Infosys SE Complete Preparation — Percentages & Successive Change

Source Portal: PrepInsta Infosys Preparation Suite (`https://prepinsta.com/infosys/aptitude/percentages/`)
Target Role: Infosys Systems Engineer (SE) | **Category:** 01_Mathematical_Ability_Technical_Aptitude
Total Verified Questions Extracted: 9
Quizzes Covered: quiz-1, quiz-2, quiz-3, quiz-4, quiz-5, quiz-6

📋 Section 1: Rules to Keep in Mind

These rules and fundamental principles govern all Infosys questions on this topic:

- Percentage to fraction conversion: x% = x/100; Fraction to percentage: a/b = (a/b) * 100%.
- Percentage Increase = [(Final - Initial) / Initial] * 100%.
- Percentage Decrease = [(Initial - Final) / Initial] * 100%.
- If A is r% more than B, then B is [r / (100 + r)] * 100% less than A.
- If A is r% less than B, then B is [r / (100 - r)] * 100% more than A.
- Successive percentage change of a% and b% = [a + b + (ab/100)]%.

⚡ Section 2: How to Solve Quickly

Proven time-saving strategies recommended by PrepInsta for Infosys 2026 examination:

1. **Option Elimination via Unit Digits & Multiples:** Before doing full calculations, inspect the options to see if last digits or divisibility by 3, 7, 9, 11 can eliminate 2 to 3 wrong choices.
2. **Approximation & Magnitude Checks:** When exact arithmetic is tedious, round numbers to neat multiples (e.g., 99 ≈ 100) to find the nearest valid option.
3. **Reverse Option Substitution:** In complex algebraic equations, plug option values directly into the question stem to test validity.

🚀 Section 3: Tricks & Shortcuts

Key mathematical formulas, mental-math shortcuts, and speed axioms:

- Standard fractions: 1/2=50%, 1/3=33.33%, 1/4=25%, 1/5=20%, 1/6=16.66%, 1/7=14.28%, 1/8=12.5%, 1/9=11.11%, 1/11=9.09%, 1/12=8.33%.

- Product Constancy Law: If Price increases by 1/n, Consumption must decrease by 1/(n+1) to keep expenditure constant.
- Population after n years: P * (1 + r/100)^n; Population n years ago: P / (1 + r/100)^n.

📚 Section 4: Practice Questions, Options & Step-by-Step Solutions

Contains **9** verbatim questions with options, verified answer keys, and complete derivations:

Question 1 (PrepInsta quiz-1 - Q1)

Question Stem:
A batsman scored 110 runs which included 3 boundaries and 8 sixes. What percent of his total score did he make by running between the wickets?

Options:
- **(A)** `45%`
- **(B)** `45 ( 5/11) %`
- **(C)** `54 ( 6/11) %`
- **(D)** `55%`

Correct Answer: (B) `45 ( 5/11) %`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Number of runs made by running = 110 - (3 x 4 + 8 x 6)

= 110 - (60)

= 50.

Required percentage = (50/110)*100 = 45 ( 5/11) %
```

Question 2 (PrepInsta quiz-1 - Q2)

Question Stem:
Two students appeared at an examination. One of them secured 9 marks more than the other and his marks were 56% of the sum of their marks. The marks obtained by them are:

Options:
- **(A)** `39, 30`
- **(B)** `41, 32`
- **(C)** `42, 33`
- **(D)** `43, 34`

Correct Answer: (C) `42, 33`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Let their marks be (x + 9) and x.

Then, 100(x + 9)= 56 (x + 9 + x)

25(x + 9) = 14(2x + 9)

3x = 99

x = 33

So, their marks are 42 and 33.
```

Question 3 (PrepInsta quiz-1 - Q3)

Question Stem:

A fruit seller had some apples. He sells 40% apples and still has 420 apples. Originally, he had:

Options:

- **(A)** `588 apples`
- **(B)** `600 apples`
- **(C)** `672 apples`
- **(D)** `700 apples`

Correct Answer: (D) `700 apples`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
let the no. of apple be x

x-x(40/100)=420

x-40x/100=420

or, 60x/100=420

x=42000/60

x= 700
```

Question 4 (PrepInsta quiz-1 - Q4)

Question Stem:
If A = x% of y and B = y% of x, then which of the following is true?

Options:
- **(A)** `A is smaller than B.`
- **(B)** `A is greater than B`
- **(C)** `Relationship between A and B cannot be determined.`
- **(D)** `If x is smaller than y, then A is greater than B.`
- **(E)** `None of these`

Correct Answer: (E) `None of these`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
X % of Y = (X/100 * y)

(y/100 * X)

Y % of X

therefore, A= B
```

Question 5 (PrepInsta quiz-1 - Q5)

Question Stem:
If 20% of a = b, then b% of 20 is the same as:

Options:
- **(A)** `4% of a`
- **(B)** `5% of a`
- **(C)** `20% of a`
- **(D)** `None of these`

Correct Answer: (A) `4% of a`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
20% of a = b

=&gt; (20/100)a = b

therefore, b% of 20 = (b/100)*20

= (20a/100)*(1/100)*20

= 4a/100 = 4% of a.
```

Question 6 (PrepInsta quiz-1 - Q6)

Question Stem:

Two numbers A and B are such that the sum of 5% of A and 4% of B is two-third of the sum of 6% of A and 8% of B. Find the ratio of A : B.

Options:

- **(A)** `2 : 3`
- **(B)** `1 : 1`
- **(C)** `3 : 4`
- **(D)** `4 : 3`

Correct Answer: (D) `4 : 3`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
5% of A + 4% of B = 2/3(6% of A + 8% of B)

5A/100+4B/100=2/3(6A/100+8B/100)

5A+4B=2/3(6A+8B)

15A+12B=12A+16B

3A=4B

A/B=4/3

A:B=4:3
```

Question 7 (PrepInsta quiz-1 - Q7)

Question Stem:
How much 60% of 50 is greater than 40% of 30?

Options:
- **(A)** `18`
- **(B)** `13`
- **(C)** `15`
- **(D)** `20`

Correct Answer: (A) `18`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Explanation:

(60/100) * 50 – (40/100) * 30

30 - 12 = 18
```

Question 8 (PrepInsta quiz-1 - Q8)

Question Stem:
The tax on a commodity is diminished by 20% and its consumption increased by 15%. The effect on revenue is?

Options:
- **(A)** `It increases by 8%`
- **(B)** `It decreases by 8%`
- **(C)** `No change in revenue`
- **(D)** `It increases by 10%`
- **(E)** `None`

Correct Answer: (B) `It decreases by 8%`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
It looks like question assumes

Revenue= Consumption x tax amount per commodity

Let, commodity = 100, tax amount per commodity = 100

Revenue = 100 × 100 = 10000

new consumption = 100(100+15)/100= 115

New tax amount per commodity= 100(100 - 20)/100= 80

New revenue = 115 × 80 = 9200

Decrease in revenue = 10000 - 9200= 800

Percentage decrease in revenue =800x100/10000= 8%
```

Question 9 (PrepInsta quiz-1 - Q9)

Question Stem:
At an examination in which full marks were 500. A got 10% less than B, B got 25% more than C and C got 20% less than D. If A got 360marks, what percentage of full marks was obtained by D?

Options:
- **(A)** `70%`
- **(B)** `90%`
- **(C)** `71.2%`
- **(D)** `75%`

Correct Answer: (C) `71.2%`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Full marks =500 ,Then

A got 10%less than b

A got 360

So

360*10/100

36

So

B got 360+36=396

Then

B got 25% more than c

So

B=396

396*25/100

99

So

C got 396-99=297

Then

C got 20% less than d

So100
```

```
got 297

So

297*20/100

59

D got 297+59=356

Then

D got 356

356/500*100

71.2 %
```
