INFOSYS SE ASSESSMENT 2026 • OFFICIAL PREPARATION VAULT

Infosys SE Complete Preparation — Data Interpretation (Tables, Graphs & Charts)

Section: prepinsta infosys SE | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

Infosys SE Complete Preparation — Data Interpretation (Tables, Graphs & Charts)

Source Portal: PrepInsta Infosys Preparation Suite (`https://prepinsta.com/infosys/aptitude/data-interpretation/`)
Target Role: Infosys Systems Engineer (SE) | **Category:** 01_Mathematical_Ability_Technical_Aptitude
Total Verified Questions Extracted: 10 (Full Question Stems + High-Resolution Figures + Verified Options + Step-by-Step Solutions)
Quizzes Covered: Quiz 1 (Diagnostic Full Mock), Tables, Bar Charts, Line Graphs & Pie Charts

---

📋 Section 1: Rules to Keep in Mind

These rules and fundamental principles govern all Infosys questions on Data Interpretation:

- **Chart Identification & Scaling:** Always check axis labels, units (e.g. Rs. in Crores, tonnes in millions), and base multipliers before starting calculations.
- **Pie Chart Angle-to-Percentage Principle:** A full circular pie chart subtends $360° = 100\%$.
- $1\% = 3.6°$
- $1° = 100 / 360\% = 5 / 18\% \approx 0.2778\%$
- **Percentage Growth / Shift Formula:**

$$\text{Percentage Change} = ((\text{Final Value} - \text{Initial Value}) / (\text{Initial Value})) \times 100$$

- **Ratio Invariance:** When asked for ratios or percentage comparisons between sectors of the same base, compute directly with percentage units or degrees—never waste time converting to absolute figures.
- **Average Calculation:** Sum of category values across all periods divided by the number of periods (N).

⚡ Section 2: How to Solve Quickly

Proven time-saving strategies recommended by PrepInsta for Infosys 2026 examination:

1. **Visual Elimination on Bar & Line Graphs:** Compare relative bar heights or line inclinations visually first. When asked for "second lowest" or "maximum difference", eliminate 3 out of 5 options before calculating.

2. **Degree Summation Shortcut:** In pie charts, add or subtract sector angles first (e.g. $45° - 20° = 25°$), then perform a single conversion to absolute units at the end.
3. **Approximation Method:** Round awkward numbers to convenient benchmarks (e.g. $20 / 340 = 1 / 17 \approx 5.88\% \approx 6\%$) to lock in the closest option immediately.

🚀 Section 3: Tricks & Shortcuts

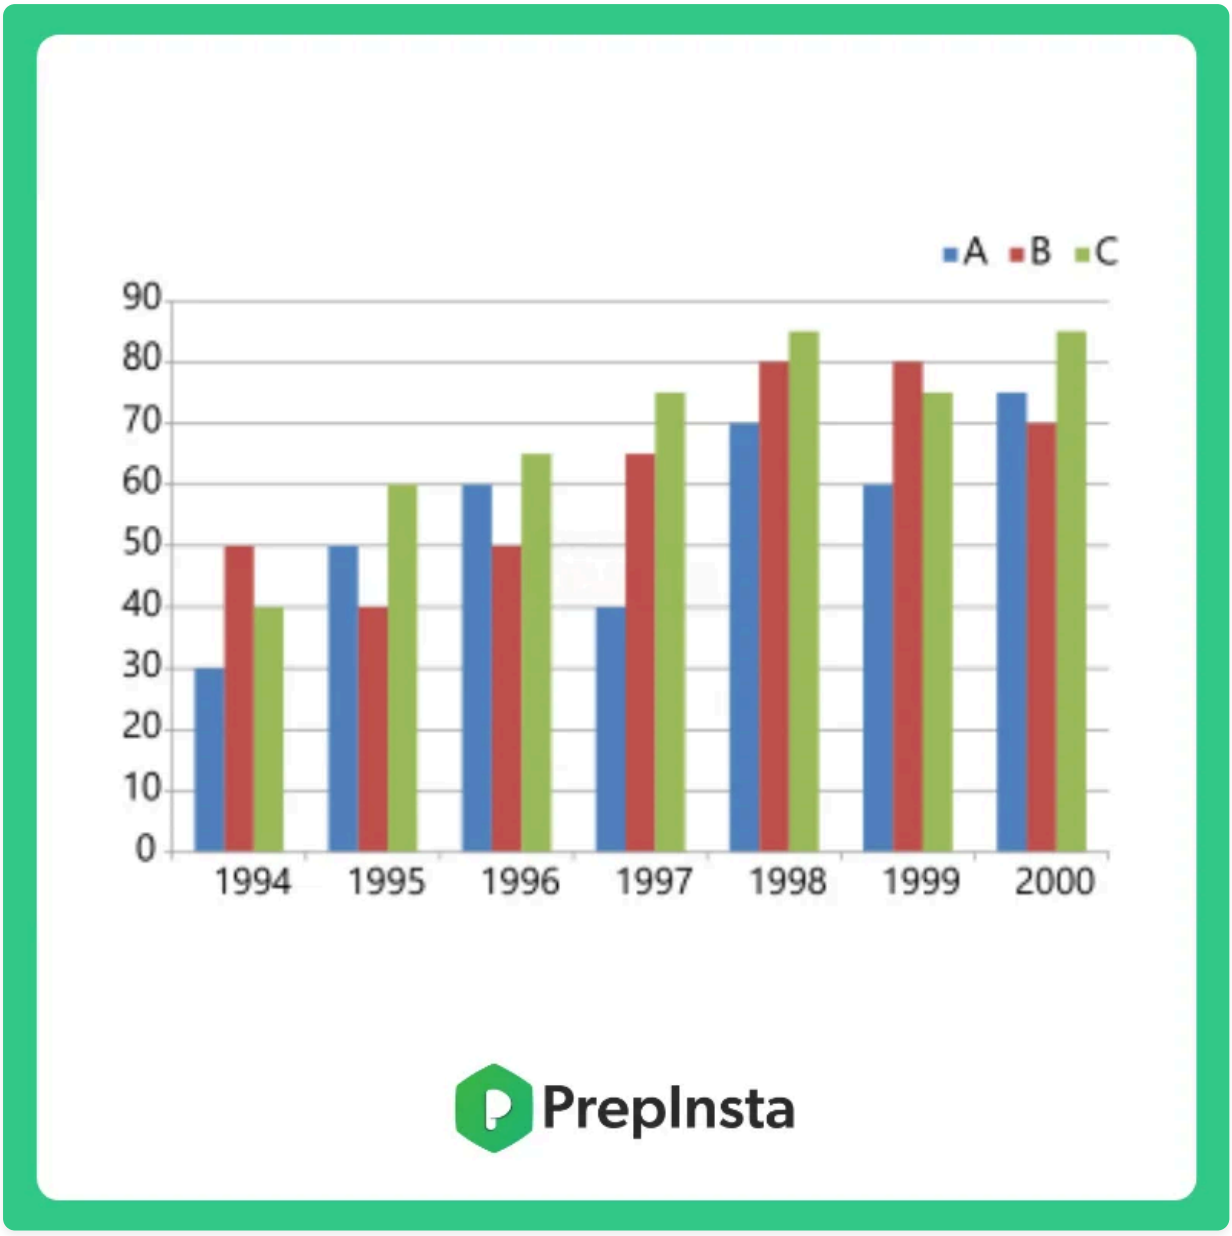

Key mathematical formulas, mental-math shortcuts, and speed axioms:

- **Degree to Percentage Conversion Matrix:**
- $18° = 5\%$
- $36° = 10\%$
- $72° = 20\%$
- $90° = 25\%$
- $180° = 50\%$
- **Cross-Multiplication for Fraction Comparison:** To check if $a / b > c / d$, compute $a \times d$ vs $b \times c$.
- **Avoid Absolute Values in Ratios:** $(\text{Sector A}) / (\text{Sector B}) = (\text{Angle A}) / (\text{Angle B}) = (\text{Percent A}) / (\text{Percent B})$.

📚 Section 4: Practice Questions, Options & Step-by-Step Solutions

Contains **10** verbatim questions with options, verified answer keys, and complete derivations:

📊 Dataset 1: Imports of 3 Companies (Questions 1 & 2)

Data Table (Imports in Rs. Crores):

Year	Company A	Company B	Company C
1993	30	45	50
1994	50	55	60
1995	60	40	70
1996	40	60	50
1997	70	65	80
1998	60	70	65
1999	75	80	90

Question 1 (PrepInsta quiz-1 - Q1)

Question Stem:

Directions: Study the graph above carefully and answer the question:

In which of the following years, the imports made by company 'A' were exactly equal to the average import made by it over the given years?

Options:

- **(A)** `1995`
- **(B)** `1996`
- **(C)** `1997`
- **(D)** `None of the above`

Correct Answer: (D) `None of the above`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Sum of imports of Company A over all 7 years:
= 30 + 50 + 60 + 40 + 70 + 60 + 75 = 385 Rs. Crores.

Average imports of Company A:
= 385 / 7 = 55 Rs. Crores.

Inspecting Company A imports per year:
1993: 30 | 1994: 50 | 1995: 60 | 1996: 40 | 1997: 70 | 1998: 60 | 1999: 75.
None of the given years has imports equal to 55 Rs. Crores.
Therefore, the answer is None of the above.
```

Question 2 (PrepInsta quiz-1 - Q2)

Question Stem:

What was the percentage increase in imports by company 'B' from 1995 to 1999?

Options:

- **(A)** `40%`
- **(B)** `250%`
- **(C)** `100%`
- **(D)** `200%`

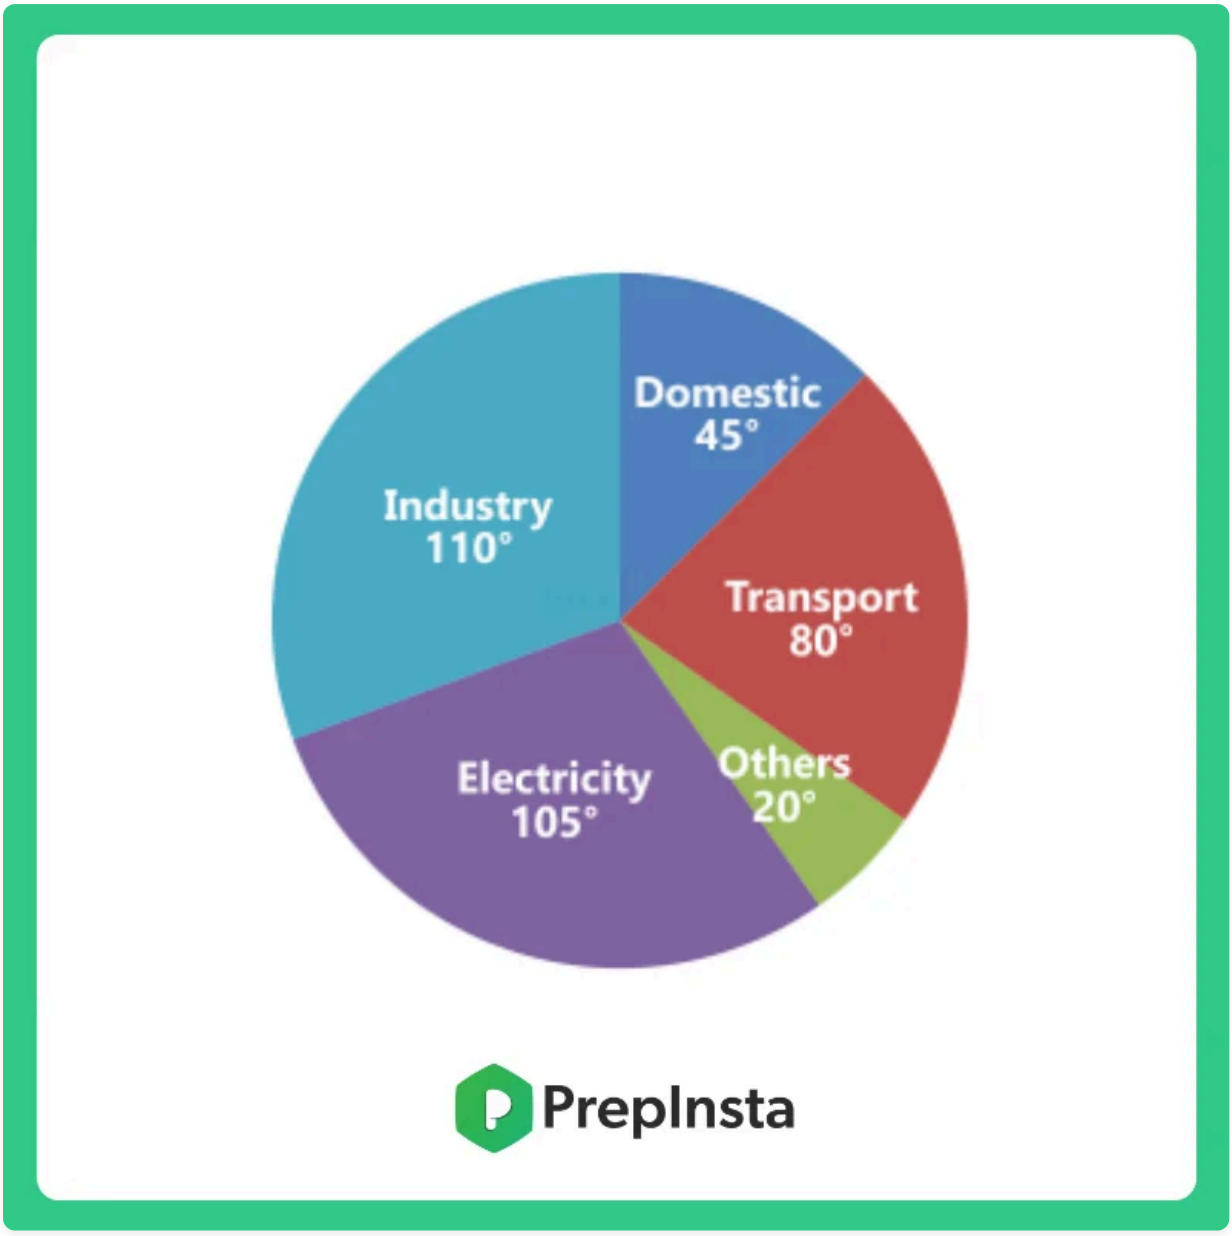

Correct Answer: (C) `100%`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Company B imports in 1995 = 40 Rs. Crores.
Company B imports in 1999 = 80 Rs. Crores.

Percentage Increase:
= [(80 - 40) / 40] * 100
= (40 / 40) * 100
= 100%
```

Dataset 2: Basic Fuel Expenditure of a Country (Questions 3 & 4)

Context: Total fuel energy consumed in 1992 was equivalent to **600 million tonnes of coal**.

- **Domestic:** $45°$
- **Transport:** $110°$
- **Industry:** $105°$
- **Electricity:** $80°$
- **Other Purposes:** $20°$
- **Total Circle:** $45° + 110° + 105° + 80° + 20° = 360°$

Question 3 (PrepInsta quiz-1 - Q3)

Question Stem:

The energy consumed for other purposes is approximately what percentage of total energy consumed for the other four major uses in 1992?

Options:

- **(A)** `20%`
- **(B)** `6%`
- **(C)** `5%`
- **(D)** `None of the above`

Correct Answer: (B) `6%`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Energy used for other purposes = 20 degrees.
Total energy used for the 4 major areas:
= 110° (Transport) + 105° (Industry) + 45° (Domestic) + 80° (Electricity) = 340 degrees.

Required percentage:
= (20 / 340) * 100
= (2 / 34) * 100
= 100 / 17
= 5.88% ≈ 6%
```

Question 4 (PrepInsta quiz-1 - Q4)

Question Stem:

What is the difference between energy used for domestic purposes and other purposes in the country in 1992?

Options:

- **(A)** `35.33 million tonnes of coal`
- **(B)** `41.67 million tonnes of coal`
- **(C)** `52.75 million tonnes of coal`
- **(D)** `Can not be determined`

Correct Answer: (B) `41.67 million tonnes of coal`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Difference in degrees between Domestic and Other purposes:
= 45° - 20° = 25°.

Since 360° represents 600 million tonnes of coal:
Value of 25°:
= (600 / 360) * 25
= (5 / 3) * 25
= 125 / 3
= 41.67 million tonnes of coal.
```

📋 Dataset 3: Monthly Employee Income & Bonus Structure (Questions 5 & 6)

Source of income	A	B	C	D	E
Salary	400	200	700	300	400
Bonus	80	40	150	80	100
Overtime	180	70	200	170	200
Arrears	200	180	400	140	250
Miscellaneous	40	10	50	10	50
Total	**900**	**500**	**1500**	**700**	**1000**

Data Table:

Employee	Basic Salary	Overtime	Bonus	Arrears	Total Income
A	420	180	80	200	**900**
B	300	100	40	60	**500**
C	800	250	150	300	**1500**
D	350	120	80	150	**700**
E	500	200	100	200	**1000**

Question 5 (PrepInsta quiz-1 - Q5)

Question Stem:

Who among the following employees earns the maximum bonus in comparison to his total income?

Options:

- **(A)** `A`
- **(B)** `B`
- **(C)** `C`
- **(D)** `D`

Correct Answer: (D) `D`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Calculate Bonus as % of Total Income for each employee:
- Employee A: (80 / 900) * 100 = 8.88%
- Employee B: (40 / 500) * 100 = 8.00%
- Employee C: (150 / 1500) * 100 = 10.00%
- Employee D: (80 / 700) * 100 = 11.42%
- Employee E: (100 / 1000) * 100 = 10.00%

Employee D earns the maximum bonus in comparison to his total income (11.42%).
```

Question 6 (PrepInsta quiz-1 - Q6)

Question Stem:

The income from overtime is what percent of the income from arrears in the case of employee A?

Options:

- **(A)** `90%`
- **(B)** `80%`
- **(C)** `75%`
- **(D)** `40%`

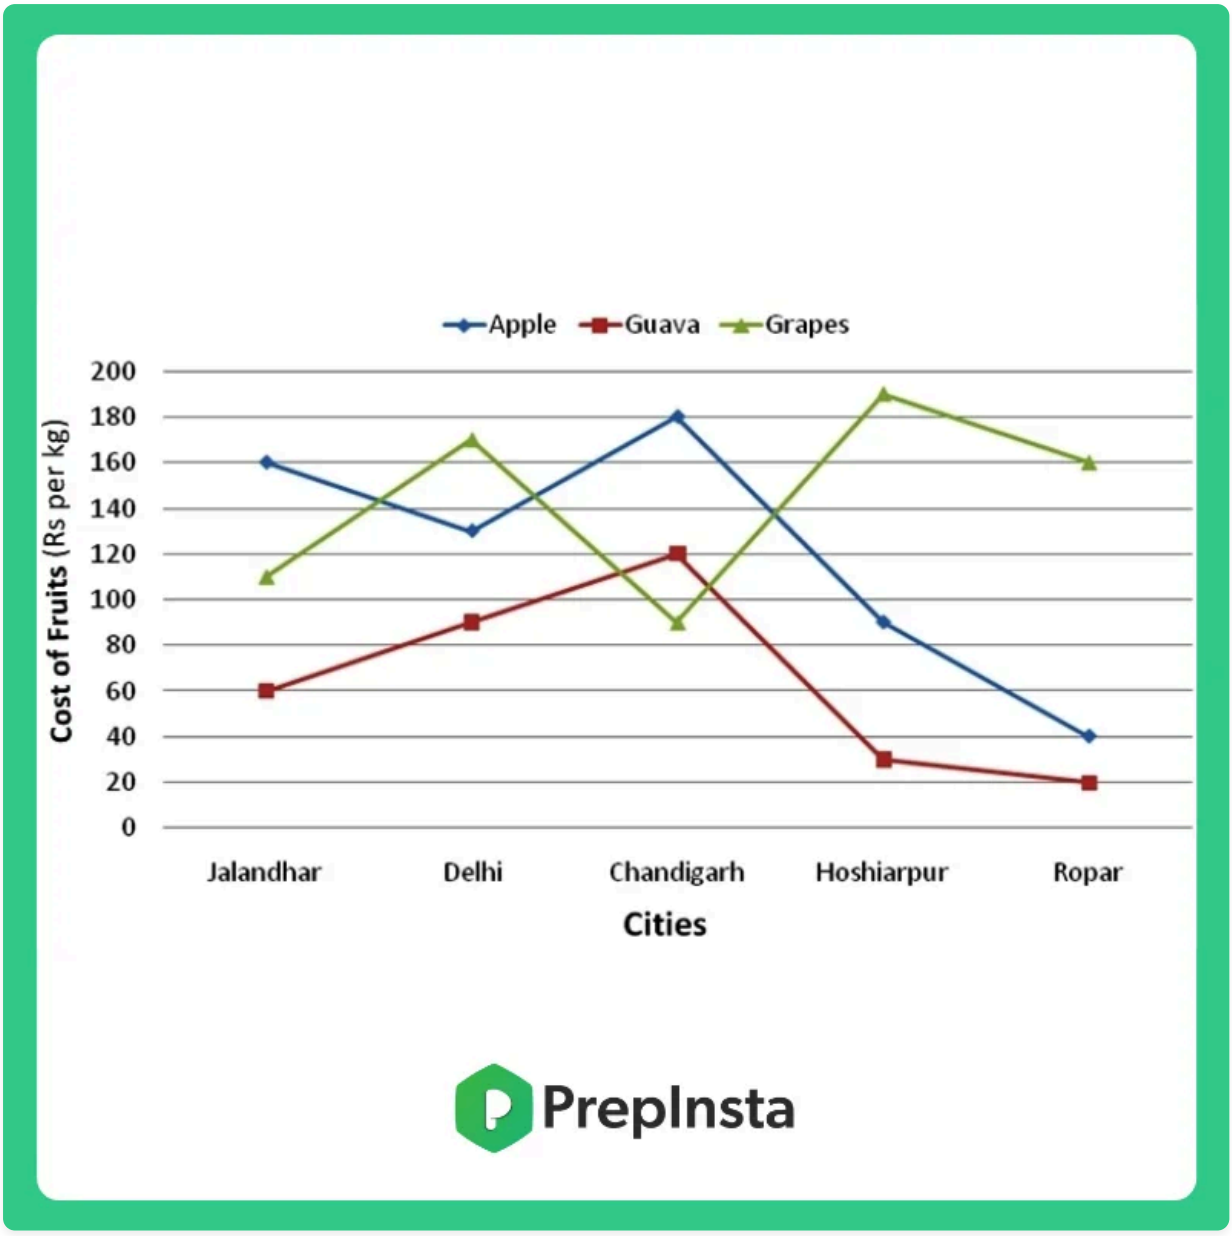

Correct Answer: (A) `90%`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
For Employee A:
- Overtime income = Rs. 180
- Arrears income = Rs. 200

Required Percentage:
= (180 / 200) * 100
= (9 / 10) * 100
= 90%
```

🍓 Dataset 4: Cost of Fruits Across Indian Cities (Questions 7 & 8)

Fruit Price Schedule (Rs. per kg):

City	Apple (Rs/kg)	Guava (Rs/kg)	Grapes (Rs/kg)
Jalandhar	160	60	80
Delhi	130	90	110
Chandigarh	180	120	90
Hoshiarpur	90	30	70
Ropar	40	20	50

Question 7 (PrepInsta quiz-1 - Q7)

Question Stem:

In which city is ‘the difference between the cost of 1 kg of apple and the cost of 1 kg of guava second lowest?

Options:

- **(A)** `Jalandhar`
- **(B)** `Delhi`
- **(C)** `Chandigarh`
- **(D)** `Ropar`

Correct Answer: (B) `Delhi`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Compute |Apple - Guava| in each city:
- Jalandhar: 160 - 60 = Rs. 100
- Delhi: 130 - 90 = Rs. 40
- Chandigarh: 180 - 120 = Rs. 60
- Hoshiarpur: 90 - 30 = Rs. 60
- Ropar: 40 - 20 = Rs. 20

Ascending order of differences:
1. Ropar: Rs. 20 (Lowest)
2. Delhi: Rs. 40 (Second Lowest)
3. Chandigarh & Hoshiarpur: Rs. 60
4. Jalandhar: Rs. 100

The second lowest difference is in Delhi.
```

Question 8 (PrepInsta quiz-1 - Q8)

Question Stem:

The cost of 1 kg of guava in Jalandhar is approximately what percent of the cost of 2 kg of grapes in Chandigarh?

Options:

- **(A)** `66%`
- **(B)** `24%`
- **(C)** `28%`
- **(D)** `34%`

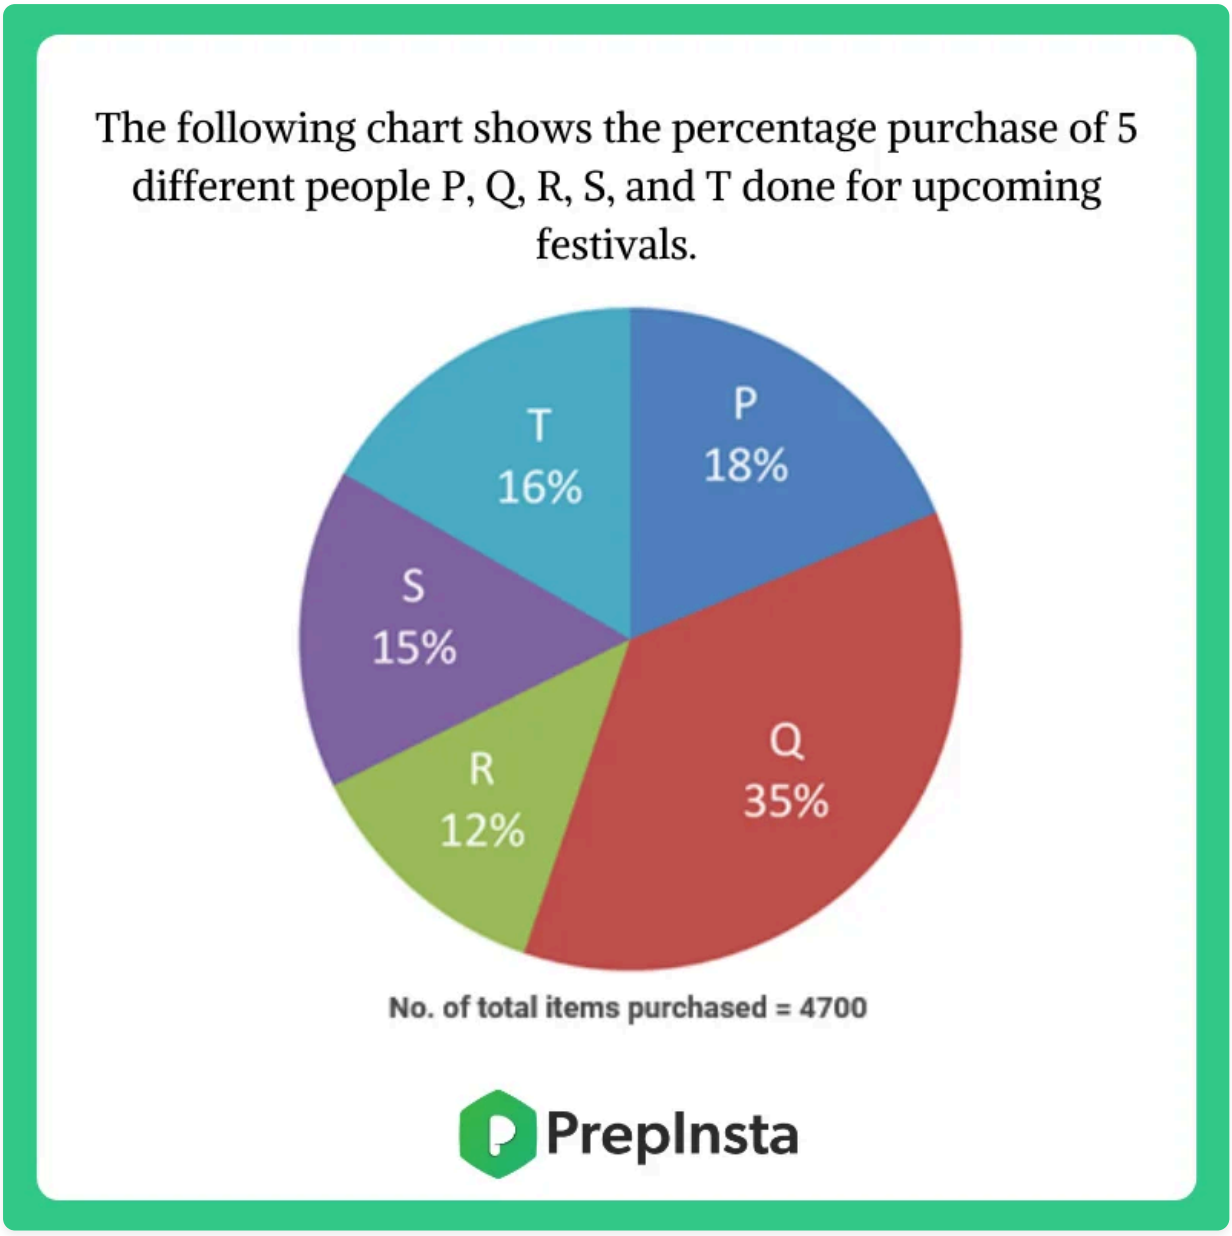

Correct Answer: (D) `34%`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Cost of 1 kg of guava in Jalandhar = Rs. 60
Cost of 1 kg of grapes in Chandigarh = Rs. 90
Cost of 2 kg of grapes in Chandigarh = 2 * 90 = Rs. 180

Required Percentage:
= (60 / 180) * 100
= (1 / 3) * 100
= 33.33% ≈ 34%
```

🛍️ Dataset 5: Total Item Purchases by Stores (Questions 9 & 10)

Context: Total item purchase made across all 5 stores = **4,700 items**.

- **Store P:** 18%
- **Store Q:** 35%
- **Store R:** 12%
- **Store S:** 15%
- **Store T:** 16%
- **Total:** $18\% + 35\% + 12\% + 15\% + 16\% = 100\%$

Question 9 (PrepInsta quiz-1 - Q9)

Question Stem:

What is the difference between the total purchase of items made by R and T together and the total purchase of items made by P and S together?

Options:

- **(A)** `237`
- **(B)** `235`
- **(C)** `335`
- **(D)** `245`

Correct Answer: (B) `235`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Total purchase % by P and S together:
= 18% + 15% = 33%

Total purchase % by R and T together:
= 12% + 16% = 28%

Difference in percentage:
= 33% - 28% = 5% of total purchase.

Required Difference:
= 5% of 4700
= (5 / 100) * 4700
= 5 * 47
= 235 items.
```

Question 10 (PrepInsta quiz-1 - Q10)

Question Stem:

What is the ratio of the total purchase made by P, R, and T together to that of S and Q together?

Options:

- **(A)** `23: 25`
- **(B)** `25: 27`
- **(C)** `31: 33`
- **(D)** `13: 15`

Correct Answer: (A) `23: 25`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Total percentage for (P + R + T):
= 18% + 12% + 16% = 46%

Total percentage for (S + Q):
= 15% + 35% = 50%

Required Ratio:
= 46% : 50%
= 46 / 50
= 23 / 25
= 23: 25.
```
