INFOSYS SE ASSESSMENT 2026 • OFFICIAL PREPARATION VAULT

Infosys SE Complete Preparation — Syllogisms & Deductive Logic

Section: prepinsta infosys SE | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

Infosys SE Complete Preparation — Syllogisms & Deductive Logic

Source Portal: PrepInsta Infosys Preparation Suite (`https://prepinsta.com/infosys/logical/syllogisms/`)
Target Role: Infosys Systems Engineer (SE) | **Category:** 02_Logical_Reasoning_Ability
Total Verified Questions Extracted: 10
Quizzes Covered: quiz-1, quiz-2, quiz-3, quiz-4, quiz-5

📋 Section 1: Rules to Keep in Mind

These rules and fundamental principles govern all Infosys questions on this topic:

- Universal Affirmative (A): All S are P (100% distribution of S).
- Universal Negative (E): No S is P (100% distribution of both S and P).
- Particular Affirmative (I): Some S are P (neither distributed).
- Particular Negative (O): Some S are not P (P distributed).
- Rules of Deduction: Two negative premises yield no valid conclusion; Two particular premises yield no valid conclusion.
- Either-Or Condition: Requires two complementary conclusions with same subjects and predicates (Some + No OR All + Some Not), where neither follows individually.
- Number Series - Coding and Number Series - Letter and Symbol Series - Logical Sequence of Words - Analogy and Classification Pattern - Statements and Conclusions - Statements and Assumptions - Data Sufficiency - Visual Reasoning - Cube and Cuboid

⚡ Section 2: How to Solve Quickly

Proven time-saving strategies recommended by PrepInsta for Infosys 2026 examination:

1. **Option Elimination via Unit Digits & Multiples:** Before doing full calculations, inspect the options to see if last digits or divisibility by 3, 7, 9, 11 can eliminate 2 to 3 wrong choices.
2. **Approximation & Magnitude Checks:** When exact arithmetic is tedious, round numbers to neat multiples (e.g., 99 ≈ 100) to find the nearest valid option.
3. **Reverse Option Substitution:** In complex algebraic equations, plug option values directly into the question stem to test validity.

🚀 Section 3: Tricks & Shortcuts

Key mathematical formulas, mental-math shortcuts, and speed axioms:

- Venn Diagram minimum overlap principle: Draw diagrams with least commitment; if a conclusion fails in even one valid diagram, it does not follow universally.
- Possibility conclusions: If a scenario can be drawn without violating any given premise, the 'is a possibility' conclusion is TRUE.
- Different Methods to Solve Syllogism Questions Quickly
- There are three different methods to solve Syllogims which are –
- Tick and Cross Method
- Verbal Method –
- It's a very simple one, try to make logical deductions in your mind from Assumptions (Premises) and match which conclusion is true.
- All cats are animals.
- From these, we can easily conclude that since all tigers are necessarily cats and all Cats are necessarily animals. So, all tigers are animals.
- Conclusion- All Tigers are Animals.
- How to solve Syllogism Question quickly :
- Venn Diagram Method –
- There are four categories to remember to solve using Venn's Diagram.
- Statement – All A's are BExample – All Mangoes are Fruits

📑 Section 4: Practice Questions, Options & Step-by-Step Solutions

Contains **10** verbatim questions with options, verified answer keys, and complete derivations:

Question 1 (PrepInsta quiz-1 - Q1)

Question Stem:
Directions: In the following question two statements are given and these statements are followed by two conclusions numbered (1) and (2). You have to take the given two statements to be true even if they seem to be at variance from commonly known facts. Read the conclusions and then decide which of the given conclusions logically follows from the two given statements, disregarding commonly known facts.

Statements:

Some papers are pens.

All pencils are pens.

Conclusions:

1. Some pens are pencils.
2. Some pens are papers.

Options:

- **(A)** `Only (1) conclusion follows`
- **(B)** `Only (2) conclusion follows`
- **(C)** `Both (1) and (2) follow`
- **(D)** `Either (1) or (2) follows`
- **(E)** `Neither (1) nor (2) follows`

Correct Answer: (C) `Both (1) and (2) follow`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Tick &amp;amp; cross Method :

Conclusions: 1. Some pens are pencils. - Possible - Because All pencils are pens.

Conclusions: 2. Some pens are papers. - Possible - Because Some papers are pens.

OR

Note: Here, a conclusion is definite if it can be shown in a diagram drawn with least-possibilities. If a conclusion can’t be shown in least-possibilities diagram then the conclusion is possible but not definite.

On drawing least-possibilities Venn-diagram:

Conclusions:

1. Some pens are pencils. ⇒ It’s, definitely, true.

2. Some pens are papers. ⇒ It’s, definitely, true.

Hence, both 1 and 2 follow
```

Question 2 (PrepInsta quiz-1 - Q2)

Question Stem:

All birds are animals.

All animals are four legged.

```
Implications:
```

a. All animals which are four legged are birds.

b. All birds are four legged

c. Some birds not are four legged

d. Some birds are animals but not four legged.

Options:

- **(A)** `a and b`
- **(B)** `b and c`
- **(C)** `only b`
- **(D)** `only d`
- **(E)** `None is true`

Correct Answer: (C) `only b`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
From the given conditions we draw the following least possible venn diagram:

Conclusions: Using tick &amp;amp; cross.

a. All animals which are four legged are birds. (False as it is not definite)

b. All birds are four legged.  (Clearly true as it is definite taking middle term as animal)

c. Some birds are not four legged (False as it is not definite also no negative statement.)

d. Some birds are animals but not four legged (False as it is not definite also if all statements
are positive then conclusion can never be negative)

Thus, conclusion (b) is true.
```

Question 3 (PrepInsta quiz-1 - Q3)

Question Stem:

Directions: Based on the statement in the question, mark the most logical pair of statement that follows.

If one gets lucky. One will win the prize.

A. Ramesh did not get the prize

B. Ramesh got the prize

C. Ramesh didn't get lucky

D. Ramesh got lucky

Options:

- **(A)** `a, c and b,d`

- **(B)** `c, a`
- **(C)** `b, d`
- **(D)** `d, c`
- **(E)** `None of these`

Correct Answer: (A) `a, c and b,d`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
If one gets lucky. One will win the prize. ⇒ All lucky win the prize.

which also means if one does not get lucky, one will not win the prize.

Clearly, the logical order is ‘ac’ ⇒ Ramesh did not get the prize then Ramesh didn’t get lucky.
but the logical order 'bd' =&gt; Ramesh Got lucky, Ramesh won the prize.
```

Question 4 (PrepInsta quiz-1 - Q4)

Question Stem:

Directions: Based on the statement in the question, mark the most logical pair of statement that follows.

If one succeeds. One makes merry.

A. One did not succeed

B. One did not make merry.

C. One succeeded

D. One made merry

Options:

- **(A)** `b, c`
- **(B)** `a,b and c, d`
- **(C)** `a, b`
- **(D)** `a, c`
- **(E)** `None of these`

Correct Answer: (B) `a,b and c, d`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
If one succeeds. One makes merry. ⇒ All succeed are Merry.

⇒ One succeeded &amp;amp; one made merry are logical pairs. but vice-vera is also correct according
to the statement.

therefore a,b and c,d both are correct.
```

Question 5 (PrepInsta quiz-1 - Q5)

Question Stem:
Directions: In the question given below, statements 1 and 2 are followed by conclusions I and II.

Taking the statements to be right although they may seem at variance with commonly accepted facts, mark your answer.

Statements:

1. Brown is red and blue is green.
2. Green is pink and yellow is red.

Conclusions:

I. Yellow is brown.

II. Pink is blue.

Options:
- **(A)** `Only conclusion I follows.`
- **(B)** `Only conclusion II follows.`
- **(C)** `Both I and II follow.`
- **(D)** `Neither I nor II follows.`
- **(E)** `Either I or II follows.`

Correct Answer: (C) `Both I and II follow.`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Note: Here, a conclusion is definite if it can be shown in a diagram drawn with least-possibilities. If a conclusion can’t be shown in least-possibilities diagram then the conclusion is possible but not definite.

On drawing least-possibilities Venn-diagram:

Conclusions:

I. Yellow is brown. → It’s, clearly, true.

II. Pink is blue. → It’s, clearly, true.

Hence, both I and II follow.
```

Question 6 (PrepInsta quiz-1 - Q6)

Question Stem:
Directions: In the question given below, statements 1 and 2 are followed by conclusions I and II. Taking the statements to be right although they may seem at variance with

commonly accepted facts, mark your answer.

Statements:

1. Some stones are shells.
2. All shells are pearls.

Conclusions:

I. Some stones are pearls.

II. All pearls are shells.

Options:

- **(A)** `Only conclusion I follows.`
- **(B)** `Only conclusion II follows`
- **(C)** `Both I and II follow.`
- **(D)** `Neither I nor II follows.`
- **(E)** `Either I or II follows`

Correct Answer: (A) `Only conclusion I follows.`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Note: Here, a conclusion is definite if it can be shown in a diagram drawn with least-possibilities. If a conclusion can’t be shown in least-possibilities diagram then the conclusion is possible but not definite.

On drawing least-possibilities Venn-diagram:

Conclusions:

I. Some stones are pearls. ⇒ It’s, definitely, true.

II. All pearls are shells. ⇒ It’s possible but not definite, hence false.

Hence, only I follows.

OR

Tick &amp;amp; cross method :

Conclusions: I. Some stones are pearls. - Possible , taking middle term as shells.

Conclusions: II All pearls are shells. - Not possible, All shells are pearls, vice versa not true.
```

Question 7 (PrepInsta quiz-1 - Q7)

Question Stem:
Directions: In the question given below, statements 1 and 2 are followed by conclusions I and II. Taking the statements to be right although they may seem at variance with commonly accepted facts, mark your answer.

Statements:

1. Some buds are leaves.
2. Some leaves are red.

Conclusions:

I. Some buds are red.

II. Some leaves are not buds.

Options:
- **(A)** `Neither I nor II follows.`
- **(B)** `Only conclusion I follows.`
- **(C)** `Both I and II follow.`
- **(D)** `Only conclusion II follows.`
- **(E)** `Either I or II follows.`

Correct Answer: (D) `Only conclusion II follows.`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Note: Here, a conclusion is definite if it can be shown in a diagram drawn with least-possibilities. If a conclusion can’t be shown in the least-possibilities diagram then the conclusion is possible but not definite.

On drawing least-possibilities Venn-diagram:

Conclusions:

I. Some buds are red. ⇒ It’s possible but not definite, hence false.

II. Some leaves are not buds. ⇒ According to the Venn diagram if some buds are leaves then it is understood that some buds are not leaves as well.

Therefore only conclusion II follows.
```

Question 8 (PrepInsta quiz-1 - Q8)

Question Stem:
Directions: In the question given below, statements 1 and 2 are followed by conclusions I and II. Taking the statements to be right although they may seem at variance with commonly accepted facts, mark your answer.

Statements:

1. All hands are machines.
2. All machines are wheels.

Conclusions:

I. All wheels are hands.

II. All hands are wheels.

Options:

- **(A)** `Only conclusion I follows`
- **(B)** `Only conclusion II follows.`
- **(C)** `Both I and II follow.`
- **(D)** `Neither I nor II follows.`
- **(E)** `Either I or II follows.`

Correct Answer: (B) `Only conclusion II follows.`

PrepInsta Detailed Explanation & Mathematical Derivation:

Note: Here, a conclusion is definite if it can be shown in a diagram drawn with least-possibilities. If a conclusion can’t be shown in least-possibilities diagram then the conclusion is possible but not definite.

On drawing least-possibilities Venn-diagram:

Conclusions:

I. All wheels are hands. ⇒ It’s possible but not definite, hence false.

II. All hands are wheels. ⇒ It’s definitely true.

Hence, only II follows.

OR

TICK & CROSS METHOD :

Taking Statements:

1. All hands are machines.

2. All machines are wheels.

Middle term - machines, we ll get All hands are wheel as a conclusion.

Hence, Conclusions: II. All hands are wheels is correct.

Question 9 (PrepInsta quiz-1 - Q9)

Question Stem:

Which of the following statements drawn from the given statements are correct?

Statements:

I. All watches sold in that shop are of high standard.

II. Some of the HMT watches are sold in that shop

Conclusions:

a) All watches of high standard were manufactured by HMT.

b) Some of the HMT watches are of high standard.

c) None of the HMT watches is of high standard.

d) Some of the HMT watches of high standard are sold in that shop.

Options:

- **(A)** `Only (a) is true`
- **(B)** `Only (b) is true`
- **(C)** `Only (c) is true`
- **(D)** `Both (a) and (c) are true`
- **(E)** `Both (b) and (d) are true`

Correct Answer: (E) `Both (b) and (d) are true`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
From the given statements we draw the following least possible Venn diagram:

Conclusions:

a) All watches of high standard were manufactured by HMT → false as it’s possible but not
definite.

b) Some of the HMT watches are of the high standard → clearly true.

c) None of the HMT watches is of the high standard → clearly false.

d) Some of the HMT watches of high standard are sold in that shop→ clearly true. Hence only b and
d follow.
```

Question 10 (PrepInsta quiz-1 - Q10)

Question Stem:

All men are vertebrates.

Some mammals are vertebrates.

Which of the following conclusions given in the options are drawn from the above statement is correct?

Options:

- **(A)** `All men are mammals`
- **(B)** `All mammals are men`
- **(C)** `Some vertebrates are mammals.`
- **(D)** `All are correct`
- **(E)** `None of these`

Correct Answer: (C) `Some vertebrates are mammals.`

PrepInsta Detailed Explanation & Mathematical Derivation:

From the given statements we draw the following least possible Venn diagram:

From the given conclusions only ‘Some vertebrates are mammals’ is true as it is definite but the other are not definite.
