INFOSYS SE ASSESSMENT 2026 • OFFICIAL PREPARATION VAULT

Infosys SE Complete Preparation — Number & Letter Series Patterns

Section: prepinsta infosys SE | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

Infosys SE Complete Preparation — Number & Letter Series Patterns

Source Portal: PrepInsta Infosys Preparation Suite (`https://prepinsta.com/infosys/logical/number-series/`)
Target Role: Infosys Systems Engineer (SE) | **Category:** 02_Logical_Reasoning_Ability
Total Verified Questions Extracted: 10
Quizzes Covered: quiz-1, quiz-2, quiz-3, quiz-4, quiz-5, quiz-6, quiz-7

📋 Section 1: Rules to Keep in Mind

These rules and fundamental principles govern all Infosys questions on this topic:

- Difference Series: Constant difference, AP difference, Difference of differences (2nd order).
- Multiplication/Division Series: *n, /n, *(n+1), *(n-1).
- Powers Series: n^2, n^3, n^2 +/- 1, n^3 +/- 1, n^3 +/- n.
- Alternate Series: Two interleaved series operating on odd and even indices independently.
- Fibonacci Series: Each term is the sum of preceding terms.
- Number Series - Coding and Number Series - Letter and Symbol Series - Logical Sequence of Words - Analogy and Classification Pattern - Statements and Conclusions - Statements and Assumptions - Data Sufficiency - Visual Reasoning - Cube and Cuboid

⚡ Section 2: How to Solve Quickly

Proven time-saving strategies recommended by PrepInsta for Infosys 2026 examination:

1. **Option Elimination via Unit Digits & Multiples:** Before doing full calculations, inspect the options to see if last digits or divisibility by 3, 7, 9, 11 can eliminate 2 to 3 wrong choices.
2. **Approximation & Magnitude Checks:** When exact arithmetic is tedious, round numbers to neat multiples (e.g., 99 ≈ 100) to find the nearest valid option.
3. **Reverse Option Substitution:** In complex algebraic equations, plug option values directly into the question stem to test validity.

🚀 Section 3: Tricks & Shortcuts

Key mathematical formulas, mental-math shortcuts, and speed axioms:

- If numbers grow very fast, suspect multiplication or powers; if slow, compute step differences.
- Calculate first differences immediately; 90% of Infosys series resolve at difference or second difference.
- Number Series - Coding and Number Series - Letter and Symbol Series - Logical Sequence of Words - Analogy and Classification Pattern - Statements and Conclusions - Statements and Assumptions - Data Sufficiency - Visual Reasoning - Cube and Cuboid

📚 Section 4: Practice Questions, Options & Step-by-Step Solutions

Contains **10** verbatim questions with options, verified answer keys, and complete derivations:

Question 1 (PrepInsta quiz-1 - Q1)

Question Stem:
8. 1, 1, 2, 3, 6, 7, 10, 11, ?

Options:
- **(A)** `12`
- **(B)** `13`
- **(C)** `14`
- **(D)** `15`

Correct Answer: (C) `14`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
The given pattern is (Prime number - consecutive numbers

starting with 1).

1 = 2 – 1

1 = 3 – 2

2 = 5 – 3

3 = 7 – 4

6 = 11 – 5

7 = 13 – 6

10 = 17 – 7

11 = 19 – 8

14 = 23 – 9
```

Question 2 (PrepInsta quiz-1 - Q2)

Question Stem:

8 11 21 15 18 21 22

Options:

- **(A)** `25 18`
- **(B)** `25 21`
- **(C)** `25 29`
- **(D)** `24 21`
- **(E)** `22 26`

Correct Answer: (B) `25 21`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
This is an alternating addition series, with a random number, 21, interpolated as every third
number. The addition series alternates between adding 3 and adding 4. The number 21 appears after
each number arrived at by adding 3.
```

Question 3 (PrepInsta quiz-1 - Q3)

Question Stem:
What is the 8th term in the series 1, 4, 9, 18, 35, 68, . . .

Options:
- **(A)** `262`
- **(B)** `148`
- **(C)** `342`
- **(D)** `112`

Correct Answer: (A) `262`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
As we see the series 1,4,9,18......

we see that

20 = 1

which is first term

2²+0 = 4

which is second term

2³+1 = 9

third term

2⁴+2 = 18

fourth term

2^5 +3 = 35

fifth term

2^6+4 = 68

sixth term

2^7+5 = 133

seventh term

2^8+6 = 262

eighth term so answer is 262
```

Question 4 (PrepInsta quiz-1 - Q4)

Question Stem:
Look at this series: 2, 6, 18, 54, ... What number should come next?

Options:
- **(A)** `108`
- **(B)** `148`
- **(C)** `162`
- **(D)** `216`

Correct Answer: (C) `162`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Since 2*3=6, 6*3=18, 18*3=54 so 54*3=162. Therefore next number is 162
```

Question 5 (PrepInsta quiz-1 - Q5)

Question Stem:
Look at this series: F2, __, D8, C16, B32, ... What number should fill the blank?

Options:
- **(A)** `A16`
- **(B)** `G4`
- **(C)** `E4`
- **(D)** `E3`

Correct Answer: (C) `E4`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
The letters decrease by 1; the numbers are multiplied by 2.

Hence, E4
```

Question 6 (PrepInsta quiz-1 - Q6)

Question Stem:
Look at this series: V, VIII, XI, XIV, __, XX, ... What number should fill the blank?

Options:
- **(A)** `IX`
- **(B)** `XXIII`
- **(C)** `XV`
- **(D)** `XVII`

Correct Answer: (D) `XVII`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
This is a simple addition series; each number is 3 more than the previous number.
```

Question 7 (PrepInsta quiz-1 - Q7)

Question Stem:
Look at this series: 4, 7, 25, 10, __, 20, 16, 19, ... What number should fill the blank?

Options:
- **(A)** `13`
- **(B)** `15`
- **(C)** `20`
- **(D)** `28`

Correct Answer: (A) `13`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
Two series alternate here, with every third number following a different pattern. In the main series, 3 is added to each number to arrive at the next. In the alternating series, 5 is subtracted from each number to arrive at the next.
```

Question 8 (PrepInsta quiz-1 - Q8)

Question Stem:
6 10 14 18 22 26 30 ? ?

Options:
- **(A)** `36 40`
- **(B)** `33 37`
- **(C)** `38 42`
- **(D)** `34 36`
- **(E)** `34 38`

Correct Answer: (E) `34 38`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
This simple addition series adds 4 to each number to arrive at the next.
```

Question 9 (PrepInsta quiz-1 - Q9)

Question Stem:
2,5,10,17,?,41

Options:
- **(A)** `44`
- **(B)** `28`

- **(C)** `31`
- **(D)** `23`

Correct Answer: (B) `28`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
There is a simple pattern in this sequence: it begins with 0

and then the prime numbers are added to consecutive

elements in ascending order

I.e., 2 is added to the first element

3 is added to second element

5 is added to third element and so on.

So, 0+2 = 2

2+ 3 = 5

5+ 5 = 10

10+ 7 = 17

17+ 11 = 28

28+ 13 = 41
```

Question 10 (PrepInsta quiz-1 - Q10)

Question Stem:
1,3,5,9,15,?,41,?

Options:
- **(A)** `31 & 53`
- **(B)** `15 & 21`
- **(C)** `27 & 81`
- **(D)** `25 and 67`

Correct Answer: (D) `25 and 67`

PrepInsta Detailed Explanation & Mathematical Derivation:

```
( Sum of two previous digits + 1 )= Next digit in series.
```
