🏆 Infosys SE Elite Crack Vault — 06 Critical Reasoning and Deductive Verbal Logic Elite

🎯 Infosys Systems Engineer (SE) | 📊 5 Questions | 📅 5-6 Nov 2026 Drive | ⚡ 100% Pure SE Verified

Problem 1 • Identifying Logical Inferences

🔥 MUST-SOLVE

ID: Q1 | Source: Infosys PYQ | Level: Infosys SE Standard

Question ID: `INFY-SET1-18`

- Figure:

Critical Reasoning (Q18–20).

Statement for Q18–19:

Many cities are banning single-use plastic to reduce pollution.

Q18. Which of the following can be inferred?
(a) Plastic is the only cause of pollution.
(b) Plastic contributes to pollution.
(c) Pollution cannot be controlled.
(d) Plastic is beneficial for the environment.

- **(a)** Plastic is the only cause of pollution.
- **(b)** Plastic contributes to pollution.
- **(c)** Pollution cannot be controlled.
- **(d)** Plastic is beneficial for the environment.

Logical Analysis

- If cities ban single-use plastic specifically *to reduce pollution*, it directly follows that plastic must be a contributing factor to pollution.
- Option (a) makes an unsubstantiated extreme claim (*only cause*).
- Option (c) contradicts the premise of action.
- Option (b) is a direct, necessary, and conservative deduction.

✓ **Verified Answer:** Option **(B)** $$\mathbf{\text{Verified Answer: (b) Plastic contributes to pollution.}}$$

Problem 2 • Logical Course of Action

MUST-SOLVE

ID: Q2 | Source: Infosys PYQ | Level: Infosys SE Standard

Question ID: `INFY-SET1-19`

- **Figure:**

Q19. Which is the best course of action?
(a) Encourage use of eco-friendly alternatives.
(b) Increase plastic production.
(c) Stop recycling efforts.
(d) Ignore the problem.

Q20. Statement: “Students should not be allowed to use mobile phones in classrooms.”
Assumption:
(a) Mobile phones distract students.
(b) Students never study.
(c) Teachers do not like technology.
(d) Mobile phones are essential in classrooms.

- **(a)** Encourage use of eco-friendly alternatives.
- **(b)** Increase plastic production.
- **(c)** Stop recycling efforts.
- **(d)** Ignore the problem.

Logical Analysis

- A valid course of action must be feasible, constructive, and directly address the problem outlined.
- Banning single-use plastic requires providing viable substitutes so daily commerce does not collapse.
- Encouraging eco-friendly alternatives directly complements the reduction of pollution.

✓ **Verified Answer:** Option **(A)** $$\mathbf{\text{Verified Answer: (a) Encourage use of eco-friendly alternatives.}}$$

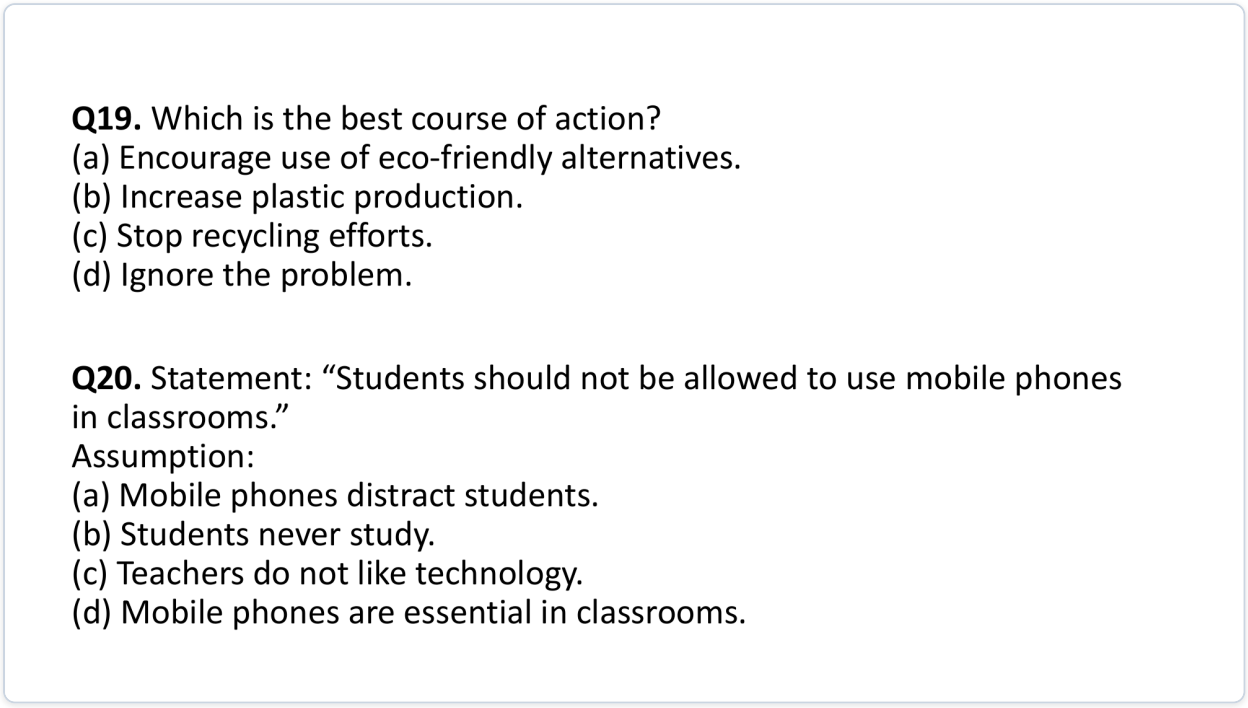

Problem 3 • Identifying Implicit Assumptions

CORE SE

ID: Q3 | Source: Infosys PYQ | Level: Infosys SE Standard

Question ID: `INFY-SET1-20`

- Figure:

- **(a)** Mobile phones distract students.
- **(b)** Students never study.
- **(c)** Teachers do not like technology.
- **(d)** Mobile phones are essential in classrooms.

Logical Analysis

- An assumption is an unstated premise that the speaker takes for granted when making a policy statement.
- For someone to propose barring phones inside classrooms, they must believe that phone usage negatively impacts classroom learning (e.g., through distraction).
- If phones were not believed to cause distraction or harm in the learning environment, the restriction would lack rationale.

✓ **Verified Answer:** Option **(A)** $$\mathbf{\text{Verified Answer: (a) Mobile phones distract students.}}$$

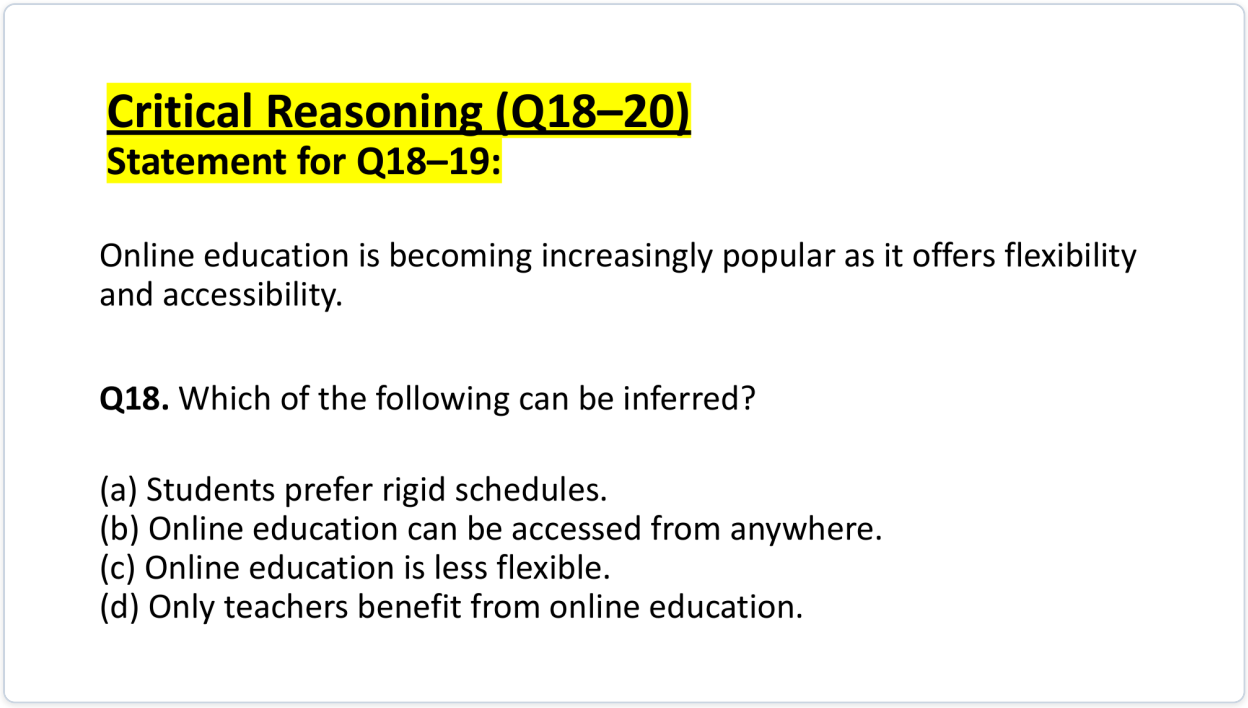

Problem 4 • Identifying Deductive Inferences

CORE SE

ID: Q4 | Source: Infosys PYQ | Level: Infosys SE Standard

Question ID: `INFY-SET2-18`

- Figure:

- **(a)** Students prefer rigid schedules.
- **(b)** Online education can be accessed from anywhere.
- **(c)** Online education is less flexible.
- **(d)** Only teachers benefit from online education.

Logical Analysis

- The statement predicates popularity directly on *flexibility and accessibility*.
- *Accessibility* in educational technology denotes the capability to access coursework regardless of geographical location.
- Therefore, inferring that *online education can be accessed from anywhere* is a direct semantic consequence of accessibility.

✓ **Verified Answer:** Option **(B)** $$\mathbf{\text{Verified Answer: (b) Online education can be accessed from anywhere.}}$$

Problem 5 • Pragmatic Course of Action

CORE SE

ID: Q5 | Source: Infosys PYQ | Level: Infosys SE Standard

Question ID: `INFY-SET2-19`

- **Figure:**

Q19. Which is the most logical course of action?
(a) Stop using online platforms.
(b) Combine online and traditional learning for better results.
(c) Make education costlier.
(d) Ban online exams.

Q20. Statement: “More public transport facilities should be introduced to reduce traffic congestion.”
Assumption:
(a) People use private vehicles because public transport is insufficient.
(b) People dislike public transport.
(c) Public transport creates traffic.
(d) Private vehicles are always better.

- **(a)** Stop using online platforms.
- **(b)** Combine online and traditional learning for better results.
- **(c)** Make education costlier.
- **(d)** Ban online exams.

Logical Analysis

- A rational course of action leverages proven technological benefits while mitigating weaknesses.
- Integrating digital tools with classroom pedagogy (hybrid/blended learning) maximizes student outcomes.
- Banning or terminating effective systems is reactionary and counterproductive.

✓ **Verified Answer:** Option **(B)** $$\mathbf{\text{Verified Answer: (b) Combine online and traditional learning for better results.}}$$
