Q395. Passage Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions... [Continues in context]

(A) Remote work has failed and companies should return to the office full-time.
(B) Hybrid work is emerging because remote work has both benefits and limits.
(C) Software tools are the main reason hybrid models succeed.
(D) New joiners prefer working only from home.

Correct Answer: Option (B) : Hybrid work is emerging because remote work has both benefits and limits.

Logic / Derivation: The passage notes gains from remote work, then its drawbacks for collaboration and new joiners, and ends with hybrid models plus the need for norms. That balanced shift is the main idea.

Q431. Passage Many software companies now treat code reviews as a daily habit rather than a last-minute check. A second pair of eyes often finds defects that automated tests miss, especially unclear names, missing edge cases and weak error messages. Reviews also spread knowledge: a junior engineer who reads a senior colleague's change learns the team's style faster than by studying a handbook. The practice has a cost. Long review queues delay releases, and harsh comments discourage people from sharing early drafts. Teams that keep reviews short, set a response-time target and discuss design before large patches are written usually keep both quality and speed. Tools help, but they cannot replace an agreed standard of courtesy and focus. The author suggests that tools

(A) can replace courtesy and focus
(B) are useless in code reviews
(C) help but cannot replace agreed standards of courtesy and focus
(D) should be banned from daily reviews

Correct Answer: Option (C) : help but cannot replace agreed standards of courtesy and focus

Logic / Derivation: The last sentence says tools help, but they cannot replace an agreed standard of courtesy and focus.

Q432. Passage Many software companies now treat code reviews as a daily habit rather than a last-minute check. A second pair of eyes often finds defects that automated tests miss, especially unclear names, missing edge cases and weak error messages. Reviews also spread knowledge: a junior engineer who reads a senior colleague's change learns the team's style faster than by studying a handbook. The practice has a cost. Long review queues delay releases, and harsh comments discourage people from sharing early drafts. Teams that keep reviews short, set a response-time target and discuss design before large patches are written usually keep both quality and speed. Tools help, but they cannot replace an agreed standard of courtesy and focus. What is the main idea of the passage?

(A) Automated tests have made human code reviews unnecessary.
(B) Code reviews improve quality and learning if teams manage time and tone.
(C) Junior engineers should never review senior engineers' work.
(D) Review tools can fully replace agreed team standards.

Correct Answer: Option (B) : Code reviews improve quality and learning if teams manage time and tone.

Logic / Derivation: The passage supports reviews for defects and learning, then names the costs, and ends with how short, timely, courteous reviews keep quality and speed. That balanced claim is the main idea.

Q441. Passage Open-source licences let companies use shared libraries without writing every component from scratch. That speed has a condition: teams must track which licence each library carries. A copyleft licence can require the company to publish its own source if the library is mixed into a shipped product. Permissive licences are lighter, but they still ask for credit. Legal reviews that happen only a week before release often find a blocked component and force a rewrite. Groups that keep a licence inventory from the first sprint avoid that scramble. A copyleft licence may require a company to

(A) pay a yearly fee only
(B) rename the library
(C) publish its own source if the library is mixed into a shipped product
(D) delete all comments

(B) idea - futile
(C) optimism - improving
(D) complaint - deteriorating

Correct Answer: Option (D) : complaint - deteriorating

(A) situation - incongruous
(B) location - apt
(C) ambience - salubrious
(D) durability - convenient

Correct Answer: Option (A) : situation - incongruous

Logic / Derivation: Ans - A The semicolon indicates that the second part of the sentence expands on the first part. So, the second part tells us we are talking about the position, or situation of a cathedral. And since the first part tells us that architects did not pay attention to the situation, the cathedral was positioned randomly in odd (incongruous) surroundings.

(B) humility
(C) veracity
(D) piety

Correct Answer: Option (C) : veracity

Logic / Derivation: Ans - C Here, the keyword is "honest," and the missing word is used to explain why Lincoln was called honest. (A) paltry - meager
(B) miniscule - substantial
(C) average - augmented
(D) judicious - penurious

Correct Answer: Option (A) : paltry - meager

Logic / Derivation: Ans - A The part after the semicolon expands upon the first part of the sentence. So, since the first part tells us that there is no money in archaeology, then there will only be small (paltry) amounts for excavating. Also 'even more' indicates that another similar word is required. Thus, meager also means small.
