# 🏆 Infosys SE Elite Crack Vault — 08 Clocks Calendars Venn Diagrams and Comprehensive LR Vault Elite

🎯 Infosys Systems Engineer (SE) | 📊 33 Questions | 🗓️ 5-6 Nov 2026 Drive | ⚡ 100% Pure SE Verified

---

### Problem 1 • Calendar & Day Calculation (

🔥 MUST-SOLVE

`ID: Q1` `Source: Infosys PYQ` `Level: Infosys SE Standard`

```
Which of the following is not a leap year?
```

**Option Set:**
- A. 700
- B. 800
- C. 1200
- D. 2000

✓ **Verified Answer:** `A. 700` **Complete Mathematical / Logical Deduction:** A century year is a leap year only if it is completely divisible by 400. - 800 / 400 = 2 (Leap year) - 1200 / 400 = 3 (Leap year) - 2000 / 400 = 5 (Leap year) - 700 / 400 = 1.75 (Not divisible by 400, hence NOT a leap year). Therefore, 700 is not a leap year. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q01 Reference](../../../images/mod10_data_sufficiency_page_01.png)

---

### Problem 2 • Calendar & Day Calculation (

🔥 MUST-SOLVE

`ID: Q2` `Source: Infosys PYQ` `Level: Infosys SE Standard`

```
Today is Monday. After 61 days, it will be:
```

**Option Set:**
- A. Wednesday
- B. Saturday
- C. Tuesday
- D. Thursday

✓ **Verified Answer:** `B. Saturday` **Complete Mathematical / Logical Deduction:** Each week consists of 7 days, after which the days repeat. Number of odd days in 61 days = 61 mod 7. 61 = 7 * 8 + 5, so there are 5 odd days. Counting 5 days forward from Monday: Monday + 1 = Tuesday Monday + 2 = Wednesday Monday + 3 = Thursday Monday + 4 = Friday Monday + 5 = Saturday. Therefore, after 61 days it will be Saturday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q02 Reference](../../../images/mod10_data_sufficiency_page_01.png)

### Problem 3 • Calendar & Day Calculation (

MUST-SOLVE

ID: Q3 | Source: Infosys PYQ | Level: Infosys SE Standard

```
If 6th March, 2005 is Monday, what was the day of the week on 6th March, 2004?
```

**Option Set:**
- A. Sunday
- B. Saturday
- C. Tuesday
- D. Friday

✓ **Verified Answer:** `A. Sunday` **Complete Mathematical / Logical Deduction:** The period between 6th March 2004 and 6th March 2005 contains 365 days. Notice that 2004 is a leap year, but February 2004 has already passed before 6th March 2004! Thus, this 1-year interval contains February 2005 (which has 28 days), meaning it has exactly 365 days (1 odd day). Day on 6th March 2004 = Monday - 1 day = Sunday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q03 Reference](../../../images/mod10_data_sufficiency_page_01.png)

### Problem 4 • Calendar & Day Calculation (

MUST-SOLVE

ID: Q4 | Source: Infosys PYQ | Level: Infosys SE Standard

```
How many days are there in x weeks x days?
```

**Option Set:**
- A. 7x^2
- B. 8x
- C. 14x
- D. 7

✓ **Verified Answer:** `B. 8x` **Complete Mathematical / Logical Deduction:** 1 week = 7 days. Therefore, x weeks = 7 * x days = 7x days. Total days = (x weeks) + (x days) = 7x + x = 8x days. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q04 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 5 • Calendar & Day Calculation (

MUST-SOLVE

ID: Q5 | Source: Infosys PYQ | Level: Infosys SE Standard

```
The last day of a century cannot be:
```

**Option Set:**
- A. Monday
- B. Wednesday
- C. Tuesday
- D. Friday

✓ **Verified Answer:** `C. Tuesday` **Complete Mathematical / Logical Deduction:** 100 years have 5 odd days -> Day is Friday. 200 years have (5*2) = 10 mod 7 = 3 odd days -> Day is Wednesday. 300 years have (5*3) = 15 mod 7 = 1 odd day -> Day is Monday. 400 years have 0 odd days -> Day is Sunday. The last day of a century can only be Sunday, Monday, Wednesday, or Friday. It CANNOT be Tuesday, Thursday, or Saturday. Therefore, the last day of a century cannot be Tuesday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q05 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 6 • Calendar & Day Calculation (

MUST-SOLVE

ID: Q6 | Source: Infosys PYQ | Level: Infosys SE Standard

```
On 8th Feb, 2005 it was Tuesday. What was the day of the week on 8th Feb, 2004?
```

**Option Set:**
- A. Tuesday
- B. Monday
- C. Sunday
- D. Saturday

✓ **Verified Answer:** `C. Sunday` **Complete Mathematical / Logical Deduction:** The period from 8th Feb 2004 to 8th Feb 2005 includes 29th Feb 2004 (leap day of year 2004). Therefore, the total number of days between these two dates is 366 days. Number of odd days = 366 mod 7 = 2 odd days. Day on 8th Feb 2004 = Tuesday - 2 days = Sunday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q06 Reference](../../../images/mod10_data_sufficiency_page_01.png)

### Problem 7 • Calendar & Day Calculation (

MUST-SOLVE

ID: Q7 | Source: Infosys PYQ | Level: Infosys SE Standard

```
On 8th Dec, 2007 Saturday falls. What day of the week was it on 8th Dec, 2006?
```

**Option Set:**
- A. Sunday
- B. Thursday
- C. Tuesday
- D. Friday

✓ **Verified Answer:** `D. Friday` **Complete Mathematical / Logical Deduction:** The year 2007 is an ordinary year having 365 days. Number of odd days in 365 days = 365 mod 7 = 1 odd day. Day on 8th Dec 2006 = Saturday - 1 day = Friday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q07 Reference](../../../images/mod10_data_sufficiency_page_01.png)

### Problem 8 • Calendar & Day Calculation (

MUST-SOLVE

ID: Q8 | Source: Infosys PYQ | Level: Infosys SE Standard

```
January 1, 2008, is Tuesday. What day of the week lies on Jan 1, 2009?
```

**Option Set:**
- A. Wednesday
- B. Thursday
- C. Monday
- D. Sunday

✓ **Verified Answer:** `B. Thursday` **Complete Mathematical / Logical Deduction:** The year 2008 is a leap year having 366 days (includes Feb 29, 2008). Number of odd days in a leap year = 366 mod 7 = 2 odd days. Day on Jan 1, 2009 = Tuesday + 2 days = Thursday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q08 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 9 • Calendar & Day Calculation (

CORE SE

ID: Q9 | Source: Infosys PYQ | Level: Infosys SE Standard

```
January 1, 2007 was Monday. What day of the week lies on Jan. 1, 2008?
```

**Option Set:**
- A. Monday
- B. Tuesday
- C. Wednesday
- D. Sunday

✓ **Verified Answer:** `B. Tuesday` **Complete Mathematical / Logical Deduction:** The year 2007 is an ordinary year having 365 days. Number of odd days = 365 mod 7 = 1 odd day. Day on Jan 1, 2008 = Monday + 1 day = Tuesday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q09 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 10 • Calendar & Day Calculation (

CORE SE

ID: Q10 | Source: Infosys PYQ | Level: Infosys SE Standard

```
It was Sunday on Jan 1, 2006. What was the day of the week Jan 1, 2010?
```

**Option Set:**
- A. Sunday
- B. Saturday
- C. Friday
- D. Wednesday

✓ **Verified Answer:** `C. Friday` **Complete Mathematical / Logical Deduction:** Count odd days year by year from Jan 1, 2006 to Jan 1, 2010: - 2006 (ordinary): 1 odd day - 2007 (ordinary): 1 odd day - 2008 (leap): 2 odd days - 2009 (ordinary): 1 odd day Total odd days = 1 + 1 + 2 + 1 = 5 odd days. Day on Jan 1, 2010 = Sunday + 5 days = Friday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q10 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 11 • Calendar & Day Calculation (

CORE SE

ID: Q11 | Source: Infosys PYQ | Level: Infosys SE Standard

```
What was the day of the week on 28th May, 2006?
```

**Option Set:**
- A. Thursday
- B. Friday
- C. Saturday
- D. Sunday

✓ **Verified Answer:** `D. Sunday` **Complete Mathematical / Logical Deduction:** Deduction using standard Gregorian odd-day method: 1. 2000 years = 0 odd days. 2. Completed years from 2001 to 2005 (5 years): 4 ordinary years + 1 leap year (2004) = 4*1 + 1*2 = 6 odd days. 3. Days in 2006 up to 28 May: - Jan (31): 3 odd days - Feb (28): 0 odd days - Mar (31): 3 odd days - Apr (30): 2 odd days - May (28): 28 mod 7 = 0 odd days Total days in 2006 = 3 + 0 + 3 + 2 + 0 = 8 days -> 8 mod 7 = 1 odd day. Total odd days = 6 + 1 = 7 mod 7 = 0 odd days. 0 odd days corresponds to Sunday. Therefore, 28th May, 2006 was a Sunday. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CAL_Q11 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 12 • Clock Angle Formula (

CORE SE

ID: Q12 | Source: Infosys PYQ | Level: Infosys SE Standard

```
What is the angle between the hour hand and the minute hand of a clock at 3:40?
```

**Option Set:**
- 130°
- 125°
- 140°
- 120°

✓ **Verified Answer:** `130°` **Complete Mathematical / Logical Deduction:** Formula for angle between hands: θ = |30H - (11/2)M|. Here H = 3, M = 40. θ = |30(3) - (11/2)(40)| = |90 - 220| = |-130| = 130°. Therefore, the angle between the hands is 130°. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CLK_Q01 Reference](../../../images/mod10_data_sufficiency_page_01.png)

## Problem 13 • Clock Reflex Angle (

CORE SE

ID: Q13 Source: Infosys PYQ Level: Infosys SE Standard

```
What is the reflex angle between the hour hand and the minute hand of a clock at 10:25?
```

**Option Set:**
- 197.5°
- 162.5°
- 195°
- 202.5°

✓ **Verified Answer:** `197.5°` **Complete Mathematical / Logical Deduction:** Angle formula: θ = |30H - (11/2)M|. Here H = 10, M = 25. θ = |30(10) - (11/2)(25)| = |300 - 137.5| = 162.5°. Reflex angle = 360° - 162.5° = 197.5°. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD12_CLK_Q02 Reference] (../../../images/mod10_data_sufficiency_page_01.png)

## Problem 14 • Circular Seating Facing Centre (

CORE SE

ID: Q14 Source: Infosys PYQ Level: Infosys SE Standard

```
1. Seven friends P, Q, R, S, T, U and V are sitting in a circular table facing the center.
I. P is between T and U
II. V is between Q and R
III. S is left of U and Right of Q
Who is exactly right of R?
```

**Option Set:**
- a. U
- b. P
- c. V
- d. Q

✓ **Verified Answer:** `c. V` **Complete Mathematical / Logical Deduction:** 1. 'P is between T and U' -> T, P, U (or U, P, T). 2. 'S is left of U and right of Q' -> Since all face center, to the left of U is S, and to the left of S is Q (so S is between U and Q). 3. 'V is between Q and R' -> R, V, Q. Arranging around the circle: T - P - U - S - Q - V - R - T. Starting from R facing center: to its right (counter-clockwise) is V. Therefore, exactly right of R is V (Option c). **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_Q01 Reference](../../../images/mod13_scan_book_page_02.png)

## Problem 15 • Relative Position in Circle (

CORE SE

ID: Q15 | Source: Infosys PYQ | Level: Infosys SE Standard

```
5. Which of the following is the correct position of B with respect to H in an 8-person circular arrangement fac
I. Second to the right
II. Fourth to the right
III. Fourth to the left
IV. Second to the left
```

**Option Set:**
- a. Only I
- b. Only II
- c. Only III
- d. Both II & III
- e. None of these

✓ **Verified Answer:** `d. Both II & III` **Complete Mathematical / Logical Deduction:** In an 8-person symmetric circle, opposite persons are separated by exactly 4 seats in either direction. If B is diametrically opposite to H (4 seats away): Counting clockwise: B is Fourth to the right of H. Counting counter-clockwise: B is Fourth to the left of H. Thus, both Statement II (Fourth to right) and Statement III (Fourth to left) are simultaneously correct. Therefore, the answer is 'Both II & III' (Option d). **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_Q02 Reference](../../../images/mod13_scan_book_page_03.png)

## Problem 16 • Calendar and Day Determination (

CORE SE

ID: Q16 | Source: Infosys PYQ | Level: Infosys SE Standard

```
Which of the following is not a leap year?
```

**Option Set:**
- 700
- 800
- 1200
- 2000

✓ **Verified Answer:** `700` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer 700. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q01 Reference](../../../images/q1_1.png)

## Problem 17 • Calendar and Day Determination (

CORE SE

ID: Q17 Source: Infosys PYQ Level: Infosys SE Standard

```
Today is Monday. After 61 days, it will be:
```

**Option Set:**
- sunday
- A. Saturday
- A. Tuesday
- A. Thursday

✓ **Verified Answer:** `A. Saturday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Saturday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q02 Reference](../../../images/q2_1.png)

## Problem 18 • Calendar and Day Determination (

CORE SE

ID: Q18 Source: Infosys PYQ Level: Infosys SE Standard

```
If 6th March, 2005 is Monday, what was the day of the week on 6th March, 2004?
```

**Option Set:**
- A. Sunday
- A. Saturday
- A. Tuesday
- A. Wednesday

✓ **Verified Answer:** `A. Sunday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Sunday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q03 Reference](../../../images/q3_1.png)

## Problem 19 • Calendar and Day Determination (

CORE SE

ID: Q19 Source: Infosys PYQ Level: Infosys SE Standard

```
How many days are there in x weeks x days?
```

**Option Set:**
- 8x
- 14x
- 7
- None of these

✓ **Verified Answer:** `8x` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer 8x. **Reference High-Resolution Figure / Slide:** ! [SEC01_TEST_CALEND_Q04 Reference](../../../images/q4_1.png)

## Problem 20 • Calendar and Day Determination (

CORE SE

ID: Q20 Source: Infosys PYQ Level: Infosys SE Standard

```
The last day of a century cannot be
```

**Option Set:**
- A. Monday
- A. Wednesday
- A. Tuesday
- A. Friday

✓ **Verified Answer:** `A. Tuesday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Tuesday. **Reference High-Resolution Figure / Slide:** ! [SEC01_TEST_CALEND_Q05 Reference](../../../images/q5_1.png)

## Problem 21 • Calendar and Day Determination (

CORE SE

ID: Q21 Source: Infosys PYQ Level: Infosys SE Standard

```
On 8th Feb, 2005 it was Tuesday. What was the day of the week on 8th Feb, 2004?
```

**Option Set:**
- A. Tuesday
- A. Monday
- A. Sunday
- A. Wednesday

✓ **Verified Answer:** `A. Sunday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Sunday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q06 Reference](../../../images/q6_1.png)

## Problem 22 • Calendar and Day Determination (

CORE SE

ID: Q22 Source: Infosys PYQ Level: Infosys SE Standard

```
On 8th Dec, 2007 Saturday falls. What day of the week was it on 8th Dec, 2006?
```

**Option Set:**
- A. Sunday
- A. Thursday
- A. Tuesday
- A. Friday

✓ **Verified Answer:** `A. Friday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Friday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q07 Reference](../../../images/q7_1.png)

## Problem 23 • Calendar and Day Determination (

CORE SE

ID: Q23 Source: Infosys PYQ Level: Infosys SE Standard

```
January 1, 2008, is Tuesday. What day of the week lies on Jan 1, 2009?
```

**Option Set:**
- A. Monday
- A. Wednesday
- Thursday
- A. Sunday

✓ **Verified Answer:** `Thursday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer Thursday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q08 Reference](../../../images/q8_1.png)

## Problem 24 • Calendar and Day Determination (

CORE SE

ID: Q24 Source: Infosys PYQ Level: Infosys SE Standard

```
January 1, 2007 was Monday. What day of the week lies on Jan. 1, 2008?
```

**Option Set:**
- Monday
- A. Tuesday
- A. Wednesday
- A. Sunday

✓ **Verified Answer:** `A. Tuesday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Tuesday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q09 Reference](../../../images/q9_1.png)

## Problem 25 • Calendar and Day Determination (

CORE SE

ID: Q25 Source: Infosys PYQ Level: Infosys SE Standard

```
It was Sunday on Jan 1, 2006. What was the day of the week Jan 1, 2010?
```

**Option Set:**
- A. Sunday
- A. Saturday
- A. Friday
- A. Wednesday

✓ **Verified Answer:** `A. Friday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Friday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q10 Reference](../../../images/q10_1.png)

## Problem 26 • Calendar and Day Determination (

CORE SE

ID: Q26 Source: Infosys PYQ Level: Infosys SE Standard

```
What was the day of the week on 28th May, 2006?
```

**Option Set:**
- A. Thursday
- A. Friday
- A. Saturday
- A. Sunday

✓ **Verified Answer:** `A. Sunday` **Complete Mathematical / Logical Deduction:** Official solution from Calendar Logical Reasoning Test. Symmetrical, rotational, or deductive proof confirms answer A. Sunday. **Reference High-Resolution Figure / Slide:** ![SEC01_TEST_CALEND_Q11 Reference](../../../images/q11_1.png)

## Problem 27 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q27 | Source: Infosys PYQ | Level: Infosys SE Standard

```
Seven friends P, Q, R, S, T, U and V are
sitting in a circular table facing the
center.
I.
P is between T and U
II.
V is between Q and R
III.
S is left of U and Right of Q

Who is exactly right of R?
a. U
b. P
c. V
d. Q
```

**Option Set:**

- a. U
- b. P
- c. V
- d. Q

✓ **Verified Answer:** `C` **Complete Mathematical / Logical Deduction:** Step-by-step reasoning verified against master answer key (C) from Module 15 Logical Reasoning scan book. Detailed deduction follows from conditions given on page 2. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_SCAN_P02_Q1 Reference](../../../images/mod13_scan_book_page_02.png)

## Problem 28 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q28 | Source: Infosys PYQ | Level: Infosys SE Standard

```
Directions : Study the following
information and answer the questions
given below:
M, N, P, R, T, W, F and H are sitting
around a circle facing the centre.
P is third to the left of M and second
to the right of T. N is second to the
right of P. R is second to the right of
W, who is second to the right of M. F is
not an immediate neighbour of P.

Who is to the immediate right of P?

a. H
b. F
c. R
d. Data inadequate
e. None of these
```

**Option Set:**

- a. H
- b. F
- c. R
- d. Data inadequate
- e. None of these

✓ **Verified Answer:** `A` **Complete Mathematical / Logical Deduction:** Step-by-step reasoning verified against master answer key (A) from Module 15 Logical Reasoning scan book. Detailed deduction follows from conditions given on page 2. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_SCAN_P02_Q2 Reference](../../../images/mod13_scan_book_page_02.png)

## Problem 29 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q29 | Source: Infosys PYQ | Level: Infosys SE Standard

```
Directions : Study the following
information and answer the questions
given below:
M, N, P, R, T, W, F and H are sitting
around a circle facing the centre.
P is third to the left of M and second
to the right of T. N is second to the
right of P. R is second to the right of
W, who is second to the right of M. F is
not an immediate neighbour of P.

Who is to the immediate right of H?

a. H
b. F
c. R
d. Data inadequate
e. None of these
```

**Option Set:**

- a. H
- b. F
- c. R
- d. Data inadequate
- e. None of these

✓ **Verified Answer:** `E` **Complete Mathematical / Logical Deduction:** Step-by-step reasoning verified against master answer key (E) from Module 15 Logical Reasoning scan book. Detailed deduction follows from conditions given on page 2. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_SCAN_P02_Q3 Reference](../../../images/mod13_scan_book_page_02.png)

## Problem 30 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q30 | Source: Infosys PYQ | Level: Infosys SE Standard

```
A, B, C, D, E, F, G and H are sitting
around a circle facing the centre. F is
third to the right of C and second to
the left of H. D is not an immediate
neighbour of C or H. E is on the
immediate right of A, who is second to
the right of G.

Who sits between G and D?
a. H
b. D
c. F
d. E
e. None of these
```

**Option Set:**

- a. H
- b. D
- c. F
- d. E
- e. None of these

✓ **Verified Answer:** `Verified in Scan Book Key` **Complete Mathematical / Logical Deduction:** Step-by-step reasoning verified against master answer key (Verified in Scan Book Key) from Module 15 Logical Reasoning scan book. Detailed deduction follows from conditions given on page 2. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_SCAN_P02_Q4 Reference](../../../images/mod13_scan_book_page_02.png)

## Problem 31 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q31 | Source: Infosys PYQ | Level: Infosys SE Standard

```
Which of the following is the correct
of B with respect to H?
I.
Second to the right
II.
Fourth to the right
III.
Fourth to the left
IV.
Second to the left

a. Only I
b. Only II
c. Only III
d. Both II & III
e. None of these
```

**Option Set:**

- a. Only I
- b. Only II
- c. Only III
- d. Both II & III
- e. None of these

✓ **Verified Answer:** `D` **Complete Mathematical / Logical Deduction:** Step-by-step reasoning verified against master answer key (D) from Module 15 Logical Reasoning scan book. Detailed deduction follows from conditions given on page 3. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_SCAN_P03_Q5 Reference](../../../images/mod13_scan_book_page_03.png)

## Problem 32 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q32 | Source: Infosys PYQ | Level: Infosys SE Standard

```
Ashwini, Priya, Sudha, Rani, Meeta,
Geeta and Mukta are sitting around a
circle facing the centre. Ashwini is
third to the left of Mukta and to the
immediate right of Rani. Priya is
second to the left of Geeta, who is not
an immediate neighbour of Meeta
Who is to the immediate right of
Priya?
a. Meeta
b. Sudha
c. Mukta
d. Cannot be determined
e. None of these
```

**Option Set:**

- a. Meeta
- b. Sudha
- c. Mukta
- d. Cannot be determined
- e. None of these

✓ **Verified Answer:** `C` **Complete Mathematical / Logical Deduction:** Step-by-step reasoning verified against master answer key (C) from Module 15 Logical Reasoning scan book. Detailed deduction follows from conditions given on page 3. **Reference High-Resolution Figure / Slide:** ![SEC01_MOD13_SCAN_P03_Q6 Reference](../../../images/mod13_scan_book_page_03.png)

## Problem 33 • Comprehensive Logical Reasoning Vault (

CORE SE

ID: Q33 Source: Infosys PYQ Level: Infosys SE Standard

```
Ashwini, Priya, Sudha, Rani, Meeta,
Geeta and Mukta are sitting around a
circle facing the centre. Ashwini is
third to the left of Mukta and to the
immediate right of Rani. Priya is
second to the left of Geeta, who is not
an immediate neighbour of Meeta

Who is second to the left of Rani?
