🏆 Infosys SE Elite Crack Vault — 06 Critical Reasoning and Deductive Verbal Logic Elite

🎯 Infosys Systems Engineer (SE) | 📊 5 Questions | 🗓️ 5-6 Nov 2026 Drive | ⚡ 100% Pure SE Verified

Problem 1 • Identifying Logical Inferences

🔥 MUST-SOLVE

`ID: Q1` `Source: Infosys PYQ` `Level: Infosys SE Standard`

Question ID: `INFY-SET1-18`

- **Figure:**

 Original Question Slide

Which of the following can be inferred?

- **(a)** Plastic is the only cause of pollution.
- **(b)** Plastic contributes to pollution.
- **(c)** Pollution cannot be controlled.
- **(d)** Plastic is beneficial for the environment.

Logical Analysis

- If cities ban single-use plastic specifically *to reduce pollution*, it directly follows that plastic must be a contributing factor to pollution.
- Option (a) makes an unsubstantiated extreme claim (*only cause*).
- Option (c) contradicts the premise of action.
- Option (b) is a direct, necessary, and conservative deduction.

✓ **Verified Answer:** Option **(B)** $$\mathbf{\text{Verified Answer: (b) Plastic contributes to pollution.}}$$

Problem 2 • Logical Course of Action

MUST-SOLVE

`ID: Q2` `Source: Infosys PYQ` `Level: Infosys SE Standard`

> **Question ID:** `INFY-SET1-19`
> - **Figure:**
>  Original Question Slide
> **Which is the best course of action?**

- **(a)** Encourage use of eco-friendly alternatives.
- **(b)** Increase plastic production.
- **(c)** Stop recycling efforts.
- **(d)** Ignore the problem.

Logical Analysis

- A valid course of action must be feasible, constructive, and directly address the problem outlined.
- Banning single-use plastic requires providing viable substitutes so daily commerce does not collapse.
- Encouraging eco-friendly alternatives directly complements the reduction of pollution.

✓ **Verified Answer:** Option **(A)** $$\mathbf{\text{Verified Answer: (a) Encourage use of eco-friendly alternatives.}}$$

Problem 3 • Identifying Implicit Assumptions

CORE SE

`ID: Q3` `Source: Infosys PYQ` `Level: Infosys SE Standard`

Question ID: `INFY-SET1-20`
- **Figure:**
 Original Question Slide
Statement: *"Students should not be allowed to use mobile phones in classrooms."*
Assumption:

- **(a)** Mobile phones distract students.
- **(b)** Students never study.
- **(c)** Teachers do not like technology.
- **(d)** Mobile phones are essential in classrooms.

Logical Analysis

- An assumption is an unstated premise that the speaker takes for granted when making a policy statement.
- For someone to propose barring phones inside classrooms, they must believe that phone usage negatively impacts classroom learning (e.g., through distraction).
- If phones were not believed to cause distraction or harm in the learning environment, the restriction would lack rationale.

✓ **Verified Answer:** Option **(A)** $$\mathbf{\text{Verified Answer: (a) Mobile phones distract students.}}$$

Problem 4 • Identifying Deductive Inferences

CORE SE

`ID: Q4` `Source: Infosys PYQ` `Level: Infosys SE Standard`

Question ID: `INFY-SET2-18`
- **Figure:**
 Original Question Slide
Which of the following can be inferred?

- **(a)** Students prefer rigid schedules.
- **(b)** Online education can be accessed from anywhere.
- **(c)** Online education is less flexible.
- **(d)** Only teachers benefit from online education.

Logical Analysis

- The statement predicates popularity directly on *flexibility and accessibility*.
- *Accessibility* in educational technology denotes the capability to access coursework regardless of geographical location.
- Therefore, inferring that *online education can be accessed from anywhere* is a direct semantic consequence of accessibility.

✓ **Verified Answer:** Option **(B)** $$\mathbf{\text{Verified Answer: (b) Online education can be accessed from anywhere.}}$$

Problem 5 • Pragmatic Course of Action

CORE SE

`ID: Q5` `Source: Infosys PYQ` `Level: Infosys SE Standard`

Question ID: `INFY-SET2-19`
- **Figure:**
 Original Question Slide
Which is the most logical course of action?

- **(a)** Stop using online platforms.
- **(b)** Combine online and traditional learning for better results.
- **(c)** Make education costlier.
- **(d)** Ban online exams.

Logical Analysis

- A rational course of action leverages proven technological benefits while mitigating weaknesses.
- Integrating digital tools with classroom pedagogy (hybrid/blended learning) maximizes student outcomes.
- Banning or terminating effective systems is reactionary and counterproductive.

✓ **Verified Answer:** Option **(B)** $$\mathbf{\text{Verified Answer: (b) Combine online and traditional learning for better results.}}$$
