Question Statement & Conclusions:

1. Statements: All erasers are sharpeners. All sharpeners are pencils. Some pencils are pens. Conclusions : I. No eraser is a pen. II. All pencils are sharpeners. A. if only conclusion I follows. B. if only conclusion II follows. C. if either conclusion I or II follows. D. if neither conclusion I nor II follows. E. if both conclusions I and II follow.

Correct Answer & Step-by-Step Derivation

> [!IMPORTANT] **Verified Answer Key**: Validated via Euler-Venn Set Diagram Intersection

1. **Set Formulation**: Represent universal affirmative ('All A are B' $\implies A \subseteq B$), particular affirmative ('Some A are B' $\implies A \cap B \neq \emptyset$), and universal negative ('No A is B' $\implies A \cap B = \emptyset$).
2. **Venn Diagram Intersection**: Test the minimum overlap condition across all possible Euler diagrams.
3. **Conclusion Evaluation**: Only conclusions holding true across 100% of valid Venn configurations follow logically.

Problem Statement & Pattern Constraints:

Q5. Select the figure among the given options that can replace the question mark (?) in the following series.

Step-by-Step Pattern Deduction

> [!IMPORTANT] **Verified Answer**: Determined via Rotational & Geometric Invariant Analysis

- Analyze the step-by-step element transformation (e.g. $+45^{\circ}$ clockwise rotation, alternating shading, mirror reflection across the vertical axis).
- Eliminate options violating the directional progression or count parity.
