(a) P
(b) R
(c) Nobody
(d) Q

Correct Answer

> [!IMPORTANT] **Verified Answer Key**: Option **((D))** — `Q`

(a) 45 minutes
(b) 30 minutes
(c) 50 minutes
(d) 60 minutes

Correct Answer

> [!IMPORTANT] **Verified Answer Key**: Option **((A))** — `45 minutes`

(c) 50 kg
(d) 60 kg

Correct Answer

> [!IMPORTANT] **Verified Answer Key**: Option **((C))** — 50 kg

Three boxes are labelled 'Apples', 'Oranges' and 'Apples and Oranges', and every label is wrong. A fruit picked from the box labelled 'Apples and Oranges' is an apple. What does the box labelled 'Oranges' contain?

(a) Apples and oranges
(b) Only apples
(c) Only oranges
(d) Cannot be determined

Correct Answer

> [!IMPORTANT] **Verified Answer Key**: Option **((A))** — `Apples and oranges`

Step-by-Step Mathematical & Logical Derivation

The box labelled 'Apples and Oranges' is mislabelled, so it holds only apples. The box labelled 'Oranges' cannot hold oranges, and apples are taken, so it holds the mixed fruit.

Question Statement & Options:

(a) N/A
(b) N/A
(c) N/A
(d) N/A

Correct Answer

> [!IMPORTANT] **Verified Answer Key**: Option **((C))** — `64`

Step-by-Step Mathematical & Logical Derivation

Let the number be 10a + b. Then 10a + b = 6(a + b) + 4, which gives 4a - 5b = 4. The only solution with non-zero digits is a = 6 and b = 4, so the number is 64.
