📐 Infosys SE Elite Crack Vault — CampusMonk WhatsApp Premium Divisibility & Number System Vault

> **Target Role: Infosys Systems Engineer (SE)** (3.6 – 4.0 LPA Recruitment Drive)
> **Payload Architecture: Complete Divisibility Rules, Consecutive Numbers & Unit Digit PYQs**
> **Section Breakdown: Section 2: Mathematical Ability (10 Qs / 35 Mins)**
> **Mathematical Rigor:** 100% Proven via Modular Arithmetic & Algebraic Expansions

---

📌 Foundational Divisibility Theorems & Modulo Shortcuts

1. **Divisibility by 2, 4, 8**: Last 1 digit (2^1), last 2 digits (2^2), last 3 digits (2^3) must be divisible.
2. **Divisibility by 3 and 9**: Sum of digits must be divisible by 3 or 9 respectively.
3. **Divisibility by 11**: Alternate sum difference: $(S_{\text{odd}} - S_{\text{even}}) \equiv 0 \pmod{11}$.
4. **Composite Divisibility (72, 88)**: N is divisible by $72 \iff 8 \mid N$ and $9 \mid N$ (since $\gcd(8,9) = 1$).

Problem 01: Number System Mastery (Slide 02) 🔴 [🔥 MUST-SOLVE | INFOSYS QUANT]

> 🎯 **Exam Priority:** 🔴 [🔥 MUST-SOLVE | INFOSYS SE ACTUAL PATTERN]

$$\text{Apply: } N = dq + r \quad \text{where } 0 \leq r < d$$

- For consecutive integers: Let $x, x+1, x+2, \ldots, x+k$ be the sequence. Their sum is $S = kx + \frac{k(k-1)}{2}$.
- For divisibility tests: Apply prime factorization decomposition $\gcd(a,b) = 1 \implies (ab \mid N \iff a \mid N \wedge b \mid N)$.
