Question 1

1 of 15

Direction: The question below consists of a question and two statements numbered I and II given. You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this. How many girls are there in a class of 20? I. Only 10 students applied for Home Science. II. Only girls applied for Home Science. (Choose one solution)

irishapunnam87@gmail.com, please provide your response below

- The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.
- The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.
- The data either in statement I alone or in statement II alone is sufficient to answer the question.
- The data in both the statements I and II together is not sufficient to answer the question.

For selection in IT companies through campus placement certain eligibility criteria has been set up. Following are some requirements as IT companies are looking for some decent candidates for recruitment. i) Candidate should have at least 8 SGPA as average of all the semester exams. SGPA is the score which a student gets in semester exams out of 10. ii) Candidate should not have any backlog in the semester exams. iii) Candidate should have done Bachelor of Technology. iv) Candidate should not be less than 21 years of age and also not more than 24 years of age. In the case of a student fulfilling all the conditions except a) At ii) above, a candidate has SGPA of more than 8, then he would be eligible for interview. b) At i) above, a candidate has managed to score at least 7.5 SGPA as average of all semester exam has no backlog, then he will be eligible for written test. In question below, details of one candidate are provided. You have to take one of the following courses of actions based on the conditions given above and the information provided in the question and mark the number of that course of action as your answer. Nikhil, a 22-year-old candidate has an average SGPA of 8 in all semesters and has one backlog. He is a graduate in Bachelor of Technology in Electronics. (Choose one solution)

Question 16

Paragraph Data

Click to Close

The idea of a body so massive that even light could not escape was briefly proposed by astronomical pioneer and English clergyman John Michell in a letter published in Novembe assumed such a body might have the same density as the Sun, and concluded that such a body would form when a star's diameter exceeds the Sun's by a factor of 500, and the s usual speed of light. Michell correctly noted that such supermassive but non-radiating bodies might be detectable through their gravitational effects on nearby visible bodies. The c appearance of an event horizon—a boundary in spacetime through which matter and light can pass only inward towards the mass of the black hole. Nothing, not even light, can e The event horizon is referred to as such because if an event occurs within the boundary, information from that event cannot reach an outside observer, making it impossible to d

How small can a black hole be? For several decades, astronomers have worked to answer this question by tallying the black holes in our corner of the universe. They've found the years—including a supermassive monster at the heart of our galaxy. But until recently, they've seen no signs of small ones, and that's presented a long-standing mystery in discovered a black hole with just three times the mass of the sun, making it one of the smallest found to date—and it happens to be the closest known black hole, at just 1,500
