# Reading Comprehension (Questions 1-10)

**Directions (1-5): Read the following passage and answer the questions that follow.**

The advent of Artificial Intelligence (AI) has been a double-edged sword. On one hand, it has ushered in an era of unprecedented technological advancement, automating complex tasks, and providing insightful data analysis that was previously impossible. Industries from healthcare to finance are leveraging AI to improve efficiency and accuracy. For instance, AI algorithms can detect diseases from medical scans with greater precision than the human eye. On the other hand, the rise of AI poses significant ethical and societal challenges. Job displacement is a major concern, as machines begin to perform tasks traditionally done by humans. Furthermore, issues of data privacy and the potential for algorithmic bias are critical hurdles that society must navigate. An AI system trained on biased data will perpetuate and even amplify existing societal prejudices, leading to unfair outcomes in areas like hiring and loan applications. Ensuring the responsible development and deployment of AI is paramount to harnessing its benefits while mitigating its risks.

**1. What is the main idea of the passage?**

a) AI is solely a tool for economic growth.

b) The development of AI should be stopped due to its risks.

c) AI offers significant benefits but also presents serious challenges. d) AI's primary impact is on the healthcare industry.

**2. According to the passage, what is a major concern related to AI in the workforce?**

a) Increased demand for human workers

b) Job displacement due to automation

c) A decline in the quality of work

d) Workers becoming too reliant on AI

**3. What does the passage suggest about algorithmic bias?**

a) It is a rare and insignificant problem.

b) It can worsen existing social inequalities.

c) It is an issue that has already been solved.

d) It only affects the finance industry.

**4. The phrase "double-edged sword" is used to indicate that AI is:**

a) Complicated and difficult to understand

b) Capable of performing two tasks at once

c) A new and innovative technology

d) Something that has both positive and negative effects

**5. What does the author propose as a necessary action for the future of AI?**

a) Banning the use of AI in critical sectors

b) Focusing only on the positive aspects of AI

c) Ensuring AI is developed and used responsibly

d) Limiting AI training to unbiased data only

**Directions (6-10): Read the following passage and answer the questions that follow.**

The concept of 'sustainability' has become a buzzword in recent years, yet its core meaning is often misunderstood. At its heart, sustainability is about meeting the needs of the present without compromising the ability of future generations to meet their own needs. It is built on three pillars: environmental protection, social equity, and economic viability. Too often, discussions about sustainability focus solely on the environmental aspect, such as reducing carbon footprints or conserving natural resources. While crucial, this perspective is incomplete. True sustainability also requires creating fair and equitable societies where all individuals have access to opportunities and a good quality of life. Furthermore, a sustainable model must be economically viable; businesses and economies must be able to thrive without depleting resources or causing social harm. A truly sustainable solution is one that finds a harmonious balance among these three pillars.

**6. What is the primary purpose of this passage?**

a) To criticize businesses for not being sustainable

b) To argue that environmental protection is the most important pillar

c) To provide a comprehensive definition of sustainability

d) To discuss the economic challenges of sustainability

**7. Which of the following is NOT listed as a pillar of sustainability?**

a) Social Equity

b) Technological Advancement

c) Environmental Protection

d) Economic Viability

**8. The author believes that the common understanding of sustainability is often:**

a) Too focused on economic aspects

b) Perfectly balanced and accurate

c) Overly complex for the general public

d) Narrowly focused on the environment

**9. According to the passage, what does "social equity" in the context of sustainability imply?**

a) Everyone has the same income.

b) Businesses focus only on social welfare.

c) All individuals have fair access to opportunities.

d) Societies prioritize social events.

**10. What is the author's vision of a "truly sustainable solution"?**

a) A solution that prioritizes economic growth above all else.

b) A system that perfectly balances environmental, social, and economic needs.

c) A model that relies entirely on renewable energy.

d) An approach that stops all forms of resource consumption.
