https://practice.geeksforgeeks.org/problems/encrypt-the-string-10337/1

```
string encryptString(string s){
    string ans = "";
    char ch = s[0];
    int count = 1;
    for(int i=1;i<s.size();i++)
    {
        if(s[i] == s[i-1])
        {
            count++;
        }
        else
        {
            ans += ch;
            ans += to_string(count);
            ch = s[i];
            count = 1;
        }
    }
    ans += ch;
    ans += to_string(count);
    reverse(ans.begin(), ans.end());
    return ans;
}
```

https://takeuforward.org/data-structure/finding-equilibrium-index-in-an-array/

```
#include<bits/stdc++.h>
using namespace std;
int main()
{
    int n;  cin>>n;
    int arr[n];
    int leftSum = 0, rightSum = 0, totalSum = 0;
    for(int i=0;i<n;i++)
    {
        cin>>arr[i];
        totalSum+=arr[i];
    }
    for(int i=0;i<n;i++)
    {
        rightSum = totalSum - arr[i] - leftSum;
        if(leftSum == rightSum)
        {
            cout<<"Equilibrium index is = "<<i<<endl;
            break;
        }
        leftSum += arr[i];
    }

}
```

https://takeuforward.org/data-structure/remove-characters-from-first-string-present-in-the-second-string/

```cpp
#include<bits/stdc++.h>
using namespace std;
int main()
{
    string s1, s2;  cin>>s1>>s2;
    unordered_map<char, int>freq;
    for(int i=0;i<s2.size();i++)
    {
        freq[s2[i]]++;
    }
    string ans = "";
    for(int i=0;i<s1.size();i++)
    {
        if(freq[s1[i]]==0)
        {
            ans+=s1[i];
        }
    }
    cout<<ans<<endl;
}
```
