https://takeuforward.org/data-structure/find-word-with-highest-number-of-repeated-letters-in-string/

```cpp
#include<bits/stdc++.h>
using namespace std;
int main()
{
    string s;
    getline(cin, s);
    unordered_map<char, int> freq;
    int mxCount = 0;
    string word = "";
    int repeatedCharCnt = 0;
    string extra = "";
    for(int i=0;i<s.size();i++)
    {
        if(s[i] == ' ')
        {
            int cnt = 0;
            for(auto it: freq)
            {
                if(it.second > 1)
                {
                    cnt++;
                }
            }
            if(cnt > mxCount)
            {
                mxCount = cnt;
                word = extra;
```

```cpp
            {
                mxCount = cnt;
                word = extra;
            }
            extra = "";
            freq.clear();
        }
        else
        {
            freq[s[i]]++;
            extra += s[i];
        }
    }
    int cnt = 0;
    for(auto it: freq)
    {
        if(it.second > 1)
        {
            cnt++;
        }
    }
    if(cnt > mxCount)
    {
        mxCount = cnt;
        word = extra;
    }
    if(word == "") cout<<-1<<endl;
    else cout<<word<<endl;
}
```
