Q2. A contractor agreed to construct a 6 km road in 200 days. He employed 140 persons for the work. After 60 days, he realized that only 1.5 km road has been completed. How many additional people would he need to employ to finish the work exactly on time?

(A) 40

Correct Answer: See Logic

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is See Logic.

[Campus Monk Day 01 Mock Test]
Topic: Quantitative Aptitude

Q3. A sum of Rs. 45500 is to be paid back in 3 equal annual installments. How much is each installment if the interest is compounded annually at 20% per annum ?

(A) 21600

Correct Answer: See Logic

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is See Logic.

[Campus Monk Day 01 Mock Test]
Topic: Quantitative Aptitude

Q4. Note : Type ans in Min Only without unit

(A) 72

Correct Answer: See Logic

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is See Logic.

Q10. X and Y enter into a business partnership with capital in the ratio 3:5. After 5 months, X adds 50% of his capital, while Y withdraws 60% of his capital. What is the share (in Rs lakhs) of X in the annual profit of Rs 10.26 lakhs?

(A) 5.89
(B) 4.56
(C) 5.58
(D) 6.24

Correct Answer: Option (C) : 5.58

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (C) : 5.58.

[Campus Monk Day 01 Mock Test]

Topic: Quantitative Aptitude

Q13.

(A) 35km/hr
(B) 40km/hr
(C) 37.5km/hr
(D) 45 km/hr

Correct Answer: Option (C) : 37.5km/hr

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (C) : 37.5km/hr.

[Campus Monk Day 01 Mock Test]
Topic: Quantitative Aptitude

Q14.

(A) 4,5,9
(B) 3,7,8
(C) 3,6,9
(D) 4,7,7

Correct Answer: Option (A) : 4,5,9

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (A) : 4,5,9.

Q15. A shopkeeper earns a profit of 20% by selling an article by giving 25% discount on its marked price. If the cost price of the article increases by 10%, then how much discount percent should he give now on the same marked price to earn the same percentage of profit as earlier?

(A) 17.5%
(B) 16.5%
(C) 18%
(D) 15%

Correct Answer: Option (A) : 17.5%

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (A) : 17.5%.

Q16. In the given questions, two quantities are given, one as 'Quantity 1' and another as 'Quantity 2'. You have to determine relationship between two quantities and choose the appropriate option: Question: One of the roots is 1, find the other root

(A) Quantity 1 > Quantity 2
(B) Quantity 1 ≥ Quantity 2
(C) Quantity 2 > Quantity 1
(D) Quantity 2 ≥ Quantity 1

Correct Answer: Option (C) : Quantity 2 > Quantity 1

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (C) : Quantity 2 > Quantity 1.

Q17. In a river, the ratio of the speed of stream and speed of a boat A in still water is 2 : 5. Again, in the same river ratio of the speed of stream and speed of another boat B in still water is 3 : 4. What is the ratio of the speeds of the first boat to the second boat in still water ?

(A) 10 : 7
(B) 15 : 8
(C) 4 : 3
(D) 5 : 4

Correct Answer: Option (B) : 15 : 8

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (B) : 15 : 8.

[Campus Monk Day 01 Mock Test]

Topic: Quantitative Aptitude

Q18. Find the area of blue portion.

(A) 52
(B) 62
(C) 72
(D) None of these

Correct Answer: Option (D) : None of these

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (D) : None of these.

[Campus Monk Day 01 Mock Test]

Q19. In the given questions, two quantities are given, one as 'Quantity 1' and another as 'Quantity 2'. You have to determine relationship between two quantities and choose the appropriate option: Question: Two dices are rolled simultaneously. Quantity 1: Probability that the sum of the numbers that appeared is a multiple of 5. Quantity 2: 1/6

(A) Quantity 1 > Quantity 2
(B) Quantity 1 ≥ Quantity 2
(C) Quantity 2 > Quantity 1
(D) Quantity 2 ≥ Quantity 1

Correct Answer: Option (A) : Quantity 1 > Quantity 2

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (A) : Quantity 1 > Quantity 2.

Q20. What is the mean of the mode and median of the data given below? 8, 7, 5, 4, 9, 1, 3, 7, 6, 5, 2, 1, 6, 3, 9, 8, 4, 6

(A) 6.5
(B) 6.25
(C) 5.5
(D) 5.75

Correct Answer: Option (D) : 5.75

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (D) : 5.75.

Q21. In the IT department of backrub, the administrator password is changed every month. The team of administrators, spread across the globe, receive an 8 digit number via email. This number is to be prefixed with a single digit number and suffixed with a single digit number to get the actual password. The password is divisible by 11 and 8. If the team received 65351364 this month, then which of the following pairs give prefix and suffix respectively.

(A) 8, 9
(B) ---
(C) 3, 4
(D) 2, 7

Correct Answer: Option (B) : ---

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (B) : ---.

Q92. Read the passage and answer the questions that follow : Once upon a time, in a quaint little village nestled in a picturesque valley, there lived a young girl named Lily. She was known for her adventurous spirit and her deep curiosity. One sunny afternoon, while exploring the woods that bordered the village, Lily stumbled upon a hidden clearing. In the center of this secret meadow, she found an old oak tree with a peculiar nook. In that nook, half-buried in the earth, was a mysterious locket, ornate and gleaming with intricate designs. Lily carefully unearthed it, and as she held it in her hand, she felt a strange connection to this forgotten piece of jewelry. Back in her cottage, Lily examined the locket more closely. It was made of silver with a hint of gold, and its surface was adorned with delicate engravings of leaves and flowers. On the front, there was an image of a crescent moon, and on the back, an engraving read, "To the one who seeks the truth." The locket was sealed tightly, and Lily couldn't open it no matter how hard she tried. Determined to solve the mystery, Lily embarked on a quest to find someone who could open the locket. She asked the village blacksmith, the wise old woman who lived on the hill, and even the town's mayor, but none of them could unlock its secrets. Feeling a bit discouraged, Lily spent her days reading about ancient relics and searching for clues in the library. One day, while immersed in an old book about mystical lockets, Lily came across a passage that mentioned the existence of a "key of the heart." It said that this key could open the most stubborn of locks, but it was hidden within each person, waiting to be discovered. This newfound knowledge gave Lily a renewed sense of hope and determination. The next morning, Lily decided to visit the village's recluse, an elderly woman rumored to have deep knowledge of the heart. The recluse lived in a remote cottage surrounded by a lush garden. Lily knocked on the door and explained her quest. The old woman listened attentively and finally agreed to help. She told Lily that the key to opening the locket was hidden within her heart and that she needed to meditate on her truest desires and intentions. Lily followed the recluse's advice, sitting beneath the ancient oak tree where she had found the locket. She closed her eyes, focused on her heart's deepest desires, and as she did, she felt the locket warming in her hand. When she opened her eyes, she found the locket had sprung open, revealing a tiny, folded parchment inside. With trembling hands, she carefully unfolded it and read the message: "The truth lies in the journey, not the destination." The mystery of the locket was solved, but Lily realized that the real treasure was the journey of self-discovery she had undertaken. She understood that her quest had led her to understand her heart's desires and the power of her own determination. Question 1- What did Lily discover in the hidden clearing in the woods?

Lily knocked on the door and explained her quest. The old woman listened attentively and finally agreed to help. She told Lily that the key to opening the locket was hidden within her heart and that she needed to meditate on her truest desires and intentions. Lily followed the recluse's advice, sitting beneath the ancient oak tree where she had found the locket. She closed her eyes, focused on her heart's deepest desires, and as she did, she felt the locket warming in her hand. When she opened her eyes, she found the locket had sprung open, revealing a tiny, folded parchment inside. With trembling hands, she carefully unfolded it and read the message: "The truth lies in the journey, not the destination." The mystery of the locket was solved, but Lily realized that the real treasure was the journey of self-discovery she had undertaken. She understood that her quest had led her to understand her heart's desires and the power of her own determination. Question 3- Who did Lily seek help from in opening the locket?

Q148. Direction : In these question you have two brief passages with six questions following the passage. Read the passage carefully and choose the best answer to each question out of the four alternatives. Passage – 1 Education, as Mahatma Gandhi described it, "is the tool for the development of consciousness and reconstitution of society". Since Independence, India has stressed reforming and restructuring the educational system as part of state intervention. The National Policy on Education (NPE), 1986, which is hailed as a landmark in the Indian educational system, provided a comprehensive framework to guide the development of education in the country. The NPE and its Programme of Action was again updated in 1992 through similar consensual process involving all the State governments, resource organisations and educationists. What has been worrying the critics and educationists alike is the non- fulfilment of one of the NPE objectives: education of girl. It has been stated in the NPE that the 'Education For All' meet should have a strong gender focus as Education For All by definition is gender inclusive. . The National Policy on Education provided

(A) guidelines for the comprehension of education in the country
(B) guidance material to develop education in the country
(C) ---
(D) comprehensive development of education in the country

Correct Answer: Option (C) : ---

■ **Step-by-Step Logic:** Solving using quantitative formula derivation confirms the answer is Option (C) : ---.

Q198. Two runners start from the same point on a 600 m circular track at the same time, in opposite directions, at 8 m/s and 10 m/s. After how many seconds will they both simultaneously be back at the starting point for the first time?
(A) 300 s
(B) 200 s
(C) 150 s
(D) 600 s
