Question Statement & Options:

In a class of 50 students, Amit is 12th from the top. There are 8 students between Amit and Riya, and Riya's rank from the top is better than Amit's. What is Riya's rank from the top?

(a) 2
(b) 3
(c) 4
(d) 5

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

Step-by-Step Mathematical & Logical Derivation

Better rank means a smaller position number. Riya's rank = Amit's rank − (students between them) − 1 = 12 − 8 − 1 = 3.

(a) CRRNG
(b) CRQNG
(c) BRRNG
(d) CRRNF

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((A))**

Step-by-Step Mathematical & Logical Derivation

(b) 16-5-13-3-9-12
(c) 15-5-14-3-9-12
(d) 16-5-14-3-8-12

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((A))**

Step-by-Step Mathematical & Logical Derivation

Use each letter's serial number: P=16, E=5, N=14, C=3, I=9, L=12. So PENCIL → 16-5-14-3-9-12.

(a) Cousin
(b) Daughter
(c) Sister
(d) Niece

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

The only son of Rohan's grandfather is Rohan's father. The daughter of Rohan's father is Rohan's sister.

At what time between 4 and 5 o'clock are the hands of a clock at right angles for the later of the two occasions?

(a) 4:32
(b) 4:38 2/11 min
(c) 4:40
(d) 4:42 8/11 min

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

Step-by-Step Mathematical & Logical Derivation

Use $|30H - 5.5M| = 90$ with $H = 4$. This gives $5.5M = 30$ or $5.5M = 210$, so $M = 5\ 5/11$ or $M = 38\ 2/11$. The later occasion is 4:38 2/11 minutes.

(a) 215
(b) 217
(c) 221
(d) 225

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

Step-by-Step Mathematical & Logical Derivation

Each term is formed as (previous × 2) plus an increasing integer: 5×2+1 = 11, 11×2+2 = 24, 24×2+3 = 51, 51×2+4 = 106. The next term is 106×2+5 = 217.

If the meeting is held on Monday, Kavya will attend it. Kavya did not attend the meeting. Which conclusion follows?

(a) The meeting was held on Monday
(b) The meeting was not held on Monday
(c) The meeting may or may not have been on Monday
(d) Kavya never attends meetings

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

Step-by-Step Mathematical & Logical Derivation

This is modus tollens: from “If P then Q” and “not Q”, infer “not P”. P = meeting on Monday, Q = Kavya attends. She did not attend, so the meeting was not on Monday.

(a) Teacher : Classroom
(b) Author : Novel
(c) Sculptor : Chisel
(d) Farmer : Crop

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

A scalpel is the primary tool a surgeon works with. A chisel is the primary tool a sculptor works with. The other options are workplace, product, or output — not tool.

(a) Z
(b) A
(c) B
(d) Y

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

Letter positions: C=3, F=6, J=10, O=15, U=21. The gaps are +3, +4, +5, +6. The next gap is +7, so 21+7 = 28. Wrapping the alphabet (28−26 = 2) gives B.

A man walks 10 km west, turns left and walks 8 km, then turns left again and walks 10 km. How far and in which direction is he from the starting point?

(a) 8 km North
(b) 10 km East
(c) 8 km South
(d) 18 km West

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

Path: 10 km West, then left (South) 8 km, then left (East) 10 km. The eastward 10 km cancels the westward 10 km, leaving him 8 km due South of the start.

(a) 42
(b) 56
(c) 70
(d) 30

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

The intended pattern is n(n+1): 1×2=2, 2×3=6, 3×4=12, 4×5=20, 5×6=30, 6×7=42, 7×8=56, 8×9=72. The last term should be 72, so 70 is wrong.

Statements: All roses are flowers. Some flowers fade quickly. Conclusions: I. Some roses fade quickly. II. All flowers are roses. Which conclusion(s) follow?

(a) Only I follows
(b) Only II follows
(c) Both follow
(d) Neither I nor II follows

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((D))**

Step-by-Step Mathematical & Logical Derivation

“Some flowers fade quickly” need not include the subset of flowers that are roses, so I is not definite. II reverses a universal statement and does not follow. Neither conclusion is certain.

(a) Only I is implicit
(b) Only II is implicit
(c) Both I and II are implicit
(d) Neither is implicit

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

(a) A
(b) B
(c) C
(d) E

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

B occupies the left end (position 1). D between B and A forces B, D, A. A second to the left of C places C at position 5. E takes position 4. Arrangement: B D A E C. Extreme right is C.

Question Statement & Options:

Passage Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room. According to the passage, new joiners learn more slowly when they work remotely because they

(a) are given fewer software tools than office staff
(b) spend too much time commuting
(c) cannot observe experienced colleagues
(d) refuse to follow hybrid schedules

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((C))**

Step-by-Step Mathematical & Logical Derivation

The passage states directly that new joiners learn less quickly when they cannot observe experienced colleagues.

Passage Remote work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room. What is the main idea of the passage?

(a) Remote work has failed and companies should return to the office full-time.
(b) Hybrid work is emerging because remote work has both benefits and limits.
(c) Software tools are the main reason hybrid models succeed.
(d) New joiners prefer working only from home.

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

Step-by-Step Mathematical & Logical Derivation

The passage notes gains from remote work, then its drawbacks for collaboration and new joiners, and ends with hybrid models plus the need for norms. That balanced shift is the main idea.

(b) Each of the players has received a medal.
(c) Each of the player has received a medal.
(d) Each of the players are received a medal.

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

In each row, third = first × second + first + second, which is the same as (first + 1)(second + 1) − 1. Row 1: 2×5 + 2 + 5 = 17. Row 2: 4×3 + 4 + 3 = 19. Row 3: 6×4 + 6 + 4 = 34. Check: (6+1)(4+1) − 1 = 34.

Step-by-Step Mathematical & Logical Derivation

In every row, third = first × second + 1. Check: 2×3+1 = 7, 3×4+1 = 13, 4×5+1 = 21, 6×7+1 = 43. Therefore 7×8+1 = 57.

Question Statement & Options:

Given is the set of four numbers that relate to each other in a certain way. Determine the missing number in the third set. Assume the third set works in the same way as the first and the second set.
Set 1 Set 2 Set 3 5 10 3 6 4 16 2 8 3 15 ? 10

(a) 2
(b) 3
(c) 4
(d) 5

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((A))**

Step-by-Step Mathematical & Logical Derivation

Within each set both rows use the same multiplier k, where right = left × k. Set 1: 5×2 = 10 and 3×2 = 6, so k = 2. Set 2: 4×4 = 16 and 2×4 = 8, so k = 4. Set 3: 3×5 = 15, so k = 5. Then ? × 5 = 10, hence ? = 2.

Question Statement & Options:

Find the missing number in the 3 × 3 grid. 39 24 ? 76 35 27 58 42 32

(a) 16
(b) 19
(c) 21
(d) 24

Correct Answer

> **IMPORTANT REQUIREMENT: Verified Answer Key**: Option **((B))**

Step-by-Step Mathematical & Logical Derivation

In each row, third number = (product of digits of the first number) − (product of digits of the second number). Row 2: 7×6 − 3×5 = 42 − 15 = 27. Row 3: 5×8 − 4×2 = 40 − 8 = 32. Row 1: 3×9 − 2×4 = 27 − 8 = 19. So the missing number is 19.
