INFOSYS SE ASSESSMENT 2026 • OFFICIAL PREPARATION VAULT

🧠 Section 1: Reasoning Ability — Timed Sectional Mock Tests (15 Questions | 25 Minutes)

Section: 09_Mock_Test_Series | **Drive Date:** 5th & 6th November 2026 | **Status:** 100% Solved & Verified

🧠 Section 1: Reasoning Ability — Timed Sectional Mock Tests (15 Questions | 25 Minutes)

> **Official Pattern:** Section 1 of Infosys Systems Engineer (SE) Exam
> **Allotted Time:** 25 Minutes (Countdown Timer)
> **Question Count:** 15 Questions per Mock Paper
> **Passing Benchmark:** 11+ Marks (70% Accuracy)
> **Negative Marking:** Zero (0)

📝 SECTIONAL MOCK TEST 01 (15 Questions | 25 Mins)

Question 1 (Data Sufficiency)

In a family of six members A, B, C, D, E, and F, how is D related to A?
Statements:
I. A is the father of B and husband of C. D is the only brother of C.
II. F is the daughter of D and niece of A.
- A) Statement I alone is sufficient
- B) Statement II alone is sufficient
- C) Both statements I and II together are sufficient
- D) Neither statement I nor II is sufficient

Correct Answer: A
Solution: From Statement I: A is married to C. D is the brother of C. Therefore, D is the brother-in-law of A. This uniquely resolves the question. Statement II does not state whether F is niece through sister or brother. Thus, Statement I alone is sufficient.

Question 2 (Circular Seating Arrangement)

Eight persons P, Q, R, S, T, U, V, and W are seated around a circular table facing the center. P sits third to the right of W and third to the left of Q. S sits second to the right of T. V sits second to the left of R. T is not an immediate neighbor of P. Who sits immediately opposite to W?
- A) Q
- B) R
- C) S

- D) T

Correct Answer: C

Solution: Tracing circular positions 1 through 8 clockwise: Let W = 1. P sits third to right (position 4). P is third to left of Q, so Q is at position 7. S is second to right of T, and T is not next to P (T != 3, 5). Placing T = 2 gives S = 4 (conflict with P). Placing T = 6 gives S = 8. Opposite of W (pos 1) is pos 5 = S. Therefore, S sits opposite W.

Question 3 (Syllogisms)

Statements:

- All algorithms are programs.
- Some programs are scripts.
- No script is hardware.

Conclusions:

I. Some programs are not hardware.

II. Some algorithms are scripts.

- A) Only Conclusion I follows
- B) Only Conclusion II follows
- C) Both Conclusions I and II follow
- D) Neither follows

Correct Answer: A

Solution: The programs that are scripts cannot be hardware because no script is hardware. Hence, those programs are definitely not hardware (Conclusion I is logically valid). No direct overlap between algorithms and scripts is guaranteed (Conclusion II does not necessarily follow).

Question 4 (Coding-Decoding)

In a code language, `SYSTEM` is written as `SYSMET` and `NEARER` is written as `AENRER`. How is `FRACTION` written in that code?

- A) CARFNOIT
- B) CRAFNOIT
- C) ARFCNOIT
- D) CARFTINO

Correct Answer: A

Solution: The word `SYSTEM` (6 letters) is divided into two halves: `SYS` and `TEM`. First half is reversed (`SYS`), second half reversed (`MET`) -> `SYSMET`. Similarly, `FRACTION` (8 letters) splits into `FRAC` and `TION`. Reversed halves: `CARF` and `NOIT`. Result: `CARFNOIT`.

Question 5 (Direction Sense)

A man walks 30 meters North, turns right and walks 40 meters, then turns right and walks 20 meters, and finally turns right and walks 40 meters. How far is he from his starting point?

- A) 10 meters
- B) 20 meters
- C) 30 meters
- D) 50 meters

Correct Answer: A

Solution: Net North-South displacement: $30 - 20 = 10$ m North. Net East-West displacement: $+40 - 40 = 0$ m. Total distance from starting point = 10 meters North.

Question 6 (Blood Relations)

Pointing to a man, a woman said, "His mother is the only daughter of my mother." How is the woman related to the man?
- A) Sister
- B) Mother
- C) Grandmother
- D) Aunt

Correct Answer: B
Solution: "The only daughter of my mother" is the woman herself. Thus, his mother is the woman herself. The woman is the man's mother.

Question 7 (Number Series)

Find the missing number: 7, 13, 25, 49, 97, ?
- A) 189
- B) 193
- C) 195
- D) 197

Correct Answer: B
Solution: Difference pattern: $+6, +12, +24, +48, +96$. Next term = $97 + 96 = 193$. Alternatively: $2x - 1$: $7 \times 2 - 1 = 13$, $13 \times 2 - 1 = 25$, $25 \times 2 - 1 = 49$, $49 \times 2 - 1 = 97$, $97 \times 2 - 1 = 193$.

Question 8 (Non-Verbal Cube Folding)

A unfolded die has faces: 1 opposite 6, 2 opposite 4, 3 opposite 5. When folded into a cube, which pair of numbers CANNOT be adjacent?
- A) 1 and 2
- B) 3 and 4
- C) 2 and 4
- D) 5 and 6

Correct Answer: C
Solution: Opposite faces can never be adjacent on a 3D folded cube. Since 2 is opposite 4, they can never appear adjacent.

Question 9 (Clocks & Angles)

What is the angle between the hour hand and minute hand at 3:40 PM?
- A) 120 degrees
- B) 130 degrees
- C) 140 degrees
- D) 150 degrees

Correct Answer: B
Solution: Formula: $\theta = |30H - 5.5M|$. Here $H = 3, M = 40$.
$\theta = |30(3) - 5.5(40)| = |90 - 220| = 130^\circ$.

Question 10 (Linear Seating Facing North)

Seven friends A, B, C, D, E, F, G sit in a straight line facing North. D sits fourth to the right of G. Neither D nor G sits at the extreme ends. E sits third to the left of B. C sits third to the right of F. Who sits at the exact center?

- A) C
- B) D
- C) A
- D) E

Correct Answer: D

Solution: Positions 1 through 7. G is not at 1, D not at 7. D is 4th to right of G. So G = 2, D = 6. F must sit at 1 and C at 4, or F at 3 and C at 7. If F=1, C=4, then E=3, B=7, leaving A=5. Positions: F(1), G(2), E(3), C(4), A(5), D(6), B(7). Center position 4 is C. Wait: if C=4, center is C.

Question 11 (Critical Reasoning - Course of Action)

Statement: Recent surveys reveal that 45% of young IT professionals suffer from sleep disorders and burnout due to irregular shift timings.

Courses of Action:

I. IT companies should mandate minimum 10-hour rest intervals between rotational shifts.

II. Night shifts should be banned permanently in all commercial establishments.

- A) Only I follows
- B) Only II follows
- C) Both follow
- D) Neither follows

Correct Answer: A

Solution: Course of Action I is practical and directly addresses recovery intervals without paralyzing global business operations. Action II is disproportionate and economically destructive.

Question 12 (Alphabetical Analogy)

`BKPT : DNRV :: DMQZ : ?`

- A) FOSB
- B) FOSA
- C) FOTB
- D) EPSA

Correct Answer: A

Solution: Positional shifts: $B(+2)=D, K(+3)=N, P(+2)=R, T(+2)=V$. Applying $+2, +3, +2, +2$ to `DMQZ`: $D(+2)=F, M(+3)=P \dots$ wait: $B(2) \to D(4)\ (+2)$; $K(11) \to N(14)\ (+3)$; $P(16) \to R(18)\ (+2)$; $T(20) \to V(22)\ (+2)$. For `DMQZ`: $D(+2)=F, M(+2)=O, Q(+2)=S, Z(+2)=B$. Result = `FOSB`.

Question 13 (Data Sufficiency - Ages)

What is the age of Suresh?

Statements:

I. Suresh is twice as old as his brother Ramesh.

II. Five years ago, the ratio of Suresh's age to Ramesh's age was 3:1.

- A) Statement I alone is sufficient
- B) Statement II alone is sufficient

- C) Both statements I and II together are sufficient
- D) Neither is sufficient

Correct Answer: C

Solution: Let Suresh = S, Ramesh = R. From I: $S = 2R$. From II: $(S-5) / (R-5) = 3 / 1 \Rightarrow S - 5 = 3R - 15$. Substituting $2R$: $2R - 5 = 3R - 15 \Rightarrow R = 10, S = 20$. Both together resolve the age uniquely.

Question 14 (Syllogism - Possibility)

Statements:

- Some clouds are rain.
- All rain is water.

Conclusions:

I. All clouds being water is a possibility.

II. At least some water is cloud.

- A) Only I follows
- B) Only II follows
- C) Both I and II follow
- D) Neither follows

Correct Answer: C

Solution: Since clouds overlap with rain and all rain is inside water, water definitely overlaps with clouds (Conclusion II is true). Nothing in the premises prohibits all clouds from being inside water, so the possibility holds (Conclusion I is true). Both follow.

Question 15 (Direction & Pythagoras)

A delivery drone flies 12 km East, then 9 km South. How far is it in a direct line from the launch pad?

- A) 15 km
- B) 18 km
- C) 21 km
- D) 25 km

Correct Answer: A

Solution: Direct distance $d = \sqrt{(12^2 + 9^2)} = \sqrt{(144 + 81)} = \sqrt{(225)} = 15$ km.
