📝 SECTIONAL MOCK TEST 01 (5 Questions | 10 Mins)

Question 1 (Inverted Third Conditional)

Select the grammatically correct completion:

`Had the DevOps team monitored the disk metrics earlier, the production database _____ out of space.`

- A) will not have run
- B) would not have run
- C) would not run
- D) had not run

Correct Answer: B

Solution: Inverted third conditional format: `Had + Subject + Past Participle, ... Subject + would have + Past Participle`. Therefore, 'would not have run' is the only grammatically valid construction.

Question 2 (Subjunctive Mood)

`The security auditor insisted that the lead engineer _____ all hardcoded API tokens immediately.`

- A) revoke
- B) revokes
- C) revoked
- D) will revoke

Correct Answer: A

Solution: Mandative subjunctive mood verbs following demand, insist, require, recommend take the bare infinitive (base form of the verb without 'to') regardless of the subject's person or number: 'insisted that he revoke', not 'revokes'.

Question 3 (Phonetic Article Usage)

Choose the correct articles for the blanks:

`It was _____ unique achievement for _____ European research consortium to develop _____ heir to the legacy satellite network.`

- A) a, an, a
- B) a, a, an
- C) an, a, a
- D) an, an, an

Correct Answer: B

Solution:

- 'unique' begins with consonant sound /j/ → 'a unique'.
- 'European' begins with consonant sound /j/ → 'a European'.
- 'heir' begins with a silent 'h' and vowel sound /\epsilon\partial/ → 'an heir'.

Correct sequence: a, a, an.

Question 4 (Dependent Prepositions)

`The engineering department is averse _____ adopting unverified third-party libraries.`

- A) for
- B) with
- C) to
- D) about

Correct Answer: C

Solution: The adjective 'averse' takes the mandatory dependent preposition 'to' (e.g., 'averse to adopting').

Question 5 (Parallel Structure in Technical Writing)

Select the sentence with impeccable parallel structure:

- A) The cloud script is responsible for provisioning servers, configuring networks, and to monitor latency.
- B) The cloud script is responsible for provisioning servers, configuring networks, and monitoring latency.
- C) The cloud script is responsible for server provisioning, to configure networks, and monitoring latency.
- D) The cloud script is responsible for provisioning of servers, network configuration, and monitors latency.

Correct Answer: B

Solution: In a coordinated list following a preposition, all items must share the identical grammatical form: gerunds 'provisioning', 'configuring', and 'monitoring'. Option B maintains perfect parallel structure.
