Question 19 (Mock Global Q059)

ID: `MOCK_SERIES_Q059` | **Mock Source**: Day 01 — 1. Full length verbal ability

Problem Statement

Directions: Read the following passage to answer the given questions based on it. Some words/phrases are printed in bold to help you locate them while answering some of the questions. (The passage has been extracted from 'The Hindu' dated June 11, 2014.) Ever since the morning after 26/11, India’s strategic community has discussed what the country ought to do when the next 26/11 happens. Prime Minister Narendra Modi may have to answer that question sooner than most people expect. The Lashkar-e-Taiba (LeT) staged its first operation against an Indian target since 26/11 just hours before Mr. Modi took office, attacking India’s mission in Herat. Lashkar chief Hafiz Muhammad Saeed blamed Mr. Modi for this week’s attacks on Karachi — and demanded vengeance. From past evidence, we know these threats aren’t idle . “The only language India understands is that of force,” a press release issued by the Lashkar’s parent organisation, Jamaat-ud-Dawa recorded Mr. Saeed as saying before 26/11, “and that is the language it must be talked to in.” From files he will have read since taking office, Mr. Modi will have learned why Dr. Singh did nothing.

Indian combat jets could hit training camps across the Line of Control (LoC), Air Chief Marshal Fali Major said at a November 29 meeting called for by the Prime Minister, but precise coordinates and adequate imaging weren't available. Later, General Deepak Kapoor, the chief of Army staff, told Dr. Singh he couldn't promise special forces' strikes would be successful either. No one could guarantee missile strikes wouldn't escalate into war, or even a nuclear exchange — and no one could guarantee war would compel Pakistan's military to change course. Mr. Modi's advisers know five responses are on the table — but all of them involve great risks. The first is to keep doing nothing. The threat of a major India- Pakistan crisis after 26/11 led the United States to mount intense pressure on Pakistan. In the years since, the LeT hasn't mounted a single major operation on Indian soil. Its affiliate, the Indian Mujahideen, has had restraint thrust upon it by Pakistan's Inter-Services Intelligence (ISI) Directorate. Inaction, though, only succeeds if someone else does the hard work. In 2008, fearing its own war in Afghanistan would be undermined by an India-Pakistan war, the U.S. stepped in. Now, as it prepares to withdraw from Afghanistan, the country's appetite for playing global policeman is diminishing. Doing nothing could thus invite even more punishment. Like Prime Minister Atal Bihari Vajpayee, Mr. Modi's second choice might be coercion. In 2001, after terrorists attacked Parliament, India mobilised troops. Pakistan was forced to respond — but its smaller economy suffered disproportionately. The stratagem is time-tested. In 1953, Prime Minister Jawaharlal Nehru mobilised troops in Punjab to deter a Pakistani attack into Kashmir. Mr. Vajpayee's strategy worked, forcing Pakistan to dramatically scale down the jihad in Jammu and Kashmir. It only worked, though, because the U.S. played mediator — much like after 26/11 — and it was hideously expensive, in money and lives. The third choice is to do what Dr. Singh couldn't: limited strikes on jihadist training camps across the LoC, using air power or missiles. In the five years since 26/11, India's ability to conduct such strikes has been significantly enhanced. However, the tactic hasn't had great success. In August 1998, the United States fired missiles into Afghanistan, seeking to avenge bombings which killed 224 people. In all, 75 missiles, each priced at $1.5 million, killed six minor jihadists. Moreover, Pakistan could hit back, targeting Indian industrial infrastructure, which is much more expensive than tent-and-donkey cart training camps. Fourth, the Prime Minister could tell Indian troops to target the Pakistan Army along the LoC, using artillery and infantry — a task aided by the fact that its defences along stretches of the Neelam valley have been degraded by troops having to be moved to fight the Tehreek-e-Taliban elsewhere. The fighting that will follow though will make it more difficult to secure the LoC against jihadist infiltration — leading to heightened violence in Kashmir. Mr. Modi could, finally, authorise the use of covert means, like bomb-for-bomb strikes or targeted assassination of jihadist leaders. Mr. Modi's intelligence services, though, don't have this arrow in their quiver — and it will be a while, most experts say, before they can acquire it. Every sane person should hope Mr. Modi will never be required to exercise any of his military options — but thinking through war is just as important as talking peace. 1. What is the major reason according to the passage is for the Lashkar-e-Taiba not mounting a major operation on Indian soil after 26/11?

Options

- **(A)** Due to India's enhanced security after 26/11

Directions: Read the following passage to answer the given questions based on it. Some words/phrases are printed in bold to help you locate them while answering some of the questions. (The passage has been extracted from 'The Hindu' dated June 11, 2014.) Ever since the morning after 26/11, India's strategic community has discussed what the country ought to do when the next 26/11 happens. Prime Minister Narendra Modi may have to answer that question sooner than most people expect. The Lashkar-e-Taiba (LeT) staged its first operation against an Indian target since 26/11 just hours before Mr. Modi took office, attacking India's mission in Herat. Lashkar chief Hafiz Muhammad Saeed blamed Mr. Modi for this week's attacks on Karachi — and demanded vengeance. From past evidence, we know these threats aren't idle . "The only language India understands is that of force," a press release issued by the Lashkar's parent organisation, Jamaat-ud-Dawa recorded Mr. Saeed as saying before 26/11, "and that is the language it must be talked to in." From files he will have read since taking office, Mr. Modi will have learned why Dr. Singh did nothing. Indian combat jets could hit training camps across the Line of Control (LoC), Air Chief Marshal Fali Major said at a November 29 meeting called for by the Prime Minister, but precise coordinates and adequate imaging weren't available. Later, General Deepak Kapoor, the chief of Army staff, told Dr. Singh he couldn't promise special forces' strikes would be successful either. No one could guarantee missile strikes wouldn't escalate into war, or even a nuclear exchange — and no one could guarantee war would compel Pakistan's military to change course. Mr. Modi's advisers know five responses are on the table — but all of them involve great risks. The first is to keep doing nothing. The threat of a major India- Pakistan crisis after 26/11 led the United States to mount intense pressure on Pakistan. In the years since, the LeT hasn't mounted a single major operation on Indian soil. Its affiliate, the Indian Mujahideen, has had restraint thrust upon it by Pakistan's Inter-Services Intelligence (ISI) Directorate. Inaction, though, only succeeds if someone else does the hard work. In 2008, fearing its own war in Afghanistan would be undermined by an India-Pakistan war, the U.S. stepped in. Now, as it prepares to withdraw from Afghanistan, the country's appetite for playing global policeman is diminishing. Doing nothing could thus invite even more punishment. Like Prime Minister Atal Bihari Vajpayee, Mr. Modi's second choice might be coercion. In 2001, after terrorists attacked Parliament, India mobilised troops. Pakistan was forced to respond — but its smaller economy suffered disproportionately. The stratagem is time-tested. In 1953, Prime Minister Jawaharlal Nehru mobilised troops in Punjab to deter a Pakistani attack into Kashmir. Mr. Vajpayee's strategy worked, forcing Pakistan to dramatically scale down the jihad in Jammu and Kashmir. It only worked, though, because the U.S. played mediator — much like after 26/11 — and it was hideously expensive, in money and lives. The third choice is to do what Dr. Singh couldn't: limited strikes on jihadist training camps across the LoC, using air power or missiles. In the five years since 26/11, India's ability to conduct such strikes has been significantly enhanced. However, the tactic hasn't had great success. In August 1998, the United States fired missiles into Afghanistan, seeking to avenge bombings which killed 224 people. In all, 75 missiles, each priced at $1.5 million, killed six minor jihadists. Moreover, Pakistan could hit back, targeting Indian industrial infrastructure, which is much more expensive than tent-and-donkey cart training camps. Fourth, the Prime Minister could tell Indian troops to target the Pakistan Army along the LoC,

using artillery and infantry — a task aided by the fact that its defences along stretches of the Neelam valley have been degraded by troops having to be moved to fight the Tehreek-e-Taliban elsewhere. The fighting that will follow though will make it more difficult to secure the LoC against jihadist infiltration — leading to heightened violence in Kashmir. Mr. Modi could, finally, authorise the use of covert means, like bomb-for-bomb strikes or targeted assassination of jihadist leaders. Mr. Modi's intelligence services, though, don't have this arrow in their quiver — and it will be a while, most experts say, before they can acquire it. Every sane person should hope Mr. Modi will never be required to exercise any of his military options — but thinking through war is just as important as talking peace. 1. Which of the following statements according to the passage is not true?

Options

- **(A)** Coercion tactics to combat Pakistan's cloven hoof have never been successful in the past.
- **(B)** Dr M. M. Singh did almost nothing in response to 26/11 attacks.
- **(C)** Fighting the Pakistan Army along the LoC head-on may make it more difficult to secure the LoC against jihadist infiltration.
- **(D)** A war with Pakistan could not guarantee peace after 26/11.

Question 7 (Mock Global Q208)

ID: `MOCK_SERIES_Q208` | **Mock Source**: Day 04 — 4. Full Length Verbal Ability

Fill in the blank with suitable words from the options.

There is a general ____ in the United States that our ethics are declining and that our moral standards are ____.

Options

- **(A)** feeling - normalizing
- **(B)** idea - futile
- **(C)** optimism - improving
- **(D)** complaint - deteriorating

Verified Answer

Option D: complaint - deteriorating

Step-by-Step Solution & Rationale

Ans - D The conjunction 'and' usually joins things of similar meaning or weight. This suggests that since ethics are declining, moral standards are also declining (deteriorating). Almost any word except 'optimism' would have fit the first blank.

Question 8 (Mock Global Q209)

ID: `MOCK_SERIES_Q209` | **Mock Source**: Day 04 — 4. Full Length Verbal Ability

Problem Statement

Fill in the blank with suitable words from the options.

In the Middle Ages, the ____ of the great cathedrals did not enter into the architects' plans; almost invariably a cathedral was positioned haphazardly in ____ surroundings.

Options

- **(A)** situation - incongruous
- **(B)** location - apt
- **(C)** ambience - salubrious
- **(D)** durability - convenient

Verified Answer

Option A: situation - incongruous

Step-by-Step Solution & Rationale

Ans - A The semicolon indicates that the second part of the sentence expands on the first part. So, the second part tells us we are talking about the position, or situation of a cathedral. And since the first part tells us that architects did not pay attention to the situation, the cathedral was positioned randomly in odd (incongruous) surroundings.

Question 9 (Mock Global Q210)

Options

- **(A)** consanguineous
- **(B)** discernible
- **(C)** incompatible
- **(D)** decipherable

Verified Answer

Option C: incompatible

Step-by-Step Solution & Rationale

Ans - C A set of words linked with 'and' usually indicates things of similar weight. To go with 'absurd' and 'unnatural' we can choose incompatible with common sense.

Question 10 (Mock Global Q211)

ID: `MOCK_SERIES_Q211` | **Mock Source**: Day 04 — 4. Full Length Verbal Ability

Abraham Lincoln was famously known for his _____, which explains why he is often referred to as "Honest Abe."

Options

- **(A)** mendacity
- **(B)** humility
- **(C)** veracity
- **(D)** piety

Verified Answer

Option C: veracity

Step-by-Step Solution & Rationale

Ans - C Here, the keyword is "honest," and the missing word is used to explain why Lincoln was called honest. Thus, the missing word must also mean honesty, as only someone known for honesty would be called "honest.", As veracity means honesty or truthfulness, it's the suitable answer.

Question 11 (Mock Global Q212)

ID: `MOCK_SERIES_Q212` | **Mock Source**: Day 04 — 4. Full Length Verbal Ability

Problem Statement

Fill in the blanks with suitable answer options.

Archaeology is a poor profession; only ____ sums are available for excavating sites and even more ____ amounts for preserving the excavations.

Options

- **(A)** paltry - meager
- **(B)** miniscule - substantial
- **(C)** average - augmented
- **(D)** judicious - penurious

Verified Answer

Option A: paltry - meager

Step-by-Step Solution & Rationale

Ans - A The part after the semicolon expands upon the first part of the sentence. So, since the first part tells us that there is no money in archaeology, then there will only be small (paltry) amounts for excavating. Also 'even more' indicates that another similar word is required. Thus, meager also means small.

- **(C)** potential, forced
- **(D)** sophistry, turned

Verified Answer

Option D: sophistry, turned

Step-by-Step Solution & Rationale

- **(D)** promoted

Verified Answer

Option A: exposed

Step-by-Step Solution & Rationale

- **(B)** sporadically - awards
- **(C)** tirelessly - encouragement
- **(D)** successfully - acclaim

Verified Answer

Option A: doggedly - disappointment

Step-by-Step Solution & Rationale

Ans - A The word 'despite' indicates something contrary. So, despite the rejection slips he pursues his path doggedly or tirelessly. But since the 'and' links similar things he is getting disappointment along with the rejection slips, not encouragement.

Question 5 (Mock Global Q316)

ID: `MOCK_SERIES_Q316` | **Mock Source**: Day 06 — Verbal Ability

Problem Statement

Read the passage and answer the questions. Management is a set of processes that can keep a complicated system of people and technology to run smoothly. The most important aspects of management include planning, budgeting, organizing, staffing, controlling and problem-solving. Leadership is a set of processes that creates organizations in the first place or adapts them to significantly changing circumstances. Leadership defines what the future should look like, aligns people with that vision and inspires them to make it happen despite the obstacles. This distinction is absolutely crucial for our purposes here: Successful transformation is 70 to 90 per cent leadership and only 10 to 30 percent management. Yet for historical reasons, many organizations today don't have much leadership. And almost everyone thinks about the problem here as one of managing change. For most of this country, as we created thousands and thousands of large organizations for the first time in human history, we didn't have enough good managers to keep all those bureaucracies functioning. Many companies and universities developed management programs and hundreds and thousands of people were encouraged to learn management on the job. And they did. But, people were taught little about leadership. To some degree, management was emphasized because it's easier to preach than leadership. But even more so, management was the main item on the twentieth century agenda because that's what was needed. For every entrepreneur or business builder who was a leader, we needed hundreds of managers to run their ever-growing enterprises. Unfortunately for us today, this emphasis on management has often been institutionalized in corporate cultures that discourage employees from learning how to lead. Ironically, past success is usually the key ingredient in producing this outcome. The syndrome, as I have observed it on many occasions, goes like this: Success creates some degree of marked dominance which in turn produces much growth. After a while keeping the ever-larger organization under control becomes the primary challenge. So, attention turns inward and managerial competencies are nurtured. With a strong emphasis on management but not leadership, bureaucracy and an inward focus takeover. But with continued success, the result mostly of market dominance, the problem often goes unaddressed and an unhealthy arrogance begins to evolve. All of these characteristics then make any transformation effort much more difficult. Arrogant managers can over-evaluate their current performance and competitive position, listen poorly and learn slowly. Inwardly focused employees can have difficulty seeing the very forces that present threats and opportunities. Bureaucratic cultures can smother those who want to respond to shifting conditions. And the lack of leadership leaves no force inside these organizations to break out of the morass.
Q. Why did companies and universities develop programs to prepare managers in such large numbers?

Options

- **(A)** Companies and universities wanted to generate funds through these programs.
- **(B)** The large number of organizations were created as they needed managers in good number.
- **(C)** Organizations did not want to spend their scarce resources in training managers.
- **(D)** Organizations wanted to create communication network through trained managers.

Verified Answer

Step-by-Step Solution & Rationale

Correct Answer: Option B: The large number of organizations were created as they needed managers in good number.. Solved following standard Infosys System Engineer evaluation criteria.

Question 6 (Mock Global Q317)

ID: `MOCK_SERIES_Q317` | **Mock Source**: Day 06 — Verbal Ability

Problem Statement

Read the passage and answer the questions. Management is a set of processes that can keep a complicated system of people and technology to run smoothly. The most important aspects of management include planning, budgeting, organizing, staffing, controlling and problem-solving. Leadership is a set of processes that creates organizations in the first place or adapts them to significantly changing circumstances. Leadership defines what the future should look like, aligns people with that vision and inspires them to make it happen despite the obstacles. This distinction is absolutely crucial for our purposes here: Successful transformation is 70 to 90 per cent leadership and only 10 to 30 percent management. Yet for historical reasons, many organizations today don't have much leadership. And almost everyone thinks about the problem here as one of managing change. For most of this country, as we created thousands and thousands of large organizations for the first time in human history, we didn't have enough good managers to keep all those bureaucracies functioning. Many companies and universities developed management programs and hundreds and thousands of people were encouraged to learn management on the job. And they did. But, people were taught little about leadership. To some degree, management was emphasized because it's easier to preach than leadership. But even more so, management was the main item on the twentieth century agenda because that's what was needed. For every entrepreneur or business builder who was a leader, we needed hundreds of managers to run their ever-growing enterprises. Unfortunately for us today, this emphasis on management has often been institutionalized in corporate cultures that discourage employees from learning how to lead. Ironically, past success is usually the key ingredient in producing this outcome. The syndrome, as I have observed it on many occasions, goes like this: Success creates some degree of marked dominance which in turn produces much growth. Inwardly focused employees can have difficulty seeing the very forces that present threats and opportunities. Bureaucratic cultures can smother those who want to respond to shifting conditions. And the lack of leadership leaves no force inside these organizations to break out of the morass. Q. Which of the following characteristics helps an organization in its efforts to transform?

Options

- **(A)** Emphasis on leadership and not management
- **(B)** Strong and dogmatic culture
- **(C)** Bureaucratic and inward-looking approach
- **(D)** Failing to acknowledge the value of customers and shareholders

Question 7 (Mock Global Q318)

ID: `MOCK_SERIES_Q318` | **Mock Source**: Day 06 — Verbal Ability

Problem Statement

Read the passage and answer the questions. The impressive recent growth of certain sectors of the Indian economy is a necessary but insufficient condition for the elimination of extreme poverty. In order to ensure that the poorest benefit from this growth, and also contribute to it, the expansion and improvement of the microfinance sector should be a national priority.studies suggest that the impact of microfinance on the poorest is greater than on the poor, and yet another that non-participating members of communities where microfinance operates experience socio-economic gains suggesting strong spillover effects. Moreover, well-managed microfinance institutions (MFIs) have shown a capacity to wean themselves off of subsidies and become sustainable within a few years. Microfinance is powerful, but it is clearly no panacea. Microfinance does not directly address some structural problems facing Indian society and the economy, and it is not yet as efficient as it will be when economies of scale are realised and a more supportive policy environment is created. Loan products are still too inflexible, and savings and insurance services that the poor also need are not widely available due to regulatory barriers Still, microfinance is one of the few market-based, scaleable anti-poverty solutions that is in place in India today, and the argument to scale it up to meet the overwhelming need is compelling.According to Sa-Dhan, the overall outreach is 6.5 million families and the sector-wide loan portfolio is Rs 2,500 crore. However, this is meeting only 10% of the estimated demand. Importantly, new initiatives are expanding this success story to the some of the country's poorest regions, such as eastern and central Uttar Pradesh. The local and national governments have an important role to play in ensuring the growth and improvement of microfinance. First and foremost, the market should be left to set interest rates, not the state. Ensuring transparency and full disclosure of rates including fees is something the government should ensure, and something that new technologies as well as reporting and data standards are already enabling. Furthermore, government regulators should set clear criteria for allowing MFIs to mobilise savings for on-lending to the poor; this would allow for a large measure of financial independence amongst well-managed MFIs. Each Indian state could consider forming a multi-party working group to meet with microfinance leaders and have a dialogue with them about how the policy environment could be made more supportive and to clear up misperceptions. There is an opportunity to make a real dent in hard-core poverty through microfinance. By unleashing the entrepreneurial talent of the poor, we will slowly but surely transform India in ways we can only begin to imagine today. Q. Which of following is not a challenge faced by microfinance in India?

Options

- **(A)** does not help the poorest
- **(B)** fficient when economy of scale is achieved
- **(C)** non_conducting policy environment

- **(D)** structural problems of india society

Option A: does not help the poorest

Problem Statement

Read the passage and answer the questions that follow : Once upon a time, in a quaint little village nestled in a picturesque valley, there lived a young girl named Lily. She was known for her adventurous spirit and her deep curiosity. One sunny afternoon, while exploring the woods that bordered the village, Lily stumbled upon a hidden clearing. In the center of this secret meadow, she found an old oak tree with a peculiar nook. In that nook, half-buried in the earth, was a mysterious locket, ornate and gleaming with intricate designs. Lily carefully unearthed it, and as she held it in her hand, she felt a strange connection to this forgotten piece of jewelry. Back in her cottage, Lily examined the locket more closely. It was made of silver with a hint of gold, and its surface was adorned with delicate engravings of leaves and flowers. On the front, there was an image of a crescent moon, and on the back, an engraving read, “To the one who seeks the truth.” The locket was sealed tightly, and Lily couldn’t open it no matter how hard she tried. Determined to solve the mystery, Lily embarked on a quest to find someone who could open the locket. She asked the village blacksmith, the wise old woman who lived on the hill, and even the town’s mayor, but none of them could unlock its secrets. Feeling a bit discouraged, Lily spent her days reading about ancient relics and searching for clues in the library. One day, while immersed in an old book about mystical lockets, Lily came across a passage that mentioned the existence of a “key of the heart.” It said that this key could open the most stubborn of locks, but it was hidden within each person, waiting to be discovered. This newfound knowledge gave Lily a renewed sense of hope and determination. The next morning, Lily decided to visit the village’s recluse, an elderly woman rumored to have deep knowledge of the heart. The recluse lived in a remote cottage surrounded by a lush garden. Lily knocked on the door and explained her quest. The old woman listened attentively and finally agreed to help. She told Lily that the key to opening the locket was hidden within her heart and that she needed to meditate on her truest desires and intentions. Lily followed the recluse’s advice, sitting beneath the ancient oak tree where she had found the locket. She closed her eyes, focused on her heart’s deepest desires, and as she did, she felt the locket warming in her hand. When she opened her eyes, she found the locket had sprung open, revealing a tiny, folded parchment inside. With trembling hands, she carefully unfolded it and read the message: “The truth lies in the journey, not the destination.” The mystery of the locket was solved,

but Lily realized that the real treasure was the journey of self-discovery she had undertaken. She understood that her quest had led her to understand her heart's desires and the power of her own determination.

Direction In these question you have two brief passages with six questions following the passage. Read the passage carefully and choose the best answer to each question out of the four alternatives. Passage – 1

Education, as Mahatma Gandhi described it, "is the tool for the development of consciousness and reconstitution of society". Since Independence, India has stressed reforming and restructuring the educational system as part of state intervention. The National Policy on Education (NPE), 1986, which is hailed as a landmark in the Indian educational system, provided a comprehensive framework to guide the development of education in the country. The NPE and its Programme of Action was again updated in 1992 through similar consensual process involving all the State governments, resource organisations and educationists. What has been worrying the critics and educationists alike is the non- fulfilment of one of the NPE objectives: education of girl. It has been stated in the NPE that the 'Education For All' meet should have a strong gender focus as Education For All by definition is gender inclusive. According to the passage, 'a strong gender focus' means

- **(D)** a focus on male-female ratio

Verified Answer

Option C: a strong focus on gender bias

Top-Level Master RC — RC01 Reading Comprehension Session

Question 1 (Mock Global Q475)

ID: `MOCK_SERIES_Q475` | **Mock Source**: Top-Level Master RC — RC01 Reading Comprehension Session

Problem Statement

Directions (01- 10): Read the following passage carefully and answer the questions given below it. Certain words are given in bold to help you locate them while answering some of the questions.
When we are children growing up, our imagination is the key to untold worlds. And it has been shown that kids with very active imaginations are more likely to dream and strive for greater things as adults. It is a sad fact that all too often, as we grow up, we are told to “get our heads out of the clouds”, to "stop daydreaming", and that living in an imaginary world is not good for us. But stifling your imagination is the worst thing you can do to yourself, as it will only pave the way for accelerated aging, and all too often a life that feels unfulfilled.
Though many take creativity for granted, it is a trait not possessed by everyone. Many people are labelled as primarily “right brained” or “left brained” (if such a thing exists): It is argued that highly intellectual, logical types are less likely to be creative, have less wild imaginations and are typically rule followers who do not believe in much of anything that cannot be logically quantified. Regardless of the left brain / right brain argument, imagination unleashes creativity, allowing you to live a life filled with potential. The creative individual does not see the sky as the limit, instead the limit is as far as he or she can imagine. They not only think outside the box, for them there is no box, and so their brains are constantly challenged, humming and conjuring up all sorts of goodies. Anything the mind can conjure is good enough to become true, be it work, life, personal goals accomplishments or anything. A very good trait to cultivate from childhood.
Empathy is the act of being truly sympathetic to another person, without ever actually experiencing what they are going through yourself. Sadly, many people do not know how to express empathy, and the reason for this is simple; it is not because that person is a bad individual, or mean spirited. It simply means that individual cannot imagine the feelings of the person experiencing a particular event, and thus cannot truly relate. Your imagination may leave you in a good position to offer a shoulder for comfort and support, as you are able to envision going through the same thing as the person suffering, and thus able to demonstrate what you think a person needs at that time. Being of service towards other people in that way, promotes your own mental health and emotional well being.
Those brain connections are a part of what makes you who you are, and forming new connections supports memory functions and keeps the brain vibrant and strong. Your imagination can be a useful tool for strengthening these connections, in order to form long-term memories. Here are two explanations of how memory works; an intellectual will harness and strengthen memory by repetition. Studying work day after day enhances these connections bit by bit, or via physical practice. On the other hand, someone who uses their imagination may know something well, and be able to recall everything without seeming to make an effort. Take for example planning for their wedding. Years and years beforehand, that person could have meticulously planned and imagined their dream wedding, so that when the actual time comes, the planning step and what they want pops up like clockwork.

Q1. What, according to the passage, is/are the disadvantage(s) of constraining the children to be realistic and not imaginative?

(I) it will lead to an unfulfilled life.
(II) They lack empathy
(III) It limits the growth of their brain

Options

- **(A)** Only (I)
- **(B)** Only (II)

- **(C)** Both (I) and (II)
- **(D)** Both (II) and (III)
- **(E)** All

Verified Answer

Option C: Both (I) and (II)

Step-by-Step Solution & Rationale

Refer the last few lines of first paragraph “But stifling your imagination is the worst thing you can do to yourself, as it will only pave the way for accelerated aging, and all too often a life that feels unfulfilled.” Hence option (c) is the correct choice.

Anything the mind can conjure is good enough to become true, be it work, life, personal goals accomplishments or anything. A very good trait to cultivate from childhood.

Empathy is the act of being truly sympathetic to another person, without ever actually experiencing what they are going through yourself. Sadly, many people do not know how to express empathy, and the reason for this is simple; it is not because that person is a bad individual, or mean spirited. It simply means that individual cannot imagine the feelings of the person experiencing a particular event, and thus cannot truly relate. Your imagination may leave you in a good position to offer a shoulder for comfort and support, as you are able to envision going through the same thing as the person suffering, and thus able to demonstrate what you think a person needs at that time. Being of service towards other people in that way, promotes your own mental health and emotional well being.Those brain connections are a part of what makes you who you are, and forming new connections supports memory functions and keeps the brain vibrant and strong. Your imagination can be a useful tool for strengthening these connections, in order to form long-term memories. Here are two explanations of how memory works; an intellectual will harness and strengthen memory by repetition. Studying work day after day enhances these connections bit by bit, or via physical practice. On the other hand, someone who uses their imagination may know something well, and be able to recall everything without seeming to make an effort. Take for example planning for their wedding. Years and years beforehand, that person could have meticulously planned and imagined their dream wedding, so that when the actual time comes, the planning step and what they want pops up like clockwork

Problem Statement

Directions (01- 10): Read the following passage carefully and answer the questions given below it. Certain words are given in bold to help you locate them while answering some of the questions.
When we are children growing up, our imagination is the key to untold worlds. And it has been shown that kids with very active imaginations are more likely to dream and strive for greater things as adults. It is a sad fact that all too often, as we grow up, we are told to “get our heads out of the clouds”, to "stop daydreaming", and that living in an imaginary world is not good for us. But stifling your imagination is the worst thing you can do to yourself, as it will only pave the way for accelerated aging, and all too often a life that feels unfulfilled.
Though many take creativity for granted, it is a trait not possessed by everyone. Many people are labelled as primarily “right brained” or “left brained” (if such a thing exists): It is argued that highly intellectual, logical types are less likely to be creative, have less wild imaginations and are typically rule followers who do not believe in much of anything that cannot be logically quantified. Regardless of the left brain / right brain argument, imagination unleashes creativity, allowing you to live a life filled with potential. The creative individual does not see the sky as the limit, instead the limit is as far as he or she can imagine. They not only think outside the box, for them there is no box, and so their brains are constantly challenged, humming and conjuring up all sorts of goodies. Anything the mind can conjure is good enough to become true, be it work, life, personal goals accomplishments or anything. A very good trait to cultivate from childhood.

Question 1 (Mock Global Q490)

ID: `MOCK_SERIES_Q490` | **Mock Source**: Top-Level Master RC — RC02 Reading Comprehension Session

Problem Statement

Directions (1-5): Read the given passage and answer the following questions based on the passage.
For almost two decades, the Central Ground Water Board (CGWB) has been reporting on the increasing number of over-exploited blocks across India, the 'dark' category blocks. The recent annual book of CGWB has reported 1,034 units, out of the 6,584 units it monitors, as over-exploited. If this is the 'crisis', then we have had it for long. What has this not received enough attention? Is it because these zones are not in cities?

Just to be sure how critical the 'crisis' is, CGWB's 2013 estimates say that the groundwater development in India is just about 62% of the utilisable groundwater reserves. Similarly, a recent report by the Central Water Commission, prepared in collaboration with the Indian Space Research Organisation (ISRO), asserted that India is not yet in "water scarcity condition". But it is certainly in a "water-stressed condition", with reducing per capita water availability. Here, we certainly don't mean to say that India can continue with the present ways of water management. We also cannot remain in a state of denial that a crisis is not in the making. However, certain steps need to be taken to ensure a more useful and productive discourse about water governance challenges.

First, India needs to reconsider the institutional processes for dissemination of knowledge about water resource management. There is a certain amount of danger inherent in the casual manner in which knowledge about water resources is legitimised and consumed, particularly in these days of 'viral' information.

Second, we need to recognise the crisis is not as much of scarcity as of delivery. The challenge is to ensure an adequate access to quality water, more so in urban areas where inequities over space and time are acute. We need to also realise that with the country's rapid urbanisation, demand cannot be met by groundwater reserves alone. For instance, according to the Delhi Jal Board estimates, groundwater meets just 10% of Delhi's drinking water needs. The rest is met by surface water sources, most of it transported from outside Delhi. The urban needs, which underpin much reporting on 'water crises', need to be met by robust long-term planning and preparation for droughts and other contingencies.

Finally, we need to reconsider our approaches to water governance. We must recognise that the fulcrum of change and action is with the States. For long, water resource departments in States have continued to follow the conventional approaches of supply augmentation. The challenge is that of reorienting themselves towards deploying strategies of demand management, conservation and regulation. The Centre has to work with States towards an institutional change for the necessary course-shift. The Finance Minister, in her budget, repeatedly stated that the government will work with States to address India's national water security challenges. Let us hope that the government intends to _____ (A) federal governance of water resources towards long-term water security.

Q1. What could be the appropriate title of this passage?

Options

- **(A)** Water crisis
- **(B)** water crisis: Inadequate rainfall
- **(C)** Preserving water
- **(D)** Water governance strategies
- **(E)** None of These

Verified Answer

Option D: Water governance strategies

Step-by-Step Solution & Rationale

Refer to the last and second last paragraph of this passage, it states that crisis of water is not due to scarcity but it is due to lack of preservation measures for delivering the same. As only groundwater is not sufficient due to expanding urbanisation, there needs to be long term planning and alongside staying prepared for drought. Also, in the last paragraph, the author says for reconsidering the strategies for water governance. For coping up with water security challenges, the Centre needs to collaborate with States strengthening the water resources governance and ensuring water security in the long term. Rest of the options are not specific enough to portray the passage as a whole. Thus, option (d) is the most suitable title for the above passage

The recent annual book of CGWB has reported 1,034 units, out of the 6,584 units it monitors, as over-exploited. If this is the 'crisis', then we have had it for long. What has this not received enough attention? Is it because these zones are not in cities?

Just to be sure how critical the 'crisis' is, CGWB's 2013 estimates say that the groundwater development in India is just about 62% of the utilisable groundwater reserves. Similarly, a recent report by the Central Water Commission, prepared in collaboration with the Indian Space Research Organisation (ISRO), asserted that India is not yet in "water scarcity condition". But it is certainly in a "water-stressed condition", with reducing per capita water availability. Here, we certainly don't mean to say that India can continue with the present ways of water management. We also cannot remain in a state of denial that a crisis is not in the making. However, certain steps need to be taken to ensure a more useful and productive discourse about water governance challenges.

First, India needs to reconsider the institutional processes for dissemination of knowledge about water resource management. There is a certain amount of danger inherent in the casual manner in which knowledge about water resources is legitimised and consumed, particularly in these days of 'viral' information.

Second, we need to recognise the crisis is not as much of scarcity as of delivery. The challenge is to ensure an adequate access to quality water, more so in urban areas where inequities over space and time are acute. We need to also realise that with the country's rapid urbanisation, demand cannot be met by groundwater reserves alone. For instance, according to the Delhi Jal Board estimates, groundwater meets just 10% of Delhi's drinking water needs. The rest is met by surface water sources, most of it transported from outside Delhi. The urban needs, which underpin much reporting on 'water crises', need to be met by robust long-term planning and preparation for droughts and other contingencies.

Finally, we need to reconsider our approaches to water governance. We must recognise that the fulcrum of change and action is with the States. For long, water resource departments in States have continued to follow the conventional approaches of supply augmentation. The challenge is that of reorienting themselves towards deploying strategies of demand management, conservation and regulation. The Centre has to work with States towards an institutional change for the necessary course-shift. The Finance Minister, in her budget, repeatedly stated that the government will work with States to address India's national water security challenges. Let us hope that the government intends to _____ (A) federal governance of water resources towards long-term water security.

2.What does the italicized sentence 'we need to recognise the crisis is not as much of scarcity as of delivery' Refers to as per the above passage?

Options

- **(A)** It is not about water scarcity but water availability. Water is not scarce but there is a lack of strategies to get it properly delivered
- **(B)** With expanding urbanisation, there is a need to generate methods to access quality water as ground water is not sufficient to meet drinking water needs.
- **(C)** Surface water is sufficient to meet the demands of drinking water
- **(D)** Without denying the fact that water crisis is in process, necessary steps must be taken ensuring productive discourse and effective dealing with water governance challenges.

- **(E)** All of the above

Verified Answer

Option A: It is not about water scarcity but water availability. Water is not scarce but there is a lack of strategies to get it properly delivered

Step-by-Step Solution & Rationale

Refer to the fourth paragraph of the passage, it states that the main challenge is to deliver quality water, especially in urban areas. Lack of time and space makes it a cumbersome task to bring quality drinking water everywhere in an organized manner. To achieve this goal, there is a dire need for effective strategies. Hence, option (a) is most adequate answer

Question 6 (Mock Global Q495)

ID: `MOCK_SERIES_Q495` | **Mock Source**: Top-Level Master RC — RC02 Reading Comprehension Session

Problem Statement

Directions (6-10): Read the given passage and answer the following questions based on the passage.
There has been much development recently with respect to the Protection of Children from Sexual Offences (POCSO) Act, 2012. With an objective of stopping the rampant sexual abuse of children, the Protection of Children from Sexual Offences (Amendment) Bill, 2019 was introduced in the Rajya Sabha in July, and later passed by both Houses of Parliament. It is all set to become the 'law of the land'. The present bill is welcome in certain respects as it specifically defines what 'child pornography' is; 'using a child for pornographic purposes' and for 'possessing or storing pornography involving a child' is punishable. It has also widened the ambit of 'Aggravated sexual assault'.

The highlight of the Bill is the introduction of the death penalty for the rape of minors. The Bill, in its object clause, justifies this by referring to the judgments of the Supreme Court in Machhi Singh (1983) and Devender Pal Singh (2002) in which the court has held that the death penalty can be awarded only in rarest of rare cases. Thus the intention of the Bill is to have a deterrent effect; but it can be argued that the introduction of the death penalty may backfire in cases of child sexual abuse and even have a catastrophic effect. Often, the perpetrators of abuse are family members and having such penalty in the statute book may discourage the registration of the crime itself. Also, it may threaten the life of the minor as the maximum punishment for murder is also the death sentence.

The Justice J.S. Verma Committee, which was constituted in 2013 in the aftermath of the Nirbhaya case, after due deliberations found itself against the imposition of death penalty in rape cases. The 262nd Report of the Law Commission of India, 2015, also provides for abolition of the death penalty except in terror cases.
Today, the death penalty has become a prominent tool of symbolic legislation — a political statement indeed. Many a time, the Government, by introducing the death penalty, portrays itself to be strict and serious with regard to such offences. It largely diverts attention from the core issues of infrastructural apathy, procedural lapses and trial delays and conveniently evades the fact that 'it is the certainty of punishment rather than its severity which has deterrence in real sense'. It is pertinent to note here that even a year-and-a-half after the passage of the Criminal Law (Amendment) Bill, 2018, which introduced the death penalty for rape of a minor girl, such incidents have not been under check. The debate here is not about retaining or abolishing the death penalty but the probable _____(A) of its provision in the Act.

The Supreme Court has recently taken cognisance of the sexual abuse of children, directing its registry to file a case as writ petition with cause title "In-re Alarming Rise in The Number of Reported Child Rape Incidents". The court has also observed that it intends having a 'zero tolerance policy' toward child rape. As data on sexual crimes against children collected by the court show, 24,212 FIRs were filed across India from January to June this year. According to National Crime Records Bureau data of 2016, the conviction rate in POCSO cases is 29.6% while pendency is as high as 89%. The prescribed time period of two months for trial in such cases is hardly complied with.

The court has also taken note of the delay in trials, in turn directing the Central Government to set up special courts within 60 days of the order in each district having more than 100 pending cases under the Act. It is to be seen how long it takes to comply with the order.
The Criminal Law (Amendment) Act, 2018 introduced the death penalty for rape of girls below the age of 12.

At the same time, the POCSO Act, under Section 42, provides that where the same act constitutes an offence under the said Act and any other law, then the offender will be punished under the Act or such law, whichever provides for greater punishment. This has created an issue as the effect of such an amendment was death penalty for rape of minor girls but not for assault against minor boys.

The proposed Bill does away with such a discrepancy. It is gender neutral and provides for the death penalty for "aggravated penetrative sexual assault of a child", thus bringing both these pieces of legislation on a par with each other in this respect. With these amendments and with the Supreme Court considering child abuse "intolerable", there seems to be reasonable hope now that vulnerable children could be safer. The Bill is a step forward in preventing child abuse but the consequences of providing for the death penalty need to be closely observed.

Q6. What could be the most appropriate title of this passage?

Options

- **(A)** Pondering over POSCO Bill
- **(B)** Life sentence under POSCO Bill
- **(C)** Diverting attention from core issues under POSCO Bill
- **(D)** All of the above
- **(E)** None of These

Verified Answer

Option A: Pondering over POSCO Bill

Step-by-Step Solution & Rationale

Option (a) is the most suitable answer choice. It fits as the title of the passage because it states the entire theme behind this passage in few and precise words.

The debate here is not about retaining or abolishing the death penalty but the probable _____(A) of its provision in the Act.

The Supreme Court has recently taken cognisance of the sexual abuse of children, directing its registry to file a case as writ petition with cause title "In-re Alarming Rise in The Number of Reported Child Rape Incidents". The court has also observed that it intends having a 'zero tolerance policy' toward child rape. As data on sexual crimes against children collected by the court show, 24,212 FIRs were filed across India from January to June this year. According to National Crime Records Bureau data of 2016, the conviction rate in POCSO cases is 29.6% while pendency is as high as 89%. The prescribed time period of two months for trial in such cases is hardly complied with.

The court has also taken note of the delay in trials, in turn directing the Central Government to set up special courts within 60 days of the order in each district having more than 100 pending cases under the Act. It is to be seen how long it takes to comply with the order.
The Criminal Law (Amendment) Act, 2018 introduced the death penalty for rape of girls below the age of 12. At the same time, the POCSO Act, under Section 42, provides that where the same act constitutes an offence under the said Act and any other law, then the offender will be punished under the Act or such law, whichever provides for greater punishment. This has created an issue as the effect of such an amendment was death penalty for rape of minor girls but not for assault against minor boys.

The proposed Bill does away with such a discrepancy. It is gender neutral and provides for the death penalty for "aggravated penetrative sexual assault of a child", thus bringing both these pieces of legislation on a par with each other in this respect. With these amendments and with the Supreme Court considering child abuse

“intolerable”, there seems to be reasonable hope now that vulnerable children could be safer. The Bill is a step forward in preventing child abuse but the consequences of providing for the death penalty need to be closely observed.

Q9. Which one of the following statements is not true about POSCO Bill according to the above paragraph?

Options

- **(A)** Protection of Children from Sexual Offences Amendment Bill, 2019 was introduced in July in Rajya Sabha.
- **(B)** Introduction of Death penalty may fall back in case of child abuse
- **(C)** The court has held the death penalty for rarest of rare cases.
- **(D)** It intends to have a zero tolerance policy towards child rape cases
- **(E)** None of the above

Verified Answer

Option C: The court has held the death penalty for rarest of rare cases.

Step-by-Step Solution & Rationale

Statement given in option (c) is not true because death penalty it is introduced in minor rape cases. Thus, option (c) is the right answer choice.

Question 10 (Mock Global Q499)

Problem Statement

Directions (6-10): Read the given passage and answer the following questions based on the passage.
There has been much development recently with respect to the Protection of Children from Sexual Offences (POCSO) Act, 2012. With an objective of stopping the rampant sexual abuse of children, the Protection of Children from Sexual Offences (Amendment) Bill, 2019 was introduced in the Rajya Sabha in July, and later passed by both Houses of Parliament. It is all set to become the ‘law of the land’. The present bill is welcome in certain respects as it specifically defines what ‘child pornography’ is; ‘using a child for pornographic purposes’ and for ‘possessing or storing pornography involving a child’ is punishable. It has also widened the ambit of ‘Aggravated sexual assault’.

The highlight of the Bill is the introduction of the death penalty for the rape of minors. The Bill, in its object clause, justifies this by referring to the judgments of the Supreme Court in Machhi Singh (1983) and Devender Pal Singh (2002) in which the court has held that the death penalty can be awarded only in rarest of rare cases. Thus the intention of the Bill is to have a deterrent effect; but it can be argued that the introduction of the death penalty may backfire in cases of child sexual abuse and even have a catastrophic effect. Often, the perpetrators of abuse are family members and having such penalty in the statute book may discourage the registration of the crime itself. Also, it may threaten the life of the minor as the maximum punishment for murder is also the death sentence.

The Justice J.S. Verma Committee, which was constituted in 2013 in the aftermath of the Nirbhaya case, after due deliberations found itself against the imposition of death penalty in rape cases. The 262nd Report of the Law Commission of India, 2015, also provides for abolition of the death penalty except in terror cases.

Today, the death penalty has become a prominent tool of symbolic legislation — a political statement indeed. Many a time, the Government, by introducing the death penalty, portrays itself to be strict and serious with regard to such offences. It largely diverts attention from the core issues of infrastructural apathy, procedural lapses and trial delays and conveniently evades the fact that 'it is the certainty of punishment rather than its severity which has deterrence in real sense'. It is pertinent to note here that even a year-and-a-half after the passage of the Criminal Law (Amendment) Bill, 2018, which introduced the death penalty for rape of a minor girl, such incidents have not been under check. The debate here is not about retaining or abolishing the death penalty but the probable _____(A) of its provision in the Act.

Problem Statement

Directions (11-15): Read the following passage and answer the following questions based on the given passage.

As the country celebrates 50 years since bank nationalisation, bank employees will be proud that they have contributed to nation-building. Still there are basic issues close to the bankman's heart that are yet to find redressal, observes Jyothi KP, Vice-President, All-India Bank Officers' Confederation, Kerala, and a National Executive Committee member.The Banking Companies (Acquisition and Transfer of Undertakings) Acts of 1970 and 1980 provide that the Central Government, in consultation with the Reserve Bank of India, may make a scheme, inter alia, for amalgamation of any nationalised bank with any other nationalised bank or any other banking institution. Various committees, including Narasimhan Committee (1998) constituted by the RBI, Leeladhar Committee (2008) chaired by the RBI Deputy Governor, and the Nayak Committee (2014) constituted by the RBI, have recommended consolidation of public sector banks (PSBs) given underlying benefits/synergies.
Taking note of this and potential benefits of consolidation for banks as well as the public through enhanced access to banking services, the government, in order to facilitate consolidation among PSBs to create strong and competitive banks, serving as catalysts for growth, with improved risk profile, has approved a framework for proposals to amalgamate PSBs through an Alternative Mechanism.The following amalgamation/mergers have already happened post-nationalisation and some more are reportedly in the pipeline. This creates stress for the employees since they are scared for their existence and job security, observes Jyothi.

Giving a bank employee's perspective, Jyothi recalled that the banking sector was in the red in Q4 of 2018-19 with a loss of ₹20,817 crore. In 2017-18, they had reported a massive loss of ₹85,000 crore forcing lenders to make provisions for bad loans and clean-up of the books.

Till such time a project is commissioned in line with the approved schedule, banks should not be forced to categorise such projects as NPA, notes Jyothi. In the event of classification of big-ticket advances as NPA, the government should pro-actively help banks in realising the public money. It should initiate steps to declare suo moto 50 top NPAs of each banks as wilful defaulters and to publish their names and photos.
For implementing SARFAESI provisions, many bank officers are targeted, even personally. By merely targeting the bank officers responsible for executing the Act, the political fraternity is missing the point to bring amendments to the Act itself.

The humongous challenge of realising the NPA is telling on PSB bottomlines. This is also subjecting the desk officers to unreasonable amount of work pressure and stress.

Irregular working hours, stress on account of financial risk in routine work schedules, technical problems of software, and IT-related issues add to the worries of the already traumatised bank employees.In many cases,

their retirement benefits are withheld. Many are arrested and are not aware as to why the arrest is happening in the first place, evening leading to suicides.
According to Section 5 of the Banking Regulation Act, banking means 'accepting, for the purpose of lending and investment of deposits of money from public, repayable on demand or otherwise and withdrawal by cheque, draft, order or otherwise.'However, sale of para-banking products and implementation of government schemes take away the lion's share of working hours of an average PSB employee.As mentioned earlier, when the balance sheet turns red, all blame is shoved on the desk-level officers for non-profitability/non-performance.

Yet, when it comes to wage revision, the question of profitability arise. The settlement takes place between Indian Banks' Association (IBA) and United Forum of Bank Unions (UFBU).

The IBA represents bank managements and the UFBU, officers, employees, and staff organisations. The Charter of demands had been submitted in a time bound manner and the IBA had agreed to complete the process of negotiations expeditiously within the time-frame so as to reach the settlement before October 2017. However, since five major bank managements have not given full mandate for negotiating wages up to scale VII , the AIBOC is not participating in the talks now.

Q11. Why amalgamation of Public sector banks has become a stress lately for the bank employees?

Options

- **(A)** Proposals to amalgamate PSBs via an alternative method is approved by the government
- **(B)** The job security and existence of a bank employees becomes questionable
- **(C)** Because such amalgamations have been done after nationalisation and still followed by more such mergers.
- **(D)** During the year 2018-2019, banking was insolvent with a loss of 20,817 Crore Rs.
- **(E)** All of the above

Verified Answer

Option C: Because such amalgamations have been done after nationalisation and still followed by more such mergers.

Step-by-Step Solution & Rationale

As it is mentioned in paragraph second, due to amalgamation of banks, the job security and existence of employees of the bank being amalgamated creates stress as their existence becomes questionable. Hence, option (b) is correct.
