?

Options:

- ✅ **(A) 39** *(Correct Answer)*
- (B) 36
- (C) 32

Correct Answer: (A)

Explanation / Solution:
Third

first × second + 7: 10+7=17, 18+9=27, 28+11=39. Equivalently
first × (second + 4) − 1? 2*9-1=17. Clean: first ×
second + 7, +9, +11 (+2): 10+7=17, 18+9=27, 28+11=39.

  alone is sufficient
- (D) Both
  together are needed

Correct Answer: (A)

A
number is a multiple of 9 if and only if its digit sum is a
multiple of 9. Digit sum 18 is enough. Being even does not decide
divisibility by 9.

Question 7

Statements:

fields. Conclusions: I. Some fields are cookies. II. Some tokens
are headers.

Options:

- ✅ **(A) Only I follows** *(Correct Answer)*
- (B) Only
  II follows
- (C) Both
  follow
- (D) Neither

  II follows
- ✅ **(C) Both I and II follow** *(Correct Answer)*
- (D) Neither
  follows

Correct Answer: (C)

Explanation / Solution:
Locks
that are mutexes are primitives, so I follows. Every mutex is a
primitive and no primitive is a socket, so no mutex is a socket.
Both follow.

Question 13

How
many students are in the class? Statement 1: Ritu's rank
from the top is 9 and from the bottom is 17. Statement 2: Two

- (C) Both
  I and II follow
- (D) Neither
  follows

Correct Answer: (B)

Explanation / Solution:
Routers
lie inside nodes but need not overlap clients, so I does not follow. Some nodes are clients and no client is a replica, so those nodes are not replicas. II follows.

Options:

- ✅ **(A) ** *(Correct Answer)*

Correct Answer: (A)

Explanation / Solution:
Social media has become an important part of modern society. Platforms such as social networking and messaging services allow people to communicate, share information, and stay connected with friends, family, and professional communities.
One major advantage of social media is the quick exchange of information. Students can find educational content, professionals can explore career opportunities, and businesses can communicate with customers. Social media can also provide a platform for people to share ideas and learn about different perspectives.
However, excessive use of social media can create several problems. Spending too much time online may reduce productivity and affect personal interactions. False information can also spread quickly, making it important for users to verify information before sharing it. Privacy and online safety are other important concerns.
In conclusion, social media has both benefits and challenges. Its impact largely depends on how responsibly it is used. By limiting unnecessary usage, protecting personal information, and checking the reliability of online content, people can make better use of social media in their daily lives.
