Question 39 [Marks: +{'positive': 1, 'negative': 0, 'negativeUnattempted': 0}]

Passage
Remote
work, once treated as an emergency arrangement, has become a lasting feature of the information-technology industry. Firms discovered that many roles can be performed without a shared office, and employees valued the time saved on commuting. Productivity studies, however, present a mixed picture. Individual task completion often improves when people work from home, but collaboration on complex problems tends to slow down. New joiners, in particular, learn less quickly when they cannot observe experienced colleagues. Companies have therefore shifted toward hybrid models: a few fixed office days for teamwork, with the remaining days left flexible. The success of such models depends less on software tools than on clear norms—when to meet, how to document decisions, and how to include people who are not in the room.
What is the
main idea of the passage?

Options:

- **(A)** Remote work has failed and companies should return to the office full-time.
- **(B)** Hybrid work is emerging because remote work has both benefits and limits.
- **(C)** Software tools are the main reason hybrid models succeed.

- **(D)** New joiners prefer working only from home.
