INFOSYS SE — ORDER, RANKING & COMPARISON PUZZLES

24 Complete Questions • Height & Weight Comparisons • Linear Queue Positions with Exact Figures

SECTION 1: Height, Weight & Ranking Comparison Puzzles (24 Questions)

[CampusMonk Book 1]

Directions: *There are six people A, B, C, D, E and F. All of them have different heights. A is taller than F & D. B is shorter than only two people including A. A is not the tallest. C is taller than D but shorter than F. The height of 2nd tallest person and the 2nd shortest person is 153 cm and 135 cm respectively.*

Q1. What is the possible height of F?

a. 140 cm
b. 165 cm
c. 100 cm
d. 134 cm
e. 130 cm

Answer: A

Logic / Trick: Descending order: E (tallest) > A (153 cm) > B > F > C (135 cm) > D. Since F is between B (<153 cm) and C (135 cm), F must be between 135 and 153 cm. Only 140 cm falls in this range.

[CampusMonk Book 1]

Directions: *There are six people A, B, C, D, E and F. All of them have different heights. A is taller than F & D. B is shorter than only two people including A. A is not the tallest. C is taller than D but shorter than F. The height of 2nd tallest person and the 2nd shortest person is 153 cm and 135 cm respectively.*

Q2. Who among the following is the 3rd shortest?

a. A
b. C
c. B
d. E
e. F

Answer: E

Logic / Trick: From shortest to tallest: D (1st shortest), C (2nd shortest, 135 cm), F (3rd shortest), B (4th shortest), A (5th shortest, 153 cm), E (tallest). Hence, F is the 3rd shortest.

[CampusMonk Book 1]

Directions: *There are 7 friends — A, B, C, D, E, F and G. All have different heights. B is taller than F but shorter than E. E is not the tallest. A is taller than both F and C. C is taller than G. A is taller than only 3 friends.*

Q3. Who is the tallest of all friends?

a. F
b. G
c. D
d. B
e. CND

Answer: C

Logic / Trick: A is taller than only 3 friends (F, C, G) -> A is 4th from top. B is taller than F but shorter than E. E is not tallest. The only person who can be at the top is D. Hence D is the tallest.

[CampusMonk Book 1]

Directions: *There are 7 friends — A, B, C, D, E, F and G. All have different heights. B is taller than F but shorter than E. E is not the tallest. A is taller than both F and C. C is taller than G. A is taller than only 3 friends.*

Q4. C can be placed at how many possible positions in the arrangement obtained?

a. Other than given in options
b. One
c. Two
d. Three
e. CND

Answer: C

Logic / Trick: Positions 5, 6, 7 are occupied by F, C, G. Since G is shorter than C, C can be in 5th or 6th position (2 possible positions).

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q5. In a line of people, Rohit is ranked 12th from the top, and Ankit is ranked 20th from the bottom. If there are 30 people in the line, how many people are between Rohit and Ankit?

A) 5
B) 7
C) 0
D) 9

Answer: C

Logic / Trick: Rohit position from bottom = (30-12)+1 = 19 Ankit position from bottom = 20 Number of people between Rohit and Ankit = 0

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q6. Arjun is older than Sumit but younger than Rahul. Vikas is younger than Rahul but older than Arjun. Ramesh is the oldest among them. Who is the third oldest?

A) Sumit
B) Arjun
C) Rahul
D) Vikas

Answer: D

Logic / Trick: From the given conditions: Arjun > Sumit, but Arjun < Rahul. -> Rahul > Arjun > Sumit. Vikas is younger than Rahul but older than Arjun. -> Rahul > Vikas > Arjun > Sumit. Ramesh is the oldest. Final order: Ramesh > Rahul > Vikas > Arjun > Sumit. The third oldest is Vikas.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q7. Six people--P, Q, R, S, T, and U--are standing in a line from left to right. P is taller than S but shorter than Q. R is taller than Q but shorter than U. T is the tallest. Who is the fourth tallest?

A) P
B) Q
C) R
D) S

Answer: B

Logic / Trick: From the given conditions: P > S, but P < Q -> Q > P > S. R > Q, but R < U -> U > R > Q. T is the tallest. Final order: T > U > R > Q > P > S. The fourth tallest person is Q.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q8. Shreya is taller than Meena but shorter than Ritu. Kajal is shorter than Ritu but taller than Meena. Payal is the shortest among all. Who is the third tallest?

A) Shreya
B) Ritu
C) Meena
D) Kajal

Answer: D

Logic / Trick: From the given conditions: Shreya > Meena but Shreya < Ritu. -> Ritu > Shreya > Meena. Kajal is shorter than Ritu but taller than Meena. -> Ritu > Kajal > Meena. Payal is the shortest. Arranging all: Ritu > Shreya > Kajal > Meena > Payal. The third tallest person is Kajal.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q9. In a row of students, Raj is 15th from the left end and 12th from the right end. How many students are there in the row?

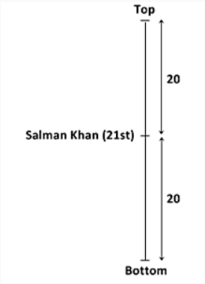

A) 26
B) 28
C) 25
D) 30

Answer: A

Logic / Trick: Total students in the row = (Position from Left) + (Position from Right) - 1 = 15 + 12 - 1 = 26

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q10. During assembly the students are standing in a line. Salman Khan is 21st in order from both the ends. How many boys are there in the class?

A) 30
B) 40
C) 31
D) 41

Answer: D

Logic / Trick: Therefore, total number of students = 20 + Salman Khan + 20 = 41

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q11. In a row of 45 students, Aditi is ranked 18th from the left. Priya is 24th from the right. If there are 5 students between Aditi and Priya, how many students are there in the row?

A) 45
B) 47
C) 50
D) 53

Answer: B

Logic / Trick: Total students in the row = (Aditi's rank from the left) + (Priya's rank from the right) + (Students between them) = 18 + 24 + 5 = 47

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q12. Rahul is heavier than Suresh but lighter than Mohan. Kunal is lighter than Rahul but heavier than Suresh. Deepak is heavier than all except Mohan. Who is the second lightest?

A) Rahul
B) Kunal
C) Suresh
D) Mohan

Answer: B

Logic / Trick: Rahul is heavier than Suresh but lighter than Mohan. -> Mohan > Rahul > Suresh Kunal is lighter than Rahul but heavier than Suresh. -> Mohan > Rahul > Kunal > Suresh Deepak is heavier than all except Mohan. -> Mohan > Deepak > Rahul > Kunal > Suresh Solution: The second lightest is Kunal.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q13. In a north-facing row of 45 students, Neha is 13th from the left, and Priya is 15th from the right. There are 4 students between Priya and Rani, who is equidistant to Neha. What is Rani's position from the right?

A) 25
B) 20
C) 30
D) 32

Answer: B

Logic / Trick: Priya's position from the left = 45-15+1=31. Rani's position from the left (5 places ahead of Priya) = 31-5=26. Check equidistance: ■26-13■=13 (same as Neha's position). Rani's position from the right = 45-26+1=20.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q14. Five students--Amit, Bhavesh, Chetan, Dinesh, and Esha--took an exam. Amit scored higher than Chetan but lower than Bhavesh. Dinesh scored more than Amit but less than Esha. Esha scored the highest. Who got the second highest marks?

A) Dinesh
B) Chetan
C) Amit
D) Esha

Answer: A

Logic / Trick: From the given conditions: Amit > Chetan, but Amit < Bhavesh. -> Bhavesh > Amit > Chetan. Dinesh > Amit but Dinesh < Esha. -> Esha > Dinesh > Amit. Esha scored the highest. Final order: Esha > Dinesh > Bhavesh > Amit > Chetan. The second highest scorer is Dinesh.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q15. In a class of 50 students, Priya ranks 14th from the top. What is her rank from the bottom?

A) 35
B) 37
C) 40
D) 45

Answer: B

Logic / Trick: Rank from the bottom = Total students - Rank from the top + 1 = 50 - 14 + 1 = 37

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q16. If the rank of Rohan is 7th from the top in a group of 50 candidates and 2 new candidates are added just before and after him, what will be his new rank from bottom?

A) 44
B) 45
C) 46
D) 48

Answer: C

Logic / Trick: Adding of candidates just before Rohan will not change his rank from bottom. Before addition, the rank of Rohan from bottom is = (50 - 7) + 1 = 44 Now adding 2 candidates just after Rohan will increase his rank by 2 positions. Hence; the new rank of Rohan from bottom will be = 44 + 2 = 46

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q17. Neha is heavier than Rina but lighter than Simran. Aisha is lighter than Neha but heavier than Rina. Jaya is heavier than all except Simran. Who is the third heaviest?

A) Rina
B) Simran
C) Neha
D) Jaya

Answer: C

Logic / Trick: From the given conditions: Neha > Rina, but Neha < Simran -> Simran > Neha > Rina. Aisha is lighter than Neha but heavier than Rina -> Simran > Neha > Aisha > Rina. Jaya is heavier than all except Simran -> Simran > Jaya > Neha > Aisha > Rina. The third heaviest person is Neha.

Score	Person	Runs
Highest	Rajat	
	Karan	78
	Anant	
	Sumer	
	Parth/Gaurav	
Lowest	Gaurav/Parth	

Q18. Six persons - Sumer, Anant, Parth, Rajat, Karan and Gaurav, played in a cricket match and scored different number of runs. Sumer scored more runs than only Parth and Gaurav. Anant scored less runs than Karan, who was not highest scorer. The Second highest person scored 78 runs. How many person(s) scored more runs than Parth?

A) 1
B) 2
C) 3
D) More than 3

Answer: D

Logic / Trick: Following the final solution we can say that either 4 or 5 persons scored more runs than Parth.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q19. In a line of 60 people, Sam is ranked 21st from the top. How many people are ahead of him and how many are behind him?

A) 20, 39
B) 20,40
C) 22,39
D) 22,40

Answer: A

Logic / Trick: People ahead of Sam = Sam's rank - 1 = 21 - 1 = 20 People behind Sam = Total - Sam's rank = 60 - 21 = 39

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q20. In a nursery, I saw a group of small rose trees arranged in a row. However, one rose tree caught my attention very much. I started counting its rank from the left hand side and found out to be 12. When I started counting from right hand side, it was again 12!! What is the total number of rose trees that were arranged in that row?

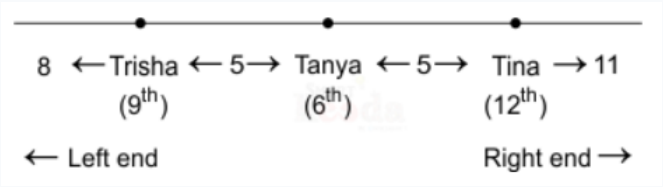

A) 21
B) 25
C) 32
D) 23

Answer: D

Logic / Trick: As the rank of the tree is same from either side, the total number of trees will be 12 + 12 - 1 = 23

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q21. In a north facing row of NCC Cadets, Trisha is 9th from the left end and Tina is 12th from the right end. There are 5 cadets between Trisha and Tanya who is equidstant to Tina. Find how many cadets are there in the row?

A) 34
B) 31
C) 32
D) 33

Answer: C

Logic / Trick: Adding all the persons in the above image, we get: 8 + 1(Trisha) + 5 + 1(Tanya) + 5 + 1(Tina) + 11 = 32 Thus there are 32 cadets in the row.

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q22. In a north-facing row of students, Ajay is 18th from the left and Vijay is 22nd from the right. If there are 10 students between them, find the total number of students in the row.

A) 40
B) 45
C) 50
D) 55

Answer: C

Logic / Trick: Total students = Ajay's position from left + Vijay's position from right + students between them = 18 + 22 + 10 = 50

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q23. Aman is standing in a queue at the 10th position from the front. If he is 15th from the back, how many people are in the queue?

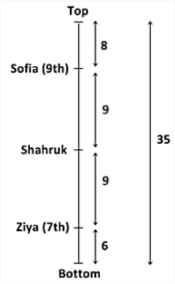

A) 30
B) 75
C) 50
D) 24

Answer: D

Logic / Trick: Total people in the queue = (Position from Front) + (Position from Back) - 1 = 10 + 15 - 1 = 24

[OnlineStudy4U Ranking Test]

Directions: *Order & Ranking Assessment: Determine absolute or relative ranks in linear queues.*

Q24. In a class of 35 students, Ziya is placed 7th from the bottom where as Sofia is placed 9th from the top. Shahruk is placed in between the two. What is Ziya's position from Shahruk?

A) 10
B) 15
C) 19
D) 21

Answer: A

Logic / Trick: As seen in the figure, Shahruk is between Sofia and Ziya. It's given that Ziya is 7th from the bottom and Sofia is 9th from the top. Therefore, number of persons between Sofia and Ziya = 35-(9+7) = 19 Sharuk's position between Sofia and Ziya = 19-1/2 = 10. Hence, Shahruk is at the middle ie. at 10th position from both. Ziya, therefore, is at the 10th position from Shahruk
